U.S. COIN AUCTION

OCTOBER 11-12 & 14, 2018 | CHICAGO

3256

Heritage Signature® Auction #1280

U.S. Coins

October 11-12 & 14, 2018 | Chicago

FLOOR Signature® Sessions 1-3

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Heritage Auctions, Chicago
215 W. Ohio • Chicago, IL 60654

Session 1-PREMIER

Thursday, October 11 • 6:00 PM CT • Lots 3001–3268

Session 2

Friday, October 12 • 1:00 PM CT • Lots 3269-3657

Session 3

Friday, October 12 • 6:00 PM CT • Lots 3658-4192

INTERNET Signature® Session 4

(HERITAGELive!®, Internet, Fax, & Mail only Session)

Session 4

Sunday, October 14 • 3:00 PM CT • Lots 7001-8190

LOT SETTLEMENT AND PICK-UP

Friday, October 12 • 10:00 AM – 1:00 PM CT

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

Buyer's Premium Per Lot:

This auction is subject to a Buyer's Premium of 20% on the first \$250,000 (minimum \$19), plus 20% of any amount between \$250,000 and \$2,500,000, plus 12% of any amount over \$2,500,000 per lot.

Dear Bidder,

An impressive gathering of Territorial gold pieces and scarce California gold ingots highlight the October Heritage U.S. Coins event, presented in our Chicago office at 215 West Ohio Street (located in the vibrant River North area, near downtown Chicago and the Magic Mile). We would like to take a moment to welcome our many Midwest clients to the auction, and invite them to participate with other bidders worldwide in the first full-fledged U.S. Coins auction held at our full-service Chicago office.

The Premier Session literally glitters with gold, headlined by **The Marcello Collection**. A spectacular Kellogg fifty is the collection centerpiece – the “king” of Territorial gold coins – graded PR63 NGC. It is the third-finest of just 14 Kellogg fifties traced in our roster of known examples. An 1851 Lettered Edge Humbert octagonal fifty dollar gold piece is nearly as impressive and noteworthy. This Select Uncirculated coin is the Kagin-4 variety, certified MS63 ★ NGC, with reflective – almost prooflike – surfaces. There really is no comparable specimen of the variety, since no other coin is certified finer than MS62 by either service.

A selection of large, gold ingots rivals that of any Heritage auction in recent memory. It includes ...

- A large Henry Hentsch gold ingot weighs in at 83.54 ounces, one of just 33 Hentsch ingots recovered from the *S.S. Central America*. Made from 849 fine gold.
- A Kellogg & Humbert large-size gold ingot, 61.89 ounces, 905 fine gold.
- A scarce Harris Marchand & Co. gold ingot, 56.65 ounces, 846 fine gold.
- A Kellogg & Humbert gold ingot 48.30 ounces, 840 fine gold.
- Another Kellogg & Humbert gold ingot 40.64 ounces, 925 fine gold.

Many rare silver and gold issues add variety and depth to Thursday evening's Premier Session:

- One of the two finest-known 1864-S ten dollar gold pieces – graded AU55 NGC – appears as lot 3179. We last sold an 1864-S earlier this year as part of the Admiral Collection, which brought \$114,000 in XF40 PCGS condition. How high will this Choice About Uncirculated piece go, a full 15 points finer, with none grader higher?
- A stunning near-Gem 1854 Liberty Head double eagle makes an appearance – the much scarcer Large Date type – graded MS64 NGC, where it is tied for finest-known.
- A challenging 1873-CC Arrows quarter certified AU55 NGC will cross the block, the only Carson City quarter of the With Arrows type, and a rare Condition Census example.

- A 1794 Flowing Hair silver dollar, VF Details, is always in demand as our nation's first silver dollar.
- A rare 1849 PR64 PCGS Seated Liberty half dollar is one of only six pieces traced, Ex: Garrett.

Medal specialists will not want to miss a small offering of rare, high-grade medals in Floor Session 3 on Friday evening. Several of the medals have extremely low mintages, with numerous finest-known or near-finest examples. A Greenslet-119 Franklin Bicentennial Medal is the rare Plain Edge variety, designed by brothers Augustus and Louis Saint-Gaudens.

In all, more than 2,300 lots make up this Chicago event, which is loaded with early silver type coins and numerous key gold issues. Those who wish to attend the auction in person will find our Chicago staff knowledgeable and accommodating, while the location could hardly be more convenient to all the great sights and sounds of Chicago.

We look forward to personally greeting you and showing off our Windy City office! Remote bidders are equally welcome to participate in real time by computer, mobile device, or telephone. Heritage's real-time bidding platform continues to win awards, and it is second-to-none in the auction industry. We are always happy to accept your bids via e-mail, fax, or regular mail before the auction, and to answer any questions you may have.

Good luck with your bids, and please accept our sincere thanks for your participation. In person or online, join us in Chicago for what promises to be a great auction experience!

Sincerely,

Greg Rohan
President

Todd Imhof
Executive Vice-President

HERITAGE
AUCTIONS

SESSION ONE

COLONIALS

1652 Oak Tree Shilling, Choice XF
IN at Left, Noe-1

- 3001** 1652 Oak Tree Shilling, IN at Left, XF45 PCGS. Noe-1, W-430, Salmon 1-A, R.3. 70.4 gn. Medium steel-gray toning dominates, though glimpses of pearl-white are also present. The strike is generally good, with moderate weakness on the central obverse and a few right-side letters. Mint-made clips affect the tops of MASAT. Close inspection reveals a few unobtrusive marks; the most relevant west of the X in XII. The Oak Tree coinage was less crude than the preceding New England and Willow types from the nascent Boston Mint. Listed on page 51 of the 2019 *Guide Book*. NGC ID# 36MK, PCGS# 45361 Base PCGS# 20

1652 Pine Tree Shilling, XF40
Large Planchet, Noe-8

- 3002** 1652 Pine Tree Shilling, Large Planchet XF40 PCGS. Noe-8, W-740, Salmon 7-E, R.4. 69.6 gn. A charming silver-gray example of the classic Colonial type. The rocker press imparted waves evident near the top and base of the tree; these cause small areas of uneven wear west of the tree roots and above the date. The peripheral legends are nearly complete with only the tops of HVS off the flan. Listed on page 51 of the 2019 *Guide Book*. NGC ID# BFMC, PCGS# 23

(1659) Lord Baltimore Sixpence, XF45
Small Bust, Hodder 2-C

- 3003** (1659) Lord Baltimore Sixpence XF45 PCGS. Hodder 2-C, W-1060, R.5. Die alignment: 180°. Small Bust. No stop after MVLTIPPLICAMINI. The obverse shows light circulation, mostly observable over the high points of Cecil Calvert's hair. The strike is uneven, with the initial letters of MARLÆ faint and the features of Calvert's face soft. The reverse is generally bold, though with similar incompleteness of strike found toward the left center of the coin, with the V of the denomination being weak. An old scratch extends from the left of the crown to the rim. Both sides are pleasing silver-gray, with slightly darker toning in some of the protected areas of the legends and devices. Well-centered for the issue. There are traces of a misplaced M punched between the C and A of MVLTIPPLICAMINI, a diagnostic for this die. A fine selection for the advanced Early American type set. Listed on page 52 of the 2019 *Guide Book*. NGC ID# 2U3K, PCGS# 33

HALF CENTS

1793 C-3 Half Cent, Fine 12
Problem-Free Surfaces

- 3004 1793 C-3, B-3, R.3, Fine 12 PCGS. The legends and berries are nicely defined on this minimally abraded chocolate-brown representative. One small spot is noted on upper left corner of the E in STATES, and a minor, narrow lamination traverses through the shoulder curls. The 1793 is a single-year type struck during the first year of coinage at the U.S. Mint. Our EAC grade VG8. NGC ID# 2222, PCGS# 35009 Base PCGS# 1000

1793 C-4, B-4 Half Cent, VG8
Final Variety of the Issue

- 3005 1793 C-4, B-4, Low R.3, VG8 PCGS. Roger Cohen and Walter Breen agreed that the C-4, B-4 die combination was the final half cent variety struck in 1793. Although exhibiting microscopic corrosion, this medium chestnut brown example has a pleasing look with its faint blue overtones. Our EAC grade Good 5. NGC ID# 2222, PCGS# 35012 Base PCGS# 1000

PROOF CLASSIC HEAD HALF CENT

1833 Half Cent, PR65 Red and Brown
C-1, B-1, Only Dies for the Issue

- 3006 1833 PR65 Red and Brown PCGS. CAC. C-1, B-1, R.5 as a proof. The number of proof half cents struck in 1833 is unknown, as no detailed records of proof strikings were kept in that era, but the production total was certainly small. PCGS CoinFacts estimates the surviving population at 30-40 examples in all grades today, and specimens in PR65 condition, with Red and Brown surfaces, are very rare. This delightful Gem exhibits razor-sharp definition on all design elements and an interesting die crack travels from star 2 through star 7, and into the field beyond. Despite the lengthy die crack, this coin is from an early state of the dies, without the reverse clash marks inside the wreath noted for Manley Die State 1. The virtually pristine surfaces show an attractive mix of original red and magenta toning, with a few hints of olive and lilac in selected areas. A single inconspicuous carbon spot above E in UNITED acts as a pedigree marker. Our EAC grade PR63. Population: 3 in 65 Red and Brown (1 in 65+), 2 finer. CAC: 2 in 65, 0 finer (9/18). NGC ID# 2239, PCGS# 1199

LARGE CENTS

1793 S-8, B-13 Cent, VF30
Vine and Bars Edge

- 3007** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3, VF30 PCGS. The horizontal stem identifies the obverse, and a triangle-shaped bow identifies the reverse. Sheldon-8 is scarcer than the S-9 variety usually paired with the 'horizontal stem' obverse. Offered here is well balanced violet-brown example that is notable for its lack of often-seen granularity. Normal softness on ON and CEN within the wreath. Our EAC grade Fine 15. NGC ID# 223H, PCGS# 35456 Base PCGS# 1347

1794 S-47 Cent, VF30
Tied for Seventh Finest Known

- 3008** 1794 Head of 1794, S-47, B-39, R.4, VF30 PCGS Secure. Ex: Christensen-Reynolds-Boka Collections. Die State II: A faint die crack joins the rim to the wreath just left of the first A in AMERICA. Other die cracks on this reverse die are difficult to see. Die state evidence suggests that all examples of S-47 were coined between the earliest two die states of S-48. Both sides of this pleasing cent exhibit olive, chestnut, and steel toning. The surfaces exhibit numerous trivial handling marks, and a diagonal planchet lamination is evident in the left obverse field.

S-47 is a scarce variety, overshadowed by its famous neighbor, the S-48 Starred Reverse. Perhaps 150 examples of S-47 survive, almost all in low grades. The ANS has the finest known that Del Bland grades XF45. Second finest is just VF30. Del Bland grades this example VF20, and tied for seventh finest known. Our EAC grade VF25.

Ex: Henry Christensen (*New Jersey Mail Bid Sale*, c. 1971); Roger Burdette (*The Old Colony Collection*, *American Numismatic Rarities*, 12/2005), lot 210; Thomas D. Reynolds (12/12/2005); Jon Alan Boka; Long Beach Signature (*Heritage*, 9/2016), lot 5332, where it realized \$5,875. NGC ID# 223P, PCGS# 35606 Base PCGS# 901374

1810 Classic Cent, AU58
S-285, B-2, Problem-Free Surfaces

- 3009** 1810 S-285, B-2, R.2, AU58 PCGS. Breen Die State III. A die crack travels through the last two numerals in the date and the stars on the right, and strong clash marks show inside the wreath on the reverse, identifying a fairly late die state of this popular type issue. Only a trace of wear shows on the well-detailed design elements, but heavy die deterioration is evident at the tops of the letters in STATES, which blur into the field. The glossy chocolate-brown surfaces show only minor signs of contact. Our EAC grade AU50. Population: 7 in 58, 15 finer (8/18). NGC ID# 224S, PCGS# 36484 Base PCGS# 1549

1811 S-287, B-1 Cent, AU55

- 3010** 1811 S-287, B-1, R.2, AU55 PCGS. Numismatic tradition dictates that overdates (such as the 1811/0 cent) are listed before normal date varieties in the standard references. However, that does not always mean they were struck first. Walter Breen reported that "evidence suggests that the normal date came first." Because the obverse and reverse dies were unique to this die marriage, true emission placement relies on other factors. Breen placed the overdate second because its reverse die was reused in 1812. Aside from trivial patches of corrosion, this is a lovely example with pleasing chocolate-brown surfaces, hints of bluish overtones, and wisps of light tan, faded from original mint red. Our EAC grade XF45. NGC ID# 224U, PCGS# 36496 Base PCGS# 1555

FLYING EAGLE CENT

1858 Flying Eagle Cent, MS66
Large Letters

- 3011** 1858 Large Letters MS66 NGC. High Leaves Reverse. Closed E in ONE. The final-year Flying Eagle cent was widely produced (24.6 million coins), but that did not guarantee the issue's collectibility in this grade. Rather, Premium Gems are scarce, and finer coins are virtually unseen. The obverse is razor-sharp and so is the reverse, except the inner leaves have been lapped. A wisp of copper toning through the wing is the only interruption of the pumpkin-gold color that dominates each side. Census: 4 in 66, 0 finer (9/18). NGC ID# 2277, PCGS# 2019

PROOF FLYING EAGLE CENT

1856 Flying Eagle Cent, Fine 12
Collector-Grade Snow-9 Example

- 3012** 1856 Snow-9 Fine 12 PCGS. Snow-9 is believed to have been coined during the period between late 1857 and 1860, as restrikes that were to be sold to collectors. PCGS usually attributes Snow-9 as a proof variety, but the present coin, housed in an older pale blue label holder with moderate wear, is graded Fine 12. Circulated examples of Snow-9 make up a significant portion of the survivorship. This piece is particularly worn, although the major elements of the eagle and wreath designs remain clear. The surfaces have olive-tan and russet patina with old contact marks long smoothed over by circulation. A vertical pinscratch on the obverse that runs from the lower rim into the eagle's breast serves as a useful pedigree marker.

Ex: *Central States Signature* (Heritage, 4/2008), lot 105, which realized \$7,475. NGC ID# 227A, PCGS# 147890 Base PCGS# 2037

INDIAN CENT

1877 Cent, MS65 Red and Brown
Seldom-Seen This Fine

- 3013** 1877 MS65 Red and Brown ANACS. Most collectors would be content with an example of the famed 1877 Indian Head cent in circulated condition. For those for whom quality is paramount, here is a lovely Gem with considerable Mint Red color that melds with areas of mellow golden-brown. Luster is frosty and vibrant, and there are only a few minor carbon spots and grazes on the obverse. Housed in a small-sized holder. NGC ID# 2284, PCGS# 2128

PROOF INDIAN CENT

1877 Cent, PR65 Red
Profound Color, Moderate Contrast

- 3014** 1877 PR65 Red PCGS Secure. High-grade proof representatives serve as more collectible alternatives to their famous circulation-strike counterparts. This PR65 Red example boasts profound copper-orange color and obvious field-device contrast on the reverse, though the effect is slightly more subdued on the obverse, thus preventing a Cameo designation. From a mintage of 1,500 or so pieces. Population: 25 in 65 (1 in 65+) Red, 13 finer (9/18). NGC ID# 229W, PCGS# 2320

LINCOLN CENT

1922 No D Cent, AU58
Strong Reverse, FS-401

- 3015** 1922 No D, Strong Reverse, FS-401, AU58 PCGS. CAC. Die Pair 2. This desirable chocolate-brown borderline-Uncirculated example displays traces of steel-blue toning on the reverse when rotated beneath a light. Partly lustrous and essentially unabraded with minor friction on Lincoln's jaw and cheekbone. Far finer than the average example most collectors will encounter. Ex: *FUN Signature* (Heritage, 1/2009), lot 484, where it realized \$11,500.00. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

PROOF LINCOLN CENTS

1915 Cent, PR66+ Red and Brown
Scarce This Fine

- 3016** 1915 PR66+ Red and Brown PCGS Secure. CAC. Only 1,150 proof Lincoln cents were struck in 1915. Premium Gem survivors are scarce regardless of color designation, and finer pieces are rare. This Plus-designated Red and Brown coin displays razor-sharp detail and broad, squared rims. Deep copper-red luster merges with burgundy-brown toning in the margins. Population: 29 in 66 (6 in 66+) Red and Brown, 4 finer; 8 in 66 (1 in 66+) Red, 2 finer (9/18). NGC ID# 22KY, PCGS# 3322

1954 Cent, PR68 Red Deep Cameo
Tied for Finest at PCGS

- 3017** 1954 PR68 Red Deep Cameo PCGS. Of the 233,300 proof cents struck in 1954, only a dozen examples have been certified at this grade level at both services combined, and that total may include resubmissions. This mirrorlike Superb Gem features deep copper-orange color and eye-catching contrast. Housed in a green label holder. Population: 6 in 68 Deep Cameo, 0 finer (9/18). NGC ID# 22LE, PCGS# 93371

THREE CENT SILVER

1854 Three Cent Silver, MS66
Toned and Satiny Condition Rarity

- 3018** 1854 MS66 PCGS Secure. This inaugural year of the Type Two design claims a relatively small mintage of 617,000 pieces, making this one of the scarcer issues with the double shield border. The obverse of the present coin is well-defined, while the reverse shows a hint of softness on the olive leaves. Both sides are toned in delicate lavender and golden-gray hues. The 1854 is rarely offered in MS66, and only a few finer pieces are known. Population: 16 in 66 (1 in 66+), 2 finer (8/18). NGC ID# 22Z3, PCGS# 3670

BUFFALO NICKELS

1913-S Type Two Nickel, MS67
None Finer, Low-Mintage Key

- 3019** 1913-S Type Two MS67 NGC. One of the lowest mintages in the series was accomplished during the latter half of 1913 at the San Francisco Mint. Only 1.2 million of these 1913-S Type Two nickels were struck. Comparable Superb Gems are rare and unsurpassed. Central definition is crisp, and there is only a hint of softness on a few of the peripheral letters. Golden tones grace lightly frosted surfaces. Census: 5 in 67 (1 in 67 ★), 0 finer (9/18). NGC ID# 22R3, PCGS# 3923

1920-S Nickel, Luminous MS65
A Rarity in This Condition

- 3020** 1920-S MS65 ANACS. The 1920-S Buffalo nickel is a rarity in Gem condition, and only a few higher-grade representatives are known. Strike softness is a particular problem on this issue, keeping many pieces out of the MS65 grade category, where sharpness becomes a consideration. This coin is a trifle weak in the centers but is better struck than the average example of the date. Moderate die erosion in the fields does not appear to affect the central devices. Both sides display frosty luster and blended mint-green and yellow-gold toning. Wisps of lavender and ice-blue appear throughout. NGC ID# 22RS, PCGS# 3946

1921-S Nickel, Delicately Toned MS65
Green CAC Sticker, Green Label Holder

- 3021** 1921-S MS65 PCGS. CAC. The luminous satin surfaces of this Gem 1921-S Buffalo nickel are devoid of abrasions. Warm golden toning graces each side, adding to the eye appeal. The obverse is remarkably sharp in the center despite minor die erosion in the fields. Die wear on the reverse is more advanced, and the bison's head and shoulder exhibit softened definition. An eye-appealing example of the date in a conditionally scarce grade. Few finer pieces are known. CAC-approved in a green label holder. Population: 81 in 65 (7 in 65+), 9 finer. CAC: 12 in 65, 2 finer (8/18). NGC ID# 22RU, PCGS# 3948

EARLY HALF DIMES

1795 Flowing Hair Half Dime, AU55
V-5, LM-8, Rich Colorful Toning

- 3022** 1795 V-5, LM-8, R.3, AU55 PCGS. The surfaces appear olive-gray at first glance, but when tilted beneath a light at just the right angle, lovely violet and gold undertones glow from partially reflective fields. There is no distinct wear, although the lower-left obverse and left-hand reverse are weakly struck where planchet adjustment marks angle across the eagle from the border. The surfaces are void of any post-minting problems or significant marks, and Liberty's upper hair strands are individually sharp. Ex: *Central States Signature* (Heritage, 4/2017), lot 3088. NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

1801 Half Dime, VF35
V-2, LM-2, Early Die State

- 3023** 1801 V-1 and V-2, LM-2, R.4, VF35 PCGS Secure. A relatively early die stage of the elusive 1801 half dime, which is scarce-to-rare in all grades. Struck from clashed dies, this LM-2 example lacks the severe die damage of later strikes. All of the motifs are well-defined to account for the Choice VF grade. L and I in LIBERTY are more distant than the LM-1 or LM-3 variants, and stars 1-3 are close together to confirm the LM-2 designation. Blue toning occupies the high points, while golden-gray patina graces the fields. The slightly uneven strike is expected on any 1801 half dime. This is an important opportunity for the Draped Bust half dime specialist looking for a solid mid-grade representative of the challenging 1801 date. Population: 4 in 35, 23 finer (9/18). NGC ID# 2327, PCGS# 38606 Base PCGS# 4267

BUST HALF DIMES

1829 Half Dime, Semiprooflike MS67 ★
Rare V-11, LM-9 Variety, Likely Finest Known

- 3024** 1829 V-11, LM-9, R.5, MS67 ★ NGC. LM-9 is rare in this condition, and the present piece is almost certainly the finest known. It is also among the few finest 1829 half dimes across all die varieties. Struck from an early die state, the fields retain substantial reflectivity, which complements the frosted luster of the devices. Neither side is toned in the least. Trivial strike weakness is seen only on the central-most hair curls of Liberty's neck and the inner part of the eagle's left (facing) wing, which is typical of the Capped Bust type. Abrasions are virtually nonexistent. This is an incredibly rare opportunity to acquire not only one of the finest 1829 half dimes known, but also likely the finest example of a rare die variety. Census: 6 in 67 (1 in 67 ★), 0 finer (9/18).
Ex: Summer FUN Signature (Heritage, 7/2010), lot 3432, which realized \$8,625. PCGS# 38624 Base PCGS# 4276

1833 Half Dime, V-7, LM-1
Dynamic, Multicolor MS67 ★

- 3025** 1833 V-7, LM-1, R.3, MS67 ★ NGC. Dramatic navy-blue, fire-red, and orange patina endows this lustrous and needle-sharp Superb Gem. Neither side displays any indication of contact. A small spur on the lower right corner of the U in UNITED helps identify this collectible variety. Dynamic eye appeal, tied for finest-known of the LM-1 variety. Census: 14 in 67 (2 in 67 ★), 0 finer (9/18).
Ex: Boston ANA Signature (Heritage, 8/2010), lot 4355, which realized \$7,762.50. NGC ID# 232F, PCGS# 38686 Base PCGS# 4280

SEATED HALF DIMES

1837 No Stars Half Dime, MS66+
Large Date, Exquisite First-Year Type

- 3026** 1837 No Stars, Large Date (Curl Top 1) MS66+ PCGS Secure. CAC. Two major varieties exist for the first-year Seated half dime, one with a Large Date, Curl Top 1, and a Script 8, and the other with a Small Date, Flat Top 1, and a Block 8. This is the slightly more often-seen variant. Olive-gold, peach-orange, red-violet, and blue patina delicately paints each side of this exquisite Premium Gem. Liberty and the reverse wreath are fully defined, while marks are practically unseen. Population: 34 in 66 (3 in 66+), 6 finer. CAC: 16 in 66, 7 finer (9/18). NGC ID# 232M, PCGS# 4311

1838-O No Stars Half Dime, MS64+
Conditional Rarity, Splendidly Toned
Ex: Reed Hawn-Eugene Gardner

3027 1838-O No Stars MS64+ PCGS. CAC. V-1. Ex: Reed Hawn. Lively luster invigorates both sides of this splendidly toned, high-end near-Gem, showing copper-gold patina accented by ice-blue at the rims on both sides. The surfaces are boldly die clashed throughout. The clashed E of DIME is plain beneath Liberty's right elbow. Numerous die cracks run upward from the left side of Liberty toward the rim in the upper-left obverse field. On the reverse, one barely perceptible die crack runs upward from the bow to meet the mintmark bottom; a second is more easily seen, running horizontally from the left-inside wreath leaves to the top-left ribbon to the mintmark and onward to meet clash marks inside the right wreath.

This piece is among four Mint State examples of the rare 1838-O No Stars that figured in the Gardner Collection, the finest of which was the single-finest MS66 example.

Ex: Reed Hawn Collection (*Stack's*, 8/1973), lot 584; Fraser, Erwin Sale (*Stack's*, 3/1978), lot 1019; New York Connoisseur's Collection (*American Numismatic Rarities*, 3/2006), lot 492; Eugene H. Gardner Collection, Part IV (*Heritage*, 10/2015), lot 98115; our current consignor. NGC ID# 232N, PCGS# 4314

1854-O Arrows Half Dime, MS66 A Rarity at This Grade Level

- 3028 1854-O Arrows MS66 NGC.** Unlike its Philadelphia counterpart, the 1854-O Arrows half dime is a rarity in MS65 and seldom seen finer. At this level, the issue becomes a major challenge to locate. This Gem is sharply struck from clashed dies, showing frosty luster and light golden toning. Mint-made die lines intertwine across Liberty's figure. Census: 5 in 66 (1 in 66+), 2 finer (9/18). NGC ID# 2343, PCGS# 4359

PROOF SEATED HALF DIME

1863 Seated Half Dime, PR68 Finest-Certified Example

- 3029 1863 PR68 NGC.** This delightful specimen is the finest certified survivor from a tiny proof mintage of 460 pieces. Spectacular rings of cobalt-blue toning surround deep emerald-green centers, with deeply mirrored fields underneath. The design elements display razor-sharp definition and the surfaces are immaculately preserved. Census: 1 in 68, 0 finer (9/18). NGC ID# 235Y, PCGS# 4446

PROOF SEATED DIME

1863 Dime, Original PR67 Lowest Proof Mintage in the Series

- 3030 1863 PR67 NGC.** One of only 460 proofs, the 1863 date has the lowest proof mintage of all Legend Obverse dimes. Few specimens have apparently survived at the grade level of the piece offered here. NGC has certified only four other PR67 coins, and two pieces grade higher; PCGS has seen no 1863 Proofs above the PR66 level (9/18). The present coin is sharply struck, with golden-gray centers accented by cobalt-blue and lilac colors around the peripheries, especially on the obverse. The frosted design elements are sharply struck throughout, and offer significant contrast against the deeply mirrored fields. The surfaces show no mentionable marks. NGC ID# 23BS, PCGS# 4756

PROOF BARBER DIME

1895 Dime, Top-Graded PR68 Extraordinary Color and Appeal

- 3031 1895 PR68 NGC.** A handful of 1895 proof dimes are certified at this level, all at NGC, but the total is inflated by multiple resubmissions. This Superb Gem features distinguishing rose, violet, blue, and peach-gold toning that appears over flashy, contact-free fields. An extraordinary, Registry-grade example. Census: 10 in 68 (2 in 68+, 1 in 68 ★), 0 finer in non-Cameo (9/18). NGC ID# 23G8, PCGS# 4879

MERCURY DIMES

1916-D Mercury Dime, XF40 Appealing for the Grade, CAC Endorsed

- 3032 1916-D XF40 PCGS Secure. CAC.** The low 264,000-piece mintage did not resonate immediately with all collectors, many of whom had more important things on their mind with World War I looming. Later, the Great Depression and eventually World War II took priority while many 1916-D dimes continued to circulate. Some pieces were put aside in the 1930s and 1940s, accounting for most examples that now grade VG to XF. Other 1916-D dimes in lesser grades were not removed from circulation until the 1950s or 1960s. This is a smoothly worn XF example that was well-preserved despite a considerable time in commerce. Original silver-gray toning provides an attractive, natural appearance, while the reverse is particularly sharp for the grade. CAC endorsement adds to the coin's considerable appeal. NGC ID# 23GY, PCGS# 4906

1921-D Mercury Dime, MS65 Full Bands

- 3033 1921-D MS65 Full Bands PCGS Secure.** The 1921-D Mercury dime claims a small mintage of just over 1 million pieces and the issue is seldom encountered in high grade, with the Full Bands designation. This spectacular Gem boasts Full Bands definition on the fasces, and the lustrous surfaces are free of mentionable distractions. Dappled shades of magenta and golden-tan toning add to the considerable eye appeal. Population: 68 in 65 (2 in 65+) Full Bands, 28 finer (8/18). NGC ID# 23HF, PCGS# 4937

1927-S Dime, MS66 Full Bands
Among the Finest at CAC

- 3034** 1927-S MS66 Full Bands PCGS Secure. CAC. Like the quarter dollar of this date and mint, the 1927-S Mercury dime is difficult to acquire with a decent strike. Full Bands representatives are scarce overall, and those grading finer than MS65 are decidedly rare. This Premium Gem is among the finest Full Bands coins endorsed by CAC. Just two numerically finer coins are graded by PCGS and NGC combined. Soft, satiny luster illuminates delicate lilac and champagne-gold toning over each side, while the surfaces are devoid of visible contact marks. A small planchet lamination is located on the obverse rim near the I in LIBERTY. Population: 20 in 66 (4 in 66+) Full Bands, 1 finer. CAC: 9 in 66, 0 finer (9/18). NGC ID# 23HW, PCGS# 4965

BUST QUARTER

1831 Small Letters Quarter, MS64
Rare Browning-3 Variety

- 3035** 1831 Small Letters, B-3, R.5, MS64 PCGS. CAC. B-3 is a rare die variety, and it is very rare in Uncirculated grades. The 2008 Tompkins reference lists a Condition Census topped by an unconfirmed MS62 example and a scratched and tooled Uncirculated details specimen. In September 2015, Heritage auctioned an NGC MS65 Prooflike example, and a PCGS MS65 appeared in our March 2013 Signature, but the present well-preserved piece could qualify as the third-finest known for the B-3 marriage. It is fully struck and satiny with dappled tan-brown and gunmetal-blue toning.
Ex: *Central States Signature* (Heritage, 4/2016), lot 3324, which realized \$7,050. NGC ID# 23RW, PCGS# 38982 Base PCGS# 5348

PROOF BUST QUARTER

1831 Capped Bust Quarter, B-5, PR62
Rare Early Proof, Large Letters Reverse

3036 1831 Large Letters PR62 ANACS. B-5, R.7 as a proof. Struck on reduced-diameter planchets in 1831, the Capped Bust design was modified by Chief Engraver William Kneass. Multiple varieties exist for the date, including four Small Letters varieties and three with Large Letters. The change in dimensions and design increase the likelihood of proofs being struck, and Walter Breen suggested 10 specimens were sent to President Andrew Jackson and another 20 proofs were delivered to Treasury Secretary S.D. Ingram, although it is unsure all of those were proofs. Breen thought 8 to 10 proofs were known, while PCGS CoinFacts currently estimates 10 to 15 pieces known.

This example is graded PR62 in an early generation ANACS holder. A faint dappling of golden-tan toning drifts across glassy, reflective surfaces. A dot of deep toning exists between E and S in STATES. Razor-sharp central devices offer stark silver contrast against the lightly toned fields. Struck from Browning-5 dies, the date shows recutting on on all four digits, most visible beneath the flags of each 1. It is worth noting that David Akers believed the only true 1831 proof quarters were of the B-5 variety. NGC ID# 23SB, PCGS# 5378

SEATED QUARTERS

1869 Seated Quarter, MS64
Exceptional Quality and Eye Appeal

3037 1869 MS64 PCGS Secure. CAC. Briggs 1-A. One pair of dies was required to strike 16,000 Seated quarters in 1869. Production was low because silver coinage failed to circulate on the East coast during and after the Civil War. This high-end Choice Uncirculated piece is sharply struck throughout, and the fields have a bright, semiprooflike gleam. Eye appeal is most attractive with golden-brown toning that covers most of each side and cobalt-blue accents around the peripheries. Population: 3 in 64, 3 finer. CAC: 2 in 64, 1 finer (8/18). NGC ID# 23UH, PCGS# 5474

1873-CC Arrows Quarter, AU55
Only CC-Mint Quarter Issue With Arrows
Rare Condition Census Example

3038 1873-CC Arrows AU55 NGC. Briggs 1-A. The 1873-CC Seated Liberty quarter, with Arrows at the date, is a sought-after, low-mintage issue, with an even lower survival rate, especially in high grade. In his excellent series reference, *The Mint on Carson Street*, Rusty Goe estimates the surviving population at a meager 45-60 examples in all grades, a range that agrees well with the current PCGS CoinFacts estimate of 50 pieces extant. The appeal of the 1873-CC Arrows quarter extends far beyond the usual field of date collecting, as it is a must-have issue for branch mint type collectors, as well. Heritage Auctions is privileged to present this attractive Condition Census example, which has been off the market for many years, in this important offering.

Among its other provisions, the Mint Act of February 12, 1873 changed the specifications for subsidiary U.S. silver coins, increasing the weight of the Seated Liberty quarter by a paltry .03 grams. To signify this change in weight, the Mint modified the design of the subsidiary coinage to include arrowheads beside the date part way through the year. The Arrows were removed from the design after 1874. The Carson City Mint struck limited mintages of both designs in 1873, but no quarters were struck in 1874, making the 1873 issue the only With Arrows quarter in the Carson City series.

Only 12,462 Seated Liberty quarters of the Arrows design were struck at the Carson City Mint in 1873, all delivered in June and July. A single die variety has been identified. The obverse die featured the new Open 3 in the date and the reverse was the same die used to strike all 1870-CC, 1871-CC, and 1872-CC quarters, but it was different from the reverse used to strike the 1873-CC No Arrows coins. The Mint had suspended specie payments in 1861, and that policy was still in force in 1873. Rusty Goe reports the branch mints were instructed to only exchange silver coins for gold, or “for change less than one dollar in settlement for gold deposits.” It seems there was little demand for quarters in the regional economy under these conditions, as the Carson City Mint produced only small mintages in the years from 1870 through 1873, and none were struck in 1874. While a number of 1873 Arrows quarters were released into circulation, it seems likely that a significant part of the mintage was stockpiled as unneeded at the time of issue. Records indicate many of the No Arrows coins were melted as uncurrent after July of 1873, and it is possible that some of the stockpiled Arrows coins were also melted at this time.

Of the coins released into circulation, few were saved by contemporary collectors, as there was little interest in collecting branch mint issues before Augustus Heaton published his landmark treatise, *Mintmarks*, in 1893. Heaton recognized the rarity of both the 1873-CC Arrows and No Arrows quarters in his book, noting “Both are exceedingly rare.” The 1873-CC Arrows quarter began appearing at auction at least as early as the W.M. Friesner Collection (Edouard Frossard, 6/1894), lot 831, where the cataloger noted the coin was only in Good condition, but scarce. Most examples seen today are in lower circulated grades, ranging from Poor to Very Fine.

Only two examples are known in Mint State, the MS65 PCGS former Norweb coin and the fabulous MS64 PCGS example from the famous Louis E. Eliasberg/Gene Gardner Collections (the Norweb coin was formerly certified MS65 NGC and that citation still appears in the NGC Census). Below those two coins, three examples in AU55 round out the Condition Census for the issue, two at PCGS and this single example at NGC. This attractive Choice AU specimen exhibits just a touch of wear on the design elements, but the reverse die was showing some deterioration after its three previous uses, and some slight porosity and evidence of rust can be detected on the lower reverse. The lightly abraded surfaces are toned in pleasing shades of lavender-gray and golden-tan toning, with a few traces of original mint luster underneath. This coin will be the capstone of a fine collection of Seated Liberty quarters. Census: 1 in 55, 1 finer (8/18). NGC ID# BZMH, PCGS# 5492

1873-S Arrows Quarter, MS65
Tied for Finest Known at Either Service

3039 1873-S Arrows MS65 NGC. Briggs 2-B. This Gem quarter traces its pedigree back to the Richmond Collection, and then to the Eugene H. Gardner Collection. Mottled champagne-gold, russet, and olive hues embrace surfaces that remain frosty and brilliant beneath the iridescent patina. The left-hand stars are fully detailed, while the upper right-hand stars are typically flat, diagnostic of the variety. The eagle is boldly defined with a touch of softness on the olive leaves. A few small, dark toning spots on the reverse are the simplest pedigree markers, yet the wonderful preservation, distinctive toning, and extraordinary eye appeal are the coin's best identifiers.

Nearly the entire mintage of 156,000 coins entered into the channels of commerce, making the 1873-S rare in all Mint State grades. The issue is the second-rarest Arrows quarter issue after the 1873-CC in high grades. Collectors seeking an example through AU condition should have little difficulty, but for those who demand one of perhaps 25 Uncirculated coins extant, patience is key. This offering is a not-to-be-missed opportunity for series specialists seeking one of the finest-known examples. Census: 2 in 65, 0 finer (9/18). NGC ID# BZMM, PCGS# 5493

1891-O Seated Quarter, MS64
Conditionally Rare New Orleans Issue

3040 1891-O MS64 NGC. CAC. Briggs 1-A. Following the Civil War, the New Orleans Mint did not resume coinage operations under federal control until 1879. It was reopened partly in response to the legislative demands of the Bland-Allison Act of 1878, which called for the coinage of new standard silver dollars in staggering quantities. However, silver dollar coinage in '79 also brought about a near-halt in coinage of quarter dollars for the better part of the 1880s. Only token quantities of the smaller denomination were struck from 1879 to 1888, and all at the Philadelphia Mint. It was not until 1891 that the New Orleans Mint finally resumed quarter dollar coinage, striking 68,000 pieces. The following year, Charles Barber's Liberty Head design debuted, meaning that the 1891-O is the only O-mint Seated Liberty quarter dollar to bear the motto IN GOD WE TRUST.

This issue is a rarity in Mint State, and only a handful of pieces are known finer than the present. This piece displays radiant satin luster and sharp stars. Tinges of deep russet, violet, and golden toning burn the borders along the lower obverse and much of the reverse, but the interiors of both sides are brilliant. Clash marks are visible in the fields, but there are no bothersome abrasions. Census: 3 in 64, 4 finer. CAC: 2 in 64, 1 finer (8/18). NGC ID# 23VS, PCGS# 5525

PROOF SEATED QUARTERS

1875 Quarter, PR67 ★ Cameo
Among the Rarest With Motto Proof Issues
Remarkable Eye Appeal

3041 1875 PR67 ★ Cameo NGC. Briggs Unlisted. This Superb Gem proof displays absolutely remarkable visual and technical quality. The centers maintain their brilliance, surrounded by a medley of violet, ice-blue, and golden-orange toning. Bold contrast and near-flawless preservation characterize the surfaces. The NGC Star designation could scarcely be more appropriate. All stars are sharply struck with full centers. Struck from Type Two dies, where the letters of STATES are distinctly separate and well-spaced, this is a proof die variety unlisted in either in the Briggs reference or Breen's proof encyclopedia. A quick check of our archives suggests not more than one in four 1875 proofs has the Type Two reverse.

A further check of our archives reveals this is the former Eugene Gardner example — not surprisingly so, given its outstanding quality and high-end eye appeal. The blatant contrast between snow-white, frosted devices and the deeply mirrored fields is nothing short of astounding. Clearly, this is a coin for the most advanced specialist and a cornerstone for any fine collection of proof quarters. As the finest-known proof example of the Type Two reverse, it takes on even greater importance. Census (all proof varieties combined): 2 in 67 Cameo (1 in 67 ★, 1 in 67+★), 1 finer (9/18). NGC ID# 23X7, PCGS# 85576

1884 Seated Liberty Quarter, PR67+ Cameo
Vivid Multicolor Toning

3042 1884 PR67+ Cameo NGC. Briggs 2-B. Vivid shades of sea-green, cobalt-blue, plum-red, and tan-brown toning invigorate the borders of this impressive Plus-graded Superb Gem. The flashy surfaces are devoid of detractions and the sharply detailed, frosty design elements contrast boldly with the deeply reflective fields. A meager 875 proofs were produced. Census: 7 in 67 Cameo (1 in 67+, 1 in 67 ★), 4 finer (8/18). NGC ID# AEZK, PCGS# 85585

PROOF BARBER QUARTERS

1897 Barber Quarter, Memorable PR68
Ex: Clapp-Eliasberg-Gardner

Tied Numerically Finest at Both Services

3043 1897 PR68 NGC. Ex: Eliasberg. This impressive coin boasts not only stellar preservation and eye appeal, but also an impressive pedigree of high-profile collections that is traced all the way back to when the coin was purchased from the Mint by the elder John Clapp in late 1897. More recently, the coin graced the collections of Louis E. Eliasberg, Sr. and Eugene H. Gardner. This is an outstanding Superb Gem proof with tack-sharp detail throughout the relief elements and deep, glassy fields that provide modest cameo contrast on the obverse. The central regions show warm champagne-gold toning that deepens to amber, blue, and mint-green around the peripheries.

PCGS shows 2 coins in this grade and 0 finer, plus 3 PR68 Cameo (1 PR68+ Cameo), while NGC lists 6 PR68 examples including 1 PR68+ ★ and 0 finer; 9 PR68 Cameo (5 PR68 ★) and 0 finer; and 3 PR68 Ultra Cameo with 0 finer (9/18).

Ex: Acquired directly from the Mint by J.M. Clapp (11/1897); John H. Clapp; Clapp Estate, to Louis E. Eliasberg, Sr. (1942); Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1561; ANA Sale of the Millennium (Bowers and Merena, 8/2000), lot 1323; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98606; our current consignor. NGC ID# 242C, PCGS# 5683

1911 Quarter, PR68 Cameo
Dramatic Field-Device Contrast
None Finer at PCGS

- 3044** 1911 PR68 Cameo PCGS. CAC. Proof quarter production was limited to 543 pieces in 1911. PCGS has graded 293 submissions in all, including non-Cameo, Cameo, and Deep Cameo proofs. This Superb Gem ranks among the six finest Cameo representatives at that service, and there are only eight pieces that have been awarded a Deep Cameo designation (9/18). These totals almost certainly contain multiple duplications. To be sure, all examples are rare at this level. Brilliant surfaces allow the frosted motifs to stand out dramatically against the reflective, unmarked fields. Every element of the design is fully struck, as expected. NGC ID# 242T, PCGS# 85697

EARLY HALF DOLLARS

1794 Flowing Hair Half Dollar, VF Sharpness
Elusive O-106, T-4 Variety

- 3045** 1794 O-106, T-4, Low R.6 — Scratched — ANACS. VF Details, Net Fine 15. Tompkins Die State 1/1. This border-toned O-106 (T-4) represents the initial use of a workhorse reverse die that coined most all of 1794 half dollars minted. Later appearances include O-101 (T-7), O-107 (T-5), and O-108 (T-6). This example is net graded for a pair of obverse scratches that intersect in front of Liberty's neck. Other light abrasions and wispy hairlines are grade-consistent and do not impair the golden-tan and deep blue toning that enriches both sides.

1795 Half Dollar, VF25
Y Over Star, O-121

- 3046** 1795 2 Leaves, Y Over Star, O-121, T-2, High R.4, VF25 PCGS. The very scarce Y Over Star variety is mentioned in the footnotes of the 2019 *Guide Book* but does not receive a separate listing in the price chart. This is a cream-gray and aquamarine example that boasts ample plumage and hair definition for the grade. Adjustment marks on the lower right obverse border, and clash marks beneath the Liberty's chin, are all of Mint origin. This is a pleasing coin in all respects.
Ex: PNG *Invitational Signature* (Heritage, 2-3/2015), lot 3098, which realized \$4,817.50. NGC ID# 24E7, PCGS# 39256 Base PCGS# 6052

1801 O-101 Half Dollar, XF40
Scarce First Year of Type

- 3047** 1801 O-101, T-2, R.3, XF40 PCGS Secure. Tompkins Die State 3/4. 1801 was the first year of half dollar production since 1797, since silver depositors typically preferred payment in dollars. The 1801 is a better date with only two marriages. Die lumps near the arrows distinguish O-101 from the rarer O-102 alternative. The deep gunmetal-gray surfaces show pleasing definition and are free from detracting marks. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

BUST HALF DOLLARS

1807 O-112 Half Dollar, AU58
50 Over 20, Large Stars

- 3048** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU58 PCGS. The usually encountered Overton marriage from the introductory year of the Capped Bust design. The present borderline Uncirculated example has apple-green, lilac, and golden-brown toning encroaching upon the pearl-gray centers. Nicely struck and only lightly abraded.
Ex: FUN Signature (Heritage, 1/2014), lot 4359, realized \$6,168.75. NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

1807 Capped Bust Half, AU50
Small Stars, O-113

- 3049** 1807 Capped Bust, Small Stars, O-113, R.2, AU50 PCGS. Original steel-gray patina blankets this lightly abraded representative. Both sides exhibit a triple set of clash marks. A good strike overall, though Liberty's neck curls and the eagle's left (facing) shoulder are softly impressed. O-113 and its cracked die state O-113a are the only Small Stars varieties for this first-year Capped Bust date. NGC ID# 24EN, PCGS# 39359 Base PCGS# 6087

1815/2 O-101 Half Dollar, XF40
Sole Variety of the Date

- 3050** 1815/2 O-101, R.2, XF40 NGC. Only one die variety is known for the 1815 half dollar, which shows the 5 in the date punched over a 2. The remnant of the 2 is faint. This XF representative is in the earlier die state — clashed, but not yet crack through the denomination on the reverse. Olive-green, gold, russet, and lilac-gray patina covers each side, complementing well-detailed design elements. The surfaces are smooth and problem-free. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

1815/2 O-101 Half Dollar, XF40
Hints of Luster Remain

- 3051** 1815/2 O-101, R.2, XF40 PCGS. The lone die variety of the 1815 half dollar shows the faint remnants of a 2 in the date from an earlier punch, earning it the overdate moniker. The Mint struck 47,150 pieces. This lightly circulated coin displays mottled gunmetal-blue, russet, and lilac-gray toning over well-detailed devices and satiny fields. Hints of luster remain in the protected regions. NGC ID# 24F5, PCGS# 39491 Base PCGS# 6108

1815/2 O-101 Half Dollar
AU Definition, Key to a Date Set

- 3052** 1815/2 O-101, R.2 — Cleaned — PCGS Genuine. AU Details. The sole 1815-dated die variety. The scant mintage of 47,150 pieces makes the 1815/2 the key to a date set of Capped Bust half dollars. The present slate-gray example exhibits minimal wear, although the right-side borders are incompletely brought up. Thorough inspection reveals vertical hairlines throughout both sides, along with thin marks on the portrait and on the field near the left scroll end.

1834 Capped Bust Half, MS65
Large Date, Small Letters, O-106

- 3053** 1834 Large Date, Small Letters, O-106, R.1, MS65 NGC. Rainbow iridescence is most dramatic at the margins on both sides of this exceptional Large Date, Small Letters half, merging into dusky tan-brown shades at the centers. Protected areas exhibit aquamarine and rose-red hues. The O-106 variety shows the 1 and 4 much taller than the 8 and 3, with the crosslet of a smaller 4 beneath the primary 4 and with recutting on the other digits as well. A set of twin segments in the dentils between stars 6 and 7 confirms the obverse. The M in AMERICA is misshapen, where the left leg is curved and recut, then joined to the center at the base. The strike is mostly sharp although slightly weak at the denomination. Abrasions are virtually nonexistent. Tied for third in the Condition Census according to both Stephen Herrman and the Parsley reference. NGC ID# 24FY, PCGS# 39910 Base PCGS# 6165

REEDED EDGE HALF DOLLAR

1836 GR-1 Reeded Edge Half Dollar
Choice About Uncirculated
First Steam Press Coinage

3054 1836 Reeded Edge, GR-1, R.2, AU55 PCGS. Half dollars were first struck on a steam press in 1836. This was also the first coinage of the reeded edge on this denomination, produced during the striking of the coin by a closed collar. Attractive AU examples of this low-mintage issue are in high demand. Luster illuminates the protected portions of the fields on this piece, complementing warm golden toning overall. The strike is sharp and barely a trace of wear is visible. NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

SEATED HALF DOLLAR

1868-S Seated Half, MS64+
WB-101, High Date Variety, Few Finer

3055 1868-S WB-101, Die Pair 8, R.3, MS64+ PCGS. CAC. Lightly toned with a few splashes of pale-rose and tan patina, this frosted and high-end near-Gem half shows only a few tiny marks under scrutiny with a loupe. CAC endorsement joins the PCGS Plus designation to confirm the excellent eye appeal and surface quality. The central strike is sharp although the peripheries are less crisp, where several stars are rounded. A late stage of the reverse die shows some prominent radial die cracks. Population (all varieties combined): 5 in 64 (2 in 64+), 6 finer. CAC: 4 in 64, 1 finer (9/18). PCGS# 572184 Base PCGS# 6324

PROOF SEATED HALF DOLLARS

1849 Seated Liberty Half Dollar, PR64
Only Six Examples Traced
Ex: Garrett

3056 1849 PR64 PCGS. CAC. WB-101. The 1849 proof Seated Liberty half dollar is a celebrated rarity in the series, with an unknown, but certainly small mintage. Experts are in close agreement on the rarity of the issue today. In their excellent 1993 series reference, Randy Wiley and Bill Bugert speculate that only five examples of the 1849 proof remain extant. The current population data from the leading grading services shows a total of seven pieces certified in all grades, including an unknown number of resubmissions and crossovers (9/18). The six examples known to us are listed in our roster below.

The example we offer in this lot displays colorful cobalt-blue toning, which occurs mostly in the recessed areas, some yellow-gold and lavender around the rim areas, and light reddish-brown patination, mostly in the fields. The design elements are exquisitely struck, with no areas of weakness, and there is a noticeable contrast against the reflective fields. The surfaces are well-preserved, with no significant contact marks or unsightly spots. A small lint mark is located in the field just beneath the cap, and a minuscule contact mark is seen on Liberty's eyebrow, which serve to identify the piece. Population: 2 in 64, 1 finer. CAC: 1 in 64, 1 finer (9/18).

1849 Proof Half Dollar Roster

- 6. PR64 PCGS.** Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1947; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98714; Baltimore Auction (Stack's Bowers, 11/2016), lot 2089; FUN Signature (Heritage, 1/2017), lot 5671.

Additional Appearances

- A. Proof.** Joseph Mickley Collection (W. Elliot Woodward, 10/1867), lot 1719; Lilliendahl.
- B. Proof.** Lorin G. Parmelee Collection (New York Coin & Stamp, 6/1890), lot 1201; possibly George Earle Collection (Henry Chapman, 6/1912), lot 2997. Possibly the same as number 3 above, per Walter Breen.
- C. Proof.** MWWA Convention (Kagin's, 7/1978), lot 622.
- D. Proof.** Capital Collection (Amwest, 7/1981). NGC ID# 27TB, PCGS# 6393

1863 Half Dollar, PR66
Highest Grade at PCGS

- 3057 1863 PR66 PCGS.** The PCGS CoinFacts plate coin. A mere 460 Seated half dollar proofs were struck in 1863. Collecting was not necessarily a priority in the midst of the Civil War. Gold and lavender iridescence glistens when the coin is rotated beneath a light. The fields are flashy and devoid of significant contact. Population: 3 in 66, 0 finer (9/18). NGC ID# 27TP, PCGS# 6417

1865 Seated Liberty Half, PR66
Low-Mintage Proof Issue

- 3058 1865 PR66 PCGS. CAC. WB-101.** As a good number of the Philadelphia Mint's business strike half dollars of 1865 (511,400 pieces) met their fate in the melting pot, this issue is usually represented by one of the extant proof representatives, of which only 500 were minted. This coin is exquisitely struck, with all of the design elements displaying razor-sharp definition. Each side is visited by waves of cerulean-blue and olive-gold patina, through which pronounced reflectivity shows in the fields. The surfaces are virtually pristine, displaying no mentionable contact marks. Outstanding eye appeal is seen throughout on this spectacular Premium Gem. Population: 9 in 66 (1 in 66+), 2 finer. CAC: 5 in 66, 1 finer (9/18). NGC ID# 27TS, PCGS# 6419

1870 Half Dollar, PR66
CAC Approval, Rich Multicolor Toning

- 3059 1870 PR66 PCGS. CAC.** A mintage of 1,000 proof half dollars in 1870 ensured the survival of moderate quantities of the issue for future generations. As with most proof issues in the series, however, the 1870 becomes distinctly scarce at the Premium Gem level, even without Cameo contrast. This representative exhibits rich hues of sun-gold, sea-green, blue, and lavender-gray over each side, while the fields display glassy reflectivity. Population: 4 in 66, 2 finer in non-Cameo. CAC: 3 in 66, 1 finer (9/18).
Ex: New York Signature (Heritage, 10/2014), lot 4772, where it brought \$3,671.88. NGC ID# 27U5, PCGS# 6428

1873 Seated Liberty Half, PR66
No Arrows, Closed 3

- 3060 1873 No Arrows, Closed 3, PR66 PCGS. CAC.** In 1873, before the Mint noticed the 3 in the date more closely resembled an 8 than a 3, 600 proof halves were struck with no arrows on either side of the date. The arrows were added later to designate a slight weight change. The proof half dollars with no arrows were struck early in the year before the 3 was altered. This is a spectacular, deeply mirrored proof that displays reddish-golden patina throughout most of the centers with occasional dabs of deep blue at the margins. Population: 15 in 66 (2 in 66+), 6 finer. CAC: 6 in 66, 2 finer (9/18). NGC ID# 27U8, PCGS# 6431

1876 Seated Half, PR64+ Cameo
Vivid Blue Toning

- 3061 1876 PR64+ Cameo PCGS Secure. CAC.** Cameo examples of the proof 1876 Seated half dollar are scarce. This Plus-designated coin displays sharp detail and softly frosted luster on the devices. Vivid ocean-blue and lilac toning fills the liquidlike fields, accentuating the cameo effect. Few of the Cameo proofs in this grade are CAC endorsed. Population: 17 in 64 (3 in 64+) Cameo, 15 finer; 1 in 64 Deep Cameo, 3 finer. CAC: 6 in 64, 10 finer (9/18). NGC ID# 27UA, PCGS# 86437 Base PCGS# 86437

1884 Half Dollar, PR67
Tied for Finest Non-Cameo Certified
Ex: Kaufman / Gardner

- 3062** 1884 PR67 NGC. CAC. WB-101. Ex: P. Kaufman. The popularity of the 1884 half dollars, with a paltry original mintage of 4,400 business strikes and 875 proofs, is virtually assured among dedicated collectors of Seated coinage. Lest anyone encounter difficulty in distinguishing prooflike business strikes from true proofs, they need only examine the 4 in the date, which on business strikes is lightly repunched.

A stellar representative of this late-series proof delivery, this Superb Gem is originally toned in mottled copper hues that yield to lighter lilac-gray tinting in the central obverse. The reflective finish is readily evident under a light, such angles also revealing dappled lavender and cobalt undertones. The needle-sharp strike is all that one could expect for a proof Seated Liberty half. Census: 5 in 67, 0 finer; 5 in 67 Cameo, 0 finer. CAC: 3 in 67, 0 finer (9/18).

Ex: Long Beach Signature (Heritage, 5/2003), lot 6232, which realized \$5,060; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98513, which realized \$7,931.25. NGC ID# 27UK, PCGS# 6445

1887 Seated Liberty Half, PR67
Registry Grade Example

- 3063** 1887 PR67 PCGS Secure. This spectacular Superb Gem exhibits razor-sharp definition in most areas, but just a touch of softness shows on the arrow fletching and claws. The impeccably preserved surfaces are enhanced by vivid shades of burnt-orange, golden-tan, cerulean-blue, and lavender toning, with deeply reflective fields underneath. Population: 6 in 67 (4 in 67+), 0 finer (8/18). NGC ID# 27UN, PCGS# 6448

WALKING LIBERTY HALF DOLLARS

1917-S Half Dollar, MS64
Obverse Mintmark, Sought-After Type

- 3064** 1917-S Obverse MS64 PCGS. The 1917-S Obverse Mintmark is a significant offering at any Uncirculated grade level, but it becomes a near-unobtainable condition rarity in grades higher than this well-struck near-Gem. Mint luster is softly frosted rather than radiant, shimmering over untuned and beautifully preserved surfaces with strong definition throughout. Four reeding marks appear on the border above the L in LIBERTY and are the only obvious imperfections. NGC ID# 26G7, PCGS# 6572

1919-D Half Dollar, MS62
Popular Condition Rarity

- 3065** 1919-D MS62 PCGS Secure. CAC. This is one of the great condition and strike rarities in the Walking Liberty half dollar series. Struck to the extent of 1.1 million coins, the 1919-D is usually found in circulated grades and seldom seen this nice, particularly with CAC approval. The devices lack central detail, as always, but satiny mint luster over lightly toned and minimally abraded surfaces produces wonderful eye appeal. NGC ID# 24PZ, PCGS# 6578

1920-D Walking Liberty Half, MS63
Better Date in High Grade

- 3066** 1920-D MS63 PCGS Secure. The 1920-D Walking Liberty half dollar claims a smallish mintage of 1.5 million pieces, and the issue becomes scarce in grades above the MS63 level. This attractive Select example exhibits a decent strike, with clear separation between Liberty's thumb and fingers on the wreath hand. The lightly marked, lustrous surfaces show highlights of pale gold toning, with strong eye appeal. NGC ID# 24R4, PCGS# 6581

1921-S Half Dollar, XF45
Well-Known Keystone Issue

- 3067 1921-S XF45 NGC.** The 1921-S is immediately recognizable as a key to the Walking Liberty half dollar series, but it is especially challenging in grades higher than this. Only 548,000 pieces were minted — a low total bested by a couple of other issues. Stone-gray surfaces display softness on the upper date digits, Liberty's head, and the branch hand, but overall wear is minimal. Each side is slightly bright with tiny hairlines. However, the difficulty of obtaining a better problem-free example is sure to override those imperfections. NGC ID# 24R8, PCGS# 6585

PROOF FRANKLIN HALF DOLLARS

1954 Franklin Half Dollar, PR68
Stunning Ultra Cameo Example

- 3068 1954 PR68 Ultra Cameo NGC.** Mintage of proof sets was increased in 1954 to 233,300 sets. The Mint also switched to a softer polyvinyl packaging during the year, which reduced the occurrence of hairlines, but increased problems with toning on coins stored in the original packaging for a considerable length of time. These factors ensured an adequate supply of attractive specimens for future collectors, but the 1954 has always been elusive with Ultra Cameo surfaces.

The present coin is a spectacular PR68 example, with sharply detailed design elements and deeply mirrored fields. The flawless reflective fields contrast delightfully with the frosty devices to produce a stunning cameo effect. The surfaces are impeccably preserved and completely brilliant, with terrific eye appeal. Census: 15 in 68 Ultra Cameo (1 in 68+★), 0 finer (8/18). NGC ID# 27VE, PCGS# 96695

1954 Half Dollar, PR68 Deep Cameo
Among the Finest Certified

- 3069 1954 PR68 Deep Cameo PCGS. CAC.** The sale of the Blue Ocean Collection of Franklin half dollars in our August 2017 ANA Signature sale highlighted the heightened interest in the series, especially in top grades. This PR68 Deep Cameo example with CAC approval matches the technical quality and appeal of the Blue Ocean representative. It features entirely brilliant and essentially unmarked surfaces that show pronounced depth of field and contrast. Population: 16 in 68 Deep Cameo, 0 finer. CAC: 9 in 68, 0 finer (9/18). NGC ID# 27VE, PCGS# 96695

EARLY DOLLARS

1794 Flowing Hair Dollar, VF Sharpness
Ultimate First-Year Demand Rarity
B-1, BB-1, Only Dies for the Date

3070 1794 B-1, BB-1, R.4 — Repaired, Damaged — NGC Details. VF. Bowers Die State III. Congressional legislation authorizing establishment of the Mint contained language that delayed filling the highest levels of Mint personnel — in particular, the proposed Chief Coiner (Henry Voigt) and the Assayer of the United States Mint (Albion Cox). A surety bond of \$10,000 was required for each position as part of the Mint & Coinage Act of 1792, and such a huge sum was beyond the resources of all but the wealthiest of individuals in the early 1790s, regardless of their qualifications and talent.

Research by David Finkelstein (published in the in the December 2015 *John Reich Journal*) clarifies how this seemingly impossible obstacle was met. First, Mint Director David Rittenhouse lobbied Congress — with the aid of President Washington and Secretary of State Thomas Jefferson — to modify the surety bond requirements, eventually achieving new legislation that lowered the bonds to \$5,000 for the Chief Coiner and \$1,000 for the Assayer. These were still large sums. Contrary to conventional thought, David Rittenhouse did not provide the surety bond for Henry Voigt. A quartet of politically connected men stepped forward on Voigt's behalf — Frederick Augustus Muhlenberg, Peter Muhlenberg, Henry Kammerer, and Nicholas Lutz — posting the bond on April 4, 1794. Albion Cox's bond was posted on April 10, 1794 by Charles Gilchrist.

That hurdle cleared, the Mint still struggled to produce the flagship of the silver series, the mandated 1794 silver dollar. Its large diameter was beyond the capabilities of the Mint's screw press, which was better suited for copper coinage than silver, and of a size no larger than a half dollar. An initial mintage of 2,000 silver dollars was reduced by 242 unacceptable coins, and many of the remaining 1,758 dollars were weakly struck from misaligned dies. Less than 10% of that mintage survives today.

In addition to 134 documented specimens recorded in the Martin A. Logies reference, *The Flowing Hair Silver Dollars of 1794*, we are aware of two other previously unlisted specimens for a confirmed total of 136 surviving 1794 dollars. Of these, at least 35% are impaired in one way or another.

This documented example is the "Goldberg May '07" coin, described on page 201 of the Logies book, where it is noted as "Scratched and Tooled." Now housed in a VF Details NGC holder as Repaired and Damaged, it shows light tooling in Liberty's hair and smoothing of the obverse fields, most likely to minimize some old pinscratches and graffiti. Small obverse digs are numerous across the obverse — best viewed with a loupe, although they are somewhat less obvious in-hand. An old cleaning is now mellowed, while the reverse appears virtually problem-free for the grade and smoothly toned in golden-gray shades. Most of Liberty's hair strands are well-defined, while the date is weak but visible at all four digits.

Any 1794 dollar is important and historic, and widely sought by collectors. We expect considerable interest when this example is called.

1795 Flowing Hair Dollar, AU50
Silver Plug, B-7, BB-18

- 3071 1795 Flowing Hair, Three Leaves, Silver Plug, B-7, BB-18, R.3, AU50 PCGS. Bowers Die State I. The B-7, BB-18 variety is R.3 or scarce overall, but it is a much greater rarity with the silver plug. The BB-18 variety (Bolender-7) is one of the Flowing Hair varieties to show a Mint inserted silver plug more often than other die marriages.

What makes the present piece so distinctive is the presence not only of a silver plug, but also of die adjustment marks. The Mint experimented with different ways to bring non-standard planchets to the proper weight. Overweight planchets were easier to fix — a file did the trick, although the adjuster's expertise was necessary to not file away too much weight. Lightweight planchets were more troublesome. Either they were put aside for remelting, or a small hole was drilled in the center of the planchet, and a silver plug inserted to raise the weight back to standard. At that point, the planchet was struck, and the silver plug spread across both surfaces, bonding with the surrounding planchet.

The silver dollar was the flagship silver coin of the United States in the 1790s. When it was taken abroad, it represented the young republic's financial stability. It was important that the coins weigh exactly 26.96 grams, both in domestic trade and in international transactions, struck from .900 silver and .100 copper.

The strike is sharp on this About Uncirculated example. Liberty's hair lacks detail just over the ear where adjustment marks angle across the portrait. Iridescent gray-rose and lilac toning is seen over each side in equal portions, and there are no obvious or mentionable surface blemishes other than the above-mentioned diagonal adjustment marks and the vague outline of a silver plug, most visible on the eagle's breast. This is a rare opportunity to acquire an example of the conscientiousness of the early Mint officials.

Ex: *Pittsburgh Signature* (Heritage, 8/2004), lot 6312; *FUN Signature* (Heritage, 1/2009), lot 3931; *FUN Signature* (Heritage, 1/2014), lot 5282. NGC ID# 24WZ, PCGS# 39993 Base PCGS# 6854

1795 Flowing Hair Dollar, VF20
B-5, BB-27, Popular Three Leaves Type

- 3072 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, VF20 PCGS. Bowers Die State I. The high, rounded relief of the B-5 variety invited early wear on Liberty's hair and the eagle's breast and the right (facing) wing. A bar-shaped obverse die line near the top curl is diagnostic of the B-5, BB-27 variety, although a fine die line from the left stem downward on the reverse is not present on this coin (a situation that occurs on perhaps one in 20 BB-27 dollars). Attractive silver-gray toning deepens at the recesses for added eye appeal. We note a short cut near the eagle's beak. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

1795 Draped Bust Dollar, VF30
Off-Center Bust, B-14, BB-51

- 3073 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VF30 NGC. "Bowers Die State III" with a double set of clash marks on the upper reverse. The single die clash "Die State II" also exists, though a majority of survivors are the unclashed Die State I. B-14 was likely the first Draped Bust variety of any denomination, given the off-center placement of the portrait punch into the obverse die. The present midgrade example shows wear on Liberty's shoulder and the eagle's chest, but glimpses of luster reside in the legends. No marks are noticeable across the powder-blue, straw-gold, and lilac surfaces. The obverse retains tiny, faint flan imperfections, as coined. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

**1795 Draped Bust Dollar, Attractive XF40
B-15, BB-52, Centered Portrait**

- 3074** 1795 Draped Bust, Centered, B-15, BB-52, R.2, XF40 ANACS. Bowers Die State IV. An unusual, internal die break within the strands of Liberty's hair near the ribbon serves to identify both the variety and the die state of 1795 BB-52 Draped Bust dollars. The break is in a rather advanced stage here, although the lack of die rust on the obverse suggests later stages exist. Gold and blue accents enliven the silver-gray surfaces of this well-defined XF example. Glimpses of luster accompany the broadly dappled toning. About half of the eagle's breast feathers are visible, with grade-consistent wear on the eagle's legs. NGC ID# 24X2, PCGS# 39995 Base PCGS# 6858

**1797 Draped Bust Dollar, Pleasing VF20
B-3, BB-71, 10x6 Stars, Large Letters**

- 3075** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF20 PCGS. Bowers Die State III. In one of the more bizarre star arrangements on U.S. coinage, the 10x6 1797 Draped Bust dollar shows LIBERTY squeezed between stars fore and aft, while the star points touch one to the next all along the circumference. The Mint soon returned to a more conventional 9x7 star arrangement on subsequent 1797 varieties. Old-silver toning deepens to deep-gray at the borders of this smoothly worn, minimally marked VF early dollar, the only 10x6 variety in the early dollar series and a necessity for type. Housed in an old green label holder. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

**1797 10x6 Stars Dollar, VF25
Large Letters Reverse, B-3, BB-71**

- 3076** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF25 PCGS. Bowers Die State III. This interesting variety features an obverse that has 10 stars crowded to the left of Liberty and 6 stars to the right. A faint die dot to the right of the first 7 in the date is obvious under a glass and makes the date appear to be 17.97. The strike is about average for the variety at the VF25 grade. This example shows a mix of medium-gray and gold toning, contrasted by the high points of Liberty in a light shade of gray. Numerous adjustment marks angle across the reverse. Scattered light abrasions define the grade, and a faint pinscratch through Liberty's hair and neck is noted. Still, a charming old-time example of this interesting variety.

Ex: Long Beach Signature (Heritage, 9/2006), lot 2369; Long Beach Signature (Heritage, 9/2008), lot 2380. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

**1797 B-3, BB-71 Dollar, Lightly Toned AU50
10x6 Stars, Small Eagle, Large Letters**

- 3077** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, AU50 NGC. Bowers Die State III. This is the only early dollar with the 10x6 obverse star arrangement. Examples are moderately available at the About Uncirculated level. Although the reported mintage of 1797 dollars is understated (BB-73 was partially or wholly struck in 1798 and included with that year's production), all three varieties are challenging. This lightly toned AU example has thin bands of olive-gold toning that run horizontally across both sides. Struck from lapped dies, a few of the stars are drawn to the edge of the finely textured fields. Some high-point weakness combines with nominal wear, visible mostly at the peripheries. Substantial mint luster remains, and there are only a few minor abrasions. Brief adjustment marks appear at the upper-right and lower-left obverse margins. Census: 9 in 50, 21 finer (9/18). NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

1797 B-1, BB-73 Dollar, VF20
9x7 Stars, Large Letters, Original Surfaces

- 3078** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, VF20 PCGS. Bowers Die State II. The dies were lapped, removing the diagnostic pellet beneath star 9 that is visible on the earliest die state. A thick mantle of gray toning is vaguely pearlescent beneath the attractive, evenly dispersed patina. The coin is well-defined for the grade except at LIB of LIBERTY and on the opposing lower wreath elements. Some light, horizontal abrasions between star 10 and Liberty's mouth are minimized by the rich-gray toning. The natural surfaces and lack of any serious flaws make this an ideal example of the 9x7 Stars, Large Letters type. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

1797 9x7 Stars Dollar, VF30
B-1, BB-73, CAC Approved

- 3079** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, VF30 PCGS. CAC. Bowers Die State III, with cracks behind Liberty's head. An evenly struck coin with deep olive-gray and russet toning overall. Wear is light with most major details remaining clear. The CAC endorsement is especially important as it speaks to the quality of this coin for the grade. Adjustment marks (mint made) appear along the lower reverse border, and the obverse patina masks some light field chatter that is not bothersome. NGC ID# 24X4, PCGS# 40003 Base PCGS# 6863

1798 Heraldic Eagle Dollar, AU58
Popular B-13, BB-108 Variety

- 3080** 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, AU58 NGC. Bowers Die State II. This Heraldic Eagle dollar is characterized by a pointed 9 in the date and 10 arrows in the bundle held by the eagle's claw. The die crack to the right of the L in LIBERTY is clear, but there is no evidence of cracking below the date or to the left that would indicate a DS III coin. This is a remarkably well-preserved early dollar. The surfaces retain significant portions of the original satiny mint luster and the rose-gray centers deepen several shades toward the rims. Strike details are strong around the margins but weaker in the centers, especially on the eagle's breast. The nearly mark-free surfaces makes this a perfect example for the type or variety collector. NGC ID# 24X6, PCGS# 40025 Base PCGS# 40018

1798 Draped Bust Dollar, AU53
Large Eagle, Pointed 9, B-15, BB-112
Rare Early Die State

- 3081** 1798 Large Eagle, Pointed 9, Wide Date, B-15, BB-112, R.3, AU53 PCGS. Bowers Die State I. A rare early die stage, with Liberty's hair curls sharp and complete. Star 13 is full-sized with full central definition. The reverse is in its early die stage for BB-112, with just a hint of a die crack emerging from the branch stem toward the border, seen here in its third use (also used to strike BB-110 and BB-111). Luster remains throughout the partially reflective, silver-blue surfaces with dappled gray accents. The strike is pinpoint sharp except on a few of the right-side field stars. Marks are limited to a few tiny, microscopic ticks. This outstanding early dollar is equal to or exceeds other About Uncirculated examples at the low end of the BB-112 list of Notable Specimens. Housed in a previous generation green label holder. NGC ID# 24X6, PCGS# 40029 Base PCGS# 40018

1798 Large Eagle Dollar, AU53
B-25, BB-123, Early Die State

- 3082** 1798 Large Eagle, Pointed 9, Close Date, B-25, BB-123, R.4, AU53 PCGS. Bowers Die State II without the usually seen obverse die cracks. Attractive, medium silver-gray toning deepens at the borders with traces of golden luster shining through the natural patina. Moderate adjustment marks angle through the date area across the portrait, as produced. The strike varies — sharp in most areas, but weak at the bust point and on the corresponding reverse at OF. B-25 has blundered field stars, where the Line Star Pattern was placed too high and the star tips run into the clouds. NGC ID# 24X6, PCGS# 40040 Base PCGS# 40018

1799 B-16, BB-158 Dollar, AU53
Close 17, Near-Terminal Obverse Cracks

- 3083** 1799 7x6 Stars, B-16, BB-158, R.2, AU53 NGC. Bowers Die State IV. This is the Close 17 Obverse variety, in an advanced die state with the obverse die shattered and bulging. Adjustment marks at the mid- to upper-left border cross into the left obverse field. Despite the late die stage, this deeply toned dollar displays solid About Uncirculated definition throughout both sides. Intense grayish-brown shades blanket the obverse and reverse alike, yet non Mint-made marks are minimal and this early dollar is an interesting die state study with its own unique charm. NGC ID# 24X7, PCGS# 40050 Base PCGS# 6878

1799 Draped Bust Dollar, AU53
B-17, BB-164, 7x6 Stars, Partially Lustrous

- 3084** 1799 7x6 Stars, B-17, BB-164, R.2, AU53 PCGS. CAC. Bowers Die State V, with numerous reverse die cracks. This About Uncirculated BB-164 dollar displays remnants of luster in the protected peripheral regions, and it has golden-gray and russet toning overall. The strike is sharp and even, and no adjustment marks are observed. Scattered marks appear on Liberty's portrait, but the fields are better preserved. NGC ID# 24X7, PCGS# 40055 Base PCGS# 6878

1799 Draped Bust Dollar, MS61
7x6 Stars, B-9, BB-166
Rare Die State I

- 3085** 1799 7x6 Stars, B-9, BB-166, R.1, MS61 NGC. Bowers Die State I. An exceedingly rare and significant early die state of Bolender-9, known by specialists as the Apostrophe Variety, named for the die crack from the border just after the final S of STATES into the field. Usually identified by this feature; however, this is Die State I in Dave Bowers' *Silver Dollar Encyclopedia*, with no evidence of either the reverse crack (apostrophe) after the S of STATES, or the typically seen die break beneath the 1 in the date. Luster glows beneath dusky dark brown color and darker steel toning. A tiny rim bump is visible on the obverse at 5 o'clock, but this only affects a portion of four dentils. This is a spectacular early Silver Dollar in full Mint State preservation, and one that was "not seen" by Bowers. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

1800 Draped Bust Dollar, AU58
B-16, BB-187, Lightly Toned Surfaces

3086 1800 B-16, BB-187, R.2, AU58 PCGS Secure. Bowers Die State III. A kernel-shaped die dot near the top-most hair curl is just one identifier unique to the BB-187 variety. In middle die states (or later) such as this example, a long, curving die crack arcs from the bottom rim through the right edge of the second 0, across the portrait to the neck junction, and exits after passing through star 10. A ragged die break and roughness above ES of STATES confirms the variety.

This nearly Mint State example displays even, light-gold toning on both sides, with a sharp obverse strike and only a few light marks scattered across the softly lustrous surfaces. The reverse is sharp except where adjustment marks angle in from the right edge, especially at F in OF and the cloud below. While BB-187 is readily available in most circulated grades, it is unexpectedly rare in Mint State with an estimated Condition Census of 64,62,62 and multiple 58s. NGC ID# 24X9, PCGS# 40073 Base PCGS# 6887

1800 Draped Bust Dollar, XF45
Dotted Date, B-14, BB-194

3087 1800 Dotted Date, B-14, BB-194, R.3, XF45 PCGS Secure. Bowers Die State 1, with a tripled dentil between B and E in LIBERTY. The die dots around the first 0 in the date identify the variety. Only light wear shows on the well-detailed design elements of this attractive Choice XF specimen, from a late state of the dies that exhibits extensive networks of die cracks on both sides. The lightly abraded lavender-gray surfaces retain traces of original mint luster. NGC ID# 24X9, PCGS# 40078 Base PCGS# 6889

1800 B-14, BB-194 Dollar, AU50
Guide Book 'Dotted Date' Variety

3088 1800 Dotted Date, B-14, BB-194, R.3, AU50 PCGS Secure. Bowers Die State IV. The distinctive Dotted Date variety has long been listed in the *Guide Book*, and is reminiscent of the "Q" variety 1800 S-197 large cent. This lightly circulated representative displays medium to deep gunmetal-gray patina. The sharply struck and attractive surfaces lack any remotely mentionable marks, though a loupe reveals minor hairlines. NGC ID# 24X9, PCGS# 40078 Base PCGS# 6889

1801 Dollar, Original XF45
B-3, BB-213, Hints of Luster Remain

3089 1801 B-3, BB-213, R.3, XF45 PCGS. Bowers Die State II. Luster emerges from protected areas of this Choice XF, chestnut-gray Large Eagle dollar. The surfaces are pleasing despite a pair of faint straight hair-thin marks on the right obverse field. An irregular planchet flaw beneath the 01 in the date is of Mint origin. The reverse shows the diagnostic Ts without their lower-right serifs, suggesting the die was made immediately **after** the reverse die for BB-214, where the Ts are only partially broken. Housed in a previous generation green label holder.
Ex: Baltimore Signature (Heritage, 3/2009), lot 2360. NGC ID# 24XA, PCGS# 40085 Base PCGS# 6893

1802/1 Wide Date Dollar, AU55
B-3, BB-234, Attractive Surfaces

- 3090** 1802/1 Wide Date, B-3, BB-234, R.3, AU55 NGC. Ex: Jules Reiver Collection. Bowers Die State III with faded "wave" clash marks above the date. The die lump below obverse star 8 is the best identifier. A butter-gold and pearl-gray example that boasts substantial luster and smooth surfaces. Only a faint line above the ES in STATES merits mention. Although outside the condition census (five best) for BB-234, the present piece would be a highlight of most collections of early dollars.
Ex: Stack's W. Earl Spies Collection (December, 1974), lot 223; Jules Reiver Collection (Heritage, 1/2006), lot 23632, realized \$12,650. NGC ID# 24XC, PCGS# 40094 Base PCGS# 6899

1802 Narrow Date Dollar, XF45
B-6, BB-241, Sharp Collector Coin

- 3091** 1802 Narrow Date, B-6, BB-241, R.1, XF45 PCGS. Bowers Die State III. Ideal for date and type collectors, this Choice XF 1802 dollar is the most-available variety of the year, easily identified by the broken right foot on T in LIBERTY and a gap between 8 and 0 in the date. Traces of mint luster remain among Liberty's hair curls, while both sides are well-centered and sharply struck. A loupe reveals just a few light field lines but no significant marks. Iridescent colors play beneath attractive gunmetal-blue and brown toning. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

1803 Silver Dollar, Choice XF
Small 3, B-5, BB-252

- 3092** 1803 Small 3, B-5, BB-252, R.3, XF45 PCGS Secure. Deep cobalt-blue, plum-lavender, and autumn-brown toning encompasses this refreshingly unabraded Heraldic Eagle dollar. Though the cheek shows wear, Liberty's hair and the eagle's wings retain luster. B-5 pairs a "new" obverse die with a lightly lapped and rusted reverse die that previously struck six different marriages. B-5 is scarce and underappreciated relative to the plentiful Large 3 B-6. NGC ID# 24XD, PCGS# 40097 Base PCGS# 6900

1803 Draped Bust Dollar, AU58
Large 3 Guide Book Variety, B-6, BB-255

- 3093** 1803 Large 3, B-6, BB-255, R.2, AU58 NGC. Bowers Die State III. The Large 3 in the date, the Normal T in LIBERTY, and the upright of E in STATES positioned left of a cloud space identifies the variety. This wonderful borderline Uncirculated early silver type coin shimmers with luster, and has only slight wear on such highpoints as Liberty's cheek and the eagle's breast feathers. Lightly toned with powder-blue, autumn-gold, and sea-green patina throughout the margins. Both sides lack memorable marks, and the eye appeal is exemplary. Census: 14 in 58, 5 finer (8/18).
Ex: Royal Oak Collection (Heritage, 8/2006), lot 5310, realized \$12,650; Long Beach Signature (Heritage, 2/2010), lot 1294, realized \$12,650. NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

GOBRECHT DOLLAR

1836 Gobrecht Dollar, Toned PR55
Judd-60 Original, Die State E

- 3094** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 PR55 NGC. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the O in DOLLAR). Die State E. This die state is the one following the most easily identified Die State D, which is characterized by the angling die clash mark above the eagle's wing. This state shows rim nicking above the A in STATES, and a chip in the dentils above and to the right of the R in DOLLAR. The fields show only faint remnants of the original reflectivity and there are numerous small contact marks that are evident when the piece is closely examined with a magnifier, the most obvious of which is a squiggly, shallow scratch below the RI of AMERICA on the reverse. Each side displays medium density gray patina with faint, underlying traces of rose evident. All in all, a choice example of this highly sought out 19th century rarity.
Ex: FUN Signature (Heritage, 1/2006), lot 3232, where it realized \$13,800. NGC ID# BLWV, PCGS# 11225

SEATED DOLLARS

1851 Seated Dollar, MS61
Original Circulation Strike
Rare Series Key, 1,300 Pieces Struck

- 3095** 1851 MS61 NGC. OC-1, Low R.5. Osburn-Cushing Die State b/g. The mintage of just 1,300 pieces makes circulation strike 1851 Seated dollars rare even in circumstances with normal attrition. Instead, with the price of silver out of balance compared to gold, the small mintage of 1851 silver dollars did not circulate, while gold dollars were struck in large quantity (more than 3.3 million pieces). All 1851 silver dollars are rare, whether one of the few circulation strikes, or if a restrike proof.
The surfaces of this lightly toned, silver-gray example are reflective throughout both sides from die polishing. The date is high near the rock base, as seen on all circulation strikes, and the coin is sharply struck from clashed dies to further confirm its business-strike status. The reverse shows a late die stage with a diagnostic, lengthy die crack above UNITED STA and a prominent die line angling downward through the right horizontal shield lines into the wing feathers below. Census: 2 in 61, 15 finer (9/18). NGC ID# 24YP, PCGS# 6939

1853 Seated Dollar, MS64
Rare Any Finer

3096 1853 MS64 NGC. OC-1, R.2. A Top 30 Variety. Osburn-Cushing Die State b/b. A single 1853 die pair was lightly clashed as it approached a total of 46,110 pieces struck. Partially reflective fields accompany sharply struck central devices of this lightly toned, pale-gold circulation strike. An unfinished area beneath the chin with strong vertical die lines identifies the Chin Whiskers variety, one of the Top 30 varieties in the Seated dollar series according to the Osburn-Cushing *Register of Liberty Seated Dollar Varieties*. This is a near-Gem example, lustrous and minimally marked, with just minor weakness at the lower right-hand stars. Just a handful of higher-graded 1853 Seated dollars exist at both services combined. Census: 34 in 64, 2 finer (9/18). NGC ID# 24YS, PCGS# 6941

1856 Seated Liberty Dollar, MS64
Tied For Finest Certified

3097 1856 MS64 NGC. OC-1. This attractive near-Gem 1856 Seated dollar is notable for its appealing, satiny luster and lack of heavy abrasions. Deep golden-gray and lavender-rose toning dots each side but is somewhat lighter on the reverse. As with any better-grade 1856 Seated dollar we have seen, the strike is a trifle mushy in the area of Liberty's head and surrounding stars.

The Mint State rarity of the 1856 Seated dollar can be misleading if one starts with the disproportionately generous mintage of 63,500 pieces. Much of the original production was eventually shipped to the Orient for commercial trade; those that remained for domestic use were seldom held from circulation. Uncirculated survivors are rare in all grades, and certified Gems are unknown. This near-Gem, despite lacking full design definition, is among the finest known of the issue. Census: 2 in 64, 0 finer (9/18).

Ex: ANA Signature (Heritage, 7/2005), lot 10244, realized \$14,950; purchased from Bill Nagle by Gene Gardner in February 2007; Eugene Gardner Collection, Part II (Heritage, 10/2014), lot 98594, realized \$14,100. NGC ID# 24YV, PCGS# 6944

1869 Seated Liberty Dollar, MS64
Underrated Issue in High Grades

- 3098** 1869 MS64 NGC. OC-2, R.2. Osburn-Cushing Die State b/d. Struck from a polished proof obverse die and a circulation strike reverse, this variety is sometimes mistaken for a proof. Doubling on the motto and reverse die cracks help confirm the variety. Pale golden-bronze toning covers both sides of this Choice Uncirculated example, with sharply struck devices and only minor marks visible with a glass. Gunmetal-blue accents ring the borders at the rim. The large mintage of 423,700 pieces makes the 1869 issue readily available in lesser grades, yet it is conditionally scarce in near-Gem and rare any finer. Census: 9 in 64, 3 finer (9/18). NGC ID# 24ZC, PCGS# 6962

PROOF SEATED DOLLARS

1863 Seated Liberty Dollar, PR64
Rare Deep Cameo Example

- 3099** 1863 PR64 Deep Cameo PCGS. OC-P1, High R.4. The economic stresses and uncertainties of the Civil War resulted in widespread hoarding of all precious metal coinage, and the government suspended specie payments in late 1861. Ordering proof sets became much more expensive during this era, since they had to be paid for in kind, which entailed purchasing precious metal coinage from bullion brokers or banks at significant premiums, or paying in paper money which was exorbitantly discounted. As a result, only 460 proof Seated Liberty dollars were struck in 1863, to accompany a small business-strike emission of 27,660 pieces. Dick Osburn and Brian Cushing estimate no more than 210 proof examples are extant in all grades today. One obverse and two reverse dies were employed to strike the small proof mintage, creating two die varieties for the date. This coin represents the slightly scarcer OC-P1 variety, with the lowest horizontal shield line extending through the edge of the shield on the left.

The present coin is an attractive Choice example, with sharply detailed, frosty design elements that contrast profoundly with the deeply mirrored fields to create an intense cameo effect. The surfaces are well-preserved, with a few subtle hints of pale gold toning. Examples with the Deep Cameo designation are rare. Population: 3 in 64 Deep Cameo, 0 finer (8/18). NGC ID# 252H, PCGS# 97006

1867 Seated Liberty Dollar, PR65
Only 625 Pieces Struck

- 3100** 1867 PR65 PCGS. OC-P1, R.3. The razor-sharp design elements and glimmering fields confirm the proof origins of this Gem 1867 Seated dollar. Deep mint-gold, gunmetal-blue, and lavender toning blankets each side, masking any insignificant contact marks. A rarity so well-preserved. Population: 17 in 65, 9 finer (the finer coins including Gem and better Cameos and Deep Cameos) (9/18). NGC ID# 252N, PCGS# 7015

1868 Silver Dollar, PR64 Cameo
Delicate Pale-Blue Color

- 3101** 1868 PR64 Cameo PCGS. OC-P2, High R.3. Osburn-Cushing Die State a/a. The obverse shows tripling on the 1 and recutting on the 8s, while the reverse displays numerous die lines around the olive leaves and within the motto. This is a lightly toned example with pale bluish-silver toning and sharply struck devices. Glassy mirrors contrast with the smoothly frosted devices for exceptional eye appeal. Only a few short, wayward hairlines away from a full Gem Cameo designation. Population: 22 in 64 (1 in 64+) Cameo, 8 finer (9/18). NGC ID# 252P, PCGS# 87016

1870 Seated Dollar, Original PR64
Pleasing Multicolor Accents

- 3102** 1870 PR64 NGC. OC-P2, High R.4. Osburn-Cushing Die State a/a. Although the mintage is 1,000 pieces, this late-date proof Seated dollar is more elusive than that figure might suggest, with proofs any finer than this near-Gem conditionally rare. As it is, a coin at the PR64 level is scarce. Glassy mirrors offer mild contrast on the sharply struck obverse, yet parts of the eagle are curiously flat. The motto shows narrow die doubling. Border toning in dappled gold and blue-green shifts to a partial rainbow appearance at the upper reverse. Census: 50 in 64 (2 in 64+), 28 finer (9/18). NGC ID# 252S, PCGS# 7018

1871 Seated Liberty Dollar, PR64
Sharply Struck, Album-Toned

- 3103** 1871 PR64 PCGS. OC-P1, R.2. Osburn-Cushing Die State a/a. The 1871 Seated dollar circulation-strike mintage topped 1 million pieces for the first time in the series, while the proof mintage slipped back below 1,000 pieces. Vibrant blue toning at the borders frames rich-gold shades across the obverse fields and devices of this Choice proof. The reverse displays a more subtle version of the same toning pattern, while both sides are razor-sharp with no distracting marks or abrasions. The date on this original proof is much further left than the only other known proof variety. Population: 50 in 64 (1 in 64+), 20 finer (9/18). NGC ID# 252T, PCGS# 7019

PROOF TRADE DOLLARS

1878 Trade Dollar, PR65
Late-Series, Proof-Only Issue

- 3104** 1878 PR65 NGC. The strike is razor-sharp and the mirrored surfaces approach perfection on this richly toned, attractive Gem proof. A pale ivory-gold hue surrounds cobalt-blue, orange, and deep-violet shades on the obverse, while a similar toning pattern adds azure-blue to the palette on the reverse. The obverse stars are fully defined and sharp, as are the subtle details of Liberty's hair strands and the tiara. Just 900 proofs were struck for the year — this one is particularly well-preserved. Census: 36 in 65, 21 finer (9/18). NGC ID# 27YR, PCGS# 7058

1879 Trade Dollar, Sharp PR65+ Cameo

- 3105** 1879 PR65+ Cameo NGC. The proof 1879 Trade dollar is a major rarity with Ultra Cameo contrast, making attractive Cameos the finest pieces typically available to collectors. This Plus-graded Gem displays needle-sharp detail and brilliant surfaces. The satiny devices strongly contrast with the mirrored fields, and neither side exhibits bothersome contact marks. Census: 23 in 65 Cameo (1 in 65+), 48 finer; 0 in 65 Ultra Cameo, 3 finer (9/18). NGC ID# 27YR, PCGS# 87059

1880 Trade Dollar, PR65 Cameo
Popular Proof-Only Issue

- 3106 1880 PR65 Cameo PCGS Secure.** A generous mintage of 1,987 proof Trade dollars was accomplished at the Philadelphia Mint in 1880, and no business-strike examples were produced. As might be expected, the issue is quite rare in PR65 condition, with the Cameo designation. This delightful Gem exhibits sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields. Hints of pale gold toning add to the terrific visual appeal. Population: 29 in 65 (2 in 65+) Cameo, 28 finer (8/18). NGC ID# 27YS, PCGS# 87060

1882 Trade Dollar, PR65
Late-Series Proof-Only Issue

- 3107 1882 PR65 NGC. CAC.** From a proof-only mintage of 1,097 pieces, this impressive Gem displays sharply detailed design elements, aside from a touch of softness on the upper stars. The well-preserved surfaces are blanketed in attractive shades of cerulean-blue and pale gold toning, with deeply reflective fields underneath. Census: 66 in 65, 39 finer. CAC: 6 in 65, 11 finer (9/18). NGC ID# 27YU, PCGS# 7062

MORGAN DOLLARS

1879-CC Dollar, MS62
Normal Mintmark, Popular Semikey

- 3108 1879-CC MS62 PCGS.** Normal Mintmark. The 1889-CC and 1893-CC are the only two Carson City issues that prove more elusive in high grades than this second-year emission from a mintage of 756,000 coins. This lightly abraded MS62 example has slightly subdued mint frost, but central design detail is good. Lavender and peach-orange toning graces much of each side with splashes of brilliance on the obverse. NGC ID# 253U, PCGS# 7086

1879-CC Dollar, Frosty MS64
Normal Mintmark, Challenging at This Level

- 3109 1879-CC MS64 PCGS.** Normal Mintmark. The variety that many collectors prefer. This near-Gem represents the highest grade before the issue becomes entirely out of reach. Indeed, only the most advanced specialists can compete at this level. Each side is brightly untuned and frosty, characteristic of the best-produced Carson City silver dollars. Central definition is marginally incomplete and chatter limits the grade, but the semiprooflike surfaces generate great eye appeal. NGC ID# 253U, PCGS# 7086

1879-CC VAM-3 Dollar, MS62
Capped Die, Few Marks

- 3110 1879-CC Capped Die, VAM-3, MS62 ANACS.** A Top 100 Variety. Housed in an early ANACS holder, this attractive Capped Die example shows only a minor abrasions for the grade. Softly lustrous with brief umber and gold accents over the frosty, silver-gray surfaces, the coin shows a sharp strike with minimal blending over the ear and at the eagle's legs. The Large Over Small mintmark with the associated die manipulations and chipping are clear. Ex: Long Beach Signature (Heritage, 9/2016), lot 5590, which realized \$3,877.50. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-S Morgan Dollar, Bright MS68
Unsurpassed Quality

- 3111 1879-S MS68 PCGS.** The 1879-S is a premier option for type representation — well-produced and accessible through the highest Mint State grade levels. This fully struck coin displays bright mint frost over completely brilliant and exquisitely preserved surfaces. A single mark on the chin is the only imperfection apparent to the unaided eye. Housed in a green label holder. None are certified in MS69 at PCGS or NGC (8/18). NGC ID# 253X, PCGS# 7092

1881-S Dollar, MS68+
A Single Coin Finer at NGC

- 3112 1881-S MS68+ NGC.** The 1881-S is famously available in high grades with a couple of MS69 coins extant, but that does not in any way diminish the amazing quality of this MS68+ coin. Aside from a blush of peach-gold and olive toning at the upper-right reverse border, the surfaces of this practically flawless Superb Gem are brilliant. Frosty luster and full detail are additional attributes. This is one of seven MS68+ examples at NGC (one of which is MS66+★), and there is a single coin graded higher (9/18). NGC ID# 2549, PCGS# 7130

1886-O Silver Dollar, MS64
Almost Uncollectible Finer

- 3113 1886-O MS64 PCGS.** Although more than 10.7 million silver dollars were produced at New Orleans in 1886, most circulated or were later melted. This issue is elusive in Mint State compared to most other dates in the series, and it is virtually uncollectible finer than the present coin. PCGS lists only three Gems finer (9/18). This Choice example displays frosty, brilliant luster and a nice cartwheel effect. The strike is sharp and abrasions are trivial. *Ex: ANA Signature (Heritage, 3/2008), lot 1018, which realized \$7,475. NGC ID# 254W, PCGS# 7168*

1889-CC Dollar, Unc Details
Bright Mint Luster

- 3114 1889-CC — Scratch — PCGS Secure. Unc Details.** The 1889-CC Carson City dollar serves as one of the iconic issues in this widely collected series. A low mintage of 350,000 coins, widespread circulation, and a high attrition rate make high-end examples difficult to locate. This Uncirculated dollar possesses tremendous appeal despite the noted imperfection: two hair-thin scratches near the arrowheads that are incredibly minor compared to other coins that bear similar designations. The surfaces are brightly untoned and radiantly lustrous, appearing freshly struck. Design detail is strong, and chatter is unobtrusive.

1889-CC Silver Dollar, MS63
Most Elusive Carson City Morgan

- 3115 1889-CC MS63 NGC.** The 1889-CC Morgan dollar claims a small mintage of 350,000 pieces, and experts consider this date the most elusive of the Carson City series. The 1889-CC is seldom encountered in high grade, and attractive Select examples, like the present coin, are prized by collectors.

This Select Mint State coin is sharply detailed in most areas, with a touch of softness showing on the hair above Liberty's ear. Although not designated as Prooflike, the surfaces of this coin are brightly reflective in most areas, with accents of champagne-gold toning. A scattering of minor contact marks on both sides is consistent with the grade. NGC has graded 49 numerically finer examples (9/18). *Ex: Long Beach Signature (Heritage, 2/2012), lot 4234, realized \$29,900. NGC ID# 2559, PCGS# 7190*

**1890-CC Dollar, MS64+ Deep Mirror Prooflike
All-Brilliant, Pronounced Cameo Effect**

- 3116 1890-CC MS64+ Deep Mirror Prooflike PCGS Secure. CAC.** Deep Mirror Prooflike examples of the 1890-CC Morgan dollar are typically found in MS62 to MS64 condition. Only eight near-Gems enjoy the added Plus designation, and a few dozen pieces are graded finer. This all-brilliant near-Gem features minimal chatter for the grade. Frosted, razor-sharp devices against watery mirrors produce an eye-appealing cameo effect. PCGS reports 30 Deep Mirror Prooflike submissions finer. NGC ID# 45YV, PCGS# 97199

**1893-CC Morgan Dollar, MS63
Final Issue from the Popular Western Mint**

- 3119 1893-CC MS63 PCGS Secure.** The supply of 1893-CC dollars had dried up by the time of the GSA release of the 1970s. A single coin was included in those sales. Still, the issue remains widely collectible though MS63, although survivors are subject to ever-strong demand as the final-year emission from the popular Western facility. Both sides are lustrous and untuned. Marks on the cheek limit the grade, but the fields are relatively clean. NGC ID# 255S, PCGS# 7222

**1892-CC Morgan Dollar, MS65
Seldom Seen Finer**

- 3117 1892-CC MS65 NGC.** A satiny white coin with radiant luster, excellent surfaces, and a decent strike on the central devices. One of the scarcer and always popular Carson City issues, and an elusive coin in Gem grade. Examination of the surfaces reveals a clean cheek on Liberty, and the surrounding fields are free of all but a smattering of little nicks. NGC has graded 15 numerically finer examples (8/18).

Ex: Dallas Signature (Heritage, 11/2005), lot 3465, realized \$6,612.50; Long Beach Signature (Heritage, 5/2007), lot 1574, realized \$6,325. NGC ID# 255M, PCGS# 7214

**1893-CC Silver Dollar, MS63
Toned Final-Year Carson City Morgan**

- 3120 1893-CC MS63 PCGS.** Frosty original luster illuminates lightly abraded surfaces on this Select final-year Carson City Morgan. The surfaces are largely amber-gold in color, although deeper sea-green hues appear around the peripheral relief elements. Slight strike weakness occurs over the central high points, as usual for this issue. NGC ID# 255S, PCGS# 7222

**1893-CC Silver Dollar, MS62
Semiprooflike Fields**

- 3118 1893-CC MS62 PCGS.** Both sides of this Mint State 1893-CC dollar showcase semiprooflike fields and a radiant cartwheel effect. Delicate rose-gold toning warms the peripheries, but the interiors are brilliant. Scattered abrasions limit the grade and the usual strike weakness is seen in the centers. Collector demand for the final-year Carson City Morgan dollar is unceasing. It is also among the more challenging CC-mint issues in Uncirculated condition. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS64
Final Carson City Issue**

3121 1893-CC MS64 PCGS. Following the Panic of 1893 and the repeal of the Sherman Silver Purchase Act, the Carson City Mint was closed for coinage operations on June 1, 1893. Due to the short production year, only 677,000 Morgan dollars were struck at the famous Western facility before its doors closed. Some of the coins were released into circulation at an early date, but most of the coins held in government storage must have been melted in 1918, as only a single example was offered in the GSA sales of the 1970s. A number of coins were found in the Redfield Hoard, but many of those were damaged when they were run through a coin-counting machine. As might be expected, the 1893-CC can be found in MS64 condition with a little patience, but finer coins are condition rarities.

The present coin is an attractive Choice example, with sharply detailed design elements and well-preserved, lustrous surfaces that show brilliant centers surrounded by peripheral hints of sea-green toning. Eye appeal is quite strong. Housed in an old-style green label holder. PCGS has graded 15 numerically finer examples (9/18). NGC ID# 255S, PCGS# 7222

**1893-S Dollar, XF40
Steel-Gray With Olive-Gold Accents**

3122 1893-S XF40 PCGS. A single obverse die was used to manufacture all 1893-S Morgan dollars (100,000 coins). Every genuine example will exhibit a set of diagnostic “rabbit ears” in the foot of the R and a die scratch in the crossbar of the T in LIBERTY. This is a problem-free, collector-grade survivor with even steel-gray patina and expected friction over the ear and breast feathers. Original golden-olive color remains within the recesses. Encapsulated in a green label holder. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, Choice XF
Untoned Problem-Free Example**

3123 1893-S XF45 NGC. Most of the 100,000 1893-S Morgan dollars struck were thrown into the channels of commerce, where they usually remained for some time. This piece circulated only briefly and grades a full 15 points higher than the typical survivor. Untoned surfaces are slightly bright and retain traces of original luster. Even wear over the centers and moderate marks and hairlines are all normal for the grade. NGC ID# 255U, PCGS# 7226

**1893-S Morgan Dollar, AU Details
Low-Mintage Key**

3124 1893-S — Polished — NGC Details. AU. Only light wear shows on the well-detailed design elements of this sought-after branch mint key, from a series-low mintage of 100,000 pieces. The brilliant surfaces exhibit only scattered, minor abrasions on both sides, but heavy polishing is evident throughout. This lot represents an important opportunity for Morgan dollar collectors seeking an affordable specimen of this celebrated rarity. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, AU55
Business-Strike Key to the Series

3125 1893-S AU55 PCGS. CAC. The financial Panic of 1893 brought about the repeal of the Sherman Silver Purchase Act and put an end to the mandated production of millions of unneeded silver dollars every year. Mintages of Morgan dollars were drastically reduced at all active U.S. Mints and the Carson City facility was closed for coinage operations after 1893. Only 100,000 Morgan dollars were struck at the San Francisco Mint that year, the smallest production total of the series. The 1893-S is the acknowledged key to the series today, and high-grade specimens are especially elusive.

The present coin is an attractive Choice AU specimen, with just a touch of wear on the well-detailed design elements. Both sides retain significant amounts of original mint luster, with traces of prooflike reflectivity in selected areas. A few hints of golden-tan and lavender toning visit the lightly abraded surfaces. Population: 44 in 55 (1 in 55+), 52 finer. CAC: 9 in 55, 6 finer (9/18). NGC ID# 255U, PCGS# 7226

1894 Silver Dollar, Frosted MS64
Just 110,000 Pieces Struck

3126 1894 MS64 PCGS. According to the current population reports, only about three dozen 1894 silver dollars exist in a numerically finer grade than MS64 at both PCGS and NGC combined, making this near-Gem example a logical candidate for a high-grade set. The low circulation-strike mintage of 110,000 pieces suggests this Philadelphia issue will hold its own among the rare dates of the series, with no great influx of finer examples forthcoming. This example is brilliant-white and sharply struck. A few light marks on the cheek are the only abrasions to note. NGC ID# 255V, PCGS# 7228

1895-O Dollar, AU58
Difficult to Find in Nice Condition

3127 1895-O AU58 PCGS. Writing for PCGS CoinFacts, Ron Guth has called the 1895-O Morgan dollar "one of the most difficult of the series to find in nice condition." While collectors may have differing views on what constitutes "nice," this piece certainly qualifies, especially considering the quality of the typical example. Minimally toned silver surfaces retain hints of satiny luster and pale gold color around the borders. There are small abrasions on each side, including reed marks under the eye and on the jaw line. NGC ID# 255Y, PCGS# 7236

1895-S Dollar, Semireflective MS63
Better S-Mint Morgan

3128 1895-S MS63 PCGS. A desirable issue from a mintage of only 400,000 coins. Thick mint frost covers the devices with semiprooflike fields on this brilliant Select example. The devices are generally well-defined with only minor shallowness over the high points, and abrasions are scattered evenly throughout. A few small planchet flakes are seen between the E and P on the obverse.
Ex: Long Beach Signature (Heritage, 9/2014), lot 3293, which realized \$5,875. NGC ID# 255Z, PCGS# 7238

1896-S Dollar, Frosted MS64

- 3129 1896-S MS64 PCGS.** This California branch mint issue proves much scarcer than its mintage of 5 million pieces indicates. At least half that number are believed to have been melted under the Pittman Act. This brilliant coin exhibits thick, frosted mint luster. A few minor abrasions and luster grazes account for the grade, as well as softness of strike over the centers.

Ex: Long Beach Signature (Heritage, 9/2007), lot 2796, where it brought \$4,168.75. NGC ID# 2564, PCGS# 7244

1904-S Dollar, MS64+
Gold and Gunmetal Patina

- 3130 1904-S MS64+ NGC.** Distribution of the 1904-S took place slowly from the 1930s through the 1950s, but no great quantities were released thereafter. Khaki-gold and gunmetal patina uniformly covers each side, confirming the originality of this near-Gem and minimizing the effects of the few grade-limiting marks. Overall, the coin is obviously high-end for the grade. All 1904-S dollars suffer from central strike softness. NGC ID# 256W, PCGS# 7294

PROOF MORGAN DOLLARS

1882 Morgan Dollar, PR66 Cameo
Warm Golden Toning

- 3131 1882 PR66 Cameo NGC.** Cameo proof 1882 Morgan dollars are in the minority, and Ultra Cameo pieces are rare in all grades. This Premium Gem Cameo is beautifully preserved and showcases dramatic contrast, accentuated by warm golden toning that deepens in the margins. The fields are deeply mirrored and seemingly flawless. A beautiful proof type coin. Census: 15 in 66 Cameo, 13 finer; 3 in 66 Ultra Cameo, 6 finer (9/18). NGC ID# 2726, PCGS# 87317

1883 Morgan Dollar, PR64 Cameo
Sharp and Well-Contrasted

- 3132 1883 PR64 Cameo NGC. CAC.** The proof Morgan dollars of 1883 usually do not have the level of cameo contrast that is seen on earlier dates. No Ultra Cameos have been certified by NGC, and Cameo coins are scarce. This CAC-approved near-Gem displays a full strike and stark white-on-black contrast. The interiors are brilliant, surrounded by a halo of light yellow-gold border toning. Census: 6 in 64 Cameo (1 in 64+), 33 finer. CAC: 2 in 64, 10 finer (9/18). NGC ID# 27YV, PCGS# 87318

1884 Morgan Dollar, PR65 Cameo
Appreciable Cameo Contrast

- 3133 1884 PR65 Cameo NGC.** This is a fully struck Gem proof with appreciable cameo contrast. The faintest trace of light rose-gold color tints the margins, but the coin presents as brilliant from most angles. A few stray lines in the fields are not out of line for the grade, and a russet toning spot near the back of Liberty's cap serves as a pedigree marker. The year 1884 was the first in which no official Trade dollar production took place. Only Morgan dollar proofs were distributed to collectors. The mintage was 875 coins. Census: 14 in 65 Cameo, 27 finer; 0 in 65 Ultra Cameo, 3 finer (9/18). NGC ID# 27ZB, PCGS# 87319

1884 Morgan Dollar, PR67
Elusive Cameo Specimen

3134 1884 PR67 Cameo NGC. In *A Guide Book of Morgan Silver Dollars*, fifth edition, Q. David Bowers' comments on the proof 1884 Morgan dollar are short: "Good strike and deep cameo contrast." Nonetheless, pieces graded as Cameos are scarcer for this date than many other Morgan issues, and only a few Ultra or Deep Cameo pieces are known. This Superb Gem Cameo is starkly contrasted and brilliant throughout the interiors, yielding to autumn-gold border toning that adds warmth to each side. A beautifully preserved, conditionally rare example that will excite the proof Morgan dollar specialist. Census: 12 in 67 Cameo (1 in 67+, 2 in 67 ★), 3 finer (including a trio of PR68 Ultra Cameos) (9/18). NGC ID# 27ZB, PCGS# 87319

1885 Morgan Dollar, PR65 Cameo
Pale-Gold Toning, Frost-White Motifs

3135 1885 PR65 Cameo NGC. In general, the Morgan dollar proofs dated 1880 to 1885 are well-produced with high percentages of cameos. This 1885 is one of them, with glassy mirrored fields and smooth, frosted devices for outstanding Gem Cameo quality. A proof mintage of 933 pieces was struck and nearly all were sold. While Cameo examples can be found, Deep Cameos are rarely seen, making this sharply struck contrasted Gem a suitable alternative. Census: 18 in 65 Cameo (1 in 65+, 1 in 65 ★), 23 finer (9/18). NGC ID# 27ZE, PCGS# 87320

1888 Morgan Dollar, PR65
Vivid, Multicolor Toning

3136 1888 PR65 PCGS. Deceptively well-mirrored under a coating of orange-gold, violet, and sea-green patina that requires a slight angle to be fully appreciated. Some weakness of definition is noted in the centers, not at all unusual for Morgan Dollar proofs from this time period. Population: 17 in 65 (1 in 65+), 7 finer (8/18). Ex: *FUN Signature* (Heritage, 1/2005), lot 11964, realized \$3,450. NGC ID# 27ZH, PCGS# 7323

1895 Morgan Dollar, Toned PR62
Pleasing Example of This Rarity

3137 1895 PR62 NGC. A pleasing lower-end example of the famous 1895 proof rarity. The 1895 Morgan dollar was struck to the extent of 880 coins, a normal production total for proof silver dollars. Following standard practice, these were distributed in silver proof sets for the year. However, those sets were largely broken up by collectors to access the silver dollar. An absence of circulation strikes from Philadelphia that year caused the 1895 proof dollar to be a recognized rarity by early 1896. Later, the Chapman brothers suggested that no circulation strikes were ever produced, and that school of thought prevails today among many numismatists. A Mint document reports a coinage of 12,000 circulation strikes, but whether or not these pieces were actually struck does not change the modern day reality: no circulation strike 1895 silver dollars have ever been available to collectors.

The 1895 proof is the king of the Morgan dollars today, a necessary acquisition for every collector looking to complete a date and mintmark set. This example is well-struck and reflective. Mottled multicolor toning in the fields prevents some scattered marks from offending the eye. NGC ID# 27ZR, PCGS# 7330

PEACE DOLLARS

1922-D Peace Dollar, MS66+
Essentially the Highest Obtainable Grade

3138 1922-D MS66+ PCGS. CAC. VAM-1Z. Few collectors will ever have the chance to obtain one of the few Superb Gem 1922-D Peace dollars graded by PCGS. This outstanding Plus-graded and CAC-approved Premium Gem is the next best thing. Indeed, it nearly qualifies for that ultimate grade level. Satiny, well-struck surfaces are almost entirely brilliant. A slender wisp of gold color above UNITED is the sole exception, and a tiny alloy spot is noted above (AMERIC)A. A long die crack appears at the lower left obverse, and a die cud forms below the mintmark, confirming the R.6 VAM-1Z attribution. PCGS reports three finer submissions, none of which have been endorsed by CAC (8/18). NGC ID# 257D, PCGS# 7358

1934-S Peace Dollar, MS66
None Seen in Higher Numeric Grades

3139 1934-S MS66 NGC. The San Francisco Mint was tasked to strike Peace dollars on October 26, 1934, leaving just over one month to complete production for the year. Understandably, only a small mintage of 1.1 million pieces was accomplished. Relatively few examples were saved for numismatic purposes in the 1930s, as collectors failed to appreciate the elusive nature of the issue. As a result, the 1934-S is the most challenging issue of the series to locate in Mint State grades.

The present coin is a spectacular Premium Gem, with well-detailed design elements that show just a touch of the usual softness on Liberty's hair and the eagle's shoulder. The impeccably preserved surfaces radiate vibrant mint luster, with understated hints of golden-tan and lavender toning. Census: 14 in 66 (1 in 66 ★), 0 finer (9/18). NGC ID# 257Z, PCGS# 7377

CERTIFIED MODERN PROOF SET

1936 Five-Piece Proof Set, PR63 to PR65
All PCGS-Certified

3140 1936 Five-Piece Proof Set, PR63 to PR65 PCGS Secure. The coins are individually housed in Secure holders with consecutive certification numbers. The set includes:

Cent — Brilliant Finish — PR65 Red. This Gem proof has an array of coppery-red and golden hues that ultimately bleed into a thin halo of peripheral violet. The strike is full, and there are no bothersome spots.

Nickel — Satin Finish — PR63. A razor-sharp Select proof with satiny surfaces and delicate iridescent toning. Both sides have a few dark spots that limit the numeric grade.

Dime PR64. This is a needle-sharp Choice proof with light rose-gold toning that yields russet and olive hues when tilted beneath a light. No distractions are seen.

Quarter PR63. A glimmering Select proof with full design sharpness. Dusky toning includes shades of lilac-gray, olive, and gold.

Half Dollar PR64. This Choice proof is fully struck and reflective. Tinges of blue, green, and lilac toning appear in the margins, while the interiors show primarily golden-gray color. An eye-appealing example of the first-year proof. (Total: 5 coins)

GOLD DOLLARS

1851-C Gold Dollar, MS63
Excellent Type Coin

- 3141 1851-C MS63 NGC. Variety 1.** Just over 50% of the Type One gold dollars that were produced in the Charlotte mint were dated 1851. As a result, the 1851-C is a relatively available issue in the context of the series and a popular choice with branch mint type collectors. The surfaces of this coin show granularity in the obverse fields and there are heavy die clash marks on the reverse. Bright yellow-gold color characterizes this piece and the striking details are unusually strong for a Charlotte coin—one might even say fully struck. Struck from striated dies that give the coin its brightness. Census: 16 in 63, 11 finer (9/18).

Ex: Dallas Signature (Heritage, 12/2004), lot 6429, realized \$4,887.50. NGC ID# 25BL, PCGS# 7514

1852 Gold Dollar, MS66
Fantastic Type One Representative

- 3142 1852 MS66 NGC.** Gold dollars from this period were produced in great quantities, but survivors are relatively scarce in top grades like the Premium Gem offered here. The impression is fully rendered throughout. Orange-gold surfaces radiate vibrant mint luster and lack any marks worthy of mention. A fantastic Type One representative. Census: 19 in 66, 5 finer (9/18). NGC ID# 25BP, PCGS# 7517

1880 Gold Dollar, MS67+
Sharp and Semiprooflike

- 3143 1880 MS67+ PCGS Secure. CAC.** The 1880 gold dollar was well-saved at the time of issue, although its mintage of only 1,600 coins remains enticing. Relatively few CAC-endorsed coins are known in Superb Gem condition. This Plus-designated example displays fully struck design elements and original sun-gold color. The fields are semiprooflike, as found on many high-grade gold dollars of this date. NGC ID# 25DJ, PCGS# 7581

1883 Gold Dollar, MS68
Among the Finest at PCGS and CAC

- 3144 1883 MS68 PCGS Secure. CAC.** The low-mintage gold dollar issues of the 1880s were universally well-saved. High-grade examples of each date are available today for minimal expense. However, few survive so fine as to qualify for the MS68 grade level, and CAC green labels are a rare sight on these. This 1883 example is a Registry Set collector's dream coin and a virtually unsurpassable type coin. Virtually flawless surfaces glisten with shimmering luster and warm orange-gold and peach hues. The strike is sharp and eye appeal is outstanding. The coin is among the finest 1883 gold dollars at PCGS and CAC. The last MS68 PCGS coin with a CAC sticker that we handled was the Duckor coin (Heritage, 8/2015), which garnered \$18,800. Population: 19 in 68, 0 finer. CAC: 8 in 68, 0 finer (9/18). NGC ID# 25DM, PCGS# 7584

EARLY QUARTER EAGLES

1804 Quarter Eagle, Near-Mint
BD-2, 14 Stars Reverse

3145 1804 14 Stars Reverse, BD-2, R.4, AU58 NGC. Though only 3,327 quarter eagles were delivered in 1804, two die pairs are known. They share the same obverse die but have different star counts on the reverse, and thus merit separate *Guide Book* listings. The variety with too many stars, BD-2, is very scarce yet more available than the rare BD-1, which has a correct reverse star count. The BD-2 die puncher misplaced the first star partially into the eagle's left wing, and apparently overlooked or discounted it as the other stars were entered. Nonetheless, the reverse die was also used to strike 1804 JR-2 dimes. The present near-Mint BD-2 example offers attractive canary-gold surfaces. Abrasions are absent, though a lint mark (as made) behind Liberty's cap provides an identifier. The strike is good aside from softness on the left-side margins. Census: 22 in 58 (1 in 58+), 11 finer (9/18). NGC ID# BFGT, PCGS# 45510 Base PCGS# 7652

1825 BD-2 Two and a Half, MS61
Semireflective Fields

3146 1825 BD-2, High R.4, MS61 PCGS Secure. Like other dates of the Capped Head Left type, the 1825 has a low mintage (4,434 pieces) and a low survival rate. Among the three die marriages, BD-2 is the most collectible, though Dannreuther estimates only 80 to 100 pieces escaped the melters. A link between the other two 1825 marriages, BD-2 shares the wide fraction reverse with BD-1 and the repunched 5 obverse with BD-3. This well-struck representative exhibits flashy sun-gold fields and relatively few marks. An important opportunity to acquire an Uncirculated example of a rare early gold type. For all BD-2 varieties, Population: 11 in 61, 14 finer (9/18). NGC ID# 25FG, PCGS# 45519 Base PCGS# 7664

CLASSIC QUARTER EAGLE

1835 Quarter Eagle, MS63
Scarce Issue, Rare Any Finer

- 3147** 1835 MS63 PCGS Secure. CAC. Breen-6141, Variety 6, R.2. Ex: "Col." Green, Newman. Wide AM variety. The 1835 quarter eagle is surprisingly scarce in Mint State for an issue with a mintage of more than 130,000 pieces. Characteristic softness on Liberty's hair curls near the ear and some minor blending at the left (facing) shield corner and wing are typical for the issue. The fields are partially prooflike and appealing. Reddish-gold highlights are especially prominent and attractive on the reverse, while the obverse displays rose-red shades over the lustrous green-gold patination. Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$15.00; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part V (Heritage, 11/2014), lot 3203, which realized \$9,987.50. NGC ID# 25FT, PCGS# 7693

LIBERTY QUARTER EAGLES

1842-C Liberty Quarter Eagle, AU58+
Rare, Low-Mintage Southern Gold Issue

- 3148** 1842-C AU58+ PCGS. CAC. Variety 1. The 1842-C Liberty quarter eagle claims a minuscule mintage of 6,729 pieces. Few examples were saved by early collectors, as there was little interest in branch mint issues at the time. In addition, the 1842-C was not a well-produced issue, and the central design elements are almost always softly struck. As a result, the 1842-C is one of the most challenging issues of the C-mint series, especially in high grade. The present coin is a Plus-graded near-Mint example, with just a trace of actual wear and a typical strike for the issue. The letters in LIBERTY are better-formed than usual, but the curls above the forehead are softly rendered and a touch of the usual softness shows on the eagle's leg. The slightly granular orange-gold surfaces are lightly abraded and retain significant amounts of original mint luster. The overall presentation is most attractive for this underrated Southern gold rarity. Population: 4 in 58 (1 in 58+), 2 finer. CAC: 4 in 58, 1 finer (9/18). NGC ID# 25GH, PCGS# 7724

1872 Quarter Eagle, Reflective MS61
3,000 Coins Struck, Underrated Issue

- 3149** 1872 MS61 PCGS Secure. Of the 3,000 quarter eagles struck in 1872, maybe 100 pieces survive, including 10 or 12 examples in Mint State. This MS61 could understandably be mistaken for a proof, the fields being deeply reflective and the devices fully struck. Yellow-gold surfaces are predictably abraded, and a small lamination occurs above Liberty's nose. Population: 4 in 61, 4 finer (9/18). NGC ID# 25KK, PCGS# 7815

1873 Closed 3 Quarter Eagle, MS65+
Exceptional Example of the Scarcer Type

- 3150** 1873 Closed 3 MS65+ PCGS. CAC. The Closed 3 quarter eagle is much scarcer than the Open 3 variant, having been struck earlier in the year in small quantities (55,200 coins minted). The star radials are crisp, but the brow, forecurl, and left leg are trivially soft. However, this conditionally rare two and a half dollar coin is wonderfully unabraded with smooth yellow-gold surfaces and frosty luster. Population: 14 in 65 (1 in 65+), 3 finer. CAC: 3 in 65, 0 finer (8/18). NGC ID# 25KN, PCGS# 7818

1889 Quarter Eagle, MS65
Tied for Finest at PCGS

- 3151** 1889 MS65 PCGS. CAC. The 1889 quarter eagle is moderately elusive in all Mint State grades, but it is genuinely rare in MS65. This Gem is among the finest coins certified by PCGS and one of only five pieces in this grade with a CAC green label. Frosty luster shimmers beneath a light. The surfaces are unblemished and showcase original peach and rose-gold hues. Some strike weakness is noted on the eagle's left (facing) leg and the hair curls around Liberty's face. Population: 15 in 65, 0 finer. CAC: 5 in 65, 1 finer (9/18). NGC ID# 7JTT, PCGS# 7841

PROOF LIBERTY QUARTER EAGLE

1894 Proof Quarter Eagle
Uncirculated Sharpness

- 3152** 1894 — Altered Surfaces — PCGS Genuine Secure. Proof, Unc Details. A mintage of 122 proof quarter eagles in 1894 produced a limited survivorship of this issue. Enthusiasts of 19th century proof gold frequently keep an eye out for affordable coins with good eye appeal. This sharp proof will appear unimpaired to most collectors. A trained eye notices a slight haze in portions of the fields the prevents a numeric grade, but other contact marks and stray hairlines are typical of lower-grade proof quarter eagles. Modest cameo contrast is apparent on each side, complementing rich honey-gold coloration.

INDIAN QUARTER EAGLES

1911-D Quarter Eagle, AU58
Strong D, Famous Series Key Date

- 3153** 1911-D AU58 PCGS Secure. Strong D mintmark. The mintage was low (55,680 pieces) and demand is high for the undisputed key to the Indian Head quarter eagle series. This is the Strong D variant, always preferred by a majority of collectors over its Weak D counterpart. Mint luster glows from both sides of the coin, which displays a sharp strike and attractive, medium-gold color. A pair of tiny reverse rim nicks at OF and a faint, thin mark near the mouth are the sole signs of brief circulation on this nearly Mint State example. NGC ID# 7KR7, PCGS# 7943

1914-D Two and a Half, MS65
Series Condition Key

3154 1914-D MS65 NGC. The 1914-D Indian quarter eagle is a condition key in MS65, one of the three rarest dates in the series this fine. In *Indian Gold Coins of the 20th Century*, Mike Fuljenz writes: "It is not really all that hard to find an attractive 1914-D in the Mint State-63 to Mint State-64 range, but true Gems are extremely scarce and this will prove to be one of the hardest dates in the series for the connoisseur."

The present example is indeed well-preserved, with frosted original luster and minimal abrasions. The strike is sharp. Both sides have pleasing yellow-gold coloration and good eye appeal. There is just one numerically finer example of this issue known. Census: 47 in 65 (2 in 65+), 1 finer (9/18). NGC ID# 2899, PCGS# 7947

1914-D Indian Quarter Eagle, MS65+
Only One Finer Certified

3155 1914-D MS65+ NGC. The 1914-D Indian quarter eagle claims a mintage of 448,000 pieces and the issue is not difficult to locate in lower Mint State grades, but it is the leading condition rarity of the series in grades above the MS65 level. The 1914-D was not a well-produced issue, and is frequently seen with a soft strike and excessive die buckling. This Plus-graded Gem exhibits unusually sharp definition on all design elements, but evidence of die buckling shows on both sides, leaving a "creased" mintmark on the reverse. The well-preserved copper-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. Only one finer coin appears in the population data from either of the leading grading services. Census: 47 in 65 (2 in 65+), 1 finer (8/18). NGC ID# 2899, PCGS# 7947

THREE DOLLAR GOLD PIECES

1854 Three Dollar Gold, MS64
Popular First-Year Issue

- 3156** 1854 MS64 PCGS Secure. CAC. The 1854 three dollar gold piece represents the first year of the denomination, an important consideration for type purposes. This attractive Choice example exhibits sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. The 1854 becomes quite elusive in grades above the MS64 level. PCGS has graded 40 numerically finer examples (8/18). NGC ID# 25M3, PCGS# 7969

1866 Three Dollar, MS63
A Rarity in This Condition

- 3157** 1866 MS63 NGC. The small 4,000-coin mintage of the 1866 three dollar gold piece is not unusually low for the series, but this issue was produced before many low-mintage dates were heavily saved, as happened in the 1880s. The 1866 is scarce in Uncirculated condition, and Select or finer coins are decidedly rare. This piece displays shimmering yellow-gold luster with a hint of reflectivity in the obverse fields. The only strike weakness is seen on the wreath bowknot, and it is minor. Census: 6 in 63, 3 finer (9/18). NGC ID# 25MM, PCGS# 7987

1888 Three Dollar, MS66
Thick Mint Frost, Rich Reddish Patina

- 3158** 1888 MS66 PCGS. Because of its low mintage of only 5,000 pieces, a substantial percentage (around 10%) were set aside at the time of production with even more examples pulled from circulation later. As a result, nice Uncirculated 1888 threes are not all that challenging to locate. However, PCGS has only certified 33 other MS66 pieces with a mere two examples finer. This is a lovely piece that displays thick mint frost and even reddish patina over each side. Sharply struck throughout with surfaces that are as clean as expected from this lofty grade. NGC ID# 25NB, PCGS# 8010

EARLY HALF EAGLES

1800 BD-4 Half Eagle, Choice XF
Early Die State

- 3159** 1800 BD-4, R.4, XF45 PCGS Secure. Bass-Dannreuther Die State c/a, perfect reverse. Remarkably little wear is evident, even for the Choice XF grade level. The surfaces display pleasing olive-gold patina with deeper orange undertones. The strike is even and sharp. A couple of green verdigris spots are visible at the RT in LIBERTY, and a few smaller ones are hidden within Liberty's hair curls. An appealing early die state example of this collectible early half eagle variety. NGC ID# 25NW, PCGS# 45594 Base PCGS# 8082

1800 BD-5 Half Eagle, AU50
Rare Early Die State

- 3160** 1800 BD-5, High R.3, AU50 PCGS. Bass-Dannreuther Die State d/a. No reverse die cracks are visible on this rare early die state example. The strike is sharp and even, with no planchet adjustment marks visible in the margins. Original luster glistens in the fields amid warm straw-gold and honey-colored patina. Only light surface marks are visible beneath a loupe. An outstanding early half eagle type coin. NGC ID# 25NW, PCGS# 45595 Base PCGS# 8082

1803/2 Capped Bust Right Five, AU55
Popular Perfect T, BD-4 Variety

- 3161** 1803/2 BD-4, R.4, AU55 NGC. Bass-Dannreuther Die State c/c, with a long die crack from star 1, through the bottom of the date, to near star 3. Another crack on the reverse completely bisects the coin, from the rim by E in AMERICA, through the eagle and shield, and out the eagle's left (facing) wingtip, to the rim. Only light wear shows on the well-detailed design elements and the lightly abraded orange-gold surfaces exhibit traces of original mint luster. Light planchet adjustment marks are evident in the obverse dentils, with a couple of heavier lines across Liberty's cheek. NGC ID# 25NY, PCGS# 504951 Base PCGS# 8084

1804 BD-2 Half Eagle, AU58
Terminal Obverse Die State

- 3162** 1804 Small 8, BD-2, High R.4, AU58 NGC. Bass-Dannreuther Die State d/f. Only 70 to 90 examples of BD-2 are thought to survive in all grades. This near-Mint example is in the latest die state, which is terminal for the obverse with a retained cud above the TY in LIBERTY and a bisecting crack from the 0 in the date to the I in LIBERTY. This is only the second use of this obverse die. The reverse was previously used for two 1803 die marriages, and it continued in use for a total of three 1804 pairings. This coin displays partial luster in the fields and has bright yellow-gold color. The strike is sharp and wear is light. Scattered light abrasions accompany a brief time in circulation. NGC ID# 25NZ, PCGS# 519892 Base PCGS# 8085

1805 Half Eagle, BD-2, MS61
Shattered Obverse Die

- 3163** 1805 BD-2, R.4, MS61 NGC. Bass-Dannreuther Die State g/d. BD-2 represents the second and final use of this obverse die, and the first of five uses for this reverse. It is an available variety among early half eagles with likely more than 100 pieces known. This piece represents the terminal die state of the obverse. It is heavily clashed and it has extensive die cracks. The coin is lustrous in the fields and satiny on the devices, showing lightly abraded yellow-gold surfaces. The strike is weak on the left portion of the reverse shield and the arrows, but the obverse portrait is well-defined. The border stars are incompletely struck as usual. Eye appeal is pleasing on this Mint State Capped Bust Right type coin. NGC ID# 25P4, PCGS# 45616 Base PCGS# 8088

1807 Capped Bust Right Half Eagle, AU53
Final Year of the Design, BD-6

- 3164** 1807 Bust Right, BD-6, High R.4, AU53 NGC. Bass-Dannreuther Die State a/b. An impressive AU53 example of the final die variety in the final year of the Capped Bust Right half eagle series, this coin exhibits only light wear on the design elements, with some minor loss of detail on cloud 3, due to lapping. Evidence of recutting shows on the 1 in the date. The lightly abraded orange-gold surfaces retain a few traces of original mint luster. Some light planchet adjustment marks show in the reverse dentils on the right. The surviving population of the BD-6 numbers no more than 80-100 examples in all grades. NGC ID# CKLF, PCGS# 519905 Base PCGS# 8092

1808 BD-3 Half Eagle, Unc Sharpness
Excellent Luster and Color

- 3165** 1808 Close 5D, BD-3, R.4 — Scratches — NGC Details. Unc. Bass-Dannreuther Die State b/e, clashed along the lower reverse from Liberty's cap. Clash marks also appear elsewhere on the reverse and throughout the obverse fields. This is actually the second set of clash marks for this variety, as earlier clashing was effaced by die lapping in a previous die state. This late-state BD-3 coin displays a sharp strike and luminous orange-gold luster. A couple of short scratches in the left obverse field and others between STATES and the ribbon on the reverse prevent a numeric grade from NGC but do not visually detract.

1810 Capped Bust Left Half Eagle, XF40
Large Date, Large 5, BD-4

- 3166** 1810 Large Date, Large 5, BD-4, R.2, XF40 PCGS. Bass-Dannreuther Die State c/b. A lightly worn XF specimen of this popular and reasonably available early half eagle, with slightly granular antique-gold surfaces that retain traces of original mint luster, with the expected number of minor abrasions for the grade. The design elements are well-detailed, with interesting clash marks above the cap and through the top of the date. A die crack extends from the clasp to the field between 8 and the second 1 in the date. Light adjustment marks are visible in the reverse dentils on the lower left. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

**1811 Capped Bust Left Five, XF45
Tall 5, BD-1 Variety**

- 3167** 1811 Tall 5, BD-1, High R.3, XF45 PCGS. CAC. Bass-Dannreuther Die State b/d. A Choice XF specimen of this somewhat scarce variety, with some light wear on the strongly impressed obverse design elements and some loss of detail on the reverse, due to lapping. Some faint clash marks are evident on the upper reverse. The lightly abraded surfaces retain traces of original mint luster, with orange-gold centers that deepen into rose at the peripheries. NGC ID# BFXS, PCGS# 507600 Base PCGS# 8110

CLASSIC HALF EAGLES

**1837 Classic Head Five, MS62
Scarce and CAC Endorsed**

- 3168** 1837 MS62 PCGS. CAC. Breen-6512, McCloskey 2-B, R.2. Large Date, Block 8. Most type coin collectors settle for an 1834 Plain 4 or 1836 Classic Head half eagle due to the availability of those issues in Mint State. The 1837 is scarce this fine, and it is a rarity in higher grades. The present coin boasts the coveted CAC endorsement. Frosty original luster illuminates original yellow-gold surfaces and shows no major abrasions. Star 1 on the obverse exhibits the only mentionable strike weakness. Population: 12 in 62 (1 in 62+), 17 finer. CAC: 6 in 62, 9 finer (9/18). Ex: Mills Collection (*Stack's*, 5/1976), lot 380. NGC ID# 25RZ, PCGS# 8175

**1838 Classic Five, Still-Lustrous AU58
Exceptional Preservation**

- 3169** 1838 AU58 PCGS. CAC. Breen-6514, McCloskey 1-A, R.2. Large Arrows, Small 5. The 1838 is one of the more available dates in this short, completable series. Few examples, especially those in near-Mint condition, can compare to this exceptional coin. The surfaces retain generous portions of mint luster around the devices, and a significant presence of reddish patina accompanies the expected yellow-gold. Minimally abraded and well-defined. Population: 36 in 58 (4 in 58+), 69 finer. CAC: 21 in 58, 18 finer (9/18). NGC ID# 25S4, PCGS# 8176

LIBERTY HALF EAGLES

**1846-O Half Eagle, Scarce AU55
Overlooked Branch Mint Issue**

- 3170** 1846-O AU55 NGC. Variety 3. Considerable luster remains on the tawny-yellow surfaces, with a frame of pale-orange toning confined to the wide, square rims that surround the dentils. The surfaces are moderately abraded as expected. Although 58,000 pieces were minted, this issue is seen infrequently in auctions. Offerings in grades higher than the present piece occur only once a year or so, on average. Census: 17 in 55, 32 finer (9/18). Ex: Houston Signature (*Heritage*, 12/2009), lot 1652. NGC ID# 25TK, PCGS# 8230

**1847 Half Eagle, MS63+
Radiant No Motto Type Coin**

- 3171** 1847 MS63+ PCGS. CAC. This issue frequently serves as a popular No Motto type because of its relative availability. In this outstanding state of preservation, it is conditionally scarce. The two hallmarks of this high-end Select representative are the exceptionally strong strike and vibrant mint luster. Each side displays a handful of small alloy spots, and marks are lightly scattered throughout, posing no serious distraction. Only a thin pinscratch between stars 6 and 7 merits mention. A bisecting crack runs from the rim through (STATE)S down to the right claw, where it splits, forming a sizeable break. Population: 23 in 63 (3 in 63+), 6 finer. CAC: 7 in 63, 2 finer (8/18). NGC ID# 25TL, PCGS# 8231

1850-D Five Dollar, AU55
Exceptional Color and Surfaces

- 3172** 1850-D AU55 NGC. Variety 28-U. The 1850-D half eagle is scarcer than its mintage of 43,984 coins would suggest. Doug Winter writes in *Gold Coins of the Dahlonega Mint*, third edition: "The underappreciated 1850-D remains one of the rarest half eagles from this mint, both in terms of overall rarity and in higher grades." Fewer than 175 pieces are believed known, and this date is a major rarity in Uncirculated condition. This Choice AU example displays smooth, satiny surfaces with original wheat-gold luster and a sharp strike. Eye appeal far surpasses expectations for the grade. Census: 28 in 55, 23 finer (9/18). NGC ID# 25U3, PCGS# 8245

INDIAN HALF EAGLES

1909-O Half Eagle, AU Details
Clear Mintmark

- 3173** 1909-O — Improperly Cleaned — NGC Details. AU. The mintmark is sharp on this AU-level 1909-O half eagle, a one-year Indian Head type coin from the New Orleans Mint. This piece is lightly cleaned with bright yellow-gold surfaces, but the detail is sharp. Scattered abrasions are typical of a gold piece that spent a brief period of time in circulation. This piece also has a linear planchet lamination that stretches from the L in LIBERTY to the T.

1909-O Indian Head Five, AU58+
New Orleans Key

- 3174** 1909-O AU58+ NGC. In the Indian half eagle series, the 1929 is the rarest issue overall. However, the rarest date in Uncirculated condition is the 1909-O. Since our Permanent Auction Archives began in 1993, we have handled a Mint State 1909-O on 77 occasions, including duplicate appearances by some coins. Moreover, most of these coins were in MS60 or MS61. This contrasts with the auction appearance rate of the 1929, which we have handled in Uncirculated condition 128 times. Additionally, most of the 1929s that we have seen graded MS63 or MS64. The 1929 is a melt rarity that survives almost entirely in Mint State. The 1909-O is a low-mintage key date with a high attrition rate. Only 34,200 coins were struck.

This About Uncirculated 1909-O is as close to Mint State as possible without qualifying for an MS60 grade, and it possesses many attractive attributes of its higher-grade counterparts: luster, sharp detail, and moderate eye appeal. It does have a brush of high-point friction and scattered abrasions, although these are expected. This is one of just seven AU58 coins that NGC has awarded a Plus designation (9/18). NGC ID# 25ZK, PCGS# 8515

1914 Five Dollar, MS64+
Exemplary in Every Respect

- 3175** 1914 MS64+ PCGS Secure. CAC. The 1914 Indian half eagle is a rarity in Gem condition, which supports the importance of this Plus-graded Choice offering. Moreover, the CAC endorsement on this piece puts it in an elite minority of the near-Gem survivorship. Softly frosted luster is arguable of Gem quality on the obverse, with only a few reverse field marks limiting the grade. Sharp devices complement original orange-gold and straw-yellow hues. PCGS lists only 34 finer submissions. CAC: 55 in 64, 11 finer (8/18). NGC ID# 28DU, PCGS# 8527

EARLY EAGLES

1799 Capped Bust Right Eagle, MS61
Small Obverse Stars, BD-7

- 3176** 1799 Small Obverse Stars, BD-7, R.3, MS61 PCGS. The 1799 Capped Bust Right eagle claims a reported mintage of 37,449 pieces, with 10 die varieties known for the date. Eight varieties display small stars on the obverse, while the final two exhibit large stars. This coin is an example of the Small Stars BD-7 variety, with the 17 in the date slanted to the right, and star 13 on the reverse positioned away from the ribbon. The BD-7 is one of the more available varieties, probably accounting for 10,000-15,000 pieces of the reported mintage. John Dannreuther believes 250-350 examples are still extant in all grades.

The present coin is an attractive Mint State example, with vivid lemon-yellow and greenish-gold surfaces. The design elements are sharply detailed, and the surfaces retain much prooflike reflectivity in sheltered areas. Population: 20 in 61, 48 finer (8/18).

Ex: FUN Signature (Heritage, 1/2012), lot 4959, realized \$29,900. NGC ID# 2625, PCGS# 45730 Base PCGS# 98562

1801 BD-2 Ten Dollar, AU Sharpness
Collectible Early Gold Type

3177 1801 BD-2, R.2 — Repaired — PCGS Genuine Secure. AU Details. This sharply defined honey-gold example has a hairlined obverse and a coarse mattelike reverse. The field above the eagle's head is smoothed. BD-2 is the specialist-familiar variety with nine equally spaced vertical die lines within Liberty's cap. The explanation for the die lines is unclear; they are not clash marks from the shield. Instead, it appears that a file or similar corrugated metallic object was inadvertently pressed into the obverse die, akin to the 1804 Spiked Chin half cent.

1801 Capped Bust Right Eagle, MS63
Popular BD-2 Variety

3178 1801 BD-2, R.2, MS63 PCGS Secure. Bass-Dannreuther Die State a/a, actually an intermediate die state, without the often-seen vertical spines in the cap, but with some light clash marks on the reverse, before that die was lapped. A substantial mintage of 43,344 Capped Bust Right eagles was accomplished in 1801, but some of those coins may have been dated 1800, or even 1799. Only two die varieties are known for the date. This coin represents the more available BD-2 variety, with star 1 distant from the curl. John Dannreuther estimates the surviving population at 600-800 examples in all grades, making the BD-2 a popular choice with type collectors. This was the only use of the obverse die, but the reverse was used again to strike the BD-3 variety of 1803.

The present coin is an attractive Select specimen, with sharply detailed design elements in most areas and just a touch of softness on some star centers. The lightly marked antique-gold surfaces retain much of their original mint luster, with a few flashes of prooflike reflectivity in sheltered areas. Overall eye appeal is outstanding. Population: 37 in 63, 37 finer (9/18). NGC ID# 2627, PCGS# 45734 Base PCGS# 8564

LIBERTY EAGLES

1864-S Ten Dollar, AU55
Only 22 to 26 Pieces Known
Tied for the Finest

3179 1864-S AU55 NGC. The 1864-S is one of the rarest dates in the entire Liberty eagle series. David Hall, writing for CoinFacts, considers it the second-rarest Liberty ten, trailing only the ultra-rare 1875. This issue is often the last to be acquired by collectors who assemble complete date and mintmark sets. It is more difficult to locate an 1864-S Liberty ten than most of the more highly heralded Carson City keys. Certainly, this issue has room for even greater collector appreciation.

The San Francisco Mint struck a paltry 2,500 Liberty tens in 1864, all of which entered circulation. This issue is unknown today in Mint State, and there are but 22 to 26 circulated pieces extant according to PCGS (25 to 30 coins, per Doug Winter's estimate). Since our Permanent Auction Archives began in 1993, we have handled an example of this issue on only 18 occasions, including three ungraded pieces with a Details designation. This figure also includes more than one appearance of some individual coins. Within the last decade, we have handled just seven different 1864-S eagles. The most recent of these, an XF40 PCGS coin, was in lot 4264 of the Long Beach Signature (Heritage, 2/2018), where it realized \$114,000. The last AU-level coin that we handled was the Donald E. Bently AU53 NGC piece (Heritage, 3/2014), which garnered \$146,875. The present example surpasses both of those coins in grade and eye appeal.

This Choice AU coin is tied for the finest 1864-S Liberty ten known, and it is the first example in this top-most grade that we have ever handled. Elements of luster remain in the protected portions of the fields, complementing sharp design details that have only trivial high-point wear. The fields show light chatter but have no singular abrasions. This is an 1864-S Liberty eagle worthy of being dubbed one of the finest known.

NGC has seen only eight submissions in all grades, with two AU55 coins being the finest; PCGS also lists two AU55 coins at the top of their *Population Report* (8/18). We have been able to verify the existence of at least three pieces in this grade. We look forward to placing this magnificent rarity in a high-end 19th century gold collection. NGC ID# 55MT, PCGS# 8640

1879 Ten Dollar, MS64
Rare at This Level

- 3180 1879 MS64 PCGS.** In 1879, ten dollar gold production at the Philadelphia Mint reached a high unseen since the start of the California Gold Rush. A total of 384,780 coins were struck, yet examples are surprisingly rare at this near-Gem level. Frosty peach-gold surfaces are boldly detailed with just minor softness on the forecurls. Trivial ticks appear on each side under a loupe. Population: 14 in 64 (1 in 64+), 3 finer (9/18). NGC ID# 265M, PCGS# 8683

1882-O Liberty Eagle, AU58
Scarce, Low-Mintage Issue

- 3181 1882-O AU58 NGC. Variety-1.** The 1882-O Liberty eagle claims a low mintage of 10,820 pieces, certainly a small production total in absolute terms, but not particularly notable in the context of the O-mint series. This attractive near-Mint specimen shows just a trace of wear on the strongly impressed design elements and the pleasing orange-gold surfaces show scattered minor abrasions on both sides. Traces of prooflike reflectivity show in protected areas around the devices. Census: 44 in 58, 16 finer (9/18). NGC ID# 55GJ, PCGS# 8697

INDIAN EAGLES

1907 Indian Eagle, MS66+
Exceptional First-Year Type Coin

- 3182 1907 No Motto MS66+ PCGS Secure.** The 1907 eagle represents the first year of the Indian design and features the short-lived No Motto motif, both important considerations for type purposes. From a fairly substantial business-strike mintage of 239,406 pieces, the 1907 is reasonably available in high grade and, even in MS66 condition, the issue can only be called scarce. The population drops off considerably in finer grades, however, and finer coins are definitely rare.

The present coin is a Plus-graded Premium Gem that offers an excellent balance of high quality and value, since finer examples are quite expensive. The design elements are well-detailed, with just a trace of the usual softness on Liberty's curls. The well-preserved reddish-gold surfaces are lustrous and appealing. PCGS has graded 12 numerically finer examples (9/18). NGC ID# 28GF, PCGS# 8852

1908-S Indian Ten, MS61
First S-Mint Indian Eagle

- 3183 1908-S MS61 PCGS.** This is a deep, coppery-gold example of the first-year San Francisco Indian ten dollar — a coin that is a lustrous and original representative, with the characteristic sharp obverse strike that makes the 1908-S a collector favorite. The headdress feathers show full definition and the hair strands are crisp, too. A cluster of marks above E PLURIBUS UNUM accounts for the assigned technical grade, but the eye appeal alone more than compensates. NGC ID# 28GL, PCGS# 8861

1909 Indian Eagle, MS65
Challenging Philadelphia Issue

- 3184 1909 MS65 NGC.** Among Indian eagles from the Philadelphia Mint, the 1909 issue is one of the most challenging to locate in high grade. From a business-strike mintage of 184,789 pieces, most of the coins were either released into circulation, where they suffered the usual wear and attrition, or were held in government storage until they were melted in the 1930s. Today, the 1909 Indian eagle is rare in MS65 condition, and finer coins are even more elusive.

The coin offered here is a spectacular Gem, with sharply detailed design elements and vivid orange-gold surfaces that exhibit no mentionable distractions. Both sides radiate vibrant mint luster, with terrific eye appeal. Census: 24 in 65 (1 in 65+), 7 finer (9/18). NGC ID# 28GM, PCGS# 8862

1910 Indian Eagle, MS65+
Rare Any Finer

- 3185 1910 MS65+ NGC.** The 1910 Indian eagle is not difficult to locate in lower Mint State grades, but examples in MS65 condition are scarce, and finer coins are rare. This Plus-graded Gem offers sharply detailed design elements and virtually pristine orange-gold surfaces, with vibrant mint luster throughout. NGC has graded 37 numerically finer examples (8/18). NGC ID# 28GR, PCGS# 8865

1911-D Indian Eagle, AU58
Elusive, Low-Mintage Issue

- 3186 1911-D AU58 NGC. CAC.** The 1911-D Indian eagle claims a low mintage of just 30,100 pieces, and relatively few examples were saved by contemporary collectors, making it the leading condition rarity of the series. This impressive near-Mint specimen shows just a trace of high-point wear, and the lustrous orange-gold surfaces are free of large or distracting abrasions. NGC ID# 28GU, PCGS# 8869

1915-S Ten Dollar, MS62
Better Date, Low-Mintage Issue

- 3187 1915-S MS62 PCGS.** The 1915-S is scarce in all Uncirculated grades — certainly, at the highest levels — but also in lesser Mint State conditions. This conservatively graded example displays gleaming, sun-gold color and has remarkably few abrasions for the MS62 level — especially for a 1915-S, which has a well-earned reputation for bagmarks and widespread abrasions. The strike, too, exceeds expectations on this attractive Indian ten, which easily fits into any Select Uncirculated or finer set. NGC ID# 28H6, PCGS# 8879

LIBERTY DOUBLE EAGLES

1850 Double Eagle, AU55
First Year of the Denomination

3188 1850 AU55 PCGS. James B. Longacre's double eagle design may have lacked the artistic panache of other U.S. coin designs, but few series can match the long-running and utilitarian aspects of the Liberty Head motif. Introduced to capitalize on the great influx of gold from California, the design quickly proceeded from samples in 1849 to full-scale mintage of more than 1.1 million double eagles in 1850. This Choice About Uncirculated first-year example shows tiny, light abrasions with attractive, orange-gold color and a strong strike. At least 50% of the mint luster survives. NGC ID# 268F, PCGS# 8902

1850 Double Eagle, AU58
Slight Reverse Die Rotation

3189 1850 AU58 NGC. The 1850 enjoys the distinction of being the first regular issue in the double eagle series, its authorization a direct result of the California Gold Rush and a need to convert vast quantities of the yellow metal into usable coinage in an efficient manner. This example is nearly Uncirculated. Its partly lustrous yellow-gold surfaces display minimal evidence of friction, although myriad abrasions are peppered over each side. Well-struck from slightly rotated dies. NGC ID# 268F, PCGS# 8902

1850-O Liberty Twenty, AU55
First Year of Denomination

3190 1850-O AU55 NGC. **Variety 1.** The 1850-O Liberty twenty was the first double eagle struck at any U.S. branch mint, and the issue is always in demand from type collectors, as well as series specialists. A fairly substantial mintage of 141,000 pieces was accomplished, but few high-quality examples were saved by contemporary collectors. As a result, the 1850-O can be easily located in grades up to the XF grade level today, but attractive AU55 examples are quite elusive, and finer coins are rare. This impressive Choice AU specimen exhibits some light wear on the design elements, which are fairly sharp on the central obverse and reverse, but show the characteristic softness on the date and obverse stars. The still-lustrous orange-gold surfaces are lightly abraded throughout. Census: 44 in 55 (1 in 55+★), 26 finer (9/18). NGC ID# 268G, PCGS# 8903

1851-O Twenty Dollar, AU50
New Orleans Type Coin

- 3191 1851-O AU50 PCGS. Variety 1.** This piece is in an early die state not often seen for the variety. The die chip in front of Liberty's eye is smaller, and star 13 is not weakened by lapping. The reverse shows only the faint beginnings of the usual peripheral die cracks. This New Orleans type coin displays excellent detail and has bright yellow-gold surfaces. Light high-point friction and scattered abrasions determine the AU50 grade. NGC ID# 268J, PCGS# 8905

1851-O Twenty, AU55
More Available Type One New Orleans Issue

- 3194 1851-O AU55 NGC. Variety 2.** This die variant is most easily distinguished by the die chip to the left side of the R in LIBERTY on the coronet. With its larger mintage the 1851-O twenty is available in appealing lower-end AU grades, and does not become truly scarce until an AU58 coin is sought. This partially prooflike representative is sharply struck with minimal (small) abrasions present. NGC ID# 268J, PCGS# 8905

1851-O Double Eagle, AU53
Collectible New Orleans Issue

- 3192 1851-O AU53 PCGS. Variety 1.** The 1851-O is one of the more collectible New Orleans issues in the Liberty double eagle series, although it is still challenging to acquire in high grade. This About Uncirculated representative offers partially lustrous fields and pleasing yellow-gold color. The design elements are well-detailed. Scattered abrasions on each side are consistent with the denomination and grade. NGC ID# 268J, PCGS# 8905

1851-O Double Eagle, AU55
Bold Strike Definition

- 3195 1851-O AU55 NGC. Variety 2.** This die marriage exhibits a chip left of the R in LIBERTY and a bold O mintmark slightly left of center over the N in TWENTY. Strike definition for the 1851-O double eagle is usually excellent, among the best New Orleans twenties. Such is the case with this Choice AU example. The only area of softness occurs at the upper obverse, while Liberty's portrait and the eagle are boldly executed. Lightly abraded orange-gold surfaces display partial luster. NGC ID# 268J, PCGS# 8905

1851-O Twenty Dollar, AU53
Sharp, Appealing, and Still Lustrous

- 3193 1851-O AU53 PCGS Secure. Variety-2.** Although it is among the most-available of the 1850s New Orleans twenties, the 1851-O is scarce in About Uncirculated or finer conditions. This bright and still lustrous AU53 example is well-produced for an O-Mint twenty, with minimal abrasions and pleasing yellow-gold surfaces with brassy overtones. The strike remains sharp despite seven points of circulation, and marks are microscopic. Attractive AU examples of the 1851-O rank among the best double eagle values in today's numismatic market. Population: 67 in 53 (1 in 53+), 87 finer (9/18). NGC ID# 268J, PCGS# 8905

1854 Liberty Double Eagle, MS64
 Scarcer Large Date Variant
 Tied for Finest Certified

3196 1854 Large Date MS64 NGC. CAC. It is uncertain when the Large Date variant of the 1854 twenty was discovered, but it had to be prior to 1988, as this variety is listed in Breen's *Encyclopedia* which was released that year. The date is apparently from a logotype used for silver dollars. We disagree with Garrett and Guth when they state "The date size is not hugely dramatic." The few Large Date 1854 twenties we have seen are immediately obvious as the digits in the date fill almost the entire space available in the exergual area.

The breakdown of 1854 twenties from the S.S. *Central America* is interesting with 36 Small Date and 7 Large Date coins recovered. This would indicate that this issue is one that still has many coins left to be discovered in dealer's inventories. Many collectors and dealers are not aware of the Large Date's existence, nor of its rarity and subsequent value. What is extraordinary about this coin is not just that it is a Large Date, but its grade. It is tied with one other example at PCGS for finest known (9/18). Most of the coins we have offered in past auctions have been XF or (mostly) AU. This is just the ninth time we have offered an Uncirculated example of the 1854 Large Date twenty in the past 25 years — representing only six different coins, and one of them was net graded. The surfaces of this spectacular Choice example are remarkably clean and show thick, frosted mint luster on both sides. Even reddish-gold color is seen over both obverse and reverse, and the striking details are sharply defined throughout. Overall eye appeal is terrific.

Ex: Milwaukee Signature (Heritage, 8/2007), lot 2010, realized \$80,500.

From The Marcello Collection. NGC ID# 268S, PCGS# 98911

1855 Double Eagle, MS62
A Rarity in Mint State

3197 1855 MS62 PCGS. With the exception of issues that survived via shipwrecks, only a few Type One Liberty double eagles are extant in significant Mint State numbers. Most are scarce or rare so fine. The 1855 Philadelphia is decidedly rare in Mint State. Since 1993, we have handled an Uncirculated example on only 26 occasions, mostly in MS61 or lower condition. We have seen just eight MS62 coins and a single MS63 finer. This piece is easily among the finest pieces we have handled. Frosted yellow-gold luster illuminates sharp design elements and reveals only trivial contact marks in the fields. Some light die lapping is seen on the obverse at the designer's initials, but the reverse is unlapped. Collectors will be hard-pressed to locate another coin of comparable quality, let alone a finer piece. Population: 5 in 62, 3 finer (9/18). NGC ID# 268V, PCGS# 8914

1856-S Liberty Double Eagle, MS63
Ex: S.S. *Central America*

3198 1856-S MS63 PCGS. Variety 17P. Ex: S.S. *Central America*. SSICA 6173. No Serif, Right S. Like most Type One double eagles, the 1856-S Liberty twenty was a rare issue in high grade before the discovery of the S.S. *Central America*. The 1856-S claims a substantial mintage of more than 1.1 million pieces, but most of the coins were released into circulation at the time of issue, and suffered heavy wear and attrition over the years. Fortunately, more than 1,000 examples were recovered from the celebrated shipwreck, many in Mint State condition.

At least 18 different varieties of the 1856-S double eagle were identified when the treasure was carefully studied. This attractive Select specimen represents Variety 17P, with a broken left serif on U in UNITED and the mintmark located to the right. The design elements are sharply detailed throughout and the lightly marked apricot-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. NGC ID# 2692, PCGS# 8919

1857-O Liberty Twenty, XF40
Elusive O-Mint Issue

3199 1857-O XF40 PCGS Secure. Variety 1. The New Orleans Mint struck just 30,000 double eagles in 1857, a significant increase over the 2,250 coins struck in 1856. However, the '57-O is itself scarce in all grades, and Mint State coins are prohibitively rare. This XF coin displays strong detail and remarkably smooth surfaces with medium yellow-gold color. Hints of luster remain in the most protected regions of the fields, and none of the scattered abrasions are singularly bothersome. NGC ID# 2694, PCGS# 8921

1857-O Double Eagle, Partly Lustrous AU55

3200 1857-O AU55 NGC. Variety 1. Double eagle production at the New Orleans Mint rebounded out of the small four-figure range in 1857, reaching 30,000 pieces. However, this issue circulated extensively and its modern-day availability is limited. Circulated pieces are occasionally seen, but the finer AU-level coins are in high demand since only a few Mint State pieces exist. This Choice About Uncirculated example is especially pleasing. There is some light friction over the high points of the devices and in the open areas of the fields, but the protected peripheral fields glimmer with original prooflike mirroring. A few marks on Liberty's cheek are the only singular distraction. Color on each side is a pleasing straw-gold hue, and eye appeal is outstanding for the issue and grade. Census: 27 in 55, 30 finer (8/18). NGC ID# 2694, PCGS# 8921

1857-S Twenty, MS63 Prooflike
Ex: S.S. Central America

3201 1857-S MS63 Prooflike PCGS. Variety 20B. Ex: S.S. Central America, SSSA 3862. The S mintmark is bold. Many people in the numismatic hobby believed that the recovery of thousands and thousands of Mint State 1857-S double eagles from the wreckage of the S.S. Central America would depress prices and stifle interest in the issue, but it has had the exact opposite effect, bringing non-collectors into the fray and appealing to a wide audience. After all, the coins' historical importance and quality are truly remarkable. This highly lustrous and razor-sharp Select Uncirculated survivor enjoys deep orange-gold color at the margins that lightens to peach and rose hues near the centers. The fields are noticeably reflective with trivial marks and shallow grazes.
From The Marcello Collection. NGC ID# 2696, PCGS# 8922

1857-S Liberty Twenty, MS64
Iconic Shipwreck Specimen

- 3202** 1857-S MS64 PCGS. Variety 20A. Ex: S.S. *Central America*, SSCA 4788. Spiked Shield, named for the two die lines extending from the left side of the shield. This well-preserved Choice example exhibits sharply detailed design elements throughout and the pleasing yellow and orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. NGC ID# 2696, PCGS# 8922

1857-S Liberty Twenty, MS64
From the S.S. *Central America*

- 3203** 1857-S MS64 PCGS. CAC. Ex: S.S. *Central America*, SSCA 3508. A couple of short, thin die lines piercing the left edge of the reverse shield earn this *Central America* variety its "Spiked Shield" moniker. Consistent with norms for SSCA coins, this near-Gem displays frosted rose-gold mint luster across the interiors with vivid orange-gold border toning. A few light marks are not distracting. This sharply struck, CAC-approved 1857-S double eagle will serve well as a No Motto type coin.
From The Marcello Collection. NGC ID# 2696, PCGS# 8922

1859-O Double Eagle, AU50
Ex: Harry W. Bass, Jr.

- 3204** 1859-O AU50 PCGS. Variety 1. Ex: Harry W. Bass, Jr. Collection. The 1859-O double eagle is the third or fourth rarest of the pieces produced in New Orleans, depending upon the source consulted. The 1854-O and 1856-O issues are the rarest, with some placing the 1855-O ahead of the 1859-O. New Orleans struck just 9,100 double eagles in 1859. Deep yellow-gold surfaces are present on this piece, an example of Variety 1, with a high date and the 1 centered between dentils. A second variety exists with a low date and the 1 centered over a dentil. Portions of the protected areas on the reverse reveal attractive orange-red color and prooflike mirroring. The remainder of the surfaces are pleasantly smooth and display original straw-gold patina.
Ex: Miles Collection (*Stack's* 10/1968), lot 858; Harry W. Bass, Jr. Collection, Part II (Bowers and Merena, 10/1999), lot 1733; FUN Signature (Heritage, 1/2014), lot 5522, which realized \$54,343.75.
From The Marcello Collection. NGC ID# 269B, PCGS# 8927

1861 Double Eagle, MS60
Collectible No Motto Type Coin

- 3205 1861 MS60 PCGS. CAC.** Contrary to what has sometimes been suggested about the issue's exorbitant mintage (3 million coins) relating to the Civil War, the total simply reflects heightened yields from California mines and increased shipments of gold to Philadelphia for conversion. This Uncirculated No Motto twenty dollar has lustrous yellow-gold surfaces that house well-detailed design elements. Myriad abrasions peppered throughout define the grade. NGC ID# 269G, PCGS# 8932

1864 Double Eagle, AU50
Partially Prooflike, Luster Remains

- 3206 1864 AU50 PCGS.** An ideal representative of the assigned AU50 grade, this partially reflective 1864 retains its sharp strike and much of its mint luster. Dappled pale-orange accents reach across pleasing, medium-gold fields and devices. The issue is surprisingly scarce in all grades given its 204,285-piece mintage. Hoarded during the final Civil War years and numbered among the dates recovered from the *S.S. Republic* wreck, the 1864 remains a curiously challenging issue in attractive, original condition such as the present coin. NGC ID# 269S, PCGS# 8941

1865 Double Eagle, MS64
From the *S.S. Republic*
Incredibly Sharp and Attractive

- 3207 1865 MS64 NGC. CAC. Ex: *S.S. Republic*.** A total of 271 Uncirculated 1865 double eagles from the final year of Type One production at the Philadelphia Mint were found aboard the remains of the *S.S. Republic*. This fully struck near-Gem is one of them. A razor-sharp impression, thickly frosted mint luster, and exceptionally clean surfaces are hallmarks of the high-end coins recovered from the famous shipwreck. Coloration is light yellow-gold and highly attractive. Marks are essentially limited to two ticks on Liberty's cheek, while the open fields display marvelous preservation and are wholly deserving the CAC endorsement. NGC ID# 269U, PCGS# 8943

1865-S Double Eagle, MS63
Clean Orange-Gold Surfaces
Ex: *Brother Jonathan*

- 3208** 1865-S MS63 PCGS. Ex: *Brother Jonathan* 671. Small S. About 600 to 800 Uncirculated examples of the 1865-S double eagle are thought to survive thanks in large part to recoveries from the *S.S. Republic* and *Brother Jonathan* shipwrecks. This Select representative derives from the latter hoard and features the excellent eye appeal that coins with that pedigree are known for. This includes clean orange-gold surfaces (especially the reverse) with strong obverse stars and bold curls on Liberty's portrait. Luster is frosty and somewhat granular, typical of other seawater survivors. This would make a great late-date No Motto type coin from the San Francisco Mint. NGC ID# 269V, PCGS# 8944

1867-S Twenty Dollar, AU58
Bright Mint Frost Remains

- 3209** 1867-S AU58 NGC. Small Squat S. The year 1867 represented the first time that the entire production of double eagles at the San Francisco Mint was of the Type Two design. More than 900,000 pieces were struck, yet few survive in mint condition. This still-lustrous alternative retains bright frost over luminous wheat-gold surfaces. Well-detailed and minimally abraded, with one notable mark under star 4. NGC has seen 28 higher examples (9/18). NGC ID# 26A2, PCGS# 8952

1873-CC Liberty Twenty, AU Details
Challenging Carson City Issue

- 3210** 1873-CC — Tooled — PCGS Genuine Secure. AU Details. Variety 1-A. A challenging Type Two double eagle, this coin exhibits only light wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain traces of original mint luster. Some evidence of smoothing shows below the bust tip. The 1873-CC Liberty double eagle is an elusive issue, from a small mintage of 22,410 pieces.

1873-CC Liberty Twenty, AU53
Elusive Branch Mint Issue

- 3211 1873-CC AU53 NGC. Variety 1-A.** Only 22,410 Liberty double eagles were struck at the Carson City Mint in 1873, making it an elusive issue in all grades today. The 1873-CC was even more challenging before the discovery of some small groups pf coins that surfaced in the 1990s, but the issue remains quite scarce today, especially in high grade. This impressive AU53 example exhibits only light wear on the strongly impressed design elements and the pleasing orange-gold surfaces are lightly abraded for a large gold coin that circulated for a short time. An amber alloy streak is evident at star 9 and much original mint luster remains intact. The overall presentation is most attractive. NGC ID# 26AJ, PCGS# 8968

1873-S Twenty Dollar, MS60
Scarcer Open 3 Variant

- 3212 1873-S Open 3 MS60 PCGS Secure.** Small S. The 1873-S double eagle with an Open 3 in the date is the scarcer of two major varieties for the year, having been struck later and in far fewer quantities than the Close 3 coins. Numerous abrasions scattered across the frosty reddish-gold surfaces account for the MS60 assessment. Difficult to find in higher grades. NGC ID# 26AM, PCGS# 8979

1874-CC Liberty Twenty, AU55
Excellent Branch Mint Type Coin

- 3213 1874-CC AU55 NGC. Variety 5-A.** A substantial mintage of 115,085 Liberty double eagles was achieved at the Carson City Mint in 1874, making the 1874-CC a relatively available date and a popular choice with branch mint type collectors. This impressive Choice AU specimen offers lightly abraded orange-gold surfaces that retain much of their original mint luster intact. Only light wear shows on the well-detailed design elements. NGC ID# 26AP, PCGS# 8971

**1874-S Liberty Double Eagle, MS62+
Conditionally Rare Any Finer**

3214 1874-S MS62+ PCGS Secure. CAC. Broad S Mintmark. The 1874-S Liberty double eagle features the popular Type Two design, with the motto IN GOD WE TRUST on the reverse. The 1874-S claims a large mintage of more than 1.2 million pieces, but the coins were released into circulation at the time of issue and few were saved for numismatic purposes. Unlike the earlier Type One issues, few Type Two double eagles have been recovered from recent shipwreck finds. As a result, most examples seen today are in circulated, or lower Mint State grades. The 1874-S is scarce in MS62 condition, and finer coins are condition rarities.

This Plus-graded MS62 example combines attractive reddish-gold and lemon highlights over lightly marked, sun-gold surfaces. The design elements are sharply rendered, as expected for the issue. Housed in a Gold Shield PCGS holder with CAC endorsement. PCGS reports just four numerically finer examples, and NGC has certified only five in a finer grade (9/18) NGC ID# 26AR, PCGS# 8972

**1876-CC Liberty Double Eagle, AU58
Attractive Branch Mint Type Coin**

3215 1876-CC AU58 NGC. Variety 3-A. The 1876-CC Liberty double eagle claims a substantial mintage in the context of the series, at 138,441 pieces. As might be expected, the issue is relatively available in high grade and a popular choice of branch mint type collectors. This attractive near-Mint specimen exhibits just a trace of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces retain much of their original mint luster. NGC ID# 26AW, PCGS# 8977

**1877 Double Eagle, MS62
Scarce Any Finer**

3216 1877 MS62 PCGS Secure. CAC. Like so many Liberty twenties from this period, the 1877 is available through MS62 but becomes conditionally rare in MS63. It is also subject to elevated demand as the first year of the Type Three design. This lustrous example has a pleasing straw-gold appearance and displays fewer major distractions than might be expected. Strike detail is good, and a small copper spot occurs next to the eagle's neck. PCGS reports 19 finer submissions. CAC: 18 in 62, 2 finer (9/18). NGC ID# 2547, PCGS# 8982

**1877-CC Twenty Dollar, AU50
Above-Average Eye Appeal**

3217 1877-CC AU50 PCGS Secure. Variety 3-A. The 1877-CC double eagle is a rarity in Uncirculated condition. Attractive AU coins are typically the finest available to collectors. This example displays eye appeal beyond its grade, although light high-point wear dictates an AU50 designation. Hints of luster remain in the fields, complementing sharp detail on the devices. Light surface chatter on each side is light, producing better-than-average eye appeal on this lightly circulated Carson City twenty. NGC ID# 26AZ, PCGS# 8983

1877-CC Double Eagle, AU53
Type Three Debut Issue, Low Mintage

- 3218** 1877-CC AU53 NGC. CAC. Variety 3-A. The rich, yellow-gold color is typical of 1877-CC twenties in their natural state, here bolstered by mint luster that glows throughout the margins and clings to the raised design elements. Abrasions are few, and those that exist are lessened by circulation, giving this Type Three Carson City double eagle unusually smooth surfaces with attractive eye appeal. The quality is duly recognized by CAC endorsement. Just 42,565 pieces were struck, making this an ideal specimen at the assigned grade. CAC: 7 in 53, 34 finer (9/18). NGC ID# 26AZ, PCGS# 8983

1879 Double Eagle, MS62
Type Three Condition Rarity

- 3219** 1879 MS62 PCGS. The 1879 Philadelphia Mint twenty is an unusual issue — and a scarce one — in this grade. Michael Fuljenz explains in his book, *Type Three Double Eagles, 1877-1907*: “The 1879 is one of the more underrated Type Three double eagles from any mint. Its grade distribution is a bit different from other early Philadelphia issues of this type. It is almost never seen below AU55 or above MS61, suggesting that it saw very little circulation.”

The surfaces on this example are quite lustrous, frosted, and sharply struck throughout. A few small abrasions on the obverse account for the grade, but there are no large or objectionable marks on either side of this attractive coin. Population: 57 in 62 (1 in 62+), 16 finer (9/18).

Ex: *Central States Signature* (Heritage, 5/2004), lot 10087. NGC ID# 26B6, PCGS# 8988

1882-CC Liberty Twenty, AU58
Nice Color and Luster

- 3220** 1882-CC AU58 NGC. Variety 1-B. No double eagles were struck at the Carson City Mint in 1880 and 1881, and only 39,140 Twenty dollar gold pieces were minted when production resumed in 1882. This attractive near-Mint example shows just a trace of wear on the high points of the design elements and the lustrous orange-gold surfaces are lightly abraded. A network of thin die cracks extends through most of the peripheral legends on the reverse. NGC ID# 26BF, PCGS# 8997

1883-CC Double Eagle, AU58
Partially Prooflike Surfaces

- 3221** 1883-CC AU58 NGC. Variety 1-B. Glimpses of prooflike flash remain around the obverse stars and date, while the reverse is more extensively prooflike throughout the fields. A touch of wear from circulation and accompanying field chatter account for the AU58 grade. A sharp strike exists throughout the wheat-gold fields with crisp devices and soft mint luster. The 1883-CC ranks among the most-available Carson City twenties for Type Three representation in near-Mint or finer grades. NGC ID# 26BH, PCGS# 8999

1883-CC Liberty Double Eagle, AU58
Minimally Worn, Lightly Abraded Specimen

- 3222** 1883-CC AU58 NGC. Variety 2-A. A die chip is evident at the tip of the outside point of star 9 and there is a spike from the dentils above the E in STATES, identifying the Variety 2-A. This impressive near-Mint specimen exhibits just the slightest trace of wear on the sharply detailed design elements and the lustrous orange-gold surfaces are lightly abraded throughout. From a smallish mintage of 59,962 pieces. NGC ID# 26BH, PCGS# 8999

1888-S Twenty Dollar, MS63
Pleasing CAC-Approved Example

- 3223** 1888-S MS63 PCGS. CAC. Ex: The Fairmont Collection. With a production in excess of 850,000 coins, the 1888-S is a plentiful issue through MS62 and it remains collectible in MS63. However, finer coins prove much more difficult, particularly with CAC approval. A bold impression, vibrant mint frost, and appealing rose-gold color are key attributes. Three abrasions on the portrait are the only ones that are singular in nature. CAC: 14 in 63, 8 finer (8/18). NGC ID# 26BU, PCGS# 9009

1890-CC Liberty Double Eagle, AU55
Lightly Worn, Lustrous Example

- 3224** 1890-CC AU55 PCGS Secure. Variety 2-B, *unlisted in Winter*. From a mintage of 91,209 pieces, the 1890-CC Liberty double eagle is a relatively available issue, due to some substantial hoards that surfaced in the mid-1990s. This lightly worn Choice AU specimen features strongly impressed central design elements, with just a touch of the often-seen softness on some of the obverse star centers. The second C in the mintmark is located over the D in DOLLAR, identifying the scarce Variety 2-B. The lightly abraded orange-gold surfaces still radiate vibrant mint luster, with strong eye appeal. NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, AU58
Substantial Luster Remains

- 3225** 1890-CC AU58 PCGS. CAC. Variety 1-A. The usual lapped reverse die state, with the eagle's tailfeathers partially effaced. The obverse is unlapped. This near-Mint 1890-CC double eagle displays lustrous fields and sharp design elements with only slight high-point friction evident. The greenish-gold surfaces are original and abrasions are minor. The CAC endorsement is seldom seen for AU58 and finer coins. CAC: 62 in 58, 32 finer (9/18). NGC ID# 26BY, PCGS# 9014

1891-CC Liberty Double Eagle, XF Details
Challenging Branch Mint Issue

- 3226** 1891-CC — Graffiti — PCGS Genuine Secure. XF Details. Variety 1-A. The 1891-CC Liberty double eagle is one of the most elusive issues of the series, thanks to its minuscule mintage of just 5,000 pieces. This lightly worn example displays strongly impressed central design elements, but a touch of the usual softness is evident on the obverse stars. The pleasing straw-gold surfaces retain much original mint luster, with some light scratches in the lower right obverse field and a couple of deeper scratches on the reverse, near ERICA.

Abraham Curry, first Superintendent of the Carson City Mint

1891-CC Liberty Twenty, AU55
Elusive, Low-Mintage Issue

3227 1891-CC AU55 NGC. Variety 1-A. Only 5,000 Liberty double eagles were struck at the Carson City Mint in 1891, the second-lowest production total of the series. Few examples were saved for numismatic purposes, as there was little interest in branch mint issues of any denomination at the time and double eagles represented too much spending power for the average collector to set them aside long term. As might be expected, the 1891-CC is an elusive issue in all grades today.

This impressive Choice AU specimen shows just a trace of wear on the strongly impressed central design elements, but some of the obverse stars exhibit a touch of the usual softness on the radials. The pleasing orange-gold surfaces retain much of their original mint luster, with some minor abrasions and chatter on both sides. The overall presentation is quite attractive. NGC ID# 26C3, PCGS# 9017

1892-CC Double Eagle, AU53
Moderate Field Reflectivity

3228 1892-CC AU53 PCGS Secure. Variety 1-A. Light friction affects the open areas of the fields and the devices, but the protected areas retain prooflike mirroring from the early die state. The surfaces are mostly bright yellow-gold, although small tinges of copper-orange appear throughout the reverse. This is an appealing coin for the grade with smooth surfaces. The 1892-CC double eagle is more plentiful than its mintage of 27,265 pieces would suggest, but this example has eye appeal that surpasses that of many of its peers. NGC ID# 26C6, PCGS# 9020

1892-S Double Eagle, MS64
Orange and Lilac Accents

3229 1892-S MS64 PCGS. This boldly struck double eagle displays soft, frosted mint luster and delicate orange and lilac accents. The fields exhibit only sparse abrasions, none particularly deep or distracting. Virtually unsurpassable quality for this otherwise obtainable S-mint twenty, and a super example for a type or mintmark set. PCGS has certified 22 finer representatives (8/18). NGC ID# 26C7, PCGS# 9021

HIGH RELIEF DOUBLE EAGLES

1907 High Relief Twenty, AU55
Strong Wire Rim Around Each Side

3230 1907 High Relief, Wire Rim AU55 PCGS Secure. The now-iconic figure of Liberty striding into the dawn of the 20th century was not always appreciated, especially by Mint personnel. The Mint was responsible for supplying the country's regional and national needs for coinage, but relatively little thought was given to the artistry that could go into coinage. When Theodore Roosevelt enlisted the help of preeminent sculptor Augustus Saint-Gaudens in 1904-1905, his focus on artistic excellence soon conflicted with the Mint's need for high-speed coinage. The contemporary coinage designed by Charles Barber was struck in shallow relief and was easily produced by one pass through a steam press. Saint-Gaudens' High Relief twenties required three strikes from a hydraulic press to fully bring up the design details engraved in the dies. Clearly such a design was not suited for mass production, and the output was limited to 12,367 pieces. Afterward the general concept was retained for circulation strike twenties, but the radical reduction in relief of Saint-Gaudens' dies makes subsequent issues only suggestive of the sculptor's original concept for the twenty dollar gold piece. This Choice AU retains original surfaces and shows only the slightest friction over the high points of the design. The surfaces are remarkably free from contact marks and the wire rim is plainly evident around each side. NGC ID# 26F2, PCGS# 9135

1907 Saint-Gaudens Double Eagle, MS62
High Relief, Wire Rim Variant

3231 1907 High Relief, Wire Rim MS62 PCGS. One of the most enduringly popular designs of the 20th century, from a limited mintage of 12,367 pieces, the High Relief version of the Saint-Gaudens double eagle has been prized since its striking, not only as a coin but as a work of art. Offered here is an impressive MS62 example of this famous issue with a prominent wire rim around the obverse. The collector should not be overly concerned about the MS62 grade, since actual marks are few; a handful of tiny flaws are visible on each side, and a diagonal abrasion touches Liberty's trailing hair, but the overall eye appeal is strong, aided by bright lemon-gold luster.

Ex: Los Angeles Signature (Heritage, 8/2009), lot 1325, realized \$17,250. NGC ID# 26F2, PCGS# 9135

SAINT-GAUDENS DOUBLE EAGLES

1908-S Twenty Dollar, Choice AU
Only 22,000 Coins Struck

- 3232 1908-S AU55 NGC. CAC.** About 1,500 1908-S double eagles are believed extant from an original mintage of just 22,000 pieces — the lowest total among all regular issues in the series. This example circulated for just a bit, showing a hint of friction and scattered marks. However, it retains considerable frosty mint luster and the appeal of higher grade. A touch soft on the date and Capitol. NGC ID# 26FA, PCGS# 9149

1908-S Saint-Gaudens Twenty, AU58
Lowest-Mintage With Motto Issue

- 3233 1908-S AU58 PCGS.** The 1908-S is the lowest mintage With Motto Saint-Gaudens double eagle, with a scant mintage of just 22,000 pieces. The San Francisco Mint had trouble adjusting its older equipment to the new double eagle design — most notably, the collar mechanism — since the coins would not stack properly. Double eagle coinage was suspended until the problem was solved in 1909. This lightly abraded, near-Mint State example shows myriad tiny marks but no heavy abrasions. A sharp strike adds to the greenish-gold eye appeal. NGC ID# 26FA, PCGS# 9149

1911 Double Eagle, MS64+
Clearly High-End

- 3234 1911 MS64+ PCGS Secure.** Medium yellow-gold surfaces awash in coruscating, frosty mint luster could easily pass for a higher grade and are entirely deserving of at least the Plus designation. The only singular marks are two well-hidden abrasions on the eagle's wings. Liberty's face, the torch hand, and the Capitol exhibit complete detail. NGC ID# 26FK, PCGS# 9157

1911-D Twenty Dollar, MS66
Sharp and Lustrous With CAC

- 3235 1911-D MS66 PCGS. CAC.** While the 1911-D saw nearly half of its 846,500-piece mintage shipped abroad, a large number of those pieces must have returned from Central American hoards in original bags. An inordinately high number of Gem or finer examples exist, although relatively few exceed the MS66 level. This is an exemplary MS66 with CAC endorsement and exquisite frosted, sharply struck surfaces. Marks are nearly nonexistent and the eye appeal is terrific. PCGS reports just 10 numerically finer examples (9/18). NGC ID# 26FK, PCGS# 9158

1913-D Saint-Gaudens Twenty, MS65
Practically Unobtainable in Better Condition

- 3236 1913-D MS65 PCGS.** This is a transitional grade, whereby the 1913-D goes from being collectible in MS65 to practically unobtainable any finer. Strike detail is strong throughout the satiny orange-gold surfaces, but is especially bold on Liberty's visage and the torch hands. Clean and lustrous as expected with only a couple of ticks in the field below the eagle. PCGS reports eight higher grading events (9/18). NGC ID# 26FP, PCGS# 9162

1914-S Saint-Gaudens Twenty, MS66
Registry Set Contender

- 3237 1914-S MS66 PCGS.** Apple-green and orange-gold hues alternate across this lustrous high-grade Saint-Gaudens twenty. Exceptionally free from the small marks usually seen on this widely held gold type. The strike is bold aside from the stars along the lower right obverse border. None have been certified numerically finer at PCGS (8/18).
Ex: Central States Signature (Heritage, 4/2012), lot 6933, realized \$5,031.25. NGC ID# 82KA, PCGS# 9166

1925-S Saint-Gaudens Twenty, MS63
Branch Mint Semikey

- 3238 1925-S MS63 PCGS.** Despite the large mintage of more than 3.7 million pieces, the 1925-S Saint-Gaudens double eagle is a scarce issue at the MS63 grade level, and finer coins are rare. Most of the coins were held in government storage as currency reserves at the time of issue, and later melted into gold bars for storage at the Fort Knox Bullion Repository, after the Gold Recall of 1933. This attractive Select specimen exhibits sharply detailed design elements and vivid orange-gold surfaces that show only minor signs of contact. Vibrant mint luster adds to the outstanding eye appeal. PCGS has certified 31 numerically finer examples (8/18). NGC ID# 26GC, PCGS# 9182

COMMEMORATIVE SILVER

1900 Lafayette Dollar, MS65+
Brilliant and Unabraded

- 3239 1900 Lafayette Dollar MS65+ NGC. DuVall 1-B.** The tip of the lowest leaf points between 19 in the date. There are a couple of small marks on Washington's portrait, but the fields and other areas are surprisingly unabraded. Bright mint luster emanates from surfaces that are about 95% brilliant with just a few glints of gold and reddish-violet patina at the borders. A wonderful example of this popular commemorative silver dollar. NGC ID# BYKW, PCGS# 9222

1937 Antietam Half Dollar, MS68
Colorful Toning, Near-Flawless

- 3240 1937 Antietam MS68 PCGS Secure.** Distribution of the Antietam commemorative half dollar, which celebrated the famous battle's 75th anniversary, amounted to 18,028 coins. Several dozen pieces are graded at this esteemed level, and only two coins are finer, both at NGC and none at PCGS (9/18). Red, violet, russet, and sun-gold tones dominate the outer areas, leaving the centers partly brilliant. Both strike and preservation are essentially unimprovable. NGC ID# BYF4, PCGS# 9229

1938 Oregon Half Dollar, MS68
One of the Top-Certified Examples

- 3241 1938 Oregon MS68 NGC.** Pale almond-gold patina combines with soft mint luster to deliver unimprovable visual appeal, matching the incredible technical quality of this Superb Gem. This collaborative design between James Earle and Laura Gardin Fraser was issued intermittently between 1926 and 1939. A total of 6,000 Philadelphia coins were distributed to collectors in 1938, plus six pieces for assay. Census: 6 in 68 (2 in 68 ★), 0 finer (9/18). NGC ID# BYHH, PCGS# 9348

**1921 Pilgrim Half Dollar, MS67+
One Coin Graded Finer**

- 3242 1921 Pilgrim MS67+ PCGS. CAC.** The outer edges of the border legends show slight softness, but the central devices are sharp. This CAC-approved Superb Gem is frosty and radiantly lustrous with champagne-tinted interiors and multicolor peripheries. The eye appeal is outstanding. The 1921 is the second and final issue in the Pilgrim type, commemorating the 300th anniversary of the Pilgrims' landing at Plymouth, Massachusetts in 1620. Population: 55 in 67 (11 in 67+), 1 finer. CAC: 9 in 67, 0 finer (8/18). NGC ID# BYHS, PCGS# 9360

**1925 Stone Mountain Half, MS68
Tied for Finest Graded**

- 3243 1925 Stone Mountain MS68 NGC.** This remarkable MS68 Stone Mountain half dollar is among the finest graded, and it is a major condition rarity as such. The coin is well-struck from lightly worn dies that show faint metal flowlines in the obverse fields. A crescent of deep burgundy toning appears along the lower-right obverse border, but the remainder of each side displays mostly olive-gold toning with soft pink and mint-green accents on the obverse. Census: 13 in 68, 0 finer (8/18). NGC ID# BYJ6, PCGS# 9378

COMMEMORATIVE GOLD

**1915-S Pan-Pac Quarter Eagle, MS66
Elusive in Finer Grades**

- 3244 1915-S Panama-Pacific Quarter Eagle MS66 NGC.** Softly frosted, shimmering luster adorns the unabraded fields and sharp devices of this Premium Gem 1915-S Panama-Pacific quarter eagle. The usual swirling die polishing lines are visible in the fields, and original wheat-gold coloration characterizes each side. This classic commemorative issue is moderately available in this grade, but finer examples are scarce. NGC ID# BYLP, PCGS# 7450

MODERN BULLION COINS

**1987 Half-Ounce Gold Eagle, MS70
Pristine Registry Coin**

- 3245 1987 Half-Ounce Gold Eagle MS70 PCGS Secure.** The 1987 half-ounce Gold Eagle is much less available in MS70 than the first-year 1986 and all issues produced during the 21st century. Technically flawless lemon-gold surfaces showcase complete strike definition. Satiny with fantastic eye appeal. Expect spirited competition among Registry Set builders. PCGS reports 32 submissions in this grade (8/18). NGC ID# 26N8, PCGS# 9812

**1995-W Silver Eagle, PR70 Ultra Cameo
Singular Series Key Date**

- 3246 1995-W Silver Eagle PR70 Ultra Cameo NGC.** This is the singular key date in the entire Silver Eagle series, claiming an ultra-low mintage of 30,125 pieces. No other issue has been as consistently sought-after over the past two decades as the 1995-W. Fully struck devices are thickly frosted, standing out boldly against the glassy, jet-black fields. A coin that is impossible to find fault with and for which there should be considerable interest. NGC ID# CFWX, PCGS# 9887

**1999 Silver Eagle, MS70
Conditionally Elusive Semikey**

- 3247 1999 Silver Eagle MS70 NGC.** The 1999 Silver Eagle compares to the 1997 in terms of the total number of submissions at NGC, but it is more than twice as difficult to locate in perfect MS70 condition. Not a single tick or area of toning appears over technically pristine and wholly brilliant surfaces. There are a couple of minuscule milk spots on the reverse that do not affect the appeal. NGC ID# 26JX, PCGS# 9947

- 3248 No Lot**

1999 Silver Eagle, MS70
Major Challenge at This Level

- 3249** 1999 Silver Eagle MS70 NGC. More than 7.4 million Silver Eagles were produced in 1999. Fears of Y2K undoubtedly heightened demand among speculators. Despite the higher mintage, the 1999 remains a major challenge at this unimprovable level. Not a single speck appears on this totally brilliant Silver Eagle. The impression is absolutely pinpoint-sharp. NGC ID# 26JX, PCGS# 9947

2000 Silver Eagle, MS70
Sought-After in This Ultimate Grade

- 3250** 2000 Millennium Set Silver Eagle MS70 NGC. The 2000 Silver Eagle is somewhat elusive in this ultimate state of preservation. Its accessibility is made all the more difficult by the high level of demand for MS70 representatives from Registry collectors. The surfaces on this coin are satiny and brilliant, showing no marks at all, even under close inspection. Fully struck. NGC ID# 26JZ, PCGS# 9969

TERRITORIAL GOLD

1851 Humbert Fifty Dollar, AU55
Scarce Lettered Edge Variant
887 Thous., 50 Reverse, K-4

- 3251** 1851 Humbert Fifty Dollar, Lettered Edge, 887 Thous., 50 Reverse, AU55 NGC. Kagin-4, R.5. The lettered edge Humbert fifty dollar gold ingots represent some of the earliest gold coins struck by the U.S. Assay Office of Gold. Augustus Humbert brought the dies — designed by Charles Cushing Wright, who was the contract engraver for the Philadelphia Mint — to San Francisco upon appointment as United States Assayer. Initial plans were for octagonal pieces to be made in denominations of \$50, \$100, \$200, \$500, and \$1,000 by varying the thickness of the ingots. The \$50 denomination was of greatest importance to the local economy and for custom duties.
- The dies were incomplete by design, leaving room for legends, fineness, and value to be hand applied at the Assay Office. No fewer than 13 separate hand punches were required to finish a single \$50 gold piece — eight punches for the edge devices, plus three numeral punches for the 887 fineness, and two punches for the 50 dollar denomination. The labor-intensive process was simplified later in the year when a Reeded Edge variety replaced the Lettered Edge design. This About Uncirculated example displays traces of reddish-orange mint luster in protected areas. A few small strike-throughs on the wide obverse margins occurred during mintage. The engine-turned reverse shows the 50 denomination weakly struck at the center plus a few light abrasions and small rim nicks. All in all, this is a Choice example of the desirable Lettered Edge variant, seldom seen in finer grades. Census: 3 in 55, 17 finer (9/18).
- From The Marcello Collection.* NGC ID# ANH4, PCGS# 10208

1851 Humbert Fifty Dollar, K-4, MS63 ★
 Lettered Edge, 887 Thous., 50 Reverse
 Single-Finest Certified Example

3252 1851 Humbert Fifty Dollar, Lettered Edge, 887 Thous., 50 Reverse, MS63 ★ NGC. K-4, R.5. The 1851 Humbert fifty dollar ingots (commonly called slugs) are among the most recognizable artifacts of the romantic Gold Rush era. The large octagonal coins are familiar to collectors of all disciplines, and even non-numismatists often make the historical connection when they encounter an example. They are rare and valuable reminders of one of the most colorful periods in our nation's history. Heritage Auctions is privileged to present the finest-certified example of the iconic K-4 variety in this important offering.

From September 30, 1850 until December of 1853, the private coinage firm of Moffat & Co. (and its successor firms) acted under government contract as the United States Assay Office of Gold. The Assay Office was initially tasked with performing government assays and issuing ingots that could serve as a universally accepted medium of exchange, but its role as a producer of private coinage was later expanded. Augustus Humbert, a New York watch maker, was appointed United States Assayer. Before leaving for California, Humbert prepared both obverse and reverse dies for the proposed ingots and transported them to California, along with other needed equipment. Prominent coin dealer Henry Chapman provided an interesting description of the design for the the 1851 K-4 fifty in lot 353 of the Captain Andrew C. Zabriskie Collection (6/1909):

"1851 \$50. Defiant eagle to left, head to right, supports a U.S. shield and three arrows in right talon, a scroll inscribed LIBERTY passes through beak; around UNITED STATES OF AMERICA below 50 D C the 50 punched in and a blank space left before the C, evidently with the intention of punching in the number of carats, above 887 THOUS. R. Engine turned, with 50 in center. Edge, AUGUSTUS HUMBERT UNITED STATES ASSAYER OF GOLD CALIFORNIA 1851 Borders, plain. Octagon. Fine. Two slight nicks on edge. Very rare."

Present day numismatists believe Chapman was in error about the C indicating carats. It seems more likely that the initials D and C stood for dollars and cents, and the fineness was also punched in individually in the blank space before THOUS., making it possible to easily issue ingots of various sizes and fineness by simply punching in the appropriate values. Of course, the edge lettering also had to be applied in eight separate steps, punching in the appropriate words and numerals on each side of the octagonal coin. All these separate punchings made for a labor-intensive production process, and the Lettered Edge format was soon replaced by the more efficient Reeded Edge type. All the Humbert fifties were widely accepted in both domestic and foreign trade, as the coins were of full weight and value. Most of the old lettered edge coins were melted for recoinage at an early date, making them much more elusive than their reeded edge counterparts.

The coin in the Zabriskie sale realized \$300, a strong price at the time. Of course, recent auction prices for the K-4 are much higher, in the \$200,000 to \$300,000 range for a really nice specimen, but there are no real comparables for this piece, as no coin graded finer than MS62 has ever been publicly offered. The present coin is a spectacular Select specimen that NGC has certified with the Star designation. It is by far the finest-known example, as no other coin has been certified higher than MS62 at either of the leading grading services (9/18). The design elements are unusually sharp, with fine detail in the feathers on the eagle's neck and all lettering legible. The edge is hidden by the NGC holder, but the description of this coin in its last auction appearance, before certification, notes the edge lettering is complete. The yellow and orange-gold surfaces are remarkably well-preserved, with only a few minor contact marks on both sides. Unlike most examples seen, the rims show no blunted corners or major dents. The reverse radiates vibrant mint luster and the obverse displays much prooflike reflectivity in the fields. Overall eye appeal is terrific. For the advanced collector, there is no adequate replacement for this finest-known example. It has been 24 years since its last public offering and it may be decades before this coin surfaces again. The discerning collector will bid accordingly. Listed on page 397 of the 2019 *Guide Book*. Census: 1 in 63 (1 in 63 ★), 0 finer (9/18).

From The Marcello Collection. NGC ID# ANH4, PCGS# 10208

1851 Humbert Fifty Dollar, VF30
K-6, 887 Thous., Reeded Edge

3253 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. VF30 PCGS Secure. K-6, R.4. The U.S. Assay Office, operating under the Curtis, Perry & Ward contract, produced a large number of octagonal fifty dollar gold ingots to serve the local economy during the Gold Rush era. Many of these hefty “slugs,” as they were called, were later deposited as bullion at the San Francisco Mint after 1854, to be recoined into regular federal eagles and double eagles, making them scarce today.

This impressive VF30 example represents the K-6 reeded edge variety, with the date under the eagle and the reverse ribbon close to the border. The design elements show moderate wear and the orange-gold surfaces exhibit the expected number of nicks and abrasions for a large gold coin that spent some time in circulation. Some minor rim dings are evident on both sides. A still-pleasing example of this intriguing Gold Rush relic. Listed on page 397 of the 2019 *Guide Book*. NGC ID# ANH9, PCGS# 10214

1852 Assay Office Fifty, 900 Thous., K-14, AU55
Last of the Octagonal Gold Rush 'Slugs'

3254 1852 Assay Office Fifty Dollar, 900 Thous. AU55 NGC. K-14, High R.5. Dated as 1852 but actually struck in 1853, the 900 thous. fifty dollar octagonal ingots were an end run in a game of political football. August 31, 1852 legislation prohibited the acceptance of Assay Office gold coins for customs duties because they were less than the .900 fineness specified by law and they lacked the proper percentage of copper alloy. The mandate crippled both the usefulness of The United States Assay Office of Gold and had devastating effects on the regional economy. Finally in October, 1852 a local agreement was reached to forego the proper mixture of copper as long as any gold coinage maintained its .900 fineness as required by law.

A substantial mintage of 23,800 fifty dollar octagonal slugs were delivered in early 1853 — 13,800 pieces in January 1853 and 10,000 more in February 1853. Soon, large quantities of ten and twenty dollar gold coins followed, and the usefulness of the cumbersome fifty dollar gold slugs declined. Eventually, most of the large octagonal gold pieces were melted as a convenient source of bullion.

This Choice About Uncirculated example is one of the few survivors from the turbulent Gold Rush period. As always, numerous small abrasions dot the surfaces, although the corners are sharp and only minor rim bumps exist. The engine turned reverse shows just a few pinpoint marks and voids. Attractive orange-gold color deepens within recesses of the eagle motif, and surrounds the obverse lettering. The strike is blunt on the eagle's breast, but all of the motifs are complete including the date and the angled legend UNITED STATES ASSAY OFFICE OF GOLD SAN FRANCISCO CALIFORNIA. Census: 8 in 55, 19 finer (9/18).

From The Marcello Collection. NGC ID# ANHH, PCGS# 10019

1853 Assay Office Twenty, XF45
K-18, 900 Thous.

John Grover Kellogg

3255 1853 Assay Office Twenty Dollar, 900 Thous. XF45 PCGS Secure. K-18, R.2. The U.S. Assay Office in San Francisco struck twenty dollar gold pieces in 1852 and 1853. The 1852 issue is a rarity today, but 1853 coins are occasionally available to collectors. In 1854, the Assay Office building was converted to house the original San Francisco branch mint, which produced regular federal double eagles. This 1853 Assay Office twenty is well-detailed and displays medium olive-gold patina. Scattered abrasions hardly detract, and hints of luster emerge from the protected recesses. NGC ID# ANHD, PCGS# 10013

1855 Kellogg & Co. Fifty Dollar, K-4, PR63
'King of Territorial Gold Coins'
14 Examples Traced

3256 1855 Kellogg & Co. Fifty Dollar PR63 NGC. Adams-54, Breen-7921, Kagin-4, High R.6. Any fifty dollar gold coin is an impressive numismatic item. The massive presence of these beautiful pieces captures the attention and holds the respect of any viewer. The Kellogg fifty dollar slug probably owes its existence to its potential as an advertisement, rather than to any commercial need for such a coin, but numismatic history is much richer for its presence.

The Kellogg firm was operating at full speed turning out their twenty dollar gold coins in 1855. With this denomination well established and serving admirably in the local economy, it is unlikely there was any pressing need for the fifty dollar piece. While Edgar Adams pays lip service to the idea that a larger denomination was desired by local merchants to facilitate counting of large sums, the fact that only two dozen or so pieces were minted indicates actual demand was not great. Instead, the small mintage of presentation pieces was a statement about the quality of Kellogg's products and the ability of the firm to match Wass, Molitor & Co. in the production of large denomination gold coins.

John Glover Kellogg arrived in San Francisco on October 12, 1849. He was originally from Auburn, New York and came West to seek his fortune at the height of the gold rush. He initially took a position with Moffat & Co., and remained with that firm during their operation as the United States Assay Office of Gold. When Moffat & Co. closed down in late 1853, prior to transitioning their facility to the new San Francisco Mint, Kellogg established a partnership with assayer G.F. Richter. The new firm of Kellogg & Richter was located at No. 106 Montgomery Street, in the basement of J.P. Haven's building. Initially, the firm acted only as an assay office, but California merchants and bankers petitioned them on January 14, 1854 to produce coins for the local economy. The intention seems to be for Kellogg & Richter to fill the gap between the closing of Moffat & Co. and the opening of the San Francisco Mint. Kellogg & Richter embraced the opportunity enthusiastically, and their first twenty dollar gold coin was minted on February 9, 1854. The coins were immediately popular with the public, and the California economy easily absorbed all the coinage the Kellogg firm could produce. Since production was modest at the new Mint in 1854, Kellogg continued producing his private coinage through 1855. By late 1854, Kellogg had dissolved his partnership with Richter and taken a new partner, Augustus Humbert. Humbert had popularized the dramatic eagle design used on the back of the Kellogg fifty dollar slug when he was a principal of the United States Assay Office of Gold. Ferdinand Gruner was the engraver of the slug. The Wass, Molitor & Co. firm was Kellogg's main competition in the private coinage industry, and they were famous for their giant fifty dollar slugs. Kellogg undoubtedly produced his artistically superior slug to demonstrate his firm's ability to keep pace with the competition at all levels of the private coinage trade.

The present specimen is an extremely attractive example of this spectacular issue. An exemplary strike complements the reflective fields to produce stunning eye appeal. Every detail of Gruner's intricate design is fully realized, and enticing Lemon-yellow patina radiates from the proof surfaces. A few handling marks and rim bruises are unavoidable with such a large coin, and are consistent with the grade. PCGS has graded only one coin in PR63, with two higher. NGC has certified two examples (including the present coin) in PR63, with three finer (9/18).

No mintage records were kept for this issue. Experts believe perhaps 20-25 coins were produced, all as presentation pieces, with 12-15 examples extant today. We have compiled a roster of all specimens known to us below. The California Historical Society has justly called the Kellogg fifty the "King of Territorial Gold Coins." Listed on page 407 of the 2019 *Guide Book*.

Roster of 1855 Proof Kellogg & Co. Fifty Dollars

This roster was compiled from many sources, expanding on previous efforts by Walter Breen and DeWitt Smith, with extensive contributions by Mark Borckardt and Dave Stone of Heritage Auctions, numismatic researchers P. Scott Rubin and Karl Moulton, and pioneer gold specialist Don Kagin. It is believed that 14 examples of this famous rarity survive, but some earlier appearances are unaccounted for. The associated number from Walter Breen's roster has been included where applicable. Grades of the coins in private hands are listed per the most recent auction appearance. Population data indicates many of the coins that were not certified at their last public offering have since been submitted for third party grading, and some of the certified coins have undoubtedly been resubmitted or crossed over.

1. PR64 Cameo PCGS. Breen #1. Augustus Humbert; Humbert's heirs; Capt. Andrew C. Zabriskie; Zabriskie Collection (Henry Chapman, 6/1909), lot 341; Col. James W. Ellsworth; John Work Garrett; Johns Hopkins University; Garrett Collection, Part II (Bowers and Ruddy, 3/1980), lot 910; Kagin's; Paul Padget; Donald Kagin and Stuart Levine; private collection; Riverboat Collection (Heritage, 4/2014), lot 5448, realized \$763,750. In the Garrett catalog, it was noted: "It is believed to be the finest known example of its kind." Walter Breen recorded the Garrett piece as later appearing in Auction '85. However, the coin in that auction was actually the unique 1854 Kellogg twenty dollar proof from the Garrett Collection.

2. PR64 PCGS. Breen #11. British private collection; Greater New York Convention (Stack's, 5/1984), lot 784; Robert Hughes; Rarities Sale (Bowers and Merena, 8/1995), lot 498; 2007 FUN Signature (Heritage, 1/2007), lot 3893, realized \$747,500. In the 1984 catalog, Stack's noted: "From information conveyed to us, this coin has recently come from England along with a few less important Territorial and Federal gold coins."

3. PR63 NGC. Breen #2. Kellogg family; possibly sold privately by Thomas Elder around 1916; New York collector, possibly F.C.C. Boyd; "J.F. Bell" in 1945; Memorable Collection (Numismatic Gallery, 3/1948), lot 967; Don Keefer; F.K. Saab; Gibson Sale (Stack's, 11/1974), lot 189; Auction '79 (Stack's, 7/1979), lot 996; Jerome S. Coles Collection (Stack's, 10/1983), lot 239; 68th Anniversary Sale (Stack's, 10/2003), lot 2292; 72nd Anniversary Sale (Stack's, 10/2007), lot 4017; FUN Signature (Heritage, 1/2009), lot 4228. **The present coin.**

4. **PR63 PCGS.** Not in Breen. Smith & Son (3/1941); Frank Heim (6/2000); Don Kagan; Q. David Bowers; Don Kagan; Elite Coin Auction (Superior, 1/2005), lot 953; Western collector; ANA Signature (Heritage, 8/2007), lot 2119; FUN Signature (Heritage, 1/2008), lot 3448.
5. **Choice Brilliant Proof.** Not in Breen. Buddy Ebsen Collection (Superior, 5/1987), lot 3140 This piece appears to be an example that matches none of the others and was unlisted in the Breen Census.
6. **PR62 PCGS.** Breen #3. George W. Rice; Virgil M. Brand; William F. Dunham (B. Max Mehl, 6/1941), lot 2369; W.D. Waltman Collection (B. Max Mehl, 6/1945), lot 37; Chicago ANA (James Kelly, 8/1956), lot 1850; Amon Carter, Sr.; Amon Carter, Jr. Collection (Stack's, 1/1984), lot 1149; Harlan White; ANA Signature (Heritage, 8/1997), lot 7898; Donald Kagan; Craig Smith; Paul S. Mory Collection (Bowers and Merena, 6/2000), lot 1053; Rarities Sale (Bowers and Merena, 1/2002), lot 857; Midwest collection.
7. **PR62 NGC.** Breen #7. N.M. Kaufman Collection (RARCOA, 8/1978), lot 66; Auction '80 (Paramount, 8/1980), lot 982; Auction '84 (RARCOA, 7/1984), lot 2000; ANA Signature (Heritage, 8/1992), lot 2583; RARCOA; Donald Kagan; private collection.
8. **PR62.** Breen #9. Augustus Humbert; Humbert's heirs; Capt. Andrew C. Zabriskie; Henry Chapman; John Story Jenks; Reuting Collection; Arthur C. Nygren (B. Max Mehl, 11/1914), lot 82; Henry Chapman (per Mehl in the Waltman catalog); George Alfred Lawrence (Thomas Elder, 6/1929), lot 1365; John H. Clapp; Louis E. Eliasberg, Sr.; Eliasberg Estate; Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 366; East Coast collection.
9. **PR62.** Breen #4. Augustus Humbert; Humbert's heirs; Capt. Andrew C. Zabriskie; Henry Chapman; George H. Earle Collection (Henry Chapman, 6/1912), lot 3782; purchased by B. Max Mehl and sold to Fred T. Huddart; Judge C.W. Slack (B. Max Mehl, 5/1925), lot 29; Col. E.H.R. Green; Josiah Lilly Collection; Smithsonian Institution. Walter Breen recorded this specimen as once the property of Amon Carter, Sr. and Jr., although such a listing is doubtful. Additional intermediaries handled this coin on a consignment basis. Both Smithsonian pieces have recently been examined and graded by Jeff Garrett and Ron Guth.
10. **PR62.** Breen #5. H.O. Granberg (consigned to the 1914 ANS Exhibition); William H. Woodin (exhibited by Edgar Adams at the 1916 ANA Convention); Waldo C. Newcomer; Willis duPont; Smithsonian Institution. This piece was stolen from duPont in October 1967 and recovered in July or August 1978, as reported in Coin World, August 9, 1978. Illustrated at www.americanhistory.si.edu and plate-matched to Mehl's Newcomer plates.
11. **PR60 PCGS.** East Coast estate / Boston ANA Platinum Night (Heritage, 8/2010), lot 3692.
12. **PR53 PCGS.** Breen #10. J.W. Schmandt (Stack's, 2/1957), lot 1028; Dan Brown; John H. Murrell; Henry H. Clifford; ANA (Kagin, 8/1983), lot 3630; Auction '88 (Superior, 7/1988), lot 491; Auction '90 (Superior, 8/1990), lot 1406; Orlando (Superior, 8/1992); private collection; FUN Signature (Heritage, 1/2014), lot 5626.
13. **Impaired Proof.** Breen #6. Augustus Humbert; Humbert's heirs; Capt. Andrew C. Zabriskie; Henry Chapman; John A. Beck; John A. Beck, Part I (Quality Sales, 1/1975), lot 729; Dr. Ketterman; Arnold and Romisa Collections (Bowers and Merena, 9/1984), lot 330; Hoke S. Green Collection (Bowers and Merena, 6/1985), lot 24; Ambassador J. William Middendorf II Collection (Christie's, 3/1994), lot 375; Morrison/ Licht Collection (Stack's, 3/2005), lot 1320; Donald Kagan; private collection. Described as a "Brilliant Proof with some hairlines and minor friction."
14. **XF Details NCS.** Breen #8. C.W. Cowell (B. Max Mehl, 1911); Waldo Newcomer (exhibited at the 1916 ANA Convention); Charles Williams (per Mehl in the Waltman catalog); New York Metropolitan Sale (Stack's, 4/1962), lot 2814; John Rowe; Abner Kreisberg (1968); Public Auction (Quality Sales Corp., 11/1972), lot 1410A; Jack Klauson; 1973 ANA (Jess Peters, 8/1973), lot 1030; Walter Breen Gold Sale #1 (Pine Tree, 3/1974), lot 455; West Coast collection; Christie's (3/1990); Morrison/ Licht Collection (Stack's, 3/2005), lot 1321; Donald Kagan; private collection. In 1972, Abner Kreisberg and Jerry Cohen commented: "The usual surface abrasions and scratches have all been removed and quite a bit of luster is still adhering. Extremely Fine."

Other Appearances

These citations represent earlier appearances of coins we are unable to positively link to the pedigree chains above. They may constitute duplicate appearances of examples above, or they may be different individual coins.

- A. DeWitt Smith, of Lee, Massachusetts, by 1905; obtained by Virgil Brand when he purchased the DeWitt Smith Collection intact.
- B. Augustus Humbert; Humbert's heirs; Capt. Andrew C. Zabriskie; Henry Chapman; William R. Weeks and Augustus Humbert Collections (Henry Chapman, 5/1902), lot 716; Virgil Brand.
- C. Two specimens retained by the heirs of John Glover Kellogg.
- D. A specimen said to be in the possession of J.W. Scott in the 19th century.
- From The Marcello Collection.** NGC ID# ANJ3, PCGS# 10228

S.S. CENTRAL AMERICA GOLD BARS

Harris Marchand & Co. Gold Ingot
 56.65 Ounces
 Ex: S.S. Central America

3257 Harris Marchand & Co Gold Ingot. 56.65 Ounces. CABG-112. The firm of Harris, Marchand & Co. operated offices in Sacramento and Marysville, California. Harvey Harris was originally from Denmark and Desire Marchand came from Belgium by way of Paris, France. While he was in France he studied assaying techniques at the Paris Mint, earning him the right to use the distinctive registered assayer's stamp seen on this ingot. The Sacramento office was established in late September 1855 and the branch in Marysville began operations the following January. The Harris and Marchand partnership continued operating their assay offices until September 1859. Later, Harvey Harris performed assays in western Nevada until his death in Gold Hill (near Carson City and Virginia City) in 1894.

Ingots discovered among items recovered in the S.S. *Central America* treasure included those of five different manufacturers. By far the most plentiful of these were ingots from the Kellogg & Humbert firm. All others, including Blake & Co., Henry Hentsch, Justh & Hunter, and Harris Marchand are much scarcer. The Harris, Marchand & Co. ingots are the third rarest with 37 ingots discovered. Serial numbers for 36 of these ranged from 6278 to 6528 with one example showing 7095. It has been speculated that this higher serial number may have been produced in Marysville with the others all from Sacramento. Of the 37 ingots recovered, 22 had a higher fineness than this example, and eight ingots had a higher weight.

This large size ingot shows light yellow-gold color with a hint of green. The top face reads: No 6476 / Harris Marchand hallmark in a curved line / round hallmark MARCHAND ESSAYEUR / 56.65 OZ / 856 FINE / \$1002.42. This ingot measures 42 x 112 x 22 mm and is from ingot mold H&Ms-03.

Ex: Long Beach Signature (Heritage, 9/2004), lot 7341, where it brought \$140,875.

From The Marcello Collection.

Henry Hentsch Gold Ingot
83.54 Ounces, Ex: S.S. *Central America*
One of Only 33 Hentsch Ingots Recovered

3258 Henry Hentsch Gold Ingot. 83.54 Ounces. CAGB-208. Henry Hentsch is a lesser-known name from the California Gold Rush era. No coins were issued under his name, only gold ingots, and to our knowledge none of those were known until the salvage of the *S.S. Central America* in 1988-1989. Hentsch was a relative latecomer to California. He arrived on the *Sonoma* in mid-1854, and did not open his assay office until February 2, 1856. At that time, Hentsch was 38 years old. The success of any private assayer in San Francisco depended upon the reputation of the owners. Hentsch was not only an assayer but he was also a banker, and his assaying office was located next door to his bank on the corner of Montgomery and Jackson streets. Hentsch was a Swiss citizen and prior to his arrival in San Francisco he apparently made a solid reputation in Europe, a reputation that transferred to his banking / assaying interests in California, where he advertised the issuance of Bills of Exchange in New York, Liverpool, London, Frankfurt, Hamburg, Berlin, Paris, and Geneva.

Hentsch ingots represented the smallest number of ingots recovered from the *S.S. Central America*. Of the 532 ingots recovered, only 33 had the Hentsch hallmark, closely followed by Blake & Co. with 34. This is a large-sized ingot from mold HH-04. The legends are neatly laid out on the top of the ingot: No 3113 / 849 FINE / Hy HENTSCH / Oz 83.54 / \$1466.16. The surfaces are unaffected by incrustations often seen on ingots from this shipwreck. A long, curved scratch extends from the upper-left of the top side down to the middle right-side; undoubtedly from the salvage operation 30 years ago. The ingot measures 56 x 104 x 25 mm. This is a rarely encountered, large-sized ingot from this little-known California assayer.

From The Marcello Collection.

Kellogg & Humbert Gold Ingot
40.64 Ounces, Bright 925 Fine Gold Content
Ex: S.S. *Central America*

3259 Kellogg & Humbert Gold Ingot. 40.64 Ounces. CABG-479. Ingots and privately issued coinage form the backbone of our numismatic understanding of the Gold Rush period. These relics provide a direct connection to the entrepreneurial individuals from the Eastern United States and around the world who ventured to the furthest reaches of the American frontier in search of fortune, often risking everything.

In the earliest years of the Gold Rush, there was a distinct shortage of circulating coinage and a lack of means to convert the large quantities of gold ore being discovered into a usable circulating medium. Firms like J.H. Bowie and Norris, Gregg, & Norris set up assaying and coining operations, but these were relatively small in scale. The proliferation of unscrupulous coiners and assayers made it difficult for the Western public to discern whether the coins and ingots that did circulate were of the proper standard. Most merchants carried a set of scales on hand to measure raw, unconverted gold dust, which was often used to make purchases in the absence of coinage. The value of the dust varied tremendously, however, making commerce exceedingly challenging.

Two firms quickly became instrumental in the creation of universally respected gold coins and ingots in the San Francisco area. The first was Moffat & Co., for whom John G. Kellogg and Augustus Humbert both worked prior to establishing their own partnership of Kellogg & Humbert in 1855, becoming the other leading assaying and coining business in the West. To what extent did Kellogg & Humbert dominate the market for producing ingots? Prior to the discovery of the S.S. *Central America* in the late 1980s we could only speculate, but the treasure recovered off the Carolina coast provided concrete evidence. Five makers were represented among the more than 500 gold ingots initially recovered from the wreckage. Kellogg & Humbert's bars, 346 in all, made up more than 60% of the ingots found.

More than just tell the story of a prominent California assayer, this impressive ingot serves as a tangible vestige of a critical cross-continent trade that took place during the 1850s. With the Philadelphia Mint's statutory price for an ounce of gold set at \$20.67 and the market price on the West coast ranging between \$16 and \$18 per ounce, traders were able to profit off the difference by exporting large quantities of the yellow metal to places like New York. In fact, that was the S.S. *Central America*'s intended destination after leaving the port of Havana, Cuba. The vital role the ship and the ingots it carried played in the east-west trade further deepened the economic crisis known as the Panic of 1857.

This is an impressive medium to large size ingot. The top side is evenly laid out: No 612 / K&H hallmark / 40.64 Oz / 925 FINE / \$777.09. The ingot number is repeated on the upper portion of the back side in a smaller, different font. Each of the six sides are bright yellow-gold with only the slightest incrustation from the iron hull of the ship seen on the back side. The top side shows a number of small depressions, a result of the casting process. A larger but still shallow circular depression from casting is located in the center of the (1857) dollar value on the lower portion of the top side. The ingot measures 44 x 97 x 15 mm.

Kellogg & Humbert Gold Ingot
48.30 Ounces of 840 Fine Gold
Ex: S.S. Central America

3260 Kellogg & Humbert Gold Ingot. 48.30 Ounces. CABG-498. Nancy Oliver and Richard Kelly published a fascinating article in the October 2017 edition of *The Numismatist*, detailing an often forgotten but no less important personage involved in the firm of Kellogg & Humbert: John Hewston, Jr. Hewston's past is colorful and shows him to be something of a renaissance man. According to Oliver and Kelly's article "When Push Comes to Shove," Hewston had obtained a medical degree by his early 20s, but opted not to pursue a career in medicine. The authors explain:

"He became interested in surveying and was appointed to the Government Survey along the coast of Florida and the Carolinas under Professor Alexander Dallas Bache, a well-known expert in steamboat surveying. Shortly thereafter, he was hired as a melter/refiner at the Philadelphia Mint, located in his hometown. After Hewston demonstrated his proficiency in this capacity, U.S. President Franklin Pierce sent him to help establish the San Francisco Mint."

Hewston arrived in San Francisco in November 1853 and presumably got to work getting the facility ready for opening. He was present in April 1854 when the nascent California branch mint began taking deposits, but mechanical problems caused production to be delayed by two weeks. This experience, and others relating to the way the new mint was governed, did not sit well with Hewston. He pursued private ventures on the side, including contracting for Kellogg & Humbert, the most established and respected refining and assaying service in San Francisco. Apparently, the partners were impressed with Hewston's work and offered to pay him \$6,000 to leave the San Francisco Mint, which he did. Oliver and Kelly present a letter Hewston wrote on May 31, 1855 in which he stated:

"I am engaged with Kellogg and Humbert in their Assay office, and they give as much pay as the Mint did — besides I have a place for my laboratory in their office and all I can make out of it. I have several analy[sis]es on hand at the present time."

Hewston would work alongside John Kellogg through 1866. In 1860, when the firm of Kellogg & Humbert was dissolved, Kellogg entered into a new business arrangement with Hewston and Cashier J.H. Stearns, declaring in the April 2 issue of the *Alta California*:

"Dr. John Hewston, the practical assayer and chemist of the house, is well known to us, having in early days sat in the same school. A number of years under the ablest anatomist and chemist in Philadelphia, with a mind bent upon his studies, has fitted him fully to fill his position with ability and judgment."

John Hewston, Jr. was, without question deeply involved in the production of this and other Kellogg & Humbert ingots. His story is one of many woven into the fabric of this Gold Rush souvenir. This medium to large-size ingot has devices that are well-spaced with an evenly and deeply impressed K&H hallmark. The top side reads: No 634 / K&H hallmark / 48.30 Oz / 840 FINE / \$838.69. The individual ingot number is repeated at the top of the back side in a different and smaller font. The surfaces overall are bright yellow-gold with just a few flecks and streaks of incrustation from the ship's hull evident. The ingot measures: 44 x 98 x 20 mm.

Kellogg & Humbert Large Size Gold Ingot
61.89 Ounces, Ex: S.S. *Central America*

3261 Kellogg & Humbert Gold Ingot. 61.89 Ounces. CABG-580. The loss at sea of the S.S. *Central America* on September 12, 1857 took the lives of 426 people and cost an estimated \$1.5 million in registered treasure. Shortly after the ship's sinking questions were raised about the seaworthiness of the ship. The Panama correspondent of the *San Francisco Evening Bulletin* published a lengthy report on two recent accidents that undoubtedly weakened the structure and stability of the vessel.

There had been two recent strandings of the *Central America* (formerly the *George Law*), one on a Florida reef 15 months prior to the ship's sinking and the second a stranding near the port of Aspinwall on April 30, 1857. After the first stranding in Florida that lasted 16 hours, a considerable amount of the copper undergirding of the ship was either damaged or lost. Once freed from the reef, the ship proceeded to Aspinwall. As the reporter stated: "Every ship-master will tell you that in that harbor (Aspinwall), a vessel with her copper off, will get any quantity of worms in her wood in a short time, and it is surprising how quickly they will work into the timbers, making a complete honey-comb of them ..." "The hull was not coppered again until several months after the first stranding, leading to the inevitable conclusion that the hull was weakened by worms that were then sealed into the ship when it was re-coppered. The Aspinwall grounding left the ship "hung by the middle" and the solution to freeing the vessel lay in evacuating all the passengers on board, thus allowing the ship to rise sufficiently to float free of the reef once the tide came in. It has been proved that the subsequent shipwreck in September was not caused by shipworms. However, the hull of the ship was undoubtedly weakened by these two strandings and the inevitable worms that were sealed into the hull once the ship was re-coppered. When the hurricane hit the vessel in September, the attempt to jettison heavy and possibly unnecessary cargo proved fruitless and after the overnight bailing of water the ship had taken on, the S.S. *Central America* slipped beneath the waves on the morning of the 12th of September.

After the initial panic of the loss of so many lives and treasure at sea, the wreck of the *Central America* was largely forgotten until 1988 when the Columbus-America Discovery Group began to recover much of the gold from the floor of the ocean. This large size ingot has its identifying legends nicely laid out. The top side reads: No 766 / K&H hallmark / 61.89 Oz / 905 FINE / \$1157.83. The top of the back side repeats the ingot number but in a different font and size. The ingot measures 44 x 97 x 25 mm. All six faces are bright yellow-gold with only the slightest trace of copper color on the left side.

CALIFORNIA FRACTIONAL GOLD

1868 Octagonal Liberty Quarter, MS67
BG-711, Single Finest at PCGS

- 3262** 1868 Liberty Octagonal 25 Cents, BG-711, R.4, MS67 PCGS Secure. As of (9/18), the present lot is the single finest PCGS-certified BG-711 octagonal quarter. The lemon-gold and lime-green surfaces appear immaculate, and all that denies perfection is moderate incompleteness of strike on the central reverse. The homely, thick-necked Liberty bust identifies the maker as Frontier, Deviercy & Co. The firm struck two 1868 octagonal quarter varieties, BG-710 and BG-711, which are readily distinguished by star and berry placements. NGC ID# 2BMM, PCGS# 10538

1871 BG-717 Liberty Octagonal Quarter, MS68
Single Finest at Either Leading Service

- 3263** 1871 Liberty Octagonal 25 Cents, BG-717, R.3, MS68 PCGS Secure. Those in search of the single highest-graded example of BG-717 need look no further. The present pristine representative offers a sharp strike and flawless apricot-gold surfaces. San Francisco jewelers Frontier, Deviercy & Co. struck several varieties of 1871 octagonal quarters, but BG-717 is distinct among those for its wide date. NGC ID# 2BMU, PCGS# 10544

COIN OF HAWAII

1883 Hawaii Dollar, MS64
Gold and Gunmetal-Blue Toning

- 3264** 1883 Hawaii Dollar MS64 PCGS Secure. The mintage of 500,000 coins for the 1883 Hawaiian silver dollar is misleading. Many of those pieces struck at the San Francisco Mint were eventually melted, and coins this well-preserved are scarce. Dappled olive-gold and gunmetal-blue toning covers each side with splashes of brilliance interspersed. Ticks are faintly visible beneath the original overlay, mostly on King Kalakaua's upper cheek. Population: 24 in 64 (3 in 64+), 22 finer (9/18). NGC ID# 2TGD, PCGS# 10995

PATTERNS

1853 Pattern Cent in German Silver
Judd-150, Thin Planchet, PR65
Ex: Bass

- 3265** 1853 One Cent, Judd-150 Thin, Pollock-178, Low R.7 PR65 PCGS. Ex: Harry W. Bass, Jr. A regular obverse quarter eagle die was paired with a wreath reverse that bears the denomination ONE CENT. This small cent pattern was struck with a reeded edge in a German silver alloy. The German silver alloy was a candidate to replace the large copper cent, but the 1856 Flying Eagle cent was instead issued in copper-nickel. The present brightly mirrored silver-gray Gem has a full strike and mark-free surfaces. The obverse displays a few tiny spots.
Ex: Brinton T. Schorer, 5/1973; Harry W. Bass, Jr. Collection, Part I (Bowers and Merena, 5/1999), lot 1005; Houston Money Show Auction (Heritage, 12/2015), lot 3472, where it brought \$4,230. NGC ID# 299J, PCGS# 11626

1858 Small Letters Flying Eagle Cent
Judd-192, Copper-Nickel, PR65

- 3266** 1858 Flying Eagle Cent, Judd-192, Pollock-235, Snow-PT13, R.5, PR65 PCGS. Eagle Eye Photo Seal, card included. The obverse is the familiar Small Letters 1858 cent. The pattern reverse generally resembles the 1860 regular issue reverse, but there is no shield at the top and the wreath is closed. Struck in copper-nickel with a plain edge. Each side retains most of the original light honey-tan color inherent in copper-nickel cents. The fields display strong mirrors and there is significant mint frost over the devices, enough to see cameo contrast on each side. NGC ID# 29BC, PCGS# 11842

1867 Five Cent Pattern in Copper
Judd-571, Pollock-639, PR65+ Brown

- 3267** 1867 Five Cents, Judd-571, Pollock-639, Low R.7, PR65+ Brown PCGS Secure. The obverse is modeled after the regular issue three cent nickel and features a bust of Liberty facing left, wearing a coronet, surrounded by the legend and date. On the reverse the denomination is placed within a laurel wreath that is positioned close to the edge, with a tiny IN GOD WE TRUST above. Examples are known in nickel and copper, with variants that show the 7 in the date either near or far from the hair curl. Only a half dozen copper pieces such as this one are believed known with the 7 further from the curl. Significant underlying red is seen on each side with light iridescence throughout. A rare opportunity for the pattern collector. NGC ID# 29MC, PCGS# 60781

1881 Liberty Nickel in Copper
Judd-1672, PR64 Red and Brown Cameo

- 3268** 1881 Liberty Head Five Cents, Judd-1672, Pollock-1873, R.6-7, PR64 Red and Brown Cameo NGC. The overall design is similar to that used on the Liberty Head nickel of the era. The obverse, however, displays UNITED STATES OF AMERICA around the periphery in place of the encircling stars. The reverse is devoid of lettering save for the Roman numeral five within the wreath. Struck in copper with a plain edge. Copper strikes are relatively scarce compared to those produced in nickel with only a half a dozen or so known in this metal. Called Red and Brown, this piece is very close to a full Red coin. Just the slightest hint of blue patina can be seen on each side. The fields are deeply reflective and enhance the cameo contrast that is evident against the frosted devices. An exceptional pattern. NGC ID# 293W, PCGS# 72068

End of Session One

3272

SESSION TWO

COLONIALS

1662 Oak Tree Twopence, VF25
Noe-31.5, W-240

- 3269** 1662 Oak Tree Twopence VF25 PCGS Secure. Noe-31.5, W-240, R.7. Small 2. In this state of the dies, which were used to manufacture all 1662 Oak Tree twopence, the second 6 is nearly indistinguishable, almost resembling a contorted 7, and a fully formed die break occurs above the 2. The well-defined obverse is misaligned toward 5:30, while the reverse is nicely centered but with somewhat mushier legends. The surfaces are evenly toned in gunmetal blue patina. A rare variety for the specialist. Listed on page 50 of the 2019 *Guide Book*. NGC ID# 2ARE, PCGS# 17

- 3270** 1652 Pine Tree Shilling, Large Planchet, No Pellets at Trunk — Graffiti — NCS. Fine Details. Noe-2, W-700, Salmon 2-C, R.5. 66.7 gn. Stone-white high points compare with lavender-gray fields. The upper edge is uneven, as made, and the shilling has straight clips at 3 and 9 o'clock. The graffiti consists of three light straight pinscratches that form a letter A above the 5 in the date. Wear is even on the reverse but somewhat greater near 7:30 and the top of the tree, where a natural bend has been straightened. Listed on page 51 of the 2019 *Guide Book*.

1652 Pine Tree Shilling, VF25
Noe-29, Small Planchet

- 3271** 1652 Pine Tree Shilling, Small Planchet, VF25 NGC. Noe-29, W-930, Salmon 11-F, R.3. 72.0 gn. D over retrograde D in ENGLAND. A charming and unblemished example with steel-gray high points and wheat-brown fields. The obverse and reverse exergues are lightly brought up, likely due to a moderately tapered planchet. A few left-side peripheral letters are partly absent, and mint-made clips create a somewhat oval appearance. Listed on page 51 of the 2019 *Guide Book*. NGC ID# 2ARZ, PCGS# 24

1652 Pine Tree Shilling, VF30
Small Planchet, Noe-29

- 3272** 1652 Pine Tree Shilling, Small Planchet, VF30 PCGS. Noe-29, W-930, Salmon 11-F, R.3. 68.52 gn. The dove-gray surfaces reveal powder-blue, lilac-red, and golden-brown undertones upon rotation beneath a light. Well defined and unblemished with an oval shape that favors the right-side legends. Mint-made clips affect ASATH. Listed on page 51 of the 2019 *Guide Book*. NGC ID# 2ARZ, PCGS# 24

- 3273** (1670-75) St. Patrick Farthing VF20 PCGS. Breen-208, W-11500, M. 1c.4-Ba.5. A problem-free chocolate-brown example with hints of charcoal toning in protected regions. The brass splasher is large but overlaps only the lower half of the crown. Mark Newby imported a quantity of this issue in 1681, and it was made legal tender by New Jersey in 1682. Listed on page 53 of the 2019 *Guide Book*. NGC ID# AUAR, PCGS# 42

- 3274** (1670-75) St. Patrick Halfpenny VF20 PCGS. Vlack 1-A, W-11540. The brass splasher covers the upper right portion of the crown. A minimally granular olive-brown representative with unmarked surfaces and good eye appeal. St. Patrick halfpennies are much scarcer than their farthing counterparts. Listed on page 53 of the 2019 *Guide Book*. NGC ID# AUAS, PCGS# 46

- 3275** 1723 Hibernia Farthing, DEI GRATIA, MS65 Brown NGC. M. 3.12-Bd.2, W-12550, R.5. The 3 in the date is repunched. A splendid medium brown Gem with hints of faded mint red in design crevices. Sharply struck and unmarked. A narrow strike-through, as coined, crosses the bottom of the king's neck. Listed on page 56 of the 2019 *Guide Book*. NGC ID# 2AT6, PCGS# 176

- 3276** 1766 Pitt Halfpenny AU50 NGC. Betts-519, W-8350, R.3. A deep brown representative of the popular halfpenny token. Pitt's cheek and shoulder display light wear, but no marks merit mention, though a small strike-through is present on the field near Pitt's coat. William Pitt the Elder campaigned for the repeal of the Stamp Act, despised on both sides of the Atlantic. Listed on page 62 of the 2019 *Guide Book*. NGC ID# 2AUH, PCGS# 236

- 3277** 1773 Virginia Halfpenny, Period MS64 Brown PCGS Secure. N. 26-Y, W-1680, R.2. Designated as Brown by PCGS, but orange-red outlines shield elements and fills the legends. The high points and fields are tan-brown. A satiny mark-free near-Gem with uncommon eye appeal. Listed on page 57 of the 2019 *Guide Book*. NGC ID# 2ATK, PCGS# 240

**1787 Massachusetts Cent, MS61 Brown
Ryder 2-E, Believed Second-Finest Known**

- 3278** 1787 Massachusetts Cent, Arrows in Left Talon, MS61 Brown NGC. Ryder 2-E, W-6060, R.5. Ex: Donald G. Partrick Collection. To the best of our knowledge, the second-finest known of this elusive variety, and one of only two currently known in Mint State. This piece is from a mildly later die state than the Norweb coin, with the reverse die crack slightly more advanced. The central design elements are also a bit more softly struck, as is typical of this issue. Orange-brown and auburn hues encompass the glossy surfaces on both sides. Listed on page 71 of the 2019 *Guide Book*. Ex: Jon Hanson (4/2008); Donald Groves Partrick; FUN Signature (Heritage, 1/2015), lot 5696, which realized \$2,585. NGC ID# 2B25, PCGS# 302

- 3279** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, XF40 PCGS. N. 15-V, W-6910, R.5. A conditionally rare Fugio variety, identified by the radial obverse die crack at 4:30 and the oversized E in ONE. The lavender-brown surfaces are unmarked and microgranular. The reverse is slightly misaligned toward 4:30, but only dentil width is affected. Listed on page 99 of the 2019 *Guide Book*. NGC ID# AX5E, PCGS# 883

- 3280** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS61 Brown NGC. N. 12-X, W-6820, R.3. A Fugio type coin from the Bank of New York Hoard. Medium to deep olive-brown toning dominates, though hints of faded mint red are also evident. Without apparent abrasions, but tiny flan flaws are distributed, and the strike is incomplete on the sun and lower reverse. Listed on page 99 of the 2019 *Guide Book*. NGC ID# AX5E, PCGS# 883

- 3281** 1787 Fugio Cent, STATES UNITED, Eight-Pointed Stars, VF35 NGC. N. 15-Y, W-6915, R.2. Only the Newman 15-Y variety has two eight-pointed stars on the reverse label, instead of the usual incused cinquefoils. This tan-brown Fugio copper has a small curved clip at 1 o'clock and minor reverse granularity. Listed on page 100 of the 2019 *Guide Book*. NGC ID# 2B8K, PCGS# 898

- 3282** 1789 Mott Token, Thin Planchet, Plain Edge MS63 Brown NGC. Breen-1021, Rulau-E-NY-611. An unmarked and coruscating medium to deep brown example. The late die state with a buckled central obverse, a large break from the upper left clock corner, and soft definition on the central reverse. A small curved clip is noted at 2:30, as made. Although dated 1789, the Mott token was likely issued during the Hard Times era. Listed on page 86 of the 2019 *Guide Book*. NGC ID# 2B5L, PCGS# 604

- 3283** 1795 Washington Grate Halfpenny, Large Buttons, Reeded Edge, MS65 Brown PCGS. Baker-29B, W-10955, Musante GW-49, R.2. A razor-sharp Gem with slightly glossy surfaces and no visible blemishes. Original burgundy-brown toning covers each side, although lighter reddish hues emerge in portions of the fields at certain angles beneath a light. The fields have a hint of reflectivity that only adds to the immense visual appeal. Listed on page 95 of the 2019 *Guide Book*. NGC ID# 2B7M, PCGS# 746

**Washington Liberty & Security Penny
MS63 Red and Brown, GW-45**

- 3284** (1795) Washington Liberty & Security Penny MS63 Red and Brown PCGS. Baker-30, W-11050, Musante GW-45, R.2. CAC. Mint Red accompanies the shield and legends, and outlines Washington's portrait. The open fields are olive-brown. The sharply struck surfaces display minimal detractors. A well-made Washington variety collected on both sides of the Atlantic. Listed on page 96 of the 2019 *Guide Book*. CAC: 1 in 63, 2 finer (9/18). NGC ID# 2B7V, PCGS# 768

HALF CENTS

- 3285** 1793 C-2, B-2, R.3 — Corroded — ANACS. VG Details, Net Good 4. The Y in LIBERTY is far from the pileus, and a pointed stem points to the left side of the U in UNITED, identifying the C-2, B-2 variety. Manley notes this variety is usually only available in low grades. This olive-brown specimen shows extensive corrosion on both sides, but the date and part of the legends remain legible. Our EAC grade AG3. NGC ID# 2222, PCGS# 35006 Base PCGS# 1000

1793 C-4, B-4 Half Cent, VG Details

- 3286** 1793 C-4, B-4, Low R.3 — Environmental Damage — PCGS Genuine Secure. VG Details. Intermingled chestnut and steel-brown patina appear on this attractive and somewhat glossy first-year half cent. The gloss is the result of careful burnishing to remove corrosion that remains visible on the reverse. The process weakened the peripheral elements. Our EAC grade Good 4.

1797 C-1, B-1 Half Cent, VF30
Struck over a TAL Token

3287 1797 1 Above 1, C-1, B-1, R.2, VF30 PCGS Secure. Manley Die State 4.0. This is an exceptional example of an advanced die state, nearly terminal, that also shows considerable undertype from a Talbot, Allum, & Lee token. The undertype is visible in the left obverse field, and along the left side of the reverse where the surfaces appear to exhibit roughness, but in actuality display remnants of the previous design from the token. The surfaces are smooth and pleasing dark olive-brown. Our EAC grade VF20. NGC ID# 2228, PCGS# 35101 Base PCGS# 1042

3288 1804 Crosslet 4, Stems, C-10, B-9, R.1, AU58 PCGS Secure. CAC. Manley Die State 3.0. A momentarily circulated deep brown Draped Bust type coin. Nicely struck and satiny. A lens reveals a few hair-thin marks on the portrait. The dies are rotated 35 degrees clockwise from coin turn. Our EAC grade XF45. CAC: 9 in 58, 22 finer (8/18). NGC ID# 222F, PCGS# 35158 Base PCGS# 1069

3289 1806 Small 6, No Stems, C-1, B-3, R.1, MS62 Brown NGC. A well-struck chocolate-brown example. A tick beneath the N in CENT provides an identifier. The final marriage involving the hardy No Stems reverse die, which previously coined the C-12 1804, C-13 1804, and C-1 1805 varieties. Our EAC grade AU55. NGC ID# 222J, PCGS# 35191 Base PCGS# 1093

3290 1826 C-1, B-1, R.1, MS64 Brown PCGS Secure. CAC. Manley Die State 4.0, "scarce." Light brown and medium brown toning alternate across this lustrous and well-preserved near-Gem. The stars are inexact brought up, but the major motifs are bold. The 1826 is plentiful in circulated grades but undeniably scarce in Mint State. Our EAC grade MS60. CAC: 7 in 64, 2 finer (9/18). NGC ID# 222U, PCGS# 35252 Base PCGS# 1144

LARGE CENTS

1793 Chain Cent, Good Details
Sheldon-3, AMERICA

3291 1793 Chain, AMERICA, S-3, B-4, Low R.3 — Corrosion — NGC Details. Good. The date is easily readable on this high demand first-year issue. Deep-brown surfaces are granular from overall corrosion, yet all of the motifs are visible throughout both sides. Several rim bumps exist on the obverse, as often seen on well-circulated Chain cents. No other detriments are present, making this an affordable and thoroughly acceptable example of the type. Our EAC grade AG3.

1793 Chain Cent, Good Details
S-4, Periods Obverse

3292 1793 Chain, AMERICA, Periods, S-4, B-5, R.3 — Corrosion — NGC Details. Good. Only a ghost of the date remains on this Sheldon-4 cent, visible with a squint and a fair amount of imagination. In contrast, LIBERTY is sharp and the portrait is fully outlined. On the reverse, the motifs are well-defined for the grade despite overall granularity of the surfaces, with UNITED slightly weaker than the other elements. The rims are exceptionally strong with virtually no imperfections, and pleasing medium-brown color spreads evenly across both sides. Our EAC grade Good 4.

1793 S-5, B-6 Wreath Cent, VF Details
Large LIBERTY

3293 1793 Wreath, Vine and Bars Edge, S-5, B-6, R.4 — Environmental Damage — PCGS Genuine. VF Details. Fine granularity imparts a mattelike finish to the surfaces of this Sheldon-5 cent — still pleasing, although not entirely natural in appearance. Olive-brown accents overlay brownish-tan toning. The coin is smooth in-hand, with moderate high-point wear on well-defined devices. The obverse beading is weak along the left edge and below the date, while the reverse is well-centered and sharp. A thin planchet lamination runs horizontally across the reverse tangent to D in UNITED, through ONE, and through M in AMERICA. An attractive example of this better variety. Our EAC grade VG10.

1793 S-8, B-13 Wreath Cent, VG10
Vine and Bars Edge

3294 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3, VG10 ANACS. The horizontal stem above the date identifies the obverse die that was used to coin Sheldon varieties 8, 9, and NC-4. The reverse features a triangular bow that made no other appearances in the early cent series. Following the Chain cents, the Vine and Bars edge Wreath cents continued the first year copper production at the U.S. Mint in Philadelphia. Pleasing walnut and dark chocolate surfaces have no obvious impairments with faint corrosion and minor scrapes visible under a glass. Our EAC grade VG8. NGC ID# 223H, PCGS# 35456 Base PCGS# 1347

3295 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2 — Scratches, Corrosion — NGC Details. VG. An evenly granular deep brown representative of the ephemeral first-year type. The portrait displays myriad faint pinscratches, but the fields appear unabraded. Sharply defined for the third-party grade. Our EAC grade Good 5.

3296 1794 Head of 1795, S-72, B-65, R.2, VF25 PCGS. Breen Die State III. A nicely defined medium brown representative. The reverse exhibits numerous minor laminations. The portrait displays a few narrow marks, as does the reverse near the I in AMERICA and east of the T in CENT. According to Breen, Sheldon-72 was the final 1794 variety, delivered December 30. Our EAC grade Fine 12. NGC ID# 223R, PCGS# 35699 Base PCGS# 1365

1796 S-89, B-10 Cent, VF25
Liberty Cap Type

3297 1796 Liberty Cap, S-89, B-10, R.3, VF25 ANACS. The Liberty Cap design was introduced in September 1793 and remained in production until about May 1796. Walter Breen believed that this variety and his variety B-11 (S-90) where the final two varieties of the type that were produced in May 1796. This pleasing piece has nice detail and attractive steel-brown surfaces that show only slight, microscopic surface roughness. Our EAC grade Fine 15. NGC ID# 223V, PCGS# 35774 Base PCGS# 1392

3298 1796 LIHERTY, S-103, B-27, R.4, Good 6 PCGS. The scarcer of the two LIHERTY Sheldon varieties, which feature a B over inverted B in LIBERTY. S-103 has two leaves beneath the O in OF, while S-104 has three leaves beneath that letter. This S-103 example has readable legends, though the denominator is faint and the T in UNITED is obscured by verdigris. The deep brown surfaces are microgranular. Marks are limited to a few thin lines above the date. Our EAC grade Good 5. NGC ID# 223X, PCGS# 35882 Base PCGS# 1413

1796 S-110, B-16 Cent, VF30
Terminal Die State

3299 1796 Reverse of 1794, S-110, B-16, R.3, VF30 ANACS. Breen Die State IX. A prominent rim break joins the tops of TY to the rim, and the obverse has additional cracks in the right and lower right obverse field. The obverse dies used for S-110 and S-111, in earlier die states, are easily confused, but there is no mistaken identity in the latest die state. This rich steel-brown example has trivial handling marks and slight roughness on its pleasing surfaces. Our EAC grade Fine 15. NGC ID# 223W, PCGS# 35801 Base PCGS# 1404

3300 1802 S-237, B-10, R.2, AU50 NGC. Breen Die State IV. A small mark on Liberty's throat is one of several scattered contact marks on this About Uncirculated type coin, although the surfaces are generally smooth with deep chocolate-brown color. Only light wear is visible on the high points of the wreath and portrait. Our EAC grade XF40. NGC ID# 224E, PCGS# 36320 Base PCGS# 1470

1811 S-287 Cent, XF45
Middle Die State

3301 1811 S-287, B-1, R.2, XF45 NGC. Breen Die State III. An evenly struck piece with smooth walnut-brown surfaces and light wear. There are a few faint rim bumps on each side, most visible near the final S in STATES and the first A in AMERICA. All of Liberty's major hair curls are intact. A pleasing Classic Head type coin or date representative. Our EAC grade VF30. NGC ID# 224U, PCGS# 36496 Base PCGS# 1555

3302 1812 Small Date, S-290, B-2, R.1, AU50 NGC. A mahogany-brown and lavender-red representative of the conditionally rare Classic Head type. The well-defined surfaces display moderate peripheral granularity. We note only a small spot on the obverse rim at 2:30 and a field tick above the N in ONE. Our EAC grade VF35. NGC ID# 224W, PCGS# 36499 Base PCGS# 1561

3303 1814 Crosslet 4, S-294, B-1, R.1, XF40 PCGS Secure. Breen Die State II. The Crosslet 4 in the date and the leaf pointing to the right curve of D in UNITED identify the popular S-294 variety. Only light wear is evident on the strongly impressed design elements and the pleasing chocolate-brown surfaces are lightly abraded for the grade. There is a raised ridge at the dentils above TES OF A. Our EAC grade VF30. NGC ID# 224Y, PCGS# 36520 Base PCGS# 1573

3304 1814 Crosslet 4, S-294, B-1, R.1, XF40 NGC. A pleasing example of the conditionally scarce final-year Classic cent. Mint gloss remains across portions of the mahogany-brown surfaces, despite light to moderate wear on the curls and leaves. Only a few unimportant marks are evident. The reverse is misaligned a few degrees toward 1 o'clock, as often seen for the variety. Our EAC grade VF35. NGC ID# 224Y, PCGS# 36520 Base PCGS# 1573

**1814 Plain 4 Cent, S-295, AU58
Rich, Glossy Patina**

- 3305 1814 Plain 4, S-295, B-2, R.1, AU58 NGC.** Two varieties of the 1814 large cent are known, identified by having either a plain 4 or crosslet 4 in the date. The two are relatively similar in availability, though the Plain 4 variant is slightly scarcer overall. This Plain 4 example is an elusive near-Mint representative with no signs of the usual environmental impairments that affect this type. Deeply blended shades of burgundy, auburn, and chocolate-brown blanket glossy, problem-free surfaces on each side. The strike is above-average for the issue, while a small planchet flaw is noted on the rim near the ER in AMERICA. An immensely pleasing example for either date or type purposes. Our EAC grade XF40.

Ex: Houston Signature (Heritage, 12/2014), lot 3449, which realized \$3,965.63. NGC ID# 224Y, PCGS# 36517 Base PCGS# 1576

- 3306 1820 Large Date, N-13, R.1, MS65 Brown PCGS. CAC.** A splendid, lustrous Gem. Primarily apple-green, but rose-red outlines the stars and letters. No spots are present, and marks are limited to a couple of delicate lines on the cheek. Undoubtedly once part of the Randall Hoard, the source of most high-grade early Matron Head cents. Our EAC grade MS60. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615

- 3307 1820 Large Date, N-13, R.1, MS63 Red PCGS.** The 1820 N-13 cent is available in Mint State courtesy of the Randall Hoard, but few of those coins retain their full fiery initial mint bloom. As of (9/18), PCGS has certified only 21 1820 cents as Red. This lustrous Select example has a predominantly orange-gold obverse. A fingerprint fragment is noted near star 8 and the ME in AMERICA, and gunmetal toning accompanies the lower left portion of the wreath. Our EAC grade MS62. NGC ID# 2256, PCGS# 36675 Base PCGS# 1617

- 3308 1823/2 N-1, R.2, XF40 NGC.** The 1823 is the scarcest date of the Matron Head series. Including the out-of-mint "restrike," three die varieties are known, each with a separate *Guide Book* listing. This is a deep olive-brown cent with lavender-tinged high points. Small marks are beneath stars 8 and 10, but the surfaces are generally smooth and attractive. Our EAC grade VF20. NGC ID# 225B, PCGS# 36760 Base PCGS# 1630

**1827 N-11 Cent, MS64 Brown
A Scarce Mint State Example**

- 3309 1827 N-11, R.1, MS64 Brown PCGS. CAC.** An absolutely beautiful example, this cent has full cartwheel luster with intermingled olive-brown and steel surfaces that retain the slightest hints of original red mint color beneath the toning. Although the N-11 cent is a plentiful 1827 variety, only about a dozen examples are finer than this piece. Our EAC grade MS60. NGC ID# 225H, PCGS# 36868 Base PCGS# 1651

- 3310 1849 N-3, R.4, MS65 Brown NGC.** Grellman Die State g. Bob Grellman lists 22 different die states for N-3, each documenting an additional degree of crumbling on the reverse die. Designated as Brown by NGC, but both sides retain glimmers of brick-red about design elements. Devoid of marks or spots. The stars are lightly brought up but the major devices are bold. Our EAC grade MS62. PCGS# 405640 Base PCGS# 1886

- 3311 1857 Large Date, N-1, R.1, MS64 Brown NGC.** Aquamarine toning accompanies peripheral elements. The centers are light brown. A strike-through is noted above the wreath ribbon, but abrasions are essentially absent. The strike is generally sharp, though Liberty's shoulder and the opposite portion of the wreath are incomplete. Our EAC grade MS60. NGC ID# 226P, PCGS# 389634 Base PCGS# 1928

FLYING EAGLE CENTS

- 3312 1857 MS64 PCGS.** This is a well-preserved near-Gem type coin with luminous tan-gold luster. No obtrusive abrasions are visible. Both sides have considerable strike weakness, mainly around the margins, with the eagle's tailfeathers and the wreath bow particularly affected. Wide machine doubling (a strike characteristic) is seen on all obverse border lettering. NGC ID# 226P, PCGS# 2016

**1857 Flying Eagle Cent, MS65
First Year of Regular Issue**

- 3313 1857 MS65 PCGS Secure.** Soft mint luster issues from tan-gold surfaces. Each side is incompletely struck from clashed and cracked dies, but there are virtually no marks to report on this Gem Flying Eagle cent from the first year of regular issue. While nearly 17.5 million coins were minted, only 19 example are graded higher at PCGS (9/18). NGC ID# 226P, PCGS# 2016

**1857 Flying Eagle Cent, MS65
Finer Pieces Are Rare**

- 3314 1857 MS65 PCGS.** Tawny-gold and pale sea-green hues grace this satiny, unabraded Gem type coin. The strike is sharp on the eagle's tailfeathers and the wreath, producing strong visual appeal. The 1857 Flying Eagle cent is often available in this grade, but finer pieces are rarely offered. PCGS has certified only 19 pieces finer (8/18). *Ex: Long Beach Signature (Heritage, 9/2005), lot 760, which realized \$2,990; Central States Signature (Heritage, 5/2007), lot 1027, which realized \$2,990. NGC ID# 226P, PCGS# 2016*

- 3315 1858 Large Letters MS64 NGC.** This Large Letters coin is razor-sharp, showing satiny tan-olive toning over orange-gold luster. The obverse fields have a hint of reflectivity when tilted beneath a light. No distracting abrasions are visible on this well-preserved Flying Eagle type coin. NGC ID# 2277, PCGS# 2019

**1858 Flying Eagle Cent, MS65
Colorful Large Letters Coin**

3316 1858 Large Letters MS65 NGC. A sharp, luminous Gem example of the Large Letters subtype. This Flying Eagle cent exhibits no bothersome abrasions and has luminous surfaces. Tan-gold borders on the obverse surround multicolor rings of toning on the interior. On the reverse, iridescent gold luster characterizes the borders, leaving the center with a dusky russet and olive hue. Higher-grade Large Letters coins are scarce. Census: 20 in 65, 4 finer (8/18). NGC ID# 2277, PCGS# 2019

3317 1858 Small Letters MS64 PCGS. Snow-5. Low Leaves. Closed E in ONE, hubbed over an Open E in ONE. A lustrous pumpkin-gold Choice cent with blushes of deeper walnut-brown toning above the eagle's tail and across the eagle's neck. The sharply struck surfaces appear unabraded, though a small reverse strike-through is at 2:30. The reverse exhibits a rim die break between 2 and 4 o'clock. NGC ID# 2279, PCGS# 2020

PROOF FLYING EAGLE CENT

3318 1856 Snow-9 — Holed — NCS. Proof Good Details. A tan-brown survivor with two 4 mm holes inside the rims near 3 and 9 o'clock. The date is clear and the remaining legends are mostly readable. Ideal for a lowball key date set. Regardless of condition, the historic 1856 Flying Eagle is the first and rarest small cent date.

INDIAN CENTS

3319 1859 MS64 PCGS. A satiny, luminous near-Gem example of this one-year Laurel Wreath type. The fields are semiprooflike, coated in copper-orange and delicate lavender hues. No major carbon spots are seen and abrasions are trivial. The strike is sharp throughout. NGC ID# 227E, PCGS# 2052

3320 1860 MS65+ PCGS Secure. Metal flowlines in the fields suggest a later die state for this high-end Gem, although no cracks or chips are visible. A tiny mark on Liberty's cheek is all that keeps this coin from a full Premium Gem designation. The strike is sharp and each side displays uniform copper-gold luster. NGC ID# 227F, PCGS# 2058

**1861 Indian Cent, MS66
Satiny Surfaces**

3321 1861 MS66 PCGS Secure. CAC. With the reverse inverted, this Premium Gem exhibits medal-turn alignment, rather than the usual coin-turn alignment, a strike variant that will interest the advanced Indian cent specialist. This lovely cent has satiny golden-tan surfaces and bold design motifs. CAC: 26 in 66, 4 finer (9/18). NGC ID# 227G, PCGS# 2061

3322 1864 L On Ribbon MS65 Red and Brown PCGS. CAC. Streaky red and brown color characterize the surfaces of this first-year bronze Indian cent. The strike details are complete throughout and there are no observable spots of carbon. A solid Gem example of this popular date. NGC ID# 227M, PCGS# 2080

3323 1864 L On Ribbon MS64 Red PCGS. Full Red examples of the L On Ribbon bronze cent of 1864 are elusive. Both sides of this piece offer shimmering orange-red luster and are well-struck with few noticeable abrasions. A few microscopic flecks of carbon in the fields rule out a higher classification. Population: 53 in 64 (1 in 64+) Red, 45 finer (9/18). NGC ID# 227M, PCGS# 2081

3324 1871 MS64 Brown PCGS Secure. CAC. Bold N in ONE. While graded Brown, some lucky collector will be pleased by the added presence of underlying mint red still evident beneath the light dusting of brown patina. Sharply struck throughout. Population: 51 in 64 Brown, 17 finer. CAC: 9 in 64, 8 finer (9/18). NGC ID# 227V, PCGS# 2100

3325 1871 MS64 Red and Brown PCGS Secure. Bold N. Formerly housed in an early generation ANACS holder at the same near-Gem grade level, this attractive Red and Brown example now sits in a PCGS Secure slab. Attractive mint red color displays deep-blue overtones and full mint luster. A solitary carbon fleck is noted between E and N in CENT. PCGS reports just 80 numerically finer pieces (8/18). NGC ID# 227V, PCGS# 2101

3326 1871 MS65 Red and Brown PCGS Secure. Bold N. The usual variety for circulation strikes, of which almost 4 million coins were produced. This Red and Brown Gem offers glowing luster from orange-gold borders and golden-brown centers. The feather tips are strong, though the diamonds on the ribbon show moderate softness. Interesting cracks appear through the left portion of the wreath, and a carbon spot on the lower serif of S(TATES) acts as a pedigree marker. PCGS reports two finer Red and Brown coins (9/18). NGC ID# 227V, PCGS# 2101

3327 1871 MS65 Red and Brown PCGS Secure. Bold N. The semikey 1871 is a prize in better Mint State grades. The present lustrous and unabraded Gem is mostly pumpkin-gold though Liberty's cheek displays olive hues. Minor mint-made strike-throughs accompany the M in AMERICA and the leftmost headdress tip. NGC ID# 227V, PCGS# 2101

3328 1872 MS65 Red and Brown PCGS Secure. Original red color mellows to chestnut-brown shades throughout both sides of this Gem 1872 cent. Satin luster glows across the smooth, mark-free surfaces. A few pinpoint flecks of brownish-gray toning merge seamlessly into the attractive coloration of this sharply struck example. The 1872 issue is rare any finer. Population: 89 in 65 (2 in 65+) Red and Brown, 11 finer (8/18). NGC ID# 227W, PCGS# 2104

3329 1877 — Polished — NGC Details. AU. The shallow N in ONE on the reverse denotes the circulation strike dies. This AU-level coin shows light wear consistent with a vigorous polish job, and the surfaces are moderately glossy as a result. However, detail is strong, and the tangerine-orange surfaces show interesting green and rose accents.

3330 1889 MS65 Red PCGS Secure. The 1889 Indian cent is scarce in this grade and decidedly rare any finer. Both sides of this Gem are well-preserved with rich copper-orange and reddish hues. The upper headdress feathers show minor strike softness, as usual. Population: 53 in 65 (2 in 65+) Red, 13 finer (9/18). NGC ID# 2732, PCGS# 2174

3331 1908-S MS65+ Red and Brown PCGS Secure. The inaugural cent issue from the San Francisco Mint is scarce in Gem and finer grades. This Plus-designated Red and Brown coin leans heavily toward the Red color spectrum. Only traces of chestnut-brown toning appear on the frosted, copper-orange surfaces. This piece is well-struck and eye-appealing. NGC ID# 2296, PCGS# 2233

PROOF INDIAN CENTS

- 3332 1862 PR65 PCGS.** The 1862 is the date usually used for type purposes for copper-nickel cents. The fields on this piece are brightly mirrored and each side is unusually colorful, displaying significant lilac-tan and reddish patina. NGC ID# 229C, PCGS# 2259
- 3333 1874 PR66 Red and Brown NGC.** This Premium Gem proof is fully struck and displays reflective fields. Rich copper-orange undertones provide a backlight for burgundy, olive, and chestnut-brown toning on each side, although the "red and brown" color balance is maintained throughout. The obverse has a hint of cameo contrast. Census: 16 in 66 Red and Brown, 1 finer; 2 in 66 Red, 0 finer; 1 in 66 Red and Brown Cameo, 0 finer; 1 in 66 Red Cameo, 0 finer (8/18). NGC ID# 229T, PCGS# 2310
- 3334 1898 PR66 Red PCGS Secure.** A hint of contrast is evident on the obverse of this fire-orange and coppery-red Premium Gem, benefiting from deeply reflective fields and sharp, satiny devices. A tiny pepper speck below the F in OF is one of two or three barely discernible carbon presences. Population: 12 in 66 Red, 4 finer; 4 in 66 Red Cameo, 5 finer; 1 in 66 Red Deep Cameo, 0 finer (9/18). NGC ID# 22AL, PCGS# 2383
- 3335 1900 PR66 Red and Brown PCGS Secure.** The reported mintage for the 1900 cent is 2,262 proofs. This Premium Gem features repunching on the lower part of 19 in the date, unmentioned in Breen's *Proof Encyclopedia*. Copper-orange surfaces display blue and red-violet accents, and reflective fields. Population: 32 in 66 (3 in 66+) Red and Brown, 6 finer (9/18). NGC ID# 22AN, PCGS# 2388

LINCOLN CENTS

- 3336 1909-S VDB — Cleaned — PCGS Genuine Secure. UNC Details.** A lustrous and crisply struck example of the first-year, low mintage key. The recolored peach-gold and olive-green surfaces are attractive despite a smattering of pinpoint flecks on the reverse.
- 3337 1909-S VDB MS64 Red and Brown PCGS.** Although only 484,000 1909-S VDB cents were produced, many rolls were saved by speculators. Radiant copper-orange color dominates each side, deepening toward to rims. Every design feature is strongly impressed, including the designer's initials. NGC ID# 22B2, PCGS# 2427

Key 1909-S VDB Cent
MS65 Red and Brown

- 3338 1909-S VDB MS65 Red and Brown PCGS.** The 1909-S VDB cent is one of the most recognizable keys to this series. Indeed, it ranks among the *100 Greatest U.S. Coins*, according to Garrett and Guth. This Red and Brown Gem displays glowing mint luster and attractive violet accents with minimal carbon spotting. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS65 Red and Brown
Outstanding Visual Quality

- 3339 1909-S VDB MS65 Red and Brown PCGS Secure. CAC.** This is a terrific example of the most famous date in the series. The original and strongly struck surfaces exhibit an eye-appealing blend of copper-orange and amber-brown color with occasional violet accents that heighten the visual quality. Lincoln's portrait, the legends and initials, and the wreath are razor-sharp. Void of mentionable abrasions. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS65 Red and Brown
Nearly Full Red Luster

- 3340 1909-S VDB MS65 Red and Brown PCGS. CAC.** A sharp strike and shimmering, satiny luster characterize this Gem Red and Brown example. The coloration is mostly copper-orange, which would earn a Red designation were it not for some faint chestnut tinting in portions of the fields. A small spot in the field below the RT in LIBERTY serves as a pedigree marker and is the only mentionable surface imperfection. Higher-grade examples are scarce, and they are rare with CAC endorsements. NGC ID# 22B2, PCGS# 2427

1909-S VDB Cent, MS65 Red and Brown
Less-Often-Seen CAC Example

- 3341 1909-S VDB MS65 Red and Brown PCGS. CAC.** A mostly Red example of this key San Francisco issue, showing blended golden-olive, amber-orange, and copper-red hues on each side. A shimmering cartwheel effect is easily produced in-hand. This frosty coin is free of abrasions and has only a few small specks. CAC has endorsed just 23 higher-grade representatives (8/18). NGC ID# 22B2, PCGS# 2427

- 3342 1909-S VDB MS63 Red PCGS.** It is the dream of all Lincoln cent collectors to one day own an 1909-S VDB cent. Most would be content with one in any grade, let alone in MS63 Red. This fire-orange key date enjoys vibrant, frosty mint luster that radiates over smooth fields and well-defined devices. A few carbon spots occur on the obverse. NGC ID# 22B2, PCGS# 2428

**1909-S VDB Cent, MS65 Red
Lustrous Cornerstone Representative**

- 3343 1909-S VDB MS65 Red PCGS.** It was thought that designer Victor David Brenner's initials at the lower reverse were too prominent and self-promoting, and as a result were removed after August 1909. The S-mint accomplished a mintage of 484,000 pieces before the design was changed. Well-detailed coppery-gold surfaces show minor evidence of die erosion in the fields. Marks are barely visible, and luster radiates softly over each side. NGC ID# 22B2, PCGS# 2428

**1909-S VDB Cent, MS65 Red
Satin Original Luster**

- 3344 1909-S VDB MS65 Red PCGS.** A sharp Gem example of the Lincoln cent key, this coin displays satiny luster and is free of bothersome spotting. Although designated Red, the attractive surfaces more accurately show yellow-gold, brass, mint-green, and autumn-orange coloration, with the hues slightly brighter on the obverse than the reverse. An eye-appealing example of this sought-after issue. Housed in a green label holder. NGC ID# 22B2, PCGS# 2428

- 3345 1909-S MS66 Red and Brown PCGS Secure.** The 1909-S is actually much scarcer in this grade than the more famous 1909-S VDB, but it does not enjoy the same level of collector demand and is underrated. This Premium Gem showcases considerably more red than brown color and a uniformly bold impression. Population: 24 in 66 (2 in 66+) Red and Brown, 0 finer (9/18). NGC ID# 22B4, PCGS# 2433

- 3346 1910-S MS66 Red PCGS.** Frosty luster and sharp devices grant this Premium Gem Red 1910-S cent tremendous eye appeal. The surfaces are the traditional golden-orange color common among early Lincoln issues, not the deep reddish hue of later dates. No abrasions are seen. PCGS lists only seven finer Red examples (9/18). NGC ID# 22B6, PCGS# 2440

**1911-D Cent, MS66+ Red
Registry-Grade Example**

- 3347 1911-D MS66+ Red PCGS Secure.** Red examples of the 1911-D cent are plentiful in MS64 and MS65, but Premium Gems are scarce. Only a few coins are known finer than this Plus-designated coin. Satiny surfaces yield sharp design elements and have shades of orange and copper-magenta luster. A loupe reveals a few unobtrusive fly specks. Population: 74 in 66 (10 in 66+) Red, 2 finer (9/18). NGC ID# 22B8, PCGS# 2446

**1912 Cent, MS66+ Red
Glistening Original Surfaces**

- 3348 1912 MS66+ Red PCGS Secure.** The Plus designation sets this piece apart from most of its peers in the Premium Gem grade, and finer coins are rarely offered. The strike is sharp and the luster luminous, benefiting from a mattelike texture in the fields. Original copper-orange luster encompasses each side, and only a few tiny specks are seen with a loupe. Population: 18 in 66+ Red, 12 finer (9/18). NGC ID# 22BA, PCGS# 2452

**1912-D Cent, MS66 Red
A Top-Grade Registry Coin**

- 3349 1912-D MS66 Red PCGS Secure.** A conditionally rare Premium Gem Red example of this early Denver issue, showing satiny copper-orange luster and impressively sharp design elements. A few tiny specks on each side are seen only with a loupe. No abrasions are evident. This 1912-D Lincoln cent is among the finest Red coins certified, a must-have item for the Registry Set collector. Population: 32 in 66 (3 in 66+) Red, 0 finer (9/18). NGC ID# 22BB, PCGS# 2455

1915-S Cent, MS65 Red
Conditionally Scarce Registry Coin

- 3350 1915-S MS65 Red PCGS.** Both sides of this matte-textured Gem exhibit vibrant golden-tan surfaces that only reveal a few unobtrusive carbon flecks. The strike is sharp throughout both sides. The 1915-S is conditionally scarce in this grade, and finer pieces are decidedly rare. Registry Set collectors should consider this high-end Red example. Population: 33 in 65 (1 in 65+) Red, 9 finer (9/18). Ex: *Central States Signature (Heritage, 4/2006)*, lot 486, which realized \$4,887.50. NGC ID# 22BM, PCGS# 2485

1915-S Lincoln Cent, MS65 Red
A Rarity This Fine

- 3351 1915-S MS65 Red PCGS.** The 1915-S Lincoln cent is a rarity in Gem Red condition, and only a few finer pieces are known. This Registry-grade example displays copper-orange color in the margins and brighter silvery-gold across the interiors. The strike is sharp and the luster has a mattelike texture. Scattered flecks are visible beneath a loupe. Population: 33 in 65 (1 in 65+) Red, 9 finer (9/18). NGC ID# 22BM, PCGS# 2485

1925-D Lincoln Cent, MS65 Red
A Registry Set Contender

- 3352 1925-D MS65 Red PCGS Secure.** Satiny golden luster yields glimpses of deeper cherry-orange color in the margins on this Gem Red 1925-D cent. The strike is sharp and abrasions are minimal. A few tiny flecks on the reverse do not distract. The 1925-D Lincoln cent is scarce in this grade, and only a handful of finer Red coins are known. Population: 76 in 65 (4 in 65+) Red, 2 finer (9/18). NGC ID# 22CG, PCGS# 2563

- 3353 1925-S MS64 Red PCGS.** The 1925-S is widely recognized as one of the most challenging issues from the 1920s, especially with full Red color and a good strike. The strike on this piece is remarkably strong for the issue and each side displays glowing mint luster. A couple of small carbon spots on the reverse probably prevent a Gem grade. Population: 57 in 64 Red, 12 finer (9/18). NGC ID# 22CH, PCGS# 2566

- 3354 1955 Doubled Die Obverse, FS-101, AU50 PCGS.** Remarkable die doubling across all obverse legends is the calling card of the famous FS-101 1955. This walnut-brown example retains noticeable mint gloss, though Lincoln's cheekbone and the centers of the wheat ears show wear. No marks are of singular relevance. Small spots are near the chin, the Y in LIBERTY, and the U in UNITED. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3355 1955 Doubled Die Obverse, FS-101, AU55 PCGS.** A lightly circulated chocolate-brown example of the dramatic and celebrated doubled die variety. The cheekbone shows light wear, and Lincoln's coat has a small tick or two, but the eye appeal is attractive and glimmers of luster remain. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3356 1955 Doubled Die Obverse, FS-101, AU58 PCGS. CAC.** The obverse legends exhibit a magnificent spread, diagnostic of the spectacular 1955 doubled die cent. This olive-brown example retains traces of faded red near the obverse rim. No marks or spots are evident. A mere hint of wear on Lincoln's cheekbone denies a Mint State assessment. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3357 1955 Doubled Die Obverse, FS-101, MS61 Brown NGC.** A walnut-brown representative with sea-green undertones. The fields are smooth and satiny, and the cheekbone and jaw show no indication of wear. Only minor carbon emerges beneath a lens. A desirable Mint State example of the spectacular doubled die variety. Ex: *FUN Signature (Heritage, 1/2002)*, lot 5719, which realized \$1,150. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3358 1955 Doubled Die Obverse, FS-101, MS63 Brown PCGS Secure.** All obverse legends exhibit a remarkable counter-clockwise spread. An exceptionally attractive example of the best-known of all doubled die varieties. The ruby-red, apple-green, and orange-gold surfaces are carbon-free and nearly devoid of contact. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

PROOF LINCOLN CENT

- 3359 1952 PR68 Red Cameo NGC.** The fields are watery and deeply reflective, surrounding brilliant rather than frosty motifs, but generating substantial Cameo contrast nonetheless. Pumpkin-gold surfaces are near-flawless. Census: 10 in 68 Red Cameo (1 in 68 ★), 0 finer (9/18). NGC ID# 22LC, PCGS# 83365

TWO CENT PIECES

1865 Fancy 5 Two Cent Piece
Luminous MS66 Red

- 3360 1865 Fancy 5 MS66 Red PCGS.** The 1865 two cent piece is scarce this fine and a great rarity in higher grades. This example displays razor-sharp definition in the shield and wreaths, despite an array of peripheral die cracks on each side. Luminous copper-orange and golden surfaces yield frosty mint luster without bothersome abrasions. No mentionable carbon spotting is seen. Population (Fancy 5): 5 in 66 (1 in 66+) Red, 1 finer (9/18). NGC ID# 22NA, PCGS# 38258 Base PCGS# 3584

**1866 Two Cent, MS65+ Red
Satin and High-End**

- 3361 1866 MS65+ Red PCGS Secure.** The finest 1866 two cent pieces at PCGS are Premium Gem Red coins. This Plus-designated Gem Red example is nearly that fine. Portions of both wreaths and CENTS are weak, as though struck through a thin coating of grease on the die, but the preservation is exceptional. Soft, satiny copper-orange luster covers each side. Only a few small flecks are visible. Population: 49 in 65 (5 in 65+) Red, 15 finer (9/18). NGC ID# 274R, PCGS# 3590

**1867 Two Cent, MS63 Brown
FS-101, Widely Die Doubled Obverse**

- 3362 1867 Doubled Die Obverse, FS-101, MS63 Brown NGC.** IN GOD WE TRUST exhibits dramatic die doubling on this variety. The *Cherrypickers'* reference states: "This is by far the strongest doubled die known in the two-cent series." Doubling is also seen on the wreath leaves. NGC has certified only 23 Mint State examples of this variety with all color designations, including three Brown coins in this grade and five finer (9/18). This piece displays a sharp strike and satiny mint luster. Chestnut-brown toning encompasses much of each side, although glimpses of golden luster emerge from the protected areas. NGC ID# 22NB, PCGS# 38271 Base PCGS# 3594

PROOF TWO CENT PIECES

- 3363 1865 PR65 Red and Brown PCGS Secure.** This is a razor-sharp Gem proof with predominantly copper-red and orange coloration. Blushes of olive toning in the central reverse and near the left obverse border earn it the Red and Brown designation. The fields are reflective and devoid of bothersome contact marks. NGC ID# 274U, PCGS# 3628
- 3364 1869 PR65+ Red and Brown PCGS Secure. CAC.** Delicate tinges of violet and burgundy toning accent mostly copper-orange and red surfaces on this Gem proof, preventing it from earning a Red designation. The CAC endorsement confirms the outstanding eye appeal for the current grade. The strike is sharp and the surfaces appear unblemished. NGC ID# 274Y, PCGS# 3640
- 3365 1870 PR65 Red NGC.** This Gem Red 1870 proof displays deep fire-orange and cherry hues across sharp design elements and deeply mirrored fields. The strike is sharp on this late-series proof type coin. Census: 26 in 65 (2 in 65+) Red, 14 finer (9/18). NGC ID# 274Z, PCGS# 3644

- 3366 1871 PR65 Red and Brown PCGS Secure. FS-102.** TRUST and nearby elements are die doubled, as usual for the proof date. Both sides exhibit much sun-gold color. Blushes of navy-blue and ruby-red are also prominent. The strike is bold and no detractors are apparent. The *Guide Book* proof mintage is 960+ pieces. NGC ID# 22NH, PCGS# 3646

**1871 Two Cent, PR65 Red
Attractive Color and Mirroring**

- 3367 1871 PR65 Red PCGS Secure.** Copper-orange and lilac-gold hues adorn the glimmering fields of this Gem Red proof, accentuating the sharp, satiny design elements. No contact marks are observed and only a few scattered flecks are visible beneath a loupe. The 1871 proof two cent piece is scarce in this grade and rare finer. Only a handful of Cameo coins are certified at PCGS. Population: 41 in 65 Red, 21 finer; 1 in 65 Red Cameo, 2 finer (9/18). NGC ID# 22NH, PCGS# 3647

- 3368 1873 Closed 3 PR35 PCGS. CAC.** Two cent coins were only struck in proof format in 1873, with originals featuring a Closed 3 in the date. This proof obviously entered into circulation, where it remained for some time before being withdrawn by an astute collector. Even brown surfaces are lightly worn remain readily appealing. NGC ID# 2753, PCGS# 3651

- 3369 1873 Closed 3 PR45 NGC.** Only proof two cent pieces were struck in 1873. This is one of just eight Closed 3 coins that NGC has certified in circulated grades. Smooth chocolate-brown surfaces display strong detail on the device despite light wear. Eye appeal is excellent. NGC ID# 2753, PCGS# 3651

**1873 Two Cent, PR65 Red and Brown
Later Open 3 Variant**

- 3370 1873 Open 3 PR65 Red and Brown PCGS. CAC.** It is believed that the Open 3 two cent proofs of 1873 are in actuality restrikes coined a few years later to supply collector demand for this final-year issue, as the date logotype is that which was used during that time period. The generally accepted mintage estimate is just 500 coins for this variety, and survivors become scarce in the finer grades. This Gem example displays fully struck motifs and moderately reflective fields. Largely orange-brown overall, though vivid cherry-red overtones appear when the fields catch a glint of light. Housed in a green label holder. NGC ID# 2754, PCGS# 3655

THREE CENT SILVER

- 3371 1862 MS67 PCGS.** A top-grade PCGS example of this early Type Three three cent silver issue, showing frosty luster and beautiful rainbow border toning. Trivial strike weakness on the center of the shield is barely noticed. Clash marks appear on each side as normal. Population: 24 in 67, 0 finer (8/18). NGC ID# 22ZB, PCGS# 3680

3372 1864 MS61 PCGS. Mint State survivors from the circulation strike mintage of 12,000 pieces are few and far between for 1864 three cent silvers. This example displays a ring of iridescent rainbow colors around silver-blue centers. The strike is sharp from clashed dies. Housed in a first generation “rattler” holder. NGC ID# 22ZE, PCGS# 3684

PROOF THREE CENT SILVER

3373 1866 PR64 Cameo PCGS Secure. A brilliant Choice proof with sharp detail throughout all design elements, even the peripheral stars. The fields are deeply mirrored and contrast is appreciated from all angles. The 1866 proof is scarce in this condition. Population: 16 in 64 (1 in 64+) Cameo, 29 finer; 3 in 64 (1 in 64+) Deep Cameo, 4 finer (9/18). NGC ID# 27CC, PCGS# 83716

3374 1870 PR64 Cameo PCGS Secure. With just one Deep Cameo certified at PCGS, Cameo proof 1870 three cent silver pieces are typically the finest coins available to collectors. This Choice example displays sharp motifs and is untoned. The mirrored fields provide modest contrast on both sides. Population: 16 in 64 Cameo, 25 finer; 0 in 64 Deep Cameo, 1 finer (9/18). NGC ID# 27CF, PCGS# 83721

3375 1870 PR66 Cameo PCGS. PCGS lists only a single Deep Cameo example of the proof 1870 three cent silver, making high-end Cameos the finest coins available to most collectors. This Premium Gem displays appreciable contrast through vivid multicolor toning. The strike is sharp and the fields are deeply reflective. Population: 14 in 66 (2 in 66+) Cameo, 3 finer; 1 in 66 Deep Cameo, 0 finer (9/18). NGC ID# 27CF, PCGS# 83721

3376 1871 PR65 PCGS Secure. A medley of rose, blue, green, and lavender tones graces this Gem three cent silver, one of 960 specimens manufactured in 1871. Those coins were struck alongside 3,400 circulation strikes, putting added demand on high-end proofs like this. NGC ID# 27CG, PCGS# 3722

3377 1873 PR63 Cameo PCGS Secure. The year 1873 saw the final coinage of the three cent silver denomination. All were proofs, struck to the extent of 600 coins, and all feature the Closed 3 date logotype. This Select Cameo is sharp with a delicate pink-champagne tint to the surfaces. Faint hairlines in the fields limit the grade. Population: 16 in 63 Cameo, 65 finer; 0 in 63 Deep Cameo, 9 finer (9/18). NGC ID# 27CJ, PCGS# 83724

THREE CENT NICKEL

3378 1872 MS66 NGC. The 1872 three cent nickel is plentiful through MS64, but Gems are scarce. This Premium Gem is a major condition rarity. Dusky golden-gray surfaces show minor strike weakness on the central reverse but are devoid of bothersome abrasions. Luster is satiny and luminous. Census: 3 in 66, 1 finer (9/18). NGC ID# 2757, PCGS# 3738

PROOF THREE CENT NICKELS

3379 1866 PR66 Cameo PCGS Secure. The second-year issue in the proof three cent nickel series is occasionally available in Cameo grades, but Premium Gems are elusive, and finer pieces are rare. This high-end Cameo displays deep mirroring in the fields and frosty luster over sharp devices. Neither side exhibits toning. Population: 22 in 66 (2 in 66+) Cameo, 2 finer; 9 in 66 (1 in 66+) Deep Cameo, 7 finer (9/18). NGC ID# 275L, PCGS# 83762

3380 1868 PR66 Cameo PCGS. CAC. The centers of the Roman numerals are slightly weak, but the remainder of the design is bold. This brilliant white-on-black proof Cameo displays deep mirrors and excellent contrast. Some faint roller marks (mint made) are discernible on Liberty’s cheek. Population: 38 in 66 (1 in 66+) Cameo, 3 finer; 15 in 66 (6 in 66+) Deep Cameo, 0 finer. CAC: 22 in 66, 3 finer (9/18). NGC ID# 275N, PCGS# 83764

3381 1871 PR66 Cameo PCGS. From a limited mintage of 960 pieces, this delightful Premium Gem proof exhibits sharp design elements and deeply reflective fields that contrast boldly with the frosted devices. The impeccably preserved surfaces show the slightest hint of pale gold toning. Population: 7 in 66 Cameo, 1 finer; 0 in 66 Deep Cameo, 1 finer (9/18). NGC ID# 275S, PCGS# 83767

3382 1872 PR66+ Cameo PCGS. Proof 1872 three cent nickels of this caliber are notably rare and virtually unimprovable. Near-brilliant, boldly contrasted surfaces on this high-end Premium Gem Cameo exhibit thickly frosted motifs surrounded by watery fields. Population: 22 in 66 (2 in 66+) Cameo, 2 finer; 3 in 66 (1 in 66+) Deep Cameo, 0 finer (9/18). NGC ID# 26JT, PCGS# 83768

3383 1872 PR66 Cameo NGC. CAC. No Ultra Cameo proof 1872 three cent nickels are reported by NGC, making this high-end Cameo a prime Registry Set contender. Each side is brilliant with a combination of luster and reflectivity. Fully struck design elements have no contact marks. Census: 24 in 66 Cameo (1 in 66+), 4 finer. CAC: 18 in 66, 0 finer (9/18). NGC ID# 26JT, PCGS# 83768

1877 Three Cent Nickel, PR65 Outstanding for the Grade

3384 1877 PR65 PCGS. This is a fully struck proof that is only a whisper away from Premium Gem quality. Delicate iridescent toning graces reflective fields and frosty devices, and there are no contact marks. A razor-thin line on the obverse portrait denotes an intact planchet lamination. Eye appeal is excellent. PCGS reports few finer representatives (9/18). NGC ID# 275X, PCGS# 3773

3385 1878 PR66 PCGS. CAC. The 1878 three cent nickel is a collector favorite because of the low mintage of only 2,350 pieces, all of which were proofs. The issue is essential for a complete date set. This is a nicely mirrored example with attractive, light pastel iridescence over each side.

Ex: Long Beach Signature (Heritage, 9/2012), lot 3613, which realized \$1,116.25. NGC ID# 275Y, PCGS# 3774

3386 1881 PR67 Cameo PCGS. CAC. A gorgeous Superb Gem proof, both sides are bright with a little light, golden-tinged iridescence. There is not a single blemish that would seem to call into question the validity of the PR67 designation. The strike is sharp and cameo contrast is pleasing. Population: 40 in 67 (2 in 67+) Cameo, 4 finer; 2 in 67 Deep Cameo, 0 finer. CAC: 36 in 67, 3 finer (9/18). *Ex: Santa Clara Signature (Heritage, 11/2002), lot 5690, which realized \$1,667.50. NGC ID# 2763, PCGS# 83777*

3387 1886 PR67 PCGS. Lime-green and powder-blue shades grace this highly lustrous and boldly struck Superb Gem. The reverse has two small blushes of tan patina, and we note two flecks on the hair below the ear, and on the obverse rim at 4:30. A popular proof-only date. Housed in a first-generation “rattler” holder. NGC ID# 2768, PCGS# 3782

SHIELD NICKELS

3388 1867 Rays MS64 PCGS Secure. CAC. This popular, second-year issue displays remarkably uniform strike details with nearly full definition on the design elements, unlike the inaugural issue the previous year. The satiny mint luster shows just the slightest, uniform tinge of gray patina and there are no mentionable or noticeable abrasions. NGC ID# 22NY, PCGS# 3791

**1867 Rays Nickel, MS65
High-Grade Two-Year Type Coin**

- 3389 1867 Rays MS65 PCGS Secure.** Struck from heavily clashed dies, as often found for these early nickel coins. Brilliant surfaces aglow in glistening mint luster show good detail on the olive leaves and stars despite a touch of incompleteness on the shield verticals and central denomination. A popular two-year type. Population: 43 in 65 (3 in 65+), 9 finer (9/18). NGC ID# 22NY, PCGS# 3791

**1879 Shield Nickel, MS65
Beautiful Pastel Patina**

- 3390 1879 MS65 PCGS.** Only 25,900 Shield nickels were struck in 1879 — the year circulation-strike production resumed after a two-year hiatus. This Gem has developed lovely multicolor pastel patina in shades of blue, green, rose, and gold that transitions from the borders to the centers on each side. Fully struck and beautifully preserved. NGC ID# 5KWK, PCGS# 3808

**1879 Shield Nickel, MS65
Challenging Issue in High Grade**

- 3391 1879 MS65 PCGS.** The Philadelphia Mint produced only 25,900 business-strike Shield nickels in 1879, and survivors in MS65 or better condition are elusive. This attractive Gem displays sharp design elements and lustrous, well-preserved satin surfaces that show highlights of pale gold and lavender toning. Population: 29 in 65 (1 in 65+), 30 finer (9/18).
Ex: Summer FUN Signature (Heritage, 7/2015), lot 3588, which realized \$2,820. NGC ID# 5KWK, PCGS# 3808

PROOF SHIELD NICKELS

- 3392 1866 Rays PR63 Cameo NGC.** The inaugural proof Shield nickel is elusive in Cameo grades, and such coins are highly sought-after to represent the With Rays design type. This Select Cameo displays a sharp strike and appreciable contrast. Warm golden toning covers each side, giving the coin the appearance of a finer grade to the unaided eye. NGC ID# 276G, PCGS# 83817

- 3393 1869 PR66 Cameo NGC.** NGC lists no Ultra Cameo examples of the 1869 proof Shield nickel, making this Premium Gem Cameo a strong Registry Set candidate. The strike is sharp and the fields are deeply mirrored. No toning hinders the appreciable cameo contrast on each side. Census: 10 in 66 Cameo (1 in 66+), 2 finer (9/18). NGC ID# AMTZ, PCGS# 83823

- 3394 1870 PR66 Cameo PCGS Secure. CAC.** PCGS has not certified any proof 1870 Shield nickels as Deep Cameos, making this CAC-approved Premium Gem Cameo important for Registry purposes. The design elements are remarkably well-contrasted against the mirrored fields. Neither side exhibits toning or contact marks. Population: 26 in 66 (3 in 66+) Cameo, 2 finer. CAC: 14 in 66, 0 finer (9/18). NGC ID# 276L, PCGS# 83824

**1877 Shield Nickel, PR64 Cameo
Scarce CAC-Approved Example**

- 3395 1877 PR64 Cameo PCGS Secure. CAC.** Stark cameo contrast characterizes both sides of this near-Gem proof, even while portions of the fields have a faintly granular texture (as struck), likely due to bits of grease on the die. The coin is sharp and beautifully preserved with almost no discernible toning — only a faint golden tint is seen on each side. CAC-endorsed Cameo proofs of this 900-coin mintage are scarce and sought-after. NGC ID# 276U, PCGS# 83831

- 3396 1878 PR66 PCGS Secure. CAC.** The 1878 Shield nickel was only struck in proof format. Just 2,350 pieces were produced, and survivors are essential for a complete date set of this underappreciated series. The present Premium Gem displays a sharp strike and satiny surfaces. Delicate iridescent toning graces each side. NGC ID# 276V, PCGS# 3832

- 3397 1882 PR67 Cameo NGC.** A blush of light golden toning warms the starkly contrasted surfaces of this late-series proof type coin. The strike is sharp, and the preservation is outstanding. The 1882 proof Shield nickel is a rarity this fine. Census: 23 in 67 Cameo (4 in 67 ★), 1 finer; 2 in 67 Ultra Cameo, 0 finer (9/18). NGC ID# 5EBF, PCGS# 83837

LIBERTY NICKELS

**1897 Liberty Nickel, MS66+
Delicate Pastel Toning**

- 3398 1897 MS66+ PCGS Secure. CAC.** Delicate pastel hues adorn the beautifully preserved surfaces of this high-end 1897 Liberty nickel. Strike weakness is visible on stars 1 and 2, as well as on the lower-left portion of the wreath, but the remainder of the design is sharply rendered. The 1897 is a rarity this fine and only a single coin is reported finer at PCGS. Population: 36 in 66 (7 in 66+), 1 finer. CAC: 10 in 66, 2 finer (9/18). NGC ID# 22PN, PCGS# 3858

**1912-D Liberty Nickel, MS66
First Branch Mint Issue for the Denomination**

- 3399 1912-D MS66 PCGS.** In only its seventh year of operation, the Denver facility, along with its San Francisco counterpart, became one of the first branch mints to strike nickel coinage. Output exceeded 8.4 million pieces. This Premium Gem has brilliant silver-gray surfaces with blushes of golden color along areas of the border. Most stars are bold, and the only overt incompleteness appears on the left ear of corn. Population: 70 in 66 (6 in 66+), 1 finer (9/18). NGC ID# 277P, PCGS# 3874

PROOF LIBERTY NICKEL

- 3400 1908 PR67 PCGS.** Delicate pastel toning graces the mirrored fields and satiny devices of this Superb Gem proof type coin. Fully struck design elements and virtually flawless preservation produce enticing eye appeal on this 1908 Liberty nickel. Population: 33 in 67 (6 in 67+), 1 finer; 8 in 67 (2 in 67+) Cameo, 1 finer (9/18). NGC ID# 278J, PCGS# 3906

BUFFALO NICKELS

- 3401 1913 Type One MS67+ PCGS Secure. CAC.** A combination of exceptional preservation and glistening, luminous mint luster earns this Type One Buffalo nickel the coveted Plus designation in addition to the already lofty grade of MS67. CAC also liked the coin, awarding it a green sticker. Delicate golden and ice-blue hues adorn each side, and the design elements are sharply rendered. PCGS lists 29 finer coins (9/18). NGC ID# 22PW, PCGS# 3915
- 3402 1914-S MS65 PCGS.** Jade-green and lilac-red patina endow this lustrous and mark-free Gem. LIBERTY and the hair above the ear are incomplete, but the remainder of the design is bold. The 1914-S is a better date in all grades, and is seldom encountered in the present quality. Encapsulated in a green-label holder. NGC ID# 22R6, PCGS# 3926
- 3403 1915-D MS65 PCGS. CAC.** An early branch mint issue, the 1915-D is collectible in Mint State but nicely struck Gems are very scarce. The present example has pleasing sharpness, especially on the date, mintmark, and bison's tail. Unabraded, though the obverse shows a couple of minute spots. Struck from moderately rotated dies, and certified in a green-label holder. CAC: 32 in 65, 22 finer (8/18). NGC ID# 22R8, PCGS# 3928
- 3404 1916-D MS65 PCGS.** The sharp strike found on this Gem nickel is typical of the issue as a whole. Only the bison's head displays a touch of incompleteness. Golden-orange and pale blue toning lightly colors surfaces awash in satiny mint luster. Struck from slightly worn and rotated dies. PCGS has seen merely 23 finer submissions (8/18). NGC ID# 22RB, PCGS# 3932
- 3405 1917-D MS65 PCGS. CAC.** The Denver Mint accomplished a mintage of nearly 10 million nickels in the series' second year. However, the issue claims an average grade of AU53 and can be a challenge at this Gem level. Mint luster is characteristically satiny over well-struck and mostly brilliant surfaces. The upper reverse border is partly incomplete. PCGS reports 26 finer submissions. CAC: 19 in 65, 5 finer (8/18). NGC ID# 22RE, PCGS# 3935

**1917-D Buffalo Nickel, MS65+
Lovely Luster and Toning**

- 3406 1917-D MS65+ PCGS Secure. CAC.** The 1917-D Buffalo nickel is moderately elusive in Gem condition and it is a rarity finer. PCGS has Plus-graded only seven MS65 coins, with 26 finer pieces (8/18). CAC-approved Gems are rare. This piece displays frosty, luminous surfaces and delicate pastel toning in shades of powder-blue, rose, and champagne-gold. Moderate central strike weakness may be a contributing factor to this coin missing a full MS66 grade. NGC ID# 22RE, PCGS# 3935

- 3407 1918/7-D FS-101 — Cleaned — NGC Details. VF.** The date is sharp on this overdate nickel, and the mintmark is clear. The obverse is sharply struck and shows little wear. On the reverse, the tip of the bison's horn merges with the head, preventing an XF designation from NGC. Original olive-gold patina covers each side, and there are no bothersome surface flaws. The cleaning noted by NGC is light and old, with almost no impact on eye appeal.

- 3408 1918-S MS63 PCGS.** The 1918-S is seldom found in higher grades, and this piece presents a well-balanced and well-preserved appearance that many collectors will appreciate. The mint luster is bright overall and the strike details are better-detailed than usually encountered. Most likely kept from a higher grade by the presence of three small planchet voids on the hindquarter of the bison. NGC ID# 22RK, PCGS# 3940

- 3409 1919-S MS64 PCGS Secure. CAC.** This challenging early mintmarked Buffalo nickel is seldom encountered in Gem or finer grades. This is an upper-end example that exhibits bright mint luster beneath a light layer of golden-rose toning. Slightly soft on the Indian's braid, as one would expect. NGC ID# 22RN, PCGS# 3943

- 3410 1921-S AU58 NGC.** An ideal coin for the Buffalo nickel specialist, this collector-grade 1921-S is incredibly sharp. Every minute detail is brought up, and only slight high-point friction appears on each side. Olive-gold toning on the satiny surfaces is original. The 1921-S is a better date in high grade. NGC ID# 22RU, PCGS# 3948

**1923-S Buffalo Nickel, MS65
Sharply Struck, Attractively Toned**

- 3411 1923-S MS65 NGC.** Scarce in all Uncirculated grades, the 1923-S runs the gamut between a few sharp examples to other technically Mint State coins so weak that Bowers describes them as horrid. This is one of the sharply struck examples, with nearly full details in all areas except immediately above the braid knot. Attractive orange-gold and lavender toning is extra-vibrant on the needle-sharp reverse. Census: 36 in 65, 9 finer (9/18). NGC ID# 22RW, PCGS# 3950

**1924-D Nickel, Regally Toned MS65
Rarely Offered in Gem or Finer Grades**

- 3412 1924-D MS65 NGC.** The Connecticut State Library hoard of 1924-D nickels is responsible for most of the high-grade Uncirculated examples known. NGC, in particular, has certified only a few Gem or finer coins. This sharply struck Gem lacks full definition only on the bison's shoulder and the lowest hair strands above the braid knot. The surfaces are essentially mark-free and toned a regal steel-gray color with gold and ice-blue accents across the satin-smooth fields and motifs. Housed in a third generation, pre-hologram NGC holder. Census: 22 in 65 (1 in 65+), 1 finer (9/18). NGC ID# 22RY, PCGS# 3952

- 3413 1924-S AU55 PCGS.** The 1924-S is a better date in high grade. This collector-grade Choice AU coin displays deep olive-gray and lilac-gold patina over well-struck design elements that show only slight high-point wear. The dies are lightly clashed but metal flowlines are faint. NGC ID# 22RZ, PCGS# 3953

- 3414 1925-D MS64+ PCGS Secure. CAC.** Wide spacing of the dies accounts for the characteristic softness seen on both sides. However, preservation is excellent, nearly qualifying this Choice example for a full Gem assessment. Satiny D-mint luster softly glistens throughout, delivering a lovely visual effect. NGC ID# 22S3, PCGS# 3955

- 3415 1926 MS67 NGC.** The 1926 Buffalo nickel is conditionally scarce this fine and nearly unknown in higher grades. This Superb Gem displays glistening satin luster and unblemished surfaces. Beautiful yellow-gold, ice-blue, and lavender toning graces each side. Slight strike softness is seen in the centers as usual. Census: 17 in 67 (1 in 67+, 1 in 67 ★), 1 finer (9/18). NGC ID# 22S5, PCGS# 3957

- 3416 1927-S MS62 NGC.** A satiny, golden-toned Mint State example of this better San Francisco date, showing minimal abrasions for the grade. Struck from worn dies with blurred border legends and indistinct details on the central devices. The major details in the Indian's hair are, however, well-defined. NGC ID# 22SA, PCGS# 3962

- 3417 1936-S MS67 PCGS.** This attractive Superb Gem is well-detailed overall, and a hint of softness at the braid has virtually no impact on the coin's eye appeal. Elegant nickel-blue patina graces satiny surfaces that show no bothersome abrasions. Neither NGC nor PCGS has graded a finer example (9/18).
Ex: ANA Signature (Heritage, 3/2008), lot 335, which realized \$1,150. NGC ID# 22SU, PCGS# 3979

**1937-D Three-Legged Nickel, MS62+
Important Guide Book Variety**

- 3418 1937-D Three-Legged, FS-901, MS62+ NGC.** Excessive polishing of the reverse die effaced the Bison's forward right leg on this variety. Metal flowlines in the design recesses and the fields reveal that this die was heavily worn prior to being polished down. The obverse die is also worn on FS-901, but it is not as aggressively polished. This Plus-graded coin displays pleasing detail for the grade and has satiny mint luster. A light golden hue graces each side. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

PROOF BUFFALO NICKELS

- 3419 1914 PR66 NGC.** Sunset-gold toning glows from the perimeters of this splendid Premium Gem matte proof nickel. Flat, square rims surround the finely grained surfaces, which display a pinpoint sharp strike on the bison, and dignify the noble Indian's finer details. Gleaming, textured borders slope inward and draw the eye to nuances of blue, rose, and lilac color. NGC ID# 278T, PCGS# 3991

- 3420 1936 Type One — Satin Finish PR66 PCGS. CAC.** This Satin Finish proof is well struck and luminous with iridescent champagne toning. No contact marks or other impairments are seen. The eye appeal is outstanding. CAC-endorsed in a first generation "rattler" holder. NGC ID# 278X, PCGS# 3994

JEFFERSON NICKELS

**1942-D/D Jefferson Nickel, MS65
Guide Book D Over Horizontal D**

- 3421 1942-D D Over Horizontal D, FS-501, MS65 PCGS.** The 1942-D Over Horizontal D "is the rarest of the major Jefferson nickel varieties in Mint State" according to the *Cherrypickers' Guide*. The mintmark was initially punched into the die horizontally, then corrected. Mint mistakes of this and similar natures are well-documented among variety specialists. This delightful Gem is sharply detailed and lustrous, with well-preserved surfaces throughout and light golden toning. The steps on Monticello are nearly full. Population: 10 in 65 (1 in 65+), 4 finer (8/18). NGC ID# 22TL, PCGS# 38495 Base PCGS# 4015

**1942-D Nickel, MS62 Five Full Steps
D Over Horizontal D Variety**

- 3422 1942-D D Over Horizontal D, FS-501, MS62 Full Steps NGC.** Of all the major Jefferson nickel varieties, the 1942-D Over Horizontal D is the rarest in Mint State grades. The mintmark was errantly entered into the die at a 90 degree rotation and then corrected, creating this unusual *Guide Book* curiosity. Satiny luster yields to pale lavender-gold toning on each side of this Full Steps coin, while the strike is bold throughout. The surfaces are unusually well-preserved for the grade level, showing no obtrusive abrasions. *Ex: Houston Signature (Heritage, 12/2014), lot 3308, which realized \$2,585. NGC ID# 22TL, PCGS# 38496 Base PCGS# 84015*

- 3423 1943/2-P Doubled Die Obverse, FS-101, MS66 Full Steps PCGS Secure. CAC.** Powder-blue and lemon-gold patina graces this lustrous and sharply struck Premium Gem. Pristine aside from delicate field contact above FIVE. Similar to the 1942/1 and 1942/1-D dimes, the 1943/2-P nickel was created after a working obverse die was hubbed with two working obverse hubs bearing different dates. CAC: 15 in 66, 0 finer (8/18). NGC ID# 22TR, PCGS# 38500 Base PCGS# 84019

PROOF JEFFERSON NICKEL

- 3424 1954 PR69 Ultra Cameo NGC.** Collectors of Ultra or Deep Cameo proof coinage may elect to complete a single series such as Jefferson nickels, a single year such as 1954, or a comprehensive collection. This nearly perfect example is a necessary component of all three collecting interests, and it is tied for the finest that NGC has certified. PCGS has never certified an example at this grade level. Both sides are brilliant and highly lustrous with extraordinary design definition and impressive contrast. Census: 3 in 69 Ultra Cameo, 0 finer (8/18). *Ex: Houston Signature (Heritage, 12/2014), lot 3315, realized \$3,055. NGC ID# 27A7, PCGS# 94186*

EARLY HALF DIMES

**1797 Half Dime, XF Details
V-4, LM-2, 16 Stars**

- 3425 1797 16 Stars, V-4, LM-2, R.4 — Bent — ANACS. XF Details, Net VF30.** LM-2 is one of two 16 Stars varieties of the 1797 half dime. The 7s in the date are from different sized punches, and both dies are heavily clashed. Heavy die cracks also appear on the reverse. The usual strike weakness affects the central devices but the borders are strong. Original gunmetal-gray, lilac, and olive-russet toning blankets each side. The bent planchet referred to by ANACS is not immediately obvious. NGC ID# 22ZZ, PCGS# 38598 Base PCGS# 4259

- 3426 1800 V-1, LM-1, R.3 — Cleaned — PCGS Secure. VF 20.** The late die state, showing a rim cud below the date but without the strike doubling on the numerals that often accompanies this state. A moderately circulated stone-gray Draped Bust half dime that displays a few delicate hairlines but has no mentionable abrasions. NGC ID# 2326, PCGS# 38601 Base PCGS# 4264

**1800 V-2, LM-3 Half Dime, AU Details
Popular LIBEKTU Variety**

- 3427 1800 LIBEKTU, V-2, LM-3, R.4 — Streak Removed — PCGS Genuine Secure. AU Details.** A mint-made grease streak at one point stretched from Liberty's mouth to star 10, but the grease is now removed. The coin is otherwise smooth with bright silver-gray patina and well-detailed devices. The usual die bulge is noted on the reverse beneath the eagle's beak, but Liberty's hair curls remain mostly sharp on the opposite side of the coin. Both sides have complete border dentils.

BUST HALF DIMES

- 3428 1833 V-4, LM-3.4, R.2, MS65 NGC.** Cherry-red and aquamarine toning embrace this lustrous and sharply struck Capped Bust type coin. The fields are clashed but devoid of contact. The reverse exhibits delicate die cracks associated with a later die state, though the eventual break through NITE is absent. PCGS# 38691 Base PCGS# 4280
- 3429 1835 Large Date, Small 5C, V-9, LM-6, R.2, MS64 PCGS Secure.** Both sides of this near-Gem LM-6 Bust dime are prooflike, complementing sharp stars and central devices. Scattered light contact marks are all that limit the grade, and these are only seen with a loupe. No toning is present on this appealing Capped Bust type coin. NGC ID# 232H, PCGS# 38714 Base PCGS# 4283

SEATED HALF DIMES

- 3430 1840 No Drapery MS65 PCGS Secure.** An even 1 million pieces were struck of this early With Stars half dime. This is a fully struck example whose surfaces at first appear brilliant, but close examination shows just the slightest hint of golden color. Each side is remarkably clean. Thick mint luster throughout. Population: 23 in 65, 26 finer (9/18). NGC ID# 232U, PCGS# 4321
- 3431 1840 No Drapery MS65 NGC.** Essentially brilliant at the centers but with wide surrounding swaths of rose, violet, and blue patina. A satiny, sharply struck Gem from early in the Seated half dime series. *Ex: Houston Signature (Heritage, 12/2010), lot 3392, where it brought \$1,610. NGC ID# 232U, PCGS# 4321*
- 3432 1841 MS66 NGC.** This impressive Premium Gem exhibits sharply detailed design elements and lustrous surfaces under attractive shades of gold and dove-gray patina. The 1841 half dime is scarce this fine with only a few pieces known finer. Census: 9 in 66 (1 in 66+, 1 in 66 ★), 5 finer (9/18). NGC ID# 232Y, PCGS# 4328
- 3433 1853 No Arrows MS66 NGC.** Most half dimes struck at the Philadelphia Mint in 1853 were of the Arrows type. Only 135,000 No Arrows coins were produced. This issue is rarely offered finer than MS64. This Premium Gem shows excellent luster over surfaces concentrically toned on each side in multicolor hues. Fully struck devices show no obvious abrasions. Census: 10 in 66, 2 finer (9/18). NGC ID# 233M, PCGS# 4351

3434 1853 Arrows MS66 PCGS. This luminous Premium Gem shows sharp relief definition despite moderate die erosion in the fields. Ice-blue luster features warmer olive-gold overtones across the interiors on each side. Finer 1853 Arrows half dimes are rarely offered. Population: 54 in 66 (14 in 66+), 14 finer (9/18). NGC ID# 233Y, PCGS# 4356

3435 1853 Arrows MS66 PCGS. CAC. The 1853 Arrows half dime becomes challenging in MS66 and is scarce any finer. Lustrous surfaces display freckles of brown toning, more so on the reverse. The design elements are well-struck. A linear mark on Liberty's left (facing) shoulder is mentioned for accuracy. Population: 54 in 66 (14 in 66+), 14 finer. CAC: 13 in 66, 7 finer (9/18). NGC ID# 233Y, PCGS# 4356

3436 1868 MS64 Prooflike NGC. As of (8/18), the present lot is the only 1868 half dime designated as Prooflike by NGC. It is a near-Gem with dazzling fields and a good strike. Brilliant save for a blush of gray toning west of Liberty's head. Smooth except for a faint scuff beneath the IM in DIME. PCGS# 84392 Base PCGS# 4392

3437 1868-S MS65 NGC. Flecks of violet, gold, and forest-green are scattered across the champagne-tinted, frosted surfaces of this Gem 1868-S half dime. Well-struck design elements and a lack of bothersome abrasions advance the eye appeal. An absolutely original, well-preserved representative. The 1868-S is a rarity this fine. Census: 21 in 65, 5 finer (8/18). NGC ID# 234P, PCGS# 4393

PROOF SEATED HALF DIMES

1859 Half Dime, PR65 Cameo
Sharp and Well-Contrasted

3438 1859 PR65 Cameo PCGS. The proof 1859 half dime is relatively plentiful in the absolute sense, but Cameo examples are rare, particularly in Gem or better grades. This PR65 Cameo exhibits brilliant surfaces that show exceptional contrast between sharply struck, highly frosted motifs and mirrored fields. A couple of obverse lint marks are noted, near stars 4 and 8. Population: 3 in 65 (1 in 65+) Cameo, 4 finer (9/18).

Ex: Long Beach Signature (Heritage, 9/2007), lot 903, which realized \$4,312.50. NGC ID# 23CD, PCGS# 84438

3439 1866 PR66 NGC. Iridescent hues that are dominated by greenish-gold and cerulean-blue on the obverse and reverse of this splendid Premium Gem. Note the quality of the strike, and the excellent, unabraded surfaces. The reflective fields of the obverse show a few trivial hairlines. Census: 11 in 66, 1 finer (8/18).

Ex: FUN Signature (Heritage, 1/2006), lot 1694, realized \$1,725. NGC ID# 2363, PCGS# 4449

3440 1868 PR66 NGC. Only 600 proofs were struck in 1868. When combined with a paltry mintage of 88,000 strikes for circulation, this places considerable date pressure on the proofs. This is a brightly mirrored example that displays variegated, light toning across each side. A strong case could be made for a Cameo designation. Census: 17 in 66 (1 in 66 ★), 5 finer (9/18). NGC ID# 2365, PCGS# 4451

3441 1868 PR66 Cameo PCGS. The 1868 proof half dime is relatively plentiful overall, but Cameo examples are rarely offered. This Premium Gem is modestly contrasted through original gold, violet, and sea-green toning. The mirrored fields glimmer when tilted beneath a light. Finer Cameos are rare. Population: 11 in 66 (2 in 66+) Cameo, 2 finer; 3 in 66 (1 in 66+) Deep Cameo, 1 finer (9/18). NGC ID# 2365, PCGS# 84451

1873 Half Dime, PR67
Beautifully Toned

3442 1873 PR67 NGC. The half dime was discontinued in 1873, being replaced by the five cent nickel-alloy coins that debuted in 1866. Only 600 proof half dimes were struck the final year. This is a spectacular proof that is deeply mirrored. The surfaces display rich blue-violet centers with rose and yellow color around the margins. An essentially perfect example of this popular type coin. Proofs are rare this fine. Census: 9 in 67 (1 in 67+★), 1 finer; 4 in 67 (1 in 67+, 1 in 67 ★, 1 in 67+★) Cameo, 0 finer; 1 in 67 Ultra Cameo, 0 finer (8/18).

Ex: Dallas Signature (Heritage, 10/2008), lot 523, which realized \$3,737.50; Summer FUN Signature (Heritage, 7/2009), lot 327, which realized \$2,990. NGC ID# 236A, PCGS# 4456

EARLY DIMES

1796 JR-1 Dime, Sharp AU Details
Well-Struck and Toned

3443 1796 JR-1, R.3 — Edge Repaired — PCGS Genuine Secure. AU Details. Some may consider the AU Details assessment to be a bit harsh on this coin, since no obvious wear is discernible on the devices. Nonetheless, a finely granular surface texture over each side may mask slight high-point rub. The edge is tooled in at least two locations, although additional repair work may be hidden behind the PCGS holder tabs. The details are sharp on the devices and border stars. Deep olive-gray and bluish toning covers each side of this pleasing Small Eagle type coin.

**1796 JR-3 Dime, VG10
Scarce Die Variety**

- 3444** 1796 JR-3, R.5, VG10 PCGS. JR-3 is among the scarcer 1796 Draped Bust dime varieties. This collector-grade example has mostly complete rims, despite the tendency of this type to be unevenly struck with poorly defined borders. There is an old planchet flaw on the rim near the N in UNITED, and a rim cud is visible above the first T in STATES. Daubs of amber, olive, and pine-green toning fill the fields, leaving the relief elements with slate-gray color. The central devices are partially detailed on this pleasing collector-grade JR-3 dime. NGC ID# 236B, PCGS# 38744 Base PCGS# 4461

1798 Small 8, JR-3 Dime, VG8

- 3445** 1798 Small 8, JR-3, R.5, VG8 PCGS. Deep golden-russet and ocean-blue consume this challenging early dime variety, which receives its own *Guide Book* listing, as do the other three marriages for the date. The wear is uneven but the plumage detail is considerable, and all letters in E PLURIBUS UNUM are at least partly present. NGC ID# 236E, PCGS# 38752 Base PCGS# 4467

BUST DIMES

- 3446** 1820 Small O, JR-7, R.2, AU55 PCGS. Forest-green and autumn-brown shades endow the peripheries of this well struck and beautifully toned Capped Bust dime. No marks merit singular mention, and the curls show only slight high-point wear. *Ex: Dallas Signature (Heritage, 2/2015), lot 3570, which realized \$1,116.25.* NGC ID# 236X, PCGS# 38787 Base PCGS# 4493

**1821 Capped Bust Dime, MS64
Large Date, JR-7**

- 3447** 1821 Large Date, JR-7, R.2, MS64 PCGS. The Large Date obverse, with a wide denticle over star 1, and the defective serif on all three A's on the reverse identify the popular JR-7 variety. Aside from a touch of softness on some star centers, the design elements of this impressive Choice example are sharply detailed. A short die crack is evident from the edge to the point of the lowest arrow. The well-preserved surfaces are blanketed by shades of gunmetal-blue, lavender-gray, and pale green-gold toning. Housed in an old green label holder. NGC ID# 236Y, PCGS# 38797 Base PCGS# 4496

- 3448** 1834 Small 4, JR-7, R.2, MS63 PCGS Secure. The only Small 4 die marriage. The reverse is close to brilliant, but the obverse exhibits lightly dappled blue-green toning, along with a blush of cherry-red beneath the bust tip. One hair-thin line is noted on the cheek. The rim is broad and irregular beneath the date, as usual for JR-7. PCGS# 38872 Base PCGS# 4525

SEATED DIMES

- 3449** 1854 Arrows MS66 NGC. After the weight was reduced in 1853, mintages increased dramatically, with far higher survival rates. This Premium Gem displays satiny luster beneath lavish golden-brown, powder-blue, and lavender toning. The design motifs are boldly detailed. Both sides exhibit a prominent wire rim between 9 and 3 o'clock. NGC ID# 239A, PCGS# 4605

- 3450** 1857 F-110, R.3, MS65 PCGS Secure. Slightly rotated dies and chips near stars 3 to 8 help attribute the Fortin marriage. A coruscating powder-blue Gem of this popular Stars Obverse date. Pristine except for small marks below star 1, and the strike shows softness only on the left-side dentils. Population: 23 in 65, 11 finer (9/18). PCGS# 538101 Base PCGS# 4614

- 3451** 1859-O Medium O, F-103, R.3, MS64 PCGS Secure. CAC. With a mintage approaching a half-million coins, the 1859-O dime can be located without trouble through MS64, though CAC has only endorsed three coins at this level. Olive-gold toning over lustrous silver surfaces generates elegant eye appeal for this original, typically struck New Orleans dime. Population (all varieties): 43 in 64, 26 finer. CAC: 3 in 64, 10 finer (9/18). NGC ID# 2395, PCGS# 538142 Base PCGS# 4620

**1864-S Dime, Sharp MS64
A Rarity in Uncirculated Condition**

3452 1864-S F-101, Low R.3, MS64 PCGS Secure. The 1864-S dime comes from a mintage of 230,000 pieces, which was produced with a single die pair. Most of the mintage circulated and has been lost to attrition. In Mint State, surviving coins are rare. This Choice example displays satiny silver-gray surfaces with a hint of light golden color. All design elements are sharply brought up, and there are no singular surface abrasions. Population: 6 in 64 (1 in 64+), 5 finer (8/18). NGC ID# 239N, PCGS# 538203 Base PCGS# 4640

3453 1884 F-106, R.2, MS67 NGC. Areas of toning appear on both sides of this Superb Gem including several shades of sea-green, along with tan and russet colors. Vibrant luster and a sharp strike further the appeal. Census: 30 in 67 (1 in 67 ★, 1 in 67+★), 6 finer (8/18). NGC ID# 23AX, PCGS# 538684 Base PCGS# 4692

3454 1891-S Medium S, F-101, R.3, MS66 NGC. The date slants up to the right, and the mintmark is tilted right. However, the chief interest factor of this 1891-S dime is the remarkably MS66 grade, which makes it a condition rarity. Satiny, untoned surfaces yield sharp design elements and are devoid of bothersome abrasions. Eye appeal is outstanding. Census: 9 in 66, 4 finer (8/18).
Ex: ANA Signature (Heritage, 4/2006), lot 422, which realized \$1,552.50. PCGS# 538958 Base PCGS# 4708

PROOF SEATED DIMES

3455 1863 F-101, R.4, PR65 PCGS. CAC. Rich sea-green and tobacco-brown toning blankets this lovely Gem dime. The strike is close to complete, although a few grains are incomplete within the upper left reaches of the cereal wreath. The proof mintage was just 460 pieces for this Civil War date. CAC: 6 in 65, 8 finer (8/18).
Ex: Long Beach Signature (Heritage, 9/2010), lot 3754, which realized \$1,380. NGC ID# 23BS, PCGS# 539011 Base PCGS# 4756

**1866 Seated Dime, Toned PR67
Subtle Field-Device Contrast**

3456 1866 PR67 NGC. The proof 1866 Seated dime is elusive at the Superb Gem grade level, with or without cameo contrast. This beautifully toned example is awash in hues of mint-gold, ocean-blue, and lavender-gray. The design elements are bold and frosty, showing modest contrast even through the rich patina. Census: 7 in 67 (3 in 67 ★), 2 finer (9/18). NGC ID# 23CP, PCGS# 4759

3457 1873 Arrows, F-102, R.4, PR64 NGC. The Arrows, Legend Obverse type was struck for only two years. Business examples are readily available, but the proof subtype has a mintage of just 1,200 pieces: 500 in 1873 and 700 in 1874. Lightly toned and unblemished with occasional minor inexactness of strike. Liberty and the wreath are icy, though the fields lack the depth of reflectivity to command a Cameo designation. NGC ID# 23DH, PCGS# 539033 Base PCGS# 4769

3458 1875 PR65 Cameo NGC. F-101, R.3. Crescents of deep cobalt-blue and lavender toning grace the upper and lower borders on the obverse, and they consume the margins on the reverse. The central obverse is brilliant, the central reverse is light golden. This sharp proof has strong contrast and is well-preserved. Cameo examples are rare this fine. Census: 6 in 65 Cameo, 20 finer (including 1 in 66 Ultra Cameo) (8/18). NGC ID# 23CY, PCGS# 84772

3459 1880 F-101, R.3, PR67 PCGS. The date placement and a die defect on the M in DIME distinguish Fortin-101 from the other 1880 proof die pair (Fortin-102). Orange and lavender tones paint the obverse, while the reverse displays predominantly steel-blue and green hues. Devoid of all but a few microscopic flecks. In this lofty grade, circulation strikes and proofs are roughly equally available. However, collector demand for high-grade examples from the low-mintage business-strike issue of only 36,000 pieces, places pressure on carefully preserved proofs such as this Superb Gem. NGC ID# 23D5, PCGS# 539047 Base PCGS# 4777

3460 1882 F-101, R.3, PR66 PCGS. Rich tan-brown, lime-green, and lilac toning adorns this sharply struck and unmarked Premium Gem. The reverse displays a narrow horizontal streak above the ribbon knot. The sole proof 1882 die marriage, attributed by minor repunching on the final digit in the date. NGC ID# 23D7, PCGS# 539052 Base PCGS# 4779

3461 1883 PR65 Cameo PCGS. F-103, R.3. An essentially brilliant Gem with especially prominent contrast between the frosty wreath and the glassy reverse field. The strike shows the customary incompleteness on the leftmost cereal grains. Population: 20 in 65 Cameo, 23 finer (8/18).
Ex: Houston Signature (Heritage, 11/2012), lot 3467, which realized \$1,116.25. NGC ID# 23D8, PCGS# 84780

3462 1883 F-103, R.3, PR66+ NGC. CAC. Sea-green, lavender-red, and electric-blue toning embraces this unmarked and lustrous specimen. The strike is good save for weakness on Liberty's hair and the upper left area of the wreath. Fortin-103 and Fortin-119 are the only proof die marriages for the date. CAC: 16 in 66, 8 finer (9/18). NGC ID# 23D8, PCGS# 539053 Base PCGS# 4780

BARBER DIMES

3463 1893/2 MS63 PCGS. Breen-3479. Die markers include a delicate die crack above the bust truncation and east of the bust tip. The *Guide Book* lists the variety but adds "overlaid photographs indicate this is not a true overdate." The chestnut-gold and silver-gray surfaces are well struck except for the dentils. We note shallow strike-throughs west of ONE DIME. NGC ID# 23DP, PCGS# 4799

3464 1893-S MS65 PCGS. Faint traces of golden-brown, dove-gray, and forest-green color complement this frosty, boldly struck Gem. A few unimportant marks require magnification. Plentiful in most grades, the 1893-S becomes scarce at this level.
Ex: FUN Signature (Heritage, 1/2007), lot 2634, where it realized \$2,185. NGC ID# 23DS, PCGS# 4802

3465 1895-O — Cleaned — PCGS Genuine. VF Details. Ocean-blue toning fills the borders of this otherwise stone-white key date dime. Faintly hairlined, and the obverse shows a few delicate hair-thin marks. LIBERTY is bold. The low-mintage 1895-O is typically encountered in Very Good or lower grades.

3466 1899-S MS64 PCGS. CAC. Russet-brown and cream-gray patina enriches this well-preserved and boldly struck near-Gem. An original and attractive example of a slightly better date Barber dime from a mintage around 1.9 million pieces. Population: 34 in 64, 39 finer. CAC: 6 in 64, 10 finer (9/18).
Ex: Palm Beach Signature (Heritage, 3/2006), lot 480, lot \$1,265. NGC ID# 23EB, PCGS# 4820

3467 1905-S MS66 PCGS. This Premium Gem is intensely lustrous and sharply struck, showing also well-preserved surfaces that exhibit dappled green and dark-olive patina near the borders. A popular high-mintage issue that is favored by type specialists, the 1905-S is nonetheless conditionally rare in this grade. Population: 12 in 66 (1 in 66+), 4 finer (9/18). NGC ID# 23EW, PCGS# 4837

3468 1909-D MS65 PCGS Secure. The 1909-D is scarce in high Mint State, with only 30 to 40 unduplicated examples estimated to survive in MS65 or finer. Just 954,000 pieces were struck — most of the mintage circulated, and few examples were saved. This lustrous Gem displays reddish-tan toning at the margins surrounding silver centers. Only tiny marks and abrasions are visible under a loupe. Population: 17 in 65, 33 finer (9/18). NGC ID# 23FC, PCGS# 4851

3469 1909-D MS65 PCGS Secure. A scarce Gem example of this early Denver issue, showing satiny luster and sharp design elements. A network of russet toning streaks — barely perceptible to the naked eye — appears atop iridescent golden-gray surfaces. No abrasions distract from the eye appeal. Population: 17 in 65, 33 finer (9/18). NGC ID# 23FC, PCGS# 4851

3470 1909-O MS65 NGC. The fully defined ear of corn on the right reverse wreath is just one example of the strong impression on both sides of this Gem 1909-O dime. Lavender-gray patina colors most of each side, while the border areas are more colorfully toned. Census: 18 in 65, 6 finer (9/18). NGC ID# 23FD, PCGS# 4852

PROOF BARBER DIMES

3471 1893 PR66 PCGS Secure. CAC. Beautifully toned, liquidlike fields produce vivid yellow-gold and mint-green hues around the borders, with sea-green and lavender color across the interiors. This Premium Gem proof is fully struck and shows no mentionable imperfections. Eye appeal is spectacular. NGC ID# 23G4, PCGS# 4877

3472 1893 PR67 NGC. Second year of issue for the Barber design, the 1893 is a popular, early date that can still be used for type purposes. The deeply mirrored fields serve to enhance and brighten the rose colored centers on each side as well as the deep blue margins. Exceptionally well-preserved. Census: 22 in 67, 6 finer (9/18). NGC ID# 23G4, PCGS# 4877

3473 1895 PR65 Cameo PCGS Secure. Circulation-strike examples of the 1895 are somewhat elusive, and high-end proofs like this Gem Cameo coin often take their place in collectors' sets. Each side remains mostly brilliant and starkly contrasted with russet-gold patina near the margins. Population: 18 in 65 (1 in 65+) Cameo, 33 finer (9/18). NGC ID# 23G8, PCGS# 84879

3474 1895 PR66 Cameo NGC. Complete brilliance furthers the Cameo contrast generated by the thick, frosty motifs and the surrounding glassy mirrors. Every design feature is fully impressed. From a production of 880 pieces. Census: 15 in 66 Cameo (1 in 66+), 20 finer (9/18). NGC ID# 23G8, PCGS# 84879

3475 1897 PR67 PCGS. Deep blue-green and cerise patina graces both sides of this luscious Superb Gem proof, yet it fails to dampen either the luster of the devices or the viewer's enthusiasm. The strike is sharp and the preservation is outstanding. Finer pieces are decidedly rare. Population: 19 in 67 (1 in 67+), 3 finer; 11 in 67 Cameo, 4 finer; 1 in 67 (1 in 67+) Deep Cameo, 0 finer (9/18). NGC ID# 23GA, PCGS# 4881

3476 1898 PR67 Cameo NGC. Both sides are high-contrast on this Superb Gem proof, but the obverse has an especially pronounced cameo effect. The portrait is boldly frost-white, in contrast to glassy "black" mirrors which show golden accents around the margins. The reverse has more general green-gold and pale blue toning. Census: 26 in 67 Cameo (1 in 67+, 2 in 67 ★), 8 finer (9/18). NGC ID# 26KV, PCGS# 84882

3477 1904 PR67 NGC. With 670 proofs struck, the popularity of the 1904 proof Barber dime issue is defined by collector demand for the final proof Morgan dollars of the same year. This elegantly toned Superb Gem proof has rich blue-to-violet toning over much of each side with latent sea-green and peach elements. Census: 10 in 67 (2 in 67 ★), 2 finer (8/18). NGC ID# 23GH, PCGS# 4888

MERCURY DIMES

1916-D Mercury Dime, XF Details Well-Detailed Key-Date Coin

3478 1916-D — Cleaned — NGC Details. XF. This is a bright, silvery example with minutely granular surfaces from an old cleaning. A crescent of golden toning graces the upper obverse and lower reverse borders, and no bothersome abrasions are seen. Wear is light, and the date and mintmark are clear. The 1916-D Mercury dime is a key date in all grades. Demand often exceeds the supply.

3479 1916-S MS67 Full Bands PCGS Secure. Gold and faint lavender hues warm the silvery, unblemished surfaces of this Superb Gem Full Bands 1916-S Mercury dime. The strike is razor-sharp from rim to rim, and the obverse fields have a faint mattelike texture. No numerically finer Full Bands coins are known. Population: 29 in 67 (1 in 67+) Full Bands, 0 finer (9/18). NGC ID# 23GZ, PCGS# 4909

3480 1918 MS66 Full Bands PCGS Secure. Close study of the design elements on this Premium Gem fails to locate even a single point of strike weakness. Frosted luster illuminates a blush of light golden toning, and the surfaces are devoid of obtrusive abrasions. The 1918 Mercury dime is scarce in this grade and rarely seen finer with Full Bands. Population: 62 in 66 (3 in 66+) Full Bands, 5 finer (8/18). NGC ID# 23H5, PCGS# 4917

3481 1919-D MS62 Full Bands PCGS Secure. The 1919-D is a better date with Full Bands definition. This lower-end Mint State example is sharp and satiny with minimal surface abrasions. Forest-green, violet, and russet border toning surrounds champagne-gray interiors. Eye appeal is pleasing for the MS62 level. NGC ID# 23H9, PCGS# 4925

3482 1920-S MS64 Full Bands PCGS. The 1920-S dime, with Full Bands, is scarce finer than MS64. This near-Gem is sharply struck and satiny with light golden interiors surrounded by deeper russet, gold, and sea-green border toning. A few small marks do not detract. NGC ID# 23HD, PCGS# 4933

3483 1921 MS63 Full Bands PCGS Secure. A sharp, satiny Full Bands example of this Philadelphia semikey, showing deep russet and gold toning over each side. Cartwheel luster is produced when rotated beneath a light, and neither side exhibits bothersome abrasions. Appealing for the grade. NGC ID# 23HE, PCGS# 4935

**1921 Dime, MS65 Full Bands
Well-Struck Central Devices**

- 3484 1921 MS65 Full Bands NGC.** The outer areas of this 1921 Mercury dime — a key date in the series — may be softly struck, but the strong interior devices qualify it for a Full Bands designation. Only 1.2 million pieces were minted in the wake of a post-war recession and reduced demand for circulating silver coinage. Frosty, mostly brilliant, and impressively clean surfaces display blushes of gold patina on the obverse. NGC ID# 23HE, PCGS# 4935

- 3485 1925-S MS64 Full Bands PCGS Secure.** Frosty silver centers turn to stippled shades of blue and reddish-violet patina around the borders. A few wispy, thin lines on the portrait prevent an even higher grade for this strongly struck near-Gem with full separation of the central bands. NGC ID# 5LX3, PCGS# 4953

- 3486 1926-D MS66 PCGS Secure.** This is a sharp Premium Gem that must have just missed a Full Bands designation — there are a couple of abrasions on the horizontal bands, but the strike in this area is virtually full. Satiny luster shows warm golden toning and eye appeal excels. This is among the finest non-Full Bands 1926-D Mercury dimes at PCGS. Population: 6 in 66, 0 finer; 34 in 66 (7 in 66+) Full Bands, 5 finer (9/18). NGC ID# 23HS, PCGS# 4956

**1926-S Dime, MS65
Nearly Fully Split Bands**

- 3487 1926-S MS65 PCGS. CAC.** Splashes of russet and ice-blue toning adorn much of the obverse and portions of the reverse. All other areas retain their original brilliance, shimmering with frosty S-mint luster. Strike is often problematic for the 1926-S, but while the central bands are not fully separated, the devices are bold. Population: 29 in 65, 9 finer. CAC: 2 in 65, 2 finer (9/18). NGC ID# 23HT, PCGS# 4958

- 3488 1942/1 FS-101 AU58 PCGS.** Wear is difficult to detect on this lustrous and minimally abraded key date dime. The stone-gray surfaces are accompanied by scattered tiny freckles of forest-green and pumpkin-gold. As always for the variety, the underdigit 1 is readily observed. NGC ID# 23K4, PCGS# 145473 Base PCGS# 5036

ROOSEVELT DIME

**1949-D Roosevelt Dime, MS68 Full Bands
Beautifully Toned Top-Grade Example**

- 3489 1949-D MS68 Full Bands PCGS.** This 1949-D Roosevelt dime is among the finest at PCGS with Full Bands (9/18). The strike is indeed sharp, and the surfaces showcase frosty, unabraded mint luster. Beautiful sun-gold, amber, crimson, and forest-green toning covers much of each side, leaving only slivers of the original silver luster. Eye appeal is outstanding. Population: 10 in 68 Full Bands, 0 finer (9/18). NGC ID# 23KV, PCGS# 85092

PROOF ROOSEVELT DIME

**1954 Dime, PR68 Ultra Cameo
Tied for Finest Certified**

- 3490 1954 PR68 Ultra Cameo NGC.** Proof Roosevelt dimes are seldom seen with Deep or Ultra Cameo contrast. Just 16 proof dimes from 1954 are designated Deep or Ultra Cameo by PCGS and NGC combined (8/18). This example is among the finest of these. Dramatically deep mirroring in the fields contrasts with frost-white luster on the devices, neither side showing toning. The strike is sharp and the preservation is nearly flawless. Census: 3 in 68 Ultra Cameo, 0 finer (8/18).
Ex: Central States Signature (Heritage, 5/2007), lot 2884, which realized \$4,600; Houston Signature (Heritage, 12/2014), lot 3432, which realized \$4,406.25. NGC ID# 3Z6P, PCGS# 95229

TWENTY CENT PIECES

- 3491 1875-CC AU58 PCGS Secure. BF-2, R.1** The mintmark is diagnostically high and close, while the obverse shows the date positioned to the left. A diamond-shaped mound is clearly visible in the right obverse field near Liberty's ankle. While the BF-2 variety represents as much as 70-75% of all known 1875-CC examples, relatively few pieces exist in the sharply struck, still-lustrous condition of this lightly toned, frosted, near-Mint coin. Recutting at the outside bottom loop of 5 in the date is easily viewed with a loupe. NGC ID# 23R6, PCGS# 5297

- 3492 1875-CC MS63 PCGS Secure. BF-2, R.1.** A collector-grade Mint State example of the only available Carson City issue in the twenty cent series. Satiny luster resides beneath lilac-gray and gold toning, and abrasions are minimal. Strike softness affects the eagle's upper left (facing) wing and breast, as well as the obverse shield. NGC ID# 23R6, PCGS# 5297

- 3493 1875-S MS64 PCGS Secure. BF-16.** The mintmark is repunched on this variety, and a heavy die crack circumnavigates the reverse periphery. The 1875-S twenty cent piece is a favorite for type purposes, and Choice examples such as this are the ideal collector grade. Traces of light golden toning grace each side, the obverse being frosty and the reverse semiprooflike. Some strike softness affects the border stars and the upper portion of the eagle's left (facing) wing. NGC ID# 23R7, PCGS# 5298

PROOF TWENTY CENT PIECE

1875 Twenty Cent, PR64
1,200 Proofs Minted

- 3494 1875 PR64 PCGS Secure. BF-1, R.1.** This variety comprises the vast majority of 1875 twenty cent pieces in both formats. The entirety of this near-Gem proof is richly toned in blue-green patina with crimson elements on each side. A few wispy lines reside beneath the toning but do not affect the appeal. Only 1,200 proofs were struck in the series' first year. NGC ID# 27GZ, PCGS# 5303

BUST QUARTERS

- 3495 1818/5 B-1, R.2, XF45 NGC.** Tompkins Die State 2/2. A charming Choice XF example. Pearl-white high points contrast with charcoal-gray fields. The surfaces are clashed, but marks are confined to a few field ticks near the profile. Housed in a circa-2000 holder. NGC ID# 23RJ, PCGS# 38953 Base PCGS# 5323

1818 B-2 Quarter, AU58
Colorful Patina

- 3496 1818 B-2, R.1, AU58 NGC.** Tompkins Die State 2/1. Star 13 is repunched on this variety. The present coin is in an early die state, showing no clash marks and being cracked only from star 8 to star 10, in an arc over Liberty's cap. Star 8 is poorly struck, but all other design elements exhibit sharp definition. Satiny luster remains in the fields amid sea-green, gold, and lilac-gray patina. Only a brush of high-point friction keeps this piece from a Mint State designation. NGC ID# 23RH, PCGS# 38943 Base PCGS# 5322
- 3497 1818/5 B-3, R.3 — Cleaning — PCGS Genuine. Unc. Details.** Tompkins Die State 2/2. A well-struck stone-white representative. Clash marks are prevalent but there are no consequential marks. Luster rolls across the devices and legends. A few delicate hairlines accompany the left obverse. B-3 is a later obverse die state of the B-1 1818/5 overdate that shows little or no evidence of the 5 underdigit.

- 3498 1820 Large 0, B-2, R.2, XF40 PCGS. CAC.** Rich dove-gray and tan-brown toning embraces this moderately circulated but minimally abraded Capped Bust quarter. Traces of luster linger within the plumage and curls. B-2 is the more available of the two Large 0 varieties. Housed in an old green-label holder. NGC ID# 23RL, PCGS# 38961 Base PCGS# 5329

- 3499 1820 Small 0, B-4, R.2, AU50 NGC.** Tompkins Die State 2/2. The reflective surfaces of this lightly circulated Bust quarter are richly toned in variegated shades of olive-gray, light-blue, and gold, with intervening areas of silver surface shining through. High-point wear exists, yet most of the elements remain sharp, and only minor contact marks exist. Census (Small 0 varieties combined): 4 in 50, 35 finer (8/18).

Ex: Central States Signature (Heritage, 4/2012), lot 3928. NGC ID# 23RL, PCGS# 38958 Base PCGS# 5328

- 3500 1821 B-4, R.3, XF40 NGC.** Tompkins Die State 1/2. A die scratch from a leaf tip to the rim identifies the moderately scarce Browning-4 variety. This unblemished example is predominantly olive-gray but displays charcoal toning on selected portions of the reverse. NGC ID# 23RM, PCGS# 38966 Base PCGS# 5331

- 3501 1822 B-1, R.2, VF30 NGC. CAC.** Tompkins Die State 1/1. A midgrade example with stone-white high points and dove-gray fields. Most of the eagle's plumage remains. Impressively unabraded aside from a solitary thin line near the earlobe. CAC: 4 in 30, 15 finer (9/18). NGC ID# 23RN, PCGS# 38969 Base PCGS# 5332

- 3502 1822 B-1, R.2, AU50 ANACS.** Tompkins Die State 1/1. Scarce as a date, the 1822 quarters were struck from just two varieties. Of those, Browning-1 is far more accessible than Browning-2. Gunmetal-blue and reddish-tan toning covers the fields and margins of this About Uncirculated B-1 example, while most of the raised devices are lightly toned in silver-gray shades. A short abrasion near star 5 is the sole mark of note. Housed in an early generation ANACS holder. NGC ID# 23RN, PCGS# 38969 Base PCGS# 5332

- 3503 1825/4(2) B-2, R.2, AU50 PCGS Secure.** Tompkins Die State 1/1. Deep slate-gray and autumn-brown toning encompasses this lightly circulated and evenly struck Capped Bust quarter. The cheek and claws exhibit wear, but neither side displays any mentionable marks. NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336

1828 Bust Quarter, AU55
Popular B-1 Variety

- 3504 1828 B-1, R.1, AU55 PCGS Secure.** Tompkins Die State 1/1, with the die crack from the scroll to AM in AMERICA. The B-1 variety features the curl-based 2 in the denomination, with E in STATES above B in PLURIBUS. This Choice AU specimen exhibits just a trace of light wear on the strongly impressed design elements and the satiny surfaces are lightly abraded, under shades of lavender and pale gold toning. NGC ID# 23RV, PCGS# 38976 Base PCGS# 5342

- 3505 1833 B-1, R.2, MS62 PCGS Secure.** A brilliant Bust type coin that boasts refreshingly smooth surfaces. The first two stars, the shoulder curl, and the shield corners show softness, but the rest of the strike is sharp. Luster dominates the borders and devices. NGC ID# 23RY, PCGS# 38989 Base PCGS# 5352

SEATED QUARTERS

3506 1857 MS65 PCGS. Briggs 2-B. Satiny, shimmering mint luster shows no bothersome abrasions on this Gem No Motto Seated quarter. A light golden hue warms each side, but no other toning is seen. This is a sharply struck type coin with pleasing eye appeal. NGC ID# 23TE, PCGS# 5442

3507 1857 MS65 NGC. While the 1857 quarter is readily available in most grades, thanks to a mintage of over 9.6 million pieces, Gem and better survivors are elusive. This MS65 piece is well-defined on the portrait, if a trifle softly struck at the margins and eagle's leg, with strongly lustrous, minimally toned silver-white surfaces. Diagonal die polish lines exist on both sides, and the coin is pleasingly preserved and attractive. Census: 57 in 65, 63 finer (8/18).
Ex: Long Beach Signature (Heritage, 5/2008), lot 318; Baltimore Signature (Heritage, 3/2009), lot 1031; New York Signature (Heritage, 2/2014), lot 3595. NGC ID# 23TE, PCGS# 5442

3508 1861 MS65 NGC. Type Two Reverse. A brilliant-white Gem, with raised die polish lines and remnants of die clashing on both sides. Vibrant mint luster sparkles from the frosted fields and sharply struck motifs. More than 4.8 million pieces were struck — by far the largest mintage of the decade, and a total unsurpassed until the mid 1870s, when massive production of quarters returned. Despite the large mintage, Gem 1861 pieces are notably scarce. Census: 30 in 65 (1 in 65 ★), 19 finer (8/18). NGC ID# 23TT, PCGS# 5454

3509 1861 MS65 PCGS. The 1861 had the sixth highest mintage of any No Motto Seated Liberty quarter and is popular as a type coin. However, Gem and finer pieces are conditionally scarce. This sharply struck and satiny Gem exhibits brilliant silver surfaces and wispy champagne toning. Population: 42 in 65, 20 finer (9/18). NGC ID# 23TT, PCGS# 5454

3510 1873 Closed 3 XF45 PCGS. Briggs 2-B. The 1873 Closed 3 quarter had a mintage of just 40,000 coins. Briggs wrote in 1991 that this date was “much harder to find than its mintage would indicate due to many pieces being melted at the Mint. Mostly seen in lower grades.” This pearl-gray example is sharper than the typical survivor. The surfaces are unblemished aside from a slender mark in the field above Liberty's head. Population: 7 in 45, 14 finer (9/18). NGC ID# 23UU, PCGS# 5484

3511 1873 Arrows MS64 PCGS Secure. The 1 in the date is lightly repunched at its base on this obverse die. All With Arrows Seated Liberty quarters have the Open 3 date logotype, and this issue is popular as a type coin. The present example shows dusky golden toning over satiny surfaces and sharp design elements. No obtrusive abrasions are seen. Population: 42 in 64, 18 finer (9/18). NGC ID# BZMG, PCGS# 5491

3512 1876 MS65 NGC. Type Two Reverse. Breen-4081. Briggs 6-F. FS-304. The loop of the 6 is obviously repunched. Well struck and lustrous with lovely autumn-gold toning that deepens toward the rims. A few trivial obverse field grazes, while the reverse appears pristine. Census: 46 in 65 (1 in 65+), 26 finer (8/18).
Ex: Long Beach Signature (Heritage, 9/2009), lot 579, realized \$1,150. NGC ID# 23V2, PCGS# 5501

3513 1888-S MS65 NGC. Briggs 4-D. The 1888-S was the first quarter dollar struck at the San Francisco Mint in a decade. The date is available through MS64 but it is rare finer. This Gem displays a sharp strike and mottled lavender and sea-green toning. The obverse is prooflike, the reverse is frosty and luminous. Census: 13 in 65, 5 finer (9/18). NGC ID# 23VN, PCGS# 5521

1889 Quarter, MS66+ Totally Untoned

3514 1889 MS66+ PCGS Secure. An average 1889 quarter certified at the leading services is likely to grade between MS60 and MS61. That is a full six points shy of this blazing untoned Premium Gem with the added Plus designation for quality within the grade. Well-struck with localized softness on Liberty's head and the olive leaves. Only 12,000 coins minted. NGC ID# 23VM, PCGS# 5522

PROOF SEATED QUARTERS

1858 Quarter, Toned PR65 Low-Mintage Proof Issue

3515 1858 PR65 NGC. Briggs 5-E. A thin die crack connects the arrowheads on this proof die marriage. This Gem proof is sharply struck and deeply reflective, although also deeply toned on both sides in gunmetal-blue and lavender hues. No major distractions are seen. The 1858 proof is a challenging issue in all grades, with a *Guide Book*-listed mintage of only 300 pieces. Census: 8 in 65 (1 in 65 ★), 9 finer (9/18). NGC ID# 23WK, PCGS# 5554

3516 1863 PR64 PCGS. Briggs 4-D. A Civil War date with a low proof mintage of 460 pieces. The obverse is mostly olive-green, and the reverse is primarily orange-gold. An area of deep blue toning accompanies star 13. Only the left-side dentils lack a full strike.
Ex: Orlando Signature (Heritage, 7/2013), lot 4895, which realized \$2,115. NGC ID# 23WR, PCGS# 5559

3517 1865 PR63 Cameo PCGS Secure. Briggs 3-B. Ocean-blue and cherry-red toning endows the right obverse margin, but the motifs are frosty and the flashy fields are predominantly brilliant. A sharply struck Civil War quarter with a low proof mintage of 500 pieces. Population: 15 in 63 (2 in 63+) Cameo, 32 finer (9/18). NGC ID# 23WT, PCGS# 85561

3518 1869 PR64 NGC. CAC. Briggs 2-B, Flynn-DDO-001. Liberty's shield is lightly die doubled. Splendid ocean-blue and plum-red shades invigorate the margins and encroach upon the frosty devices. Cameo contrast is undeniable, though the coin is uncertified as such due to its prior generation holder. CAC: 9 in 64, 13 finer (8/18). NGC ID# 29SH, PCGS# 5568

3519 1873 No Arrows PR65 PCGS. Briggs 1-A. All proof No Arrows 1873 quarters show the Closed 3 date. A total of 600 pieces were struck. This toned Gem shows concentric yellow-gold, mint-green, blue, and lavender toning. The strike is sharp and eye appeal is exceptional. The fields show deep mirroring when tilted beneath a light. NGC ID# 23X6, PCGS# 5572

BARBER QUARTERS

- 3520 1873 No Arrows PR64 Cameo PCGS. CAC. Briggs 1-A.** The No Arrows proof mintage was just 600 pieces. This well-struck Choice quarter displays dramatic contrast between the icy devices and the iridescently toned fields. Sea-green, lilac-red, and butter-gold shades gradually deepen toward the rims. Population: 17 in 64 (1 in 64+) Cameo, 16 finer. NGC ID# 23X6, PCGS# 85572
- 3521 1876 PR64 Cameo NGC. Briggs 9-J.** Delicate golden toning warms the mirrored fields and satiny devices of this Choice Cameo proof. Sharp devices contrast pleasantly with the fields, and no bothersome contact marks are seen. Census: 12 in 64 Cameo, 19 finer; 1 in 64 Ultra Cameo, 1 finer (8/18). NGC ID# 23X8, PCGS# 85577
- 3522 1876 PR65 Cameo PCGS. Type Two Reverse.** A brilliant Gem whose frosty motifs and glassy fields exhibit imposing white-on-black contrast. The strike is good, and contact is limited to a few tiny ticks on the right obverse field. Population: 11 in 65 Cameo, 9 finer (8/18).
Ex: Central States Signature (Heritage, 4/2012), lot 3982, which realized \$1,840. NGC ID# 23X8, PCGS# 85577
- 3523 1879 PR65 PCGS. Briggs 2-B.** Type Two Reverse. The 1879 proof is scarce in Gem condition and rare finer. This piece displays excellent sharpness and subtle field-device contrast. Light golden obverse toning complements reddish-amber reverse color. A few small dark specks appear on the lower-reverse shield and on the eagle's right (facing) wingtip. NGC ID# 23XB, PCGS# 5580
- 3524 1880 PR65 Cameo NGC. Briggs 2-B.** Type Two Reverse. Beautiful ocean-blue, honey-gold, and cherry-red shades endow this sharply struck and exemplary Gem. Cameo contrast is particularly evident on the reverse. Business strikes and proofs combined for a mintage of fewer than 15,000 pieces. NGC ID# 23XC, PCGS# 85581
- 3525 1881 PR66+ NGC. Briggs 2-B, Flynn-RPD-001.** The date is repunched within the loops of the 8. This well struck and satiny Premium Gem displays aquamarine and rose-gold on the obverse. The reverse exhibits lilac-red borders and lightly toned centers. A low mintage date with 975 proofs and 12,000 business strikes. NGC ID# 23XD, PCGS# 5582
- 3526 1881 PR66 Cameo NGC. Briggs 2-B, Flynn-RPD-001.** Both 8s in the date are recut within the loops. The date was initially entered with a downward slope, mostly effaced, then corrected. Frosty devices rise in intricate definition above the glassy fields. This brilliant and unabraded specimen displays a short mint-made lint mark east of the uppermost arrowhead. Census: 9 in 66 Cameo, 7 finer (9/18). NGC ID# CFBL, PCGS# 85582

1886 Quarter, Toned PR67 Low Total Mintage

- 3527 1886 PR67 NGC.** A total mintage of 5,886 quarters in 1886, including 886 proofs, explains the challenge this date poses. Superb Gem proofs with or without contrast are exceedingly scarce. Gorgeous intermixed shades of violet, blue, and peach-gold cover pristine fields, ensuring the originality of this PR67 offering. Excellent aesthetic appeal. Census: 17 in 67 (1 in 67+, 1 in 67 ★), 4 finer (9/18). NGC ID# 23XJ, PCGS# 5587

- 3528 1894-O MS65 NGC. Lawrence-102.** The date is repunched, most clearly on the base of the 4. An average 1894-O Barber quarter will grade fractionally better than AU50, but this is no ordinary example. The obverse is richly toned in violet, peach-orange, and sea-green hues. Similar colors frame dusky cream-gray centers on the reverse. Preservation and eye appeal are both excellent. Census: 8 in 65 (1 in 65 ★), 8 finer (8/18). NGC ID# 23Y2, PCGS# 5608
- 3529 1900 MS66 NGC. Type Two Obverse. Type Three Reverse.** Dusky walnut-brown and navy-blue toning embrace this sharply struck and coruscating Premium Gem. No marks are apparent, and the originality is undeniable. Census: 7 in 66, 2 finer (8/18). NGC ID# 23YK, PCGS# 5625
- 3530 1901-S — Repaired — NGC Details. AG3.** A pearl-white example of the series key. An obverse edge knock at 5:30 has been repaired, and rim dings have been smoothed on the reverse at 1 o'clock and 4:30. The date and mintmark are unaffected. The date, LIBERTY, and the stars are complete. UNITED STATES OF is mostly present, while about half of AMERICA and the denomination remain.
- 3531 1901-S AG3 PCGS. CAC.** That's right, CAC-endorsed. This is a remarkably clean, problem-free example of a 1901-S, the undisputed key to the Barber quarter series. Only 72,664 pieces were produced and few were set aside at the time of issue, most were recovered from circulation decades later, such as this piece. Original, untampered surfaces. NGC ID# 23YR, PCGS# 5630
- 3532 1907-O MS66 PCGS.** More than 4.5 million quarters were struck at New Orleans in 1907, yet few survivors have achieved high Mint State grades. This issue circulated heavily, and most pieces that were preserved had below-average strike quality. This Premium Gem coin bucks the trend, with sharp definition on both sides. A swath of frosty-silver chases away the tan-gold and autumn-gray toning that covers the upper portions of the obverse. Strong mint luster is especially prevalent on the nearly untuned reverse, which displays complementary toning at the borders. Population: 15 in 66 (2 in 66+), 5 finer (9/18). NGC ID# 23ZA, PCGS# 5647
- 3533 1908-O MS66 PCGS. CAC.** This coin typifies the Feigenbaums' comment that this date comes with good luster and a soft strike, although the strike is a little above-average on this piece. A medium coating of amber-gold and dove-gray toning adds a degree of warmth over each side. Although not quite full, the devices are well-defined, and there are no singularly mentionable abrasions or other post-strike problems. For an issue with one of the larger mintages in the series (more than 6.2 million coins), Gem representatives are certainly scarce, and examples grading as fine as this piece are decidedly rare. Population: 13 in 66 (2 in 66+), 2 finer. CAC: 5 in 66, 0 finer (8/18).
Ex: Central States Signature (Heritage, 5/2004), lot 7024; Eugene Gardner Collection, Part II (Heritage, 10/2014), lot 98423, realized \$4,259.38. NGC ID# 23ZE, PCGS# 5651

1908-S Quarter, MS65 Blue and Lavender Patina

- 3534 1908-S MS65 PCGS Secure.** The 1908-S Barber quarter is an elusive issue in any Mint State grade, becoming scarce at the Gem level and rare any finer. Luster glistens softly beneath shades of blue, lavender, and rose patina. The motifs are well-defined, except for the right talon and fletchings. Population: 14 in 65 (1 in 65+), 10 finer (9/18). NGC ID# 23ZF, PCGS# 5652

- 3535 1911 MS66 PCGS Secure.** Available in lower grades to a certain extent, the 1911 Barber quarter is conditionally scarce in MS66 and is nearly uncollectible finer. This Premium Gem displays frosty cartwheel luster and razor-sharp detail. Tiny, scattered flecks of russet accent light golden luster, with no bothersome abrasions evident. Population: 36 in 66 (19 in 66+), 1 finer (9/18). NGC ID# 23ZN, PCGS# 5659

PROOF BARBER QUARTERS

- 3536 1894 PR65 PCGS.** A hint of light golden toning warms the beautifully preserved surfaces of this Gem proof 1894 Barber quarter. Modest cameo contrast must have just missed recognition from PCGS. This proof is sharp and eye-appealing. NGC ID# 2429, PCGS# 5680
- 3537 1895 PR65 NGC.** The same number of proof quarters were struck as the famous Morgan dollars in 1895: 880 specimens. Cream-gray surfaces display moderate reflectivity in the obverse fields. Wispy die polish lines appear on each side. NGC ID# 242A, PCGS# 5681

1912 Quarter, PR67 Among 700 Proofs Minted

- 3538 1912 PR67 NGC.** Dusky patina includes hues of khaki-gold, blue, and crimson, confirming the originality of this Superb Gem Barber quarter. Careful examination fails to turn up significant contact marks, as expected for a coin at this high grade level. One of 700 specimens minted. Census: 10 in 67 (1 in 67 ★), 6 finer in this category (9/18). NGC ID# 242U, PCGS# 5698
- 3539 1915 PR65 NGC.** The final proof Barber quarter issue claims a small mintage of 450 pieces. This Gem specimen displays a layer of ice-blue patina over each side and the occasional hint of golden color. Unsurprisingly, strike definition is needle-sharp. NGC ID# 242X, PCGS# 5701

STANDING LIBERTY QUARTERS

- 3540 1916 Fair 2 PCGS.** A coin for the collector on a strict budget, this 1916 Standing Liberty quarter displays considerable wear. The date is worn away, and the reverse border legends and stars merge with the rim. On the obverse, the top of Liberty's head presses into the reed-and-bead border design, and the big toe on Liberty's right (facing) foot is large — both diagnostics of the 1916 key date. The surfaces have pleasing slate-bray color with occasional russet flecks. NGC ID# 43XR, PCGS# 5704

1916 Standing Liberty Quarter, VG8 Readable Date, Full Rims

- 3541 1916 VG8 PCGS.** A pleasing collector-grade example of the first-year key date with uniform battleship-gray patina and attractively smooth surfaces. Wear is extensive, as the grade suggests, but the lower portions of the date numerals remain visible. The rims are complete around each side. This is just an excellent coin for the grade and one that many collectors will be proud to own. NGC ID# 43XR, PCGS# 5704
- 3542 1917-D Type One MS66 Full Head NGC. CAC. Ex: Rev. Dr. James G. K. McClure.** Dusky original toning casts this Premium Gem Full Head Type One quarter in shades of autumn-gold, pale olive, and champagne, while frosty underlying luster illuminates the eye appeal. The 1917-D Type One is not seen sharply struck nearly as often as its Philadelphia counterpart, and this piece shows some modest weakness on the shield, central figure, and leading edge of the eagle's left (facing) wing. A small tick on Liberty's breast is the only mentionable abrasion. Few finer coins are certified. *Long Beach Signature* (Heritage, 6/2016), lot 3771; *Dallas Signature* (Heritage, 4/2017), lot 15417. NGC ID# 2432, PCGS# 5709

1917-S Type One Quarter, MS66 Full Head Pinpoint-Sharp Strike

- 3543 1917-S Type One MS66 Full Head PCGS.** The 1917-S Type One quarter is scarcer than its Philadelphia and Denver counterparts, but it remains a collectible issue though MS66 Full Head. Finer coins are scarce. Dappled gold and gunmetal toning blankets frosty, well-preserved surfaces. Strike definition is absolutely pinpoint-sharp. PCGS reports 19 submissions graded higher (9/18). NGC ID# 2433, PCGS# 5711
- 3544 1918-D MS64 Full Head PCGS.** This is a well-preserved 1918-D quarter, held from a Gem grade by the most trivial luster grazes in the fields. Delicate pastel toning covers these grazes and produces warm eye appeal across the satiny luster. Liberty's head and the date are sharp, although the usual strike weakness affects the shield rivets and the leading edge of the eagle's left (facing) wing. NGC ID# 3TWU, PCGS# 5723

**1918/7-S Quarter, VF Details
Strong Date Numerals**

- 3545 1918/7-S FS-101 — Cleaned — NGC Details. VF.** Wear is light for the VF grade level, but light cleaning on each side of this overdate quarter prevents a numeric grade from NGC. The surfaces are bright slate-gray in color, save for a couple of russet spots on the shield and above WE, which serve as pedigree markers. The overdate feature is clear, the numerals being bold despite light wear. The 1918/7-S is the only major variety in the Standing Liberty quarter series.

**1920-D Quarter, MS63 Full Head
Conditionally Scarce**

- 3546 1920-D MS63 Full Head PCGS Secure. CAC.** Denver Mint officials coined more than 3.5 million Standing Liberty quarters in 1920, yet the issue suffered a high rate of attrition and is seldom seen in Mint State with Full Head detail. A translucent veil of delicate antique-gray patina complements otherwise silvery satin surfaces. Trivial softness occurs on the date digits, and abrasions are minor for the grade. CAC: 4 in 63, 11 finer (9/18). NGC ID# 243F, PCGS# 5737
- 3547 1923-S — Cleaned — NGC Details. AU.** The semikey 1923-S is a low-mintage branch mint issue that preceded the 1925 date recession. The present minimally marked piece has been dipped white but displays considerable luster and little if any wear.
- 3548 1924-S MS63 PCGS Secure.** An incredibly sharp date and impressive definition on Liberty's head and shield are the hallmarks of this satiny Select example. Olive-gold toning covers each side, and there are no singular abrasions. Trivial weakness in the area of Liberty's ear is all that keeps this piece from a Full Head designation, as the three sprigs at the temple are sharp. NGC ID# 243N, PCGS# 5750
- 3549 1928 MS66 Full Head PCGS Secure.** Golden-tan and powder-blue patina drapes this strongly defined Premium Gem quarter. Liberty's head, shield, and chainmail, as well as the date digits are bold. The eagle's breast is the only point of real softness, and clash marks appear below the neck. Population: 63 in 66 (5 in 66+) Full Head, 9 finer (9/18). NGC ID# 243X, PCGS# 5767
- 3550 1929-D MS64 Full Head NGC.** The 1929-D is semikey date with Full Head definition. This Choice coin shows trivial contact on Liberty's breast and knee that denies a finer grade, but the frosted luster is otherwise void of bothersome contact. Russet-gold toning graces each side. Census: 42 in 64 Full Head, 30 finer (9/18). NGC ID# 2443, PCGS# 5775

- 3551 1930-S MS66 ★ Full Head NGC. CAC.** The Star designation and CAC endorsement are well-warranted on this Premium Gem. Frosty, brilliant luster is virtually pristine, and the strike is above average on the head and shield rivets. Eye appeal is about as strong and quality is about as superb as is possible without warranting an even finer grade. NGC ID# 2446, PCGS# 5781

WASHINGTON QUARTERS

- 3552 1932-D MS63 PCGS. CAC.** A pleasing Select example of this Denver key. The strike is sharp and luster is satiny, cast in light golden toning with scattered flecks of russet. The CAC endorsement is a rare sight on 1932-D quarters in this grade, setting this piece apart from its peers. NGC ID# 2448, PCGS# 5791
- 3553 1943-S Doubled Die Obverse, FS-101, MS65 PCGS Secure.** A dramatic *Guide Book* variety with strongest doubling on IN GOD WE TRUST, though the date and LIBERTY also exhibit an impressive spread. Brilliant and lustrous with exemplary preservation and moderate peripheral incompleteness of strike. NGC ID# 2457, PCGS# 145154 Base PCGS# 5823

**1962 Quarter, Registry-Grade MS67
A CAC-Endorsed Condition Rarity**

- 3554 1962 MS67 PCGS. CAC.** The 1962 is a rarity in this grade at PCGS, and only a few coins are endorsed by CAC. Ideal for Registry Sets, this Superb Gem 1962 Washington quarter is among the finest pieces at PCGS and CAC (9/18). Satiny luster shows no bothersome abrasions and the preservation is almost unsurpassable. The obverse has dusky gold, olive-green, and russet border toning, while the reverse displays a hint of light champagne color overall. Population: 20 in 67 (1 in 67+), 0 finer. CAC: 13 in 67, 0 finer (9/18). NGC ID# 246P, PCGS# 5872

EARLY HALF DOLLARS

- 3555 1795 2 Leaves, O-105, T-25, High R.3, VG10 PCGS.** Sharply defined for the VG10 grade, since the dentils are complete except on the reverse above D STA. The curls behind Liberty's neck show pleasing definition. The silver-gray surfaces show few marks, though minor granularity is noted on the right obverse margin. NGC ID# 24E7, PCGS# 39220 Base PCGS# 6052
- 3556 1795 2 Leaves, O-124, T-12, R.5, Fine 15 PCGS.** Deep charcoal toning fills the fields, while the high points are stone-white. No marks are apparent across minimally granular surfaces. The stars are well outlined and all legends are readable, though the tops of a few letters in UNITED and OF AMERICA are faint. Liberty's hair and the eagle's plumage are nicely defined for the grade. NGC ID# 24E7, PCGS# 39240 Base PCGS# 6052
- 3557 1795 2 Leaves, O-125, T-13, R.4, VG8 NGC.** A collectible example of this popular introductory silver type. The stars are faint but all are present. The tops of STATES OF have faded, but the remainder of the legends are clear. The types are well outlined. The stone-white and powder-blue surfaces are minimally marked. NGC ID# 24E7, PCGS# 39241 Base PCGS# 6052

3558 1795 2 Leaves, O-131, T-9, High R.4, Good 6 NGC. Wear is advanced on this O-131 example, although the surfaces are naturally toned and problem-free. Olive-gray patina covers the relief elements, complementing deep gunmetal-blue, lilac, and russet color in the fields. The left obverse border is weak, although some detail remains in the Liberty portrait. On the reverse, the eagle is weak but still fully outlined. NGC ID# 24E7, PCGS# 39243 Base PCGS# 6052

**1803 Large 3 Half Dollar, AU50
O-101, Small Reverse Stars**

3559 1803 Large 3, Small Reverse Stars, 12 Arrows, O-101, T-1, R.3, AU50 NGC. Elements of original luster emerge from the protected areas of this About Uncirculated 1803 O-101 half dollar. Natural lilac-gray and autumn-gold toning covers each side, and the surfaces are smooth. Little wear is present, and the strike is even and sharp. Faint remnants of adjustment marks are visible around the reverse border. An outstanding Small Reverse Stars, Large 3 type coin. NGC ID# 24EF, PCGS# 39270 Base PCGS# 6066

3560 1806/5 O-102, T-7, High R.3, XF45 NGC. Tompkins Die State 2/2. Deep steel-blue and autumn-brown toning blankets this unblemished and pleasing Choice XF Draped Bust half. A small rim flaw between the IB in LIBERTY is of mint origin. Circulation wear is moderate and the portrait is fairly sharp, though the area near the eagle's head is incompletely brought up. NGC ID# 24EK, PCGS# 39298 Base PCGS# 6077

3561 1806 Pointed 6, No Stem, O-109a, T-15, R.3, XF45 PCGS Secure. The silver-gray surfaces are clashed and lightly rusted but lack relevant marks. A moderately circulated but problem-free representative of the popular *Guide Book* variety. Although the Knob 6, No Stem is a great rarity, the Pointed 6, No Stem is readily encountered. But the late die state with a heavy radial crack through obverse star 12 is comparatively scarce. NGC ID# 24EJ, PCGS# 39311 Base PCGS# 6073

3562 1806 Pointed 6, Stem, O-115, T-17, R.1 — Cleaned — PCGS Genuine Secure. AU Details. This sharply defined and lightly cleaned Draped Bust type coin is predominantly cream-gray, though the obverse border exhibits deeper olive and gunmetal shades. A thin mark is concealed in Liberty's hair, but no other abrasions are apparent.

3563 1806 Pointed 6, Stem, O-116, T-20, R.3, XF40 PCGS. Wheat-gold and aquamarine toning adorns this nicely detailed Draped Bust half. Minimally marked overall, though the note delicate slide marks on the shoulder curl and left (facing) wing. The TY in LIBERTY is repunched, and reverse die cracks confirm the attribution. NGC ID# 24EJ, PCGS# 39319 Base PCGS# 6071

3564 1806 Pointed 6, Stem, O-120a, T-28, R.4, XF40 PCGS. Tompkins Die State 2/3-4. A relatively early die state of O-120a. The die break within the shield crosses vertical stripes 4 and 5 but remains distant from stripe 3. Deep cobalt-blue dominates the obverse, though the high points are tan-brown. The reverse is richly toned in gunmetal-gray and lavender shades. The upper reverse displays a couple of thin unobtrusive marks. NGC ID# 24EJ, PCGS# 39326 Base PCGS# 6071

3565 1806 Pointed 6, Stem, O-125, T-14, R.5, XF40 PCGS. Overton-125 is a scarce variety. Star 1 on the obverse is low in relation to the hair curl, and star 13 nearly touches the bust. This is a Pointed 6, Stem Through Claw variety. The present coin displays uniform gunmetal-blue and gray patina with lighter tan-gold color on the worn high points. Substantial design sharpness remains on this attractive, original Draped Bust type coin. NGC ID# 24EJ, PCGS# 39331 Base PCGS# 6071

BUST HALF DOLLARS

3566 1807 Draped Bust, O-109a, T-2, R.3, VF35 PCGS. The usual T-2 die state with cracks across much of the obverse periphery and ED ST on the reverse. Deep gunmetal toning embraces this unblemished Choice VF half dollar. Hints of lighter cream color accompany design recesses. Incorrectly designated by PCGS as a Small Stars Capped Bust variety. NGC ID# 24EM, PCGS# 39350 Base PCGS# 6079

3567 1809 Normal Edge, O-106, R.3, AU55 PCGS. The reverse, exclusive to this die pair, has two key markers: recutting on the left side of the N in UNITED and a die line off the shield into the upper part of the eagle's right (facing) wing. Golden-brown and blue-green toning adorn the borders of this partly lustrous and lightly abraded representative.
Ex: Tampa Signature (Heritage, 1/2011), lot 3595; FUN Signature (Heritage, 7/2016), lot 7398, which realized \$1,292.50. NGC ID# 24ES, PCGS# 39395 Base PCGS# 6092

3568 1809 Normal Edge, O-112, Low R.5, XF40 PCGS. Dr. Glenn Peterson reveals two die lump locations to confirm the much better O-112 variety. The first lump is below the M in AMERICA, and the other lump resides between the ES in STATES. Both lumps are present on this straw-gold and dove-gray example. Protected areas display luster, though the portrait shows wear on the cheek, curls, and clothing. A few hair-thin marks are beneath the left scroll end. NGC ID# 24ES, PCGS# 39397 Base PCGS# 6092

3569 1811 Large 8, O-104a, R.1, AU58 PCGS Secure. The Large 8 and interesting obverse die cracks allow prompt attribution. Light silver-gray toning embraces this lustrous and unblemished half dollar. Slight wear on the curls precludes a Mint State assessment. The left-side stars are lightly impressed, but the remainder of the strike is bold. NGC ID# 24EU, PCGS# 39426 Base PCGS# 6096

3570 1811 Small 8, O-105a, R.2, AU58 PCGS. Die cracks throughout the reverse border allow easy attribution. This near-Mint Bust half has dusky dove-gray and autumn-gold toning. Marks are minimal, and the strike is bold save for the right-side stars.
Ex: Central States Signature (Heritage, 5/2009), lot 665, which realized \$1,207.50. NGC ID# 24EU, PCGS# 39428 Base PCGS# 6097

3571 1811 Small 8, O-106, R.3, AU53 PCGS. CAC. Stone-gray fields and motifs are framed by golden-brown and gunmetal borders. The eagle's left (facing) wing displays light wear, but glimmers of luster remain, and marks are confined to a diagonal line after the C in 50 C.
Ex: Central States Signature (Heritage, 4/2012), lot 9734, which realized \$632.50. NGC ID# 24EU, PCGS# 39429 Base PCGS# 6097

3572 1812 Large 8, O-105a, R.2, AU58 PCGS. CAC. A late die state example with a die break inside the lower loop of the 8 in the date. This partly lustrous and lightly toned Borderline Uncirculated half dollar is free from apparent abrasions. The usual pick-up point for the variety is the double dentil above the final A in AMERICA, but mint-made peripheral die wear has made that marker indistinct. The multiple sets of clash marks beneath the scroll provide a secondary diagnostic. NGC ID# 24EW, PCGS# 39450 Base PCGS# 6100

3573 1813 O-107a, R.1, AU58 PCGS. Extensive die cracks and clash marks aid the attribution. The design elements have been well impressed, except for some softness on the eagle's head. Luster shimmers across unblemished stone-gray and wheat-gold surfaces.
Ex: Dallas Signature (Heritage, 10/2008), lot 859, which realized \$1,150. NGC ID# 24EZ, PCGS# 39468 Base PCGS# 6103

3574 1814 O-102, R.2, AU58 PCGS. CAC. Myriad die lines above the drapery clasp provide prompt attribution. Freckles of forest-green and russet-brown toning encompass the borders. Luster illuminates the stars and legends. Both sides are impressively unabraded. CAC: 23 in 58, 41 finer (9/18). NGC ID# 24F3, PCGS# 39475 Base PCGS# 6105

3575 1814 O-103, R.1, AU58 NGC. CAC. The prominent vertical die line beneath the left scroll end makes Overton-103 one of the easiest die marriages to confirm within the entire Capped Bust series. A triple set of bold clash marks further increase specialist interest. Steel-gray and aquamarine toning accompanies satiny and unblemished surfaces. NGC ID# 24F3, PCGS# 39477 Base PCGS# 6105

3576 1814 O-109, R.2, AU58 NGC. A split hair curl beneath the L in LIBERTY is among the chief identifiers of this available die pairing. This near-Mint example is struck from clashed dies, showing virtually complete outlines of the eagle on the obverse and Liberty's portrait on the reverse. Dusky peach-gold, powder-blue, and jade-green toning encompasses satiny surfaces. Unabraded save for a hair-thin mark beneath the chin. NGC ID# 24F3, PCGS# 39486 Base PCGS# 6105

1818 O-108 Half Dollar, MS63 Lustrous and Lightly Toned

3577 1818 O-108, R.1, MS63 PCGS Secure. There are notches in the tops of the 8s on O-108, the only 1818 half dollar issue that employs this obverse die. Original cartwheel luster illuminates light golden, lilac-gray, and ocean-blue toning on this Select example. All of the stars are sharp, and the central devices are equally well-defined. Faint marks on Liberty's cheek limit the grade but are unseen by the naked eye. NGC ID# 24F9, PCGS# 39524 Base PCGS# 6113

3578 1818 O-109a, R.1, AU58 PCGS. The high N in UNITED is the identifier for this collectible Capped Bust half marriage. The die crack through ED STATE confirms the later Overton die state. This lightly toned example has dusky chestnut-brown toning aside from peripheral bands of forest-green. Smooth aside from a narrow tick on the cheek.

Ex: Long Beach Signature (Heritage, 9/2009), lot 741, which realized \$977.50. NGC ID# 24F9, PCGS# 39526 Base PCGS# 6113

3579 1818 O-112, R.1, AU58 PCGS. The lengthy crack across the lower left reverse is an even better pick-up point than the tilted A in STATES. Brilliant and well struck with ample luster and a few thin marks on Liberty's chest and the field near the chin.
Ex: FUN Signature (Heritage, 1/2011), lot 10716; FUN Signature (Heritage, 7/2016), lot 3533, which realized \$1,645. NGC ID# 24F9, PCGS# 39529 Base PCGS# 6113

3580 1820/19 Curl Base 2, O-102, R.1, AU55 NGC. The sole Curl 2 overdate variety, O-102 commands its own *Guide Book* listing. The dusky blended wheat-gold and steel-gray surfaces are practically unabraded, and wear is limited to such high points as the curl beneath the Y in LIBERTY. NGC ID# 24FE, PCGS# 39574 Base PCGS# 6126

1820/19 Half Dollar, Lustrous AU58 O-102, Curl Base 2

3581 1820/19 Curl Base 2, O-102, R.1, AU58 PCGS. Overton-102 is the only overdate die pair with a Curl Base 2. The underdigits are plainly visible within the loops of the 20. This nearly Uncirculated example displays warm golden toning over each side with substantial luster in the fields. Slight strike weakness is seen on the highest points of Liberty's hair curls and on the eagle's left (facing) wing, but the overall sharpness is pleasing and no bothersome surface blemishes are seen. NGC ID# 24FE, PCGS# 39574 Base PCGS# 6126

3582 1820 Square Base 2, Large Date, Knob, O-104, High R.4, XF45 PCGS. *Ex: Witham.* Richly toned with honey-gold centers and lilac-gray margins. Luster glimmers from the stars and legends. Void of marks, and an impressive example of this challenging die pairing.
Ex: Witham Collection - Boston ANA Signature (Heritage, 8/2010), lot 4876, which realized \$1,955. NGC ID# 24FD, PCGS# 39565 Base PCGS# 6122

3583 1823 O-108a, R.3, AU58 PCGS. This late die state of the obverse has all the die cracks of O-108a. The first A is perfect, and a reverse center dot is clearly visible, confirming the O-108 attribution. Specialists always get a little excited when they see the die crack across the bust, which also appears on the O-109 rarity. This near-Mint example has satin luster with light silver surfaces and delicate champagne toning on the obverse. Splashes of powder-blue appear on the reverse.
Ex: Houston Signature (Heritage, 12/2014), lot 4058, which realized \$2,232.50. NGC ID# 24FJ, PCGS# 39613 Base PCGS# 6131

3584 1825 O-117, R.4, AU58 NGC. The repunched 5 in the date is characteristic of this very scarce 1825 Overton marriage. The margins display a hint of tan toning, and the open fields are moderately bright. The strike is crisp except on the stars.
Ex: FUN Signature (Heritage, 7/2015), lot 3933, which realized \$1,116.25. NGC ID# 24FL, PCGS# 39664 Base PCGS# 6142

3585 1826 O-115, Low R.5, AU55 PCGS. O-115 shares an obverse die with O-111, and a reverse die with O-116, but is much scarcer than either of those two prevalent marriages. This stone-white and straw-gold Choice AU example is remarkably unabraded and displays noticeable remaining luster. The right-side stars are lightly impressed. NGC ID# 24FM, PCGS# 39686 Base PCGS# 6143

3586 1827 Square Base 2, O-114, R.3, MS61 NGC. CAC. *Ex: "Col." E.H.R. Green, Eric P. Newman Collection.* Deep cream-gray toning confirms the originality of this smooth and satiny example. Several stars and the IB in PLURIBUS are incompletely brought up. Although the number of die varieties for the series peaked in 1827, O-114 is readily attributed by a die line within the Y in LIBERTY, and repunching on the 7 in the date.
Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$7.50; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection Part II (Heritage, 11/2013), lot 33601, which realized \$2,350. NGC ID# 24FN, PCGS# 39709 Base PCGS# 6144

3587 1828 Curl Base 2, No Knob, O-105, R.5, AU58 PCGS. A rare die pair combining a Curl Top, Curl Base 2 obverse with the reverse that shows recutting on the U of UNITED. Stephen Herrman's Condition Census lists this piece third finest, trailing an AU58 PCGS CAC coin and an MS62 PCGS coin. Deep peach and blue-violet luster highlights the small areas of rub on the high points of the well-struck devices.

Ex: *FUN Signature (Heritage, 1/2011)*, lot 3717, which realized \$3,450. NGC ID# 24FR, PCGS# 39758 Base PCGS# 6148

3588 1828 Square Base 2, Large 8s, O-109, R.3, MS62 PCGS. The O-109 shares a *Guide Book* listing with O-108, as the only 1828 half dollar varieties with a Square Base 2 and Large 8s. Light almond-gold toning adorns this lustrous and crisply struck Capped Bust half. Given the impressive eye appeal, expect bidding to be competitive. NGC ID# 24FR, PCGS# 39763 Base PCGS# 6150

3589 1828 Square Base 2, Small 8s, Large Letters, O-112, R.3, MS61 PCGS Secure. The awkward alignment of the ES in STATES is a pick-up point for Overton-112. A lightly toned and lustrous type coin with unmarked surfaces and a mint-made strike-through above the M in AMERICA. The stars are softly defined, but the major devices are sharp. NGC ID# 24FR, PCGS# 39766 Base PCGS# 6151

3590 1833 O-105, R.2, MS62 PCGS Secure. The widely repunched second S in STATES is diagnostic for Overton-105. This lustrous and unmarked type representative has lime-green borders and cream-gray centers. The dies were slightly misaligned, causing a typical strike on the upper obverse and lower reverse, and a few stars are also incomplete. NGC ID# 24FX, PCGS# 39892 Base PCGS# 6163

3591 1836 50/00, Lettered Edge, O-116, R.2, AU58 NGC. The 5 in the denomination is punched over an underlying 0. Deeply blended autumn-brown and apple-green toning blankets this satiny and momentarily circulated example. Close inspection reveals minor hair-thin marks on the left obverse.

Ex: *New York Signature (Heritage, 10/2014)*, lot 3528, which realized \$1,527.50. NGC ID# 24G2, PCGS# 39964 Base PCGS# 6170

REEDED EDGE HALF DOLLARS

1836 Half Dollar, AU Details
Reeded Edge, GR-1

3592 1836 Reeded Edge, GR-1, R.2 — Altered Surfaces — PCGS Genuine Secure. AU Details. With a reported mintage of just 1,200 pieces, the 1836 Reeded Edge half dollars were the first coins of the denomination struck on a steam press. The issue is a sought-after key date today and collectors prize examples in all grades and conditions. This coin shows some light wear on the strongly impressed design elements and the lightly abraded surfaces display highlights of lavender-gray and pale gold toning, with a few specks of amber on the obverse and a finger print pattern on the reverse. The luster is somewhat dimmed and the flat aspect suggests some kind of surface alteration long ago.

3593 1837 GR-22, R.2, MS62 NGC. Deep electric-blue, plum-red, and chestnut-brown toning encompasses this satiny Reeded Edge half dollar type coin. Well-struck in the centers, though border elements are incompletely impressed. An unobtrusive scuff on the cheekbone is all that precludes a finer grade. NGC ID# 24G4, PCGS# 531071 Base PCGS# 6176

SEATED HALF DOLLARS

3594 1843 WB-Unlisted, Die Pair 35, R.3, MS63 ANACS. Interesting die cracks on both sides attribute the variety. The 43 in the date is triple-punched, per the Bugert reference. A satiny Select example with faint tan-gold and silver-gray toning. The strike is good, and marks are chiefly confined to the field near the U in UNITED. NGC ID# 24GX, PCGS# 6243 Base PCGS# 6243

3595 1844-O Doubled Date, WB-103, FS-301, Die Pair 22, R.4, VF20 PCGS Secure. The most dramatic repunched date variety in the Seated Liberty series. The date was initially entered too far north, overlapping the rock. The second date placement was correct. Listed in both *Cherrypickers'* and the *Guide Book*, and the cover variety for the classic Wiley-Bugert reference. This evenly worn and lightly abraded example has ocean-blue, lemon-gold, and stone-gray toning along with a dash of cherry-red patina near the date. NGC ID# 24H2, PCGS# 145817 Base PCGS# 6247

3596 1849 Repunched Date, WB-103, Die Pair 9, R.3, AU58 NGC. CAC. The 18 in the date is clearly repunched. Attractive golden-brown, rose-red, and navy-blue borders encompass brilliant fields and devices. Lustrous and nearly unabraded with eye appeal that exceeds the third-party numerical grade. In a former generation holder. For all 1849 varieties combined, CAC: 11 in 58, 20 finer (8/18). PCGS# 572070 Base PCGS# 6262

3597 1861-O WB-101, Die Pair 7, R.2, MS62 PCGS Secure. Satiny surfaces display golden-toned mint luster on this Uncirculated 1861-O half dollar. Die Pair 7 is a Louisiana issue. The reverse is in a late die state on this piece, cracked along the top of UNITED and the RICA in AMERICA. Surface abrasions are light and scattered with minimal visual impact. The design elements are fully struck. NGC ID# 24J8, PCGS# 572146 Base PCGS# 6303

3598 1861-O WB-101, Die Pair 9, R.2, MS62 PCGS. Lightly dappled russet toning visits this well struck and inoffensively abraded New Orleans Civil War half dollar. The luster is good and the surfaces show no indication of seawater exposure. Die Pair 9 can be attributed by its many spindly cracks, and was deemed a Confederate issue by Randall E. Wiley in the November 2006 *Gobrecht Journal*. NGC ID# 24J8, PCGS# 572146 Base PCGS# 6303

1867 Half Dollar, Toned MS64
Luminous Original Luster

3599 1867 WB-101 MS64 PCGS. Golden-rose and subtle blue colors adorn this sharp, shimmering near-Gem. Only a fragment of the drapery at Liberty's elbow is present, although the foot support is full. On the reverse, a series of faint vertical pinscratches is visible in the left horizontal shield lines, but these are the only mentionable imperfections. An appealing coin for the grade. The 1867 half dollar is rarely offered this fine. Population: 9 in 64 (1 in 64+), 9 finer (8/18).

Ex: *Houston Signature (Heritage, 11/2007)*, lot 60657, which realized \$3,450; *Stamford Coinfest Signature (Heritage, 10/2010)*, lot 3687, which realized \$2,760. PCGS# 572177 Base PCGS# 6321

3600 1872-CC WB-101, Die Pair 6, R.4, XF40 PCGS. CAC. An early Carson City issue with a low survival rate. This moderately circulated dove-gray representative shows minimal granularity, and the sole apparent abrasion is a tick near the left (facing) elbow. CAC: 2 in 40, 7 finer (8/18). NGC ID# 64EJ, PCGS# 572203 Base PCGS# 6334

1872-CC Seated Half Dollar, AU55
Lustrous Fields

- 3601** 1872-CC WB-101, Die Pair 6, R.4, AU55 PCGS. Original luster shimmers in the fields of this Choice About Uncirculated example, complementing sea-green, gold, and russet border toning. The interiors have a light lilac-gold hue. The strike is sharp and only trivial high-point wear is observed. The 1872-CC half dollar is a better date in AU levels, and it is a rarity in Uncirculated condition. This piece is outstanding in all respects. NGC ID# 64EJ, PCGS# 572203 Base PCGS# 6334
From the Harry Salyards Collection; ex: Art Kagin, privately, April 1986.

**1874 Arrows Half Dollar, Stark-White MS64+
WB-102, Large Arrows**

- 3602** 1874 Large Arrows, WB-102, MS64+ NGC. Delightfully smooth and frosted fields are nearly without fault on this high-end, Choice Uncirculated Arrows half. The strike is sharp in all areas except for the eagle's left (facing) talon, which is incompletely brought up. The coin is brilliant throughout, with frost-white fields and equally frostlike central motifs. A popular two-year type, seldom graded any finer. Census: 1 in 64+, 1 in 64 ★, 14 finer (9/18). NGC ID# 24LA, PCGS# 572219 Base PCGS# 6346
- 3603** 1877-S Closed Bud, Very Small S, WB-104, Die Pair 16, R.4, MS64 PCGS. CAC. This Choice example is boldly struck, with notable definition on the olive leaves and Liberty's head. As is seen on many high-grade examples of this variety, the fields display significant semiprooflike mirroring. Abrasions, however, are minimal, and pale golden toning blankets each side. PCGS has seen 68 numerically finer submissions (8/18).
Ex: New York Signature (Heritage, 10/2014), lot 3545, realized \$1,410. NGC ID# 24KM, PCGS# 572255 Base PCGS# 6357

1887 Seated Half, MS65
Nearly Prooflike Circulation Strike

- 3604** 1887 WB-101 MS65 NGC. CAC. The reflective fields are nearly prooflike in most areas, struck with the Closed Bud reverse (Type Two) and with slight strike weakness at Liberty's uppermost curls and at star 7. The coin is otherwise razor-sharp with considerable contrast between the frosted devices and glassy fields. Pale-blue, violet, and light-russet hues are strongest at the margins. CAC endorsed for surface quality and visual appeal. Census: 20 in 65, 13 finer. CAC: 3 in 65, 9 finer (9/18). NGC ID# 24L2, PCGS# 572272 Base PCGS# 6369

PROOF SEATED HALF DOLLARS

- 3605** 1866 Motto PR64 Cameo NGC. CAC. This razor-sharp specimen is untuned aside from a glimpse of golden-brown and pale-gold near the rims. The devices exhibit noticeable frost, and the fields are glassy with a few delicate lines. A meager 725 proofs were struck. Census: 12 in 64 Cameo (1 in 64+), 8 finer. CAC: 5 in 64, 2 finer (9/18). NGC ID# 27TZ, PCGS# 86424
- 3606** 1873 No Arrows, Closed 3, PR65 NGC. The Mint struck 600 No Arrows proof half dollars in 1873, all with the Closed 3 logotype in the date. This Gem example displays lilac-gold toning over mirrored fields and sharp, satiny devices. Bluish border toning frames each side. A few faint hairlines on the obverse are well-masked by the patina. NGC ID# 27U8, PCGS# 6431
- 3607** 1879 PR64 PCGS. Type One Reverse with an open bud above the H in HALF. Mintages of business half dollars fell precipitously with the advent of the Morgan dollar, but the proof 1879 half is affordable for the intermediate collector. A brilliant and unblemished near-Gem with frosty devices that contrast with glassy fields, though the coin is undesignated as Cameo within its green-label holder. NGC ID# 27UE, PCGS# 6440
- 3608** 1882 PR66 NGC. Beautiful multicolor toning forms concentric bands on the obverse of this Premium Gem proof, while the reverse displays mottled lavender and gold color. The strike is sharp on this beautifully preserved type coin, and the eye appeal it outstanding. NGC ID# 27UH, PCGS# 6443

1885 Half Dollar, PR65 Cameo
Borderline Ultra Cameo

- 3609 1885 PR65 Cameo PCGS. WB-101.** Ex: "Col." Green, Newman. The 1885 half dollar is among the lowest total mintage dates from the always-collectible 1880s. Only 930 proofs were struck out of a total output of 6,130 pieces. This is a magnificent cameo that displays thick mint frost over the devices, set against deeply reflective fields. The contrast is so stark that it is a borderline Deep Cameo. The brilliant centers are surrounded by a wide and ever-deepening margin of russet-golden patina.
Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$6.50; Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33794, which realized \$5,581.25. NGC ID# 27UL, PCGS# 86446

- 3610 1888 PR64 PCGS.** The total mintage for the 1888 half dollar barely exceeds 20,000 pieces, including 832 proofs, making this a popular date with collectors. Shades of blue, gold, and lavender adorn moderately flashy fields and strong devices that show just a hint of softness at the upper obverse. NGC ID# 27UP, PCGS# 6449

BARBER HALF DOLLARS

1897 Half Dollar, MS65
Lightly Toned and Highly Lustrous

- 3611 1897 MS65 PCGS Secure.** The mintage for 1897 halves was a substantial 2.48 million pieces, and true to form for Philadelphia coinage from the late-1890s half dollars from this year were well-produced. This is a sharply defined example that displays bright, glowing mint luster. Each side is lightly toned and the original patina does not impede the underlying mint frost. An exceptional type coin. Population: 26 in 65 (1 in 65+), 16 finer (9/18). NGC ID# 24LY, PCGS# 6477
- 3612 1904-O MS62 PCGS Secure.** Natural shades of blue, orange, and red-violet color serve to augment the appeal of this MS62 Barber half dollar and conceal grade-limiting ticks on each side. Strike definition is remarkably strong for the O-mint, including on the right shield-wing juncture. Population: 7 in 62, 44 finer (9/18). NGC ID# 5EPG, PCGS# 6499
- 3613 1908 MS64 PCGS Secure. CAC.** A trace of light golden toning graces the frosted cartwheel luster of this CAC-approved near-Gem. The strike is sharp throughout, and Liberty's cheek exhibits only trivial grade-limiting abrasions. Higher-grade 1908 Barber half dollars are rare. Population: 70 in 64 (1 in 64+), 25 finer. CAC: 13 in 64, 9 finer (9/18). NGC ID# 24N4, PCGS# 6512

- 3614 1908 MS65 NGC.** A dip in the mintage of 1908 half dollars compared to the higher mintages of the 1907 and 1909 issues does not translate to any meaningful difference in market value, yet the scant population in Gem and finer condition suggests that it should. This frosty example exhibits pale golden-gray toning and soft mint luster. The shield base is sharp, with only slight merging of the details on the eagle's talon and arrow fletchings. Census: 12 in 65, 4 finer (9/18). NGC ID# 24N4, PCGS# 6512

- 3615 1915-D MS65 NGC.** Ex: Highland Collection. This boldly defined final-year Gem displays satiny luster that beams through its light champagne and gold toning. Finer 1915-D Barber halves are rarely offered, and even coins in this grade are infrequently seen. Census: 53 in 65 (1 in 65+), 12 finer (9/18). NGC ID# 24NS, PCGS# 6533

PROOF BARBER HALF DOLLARS

- 3616 1894 PR65 NGC.** A total of 972 proofs were struck, but perhaps only 10% of those survive in Gem proof or finer grades. This is a brilliant-white PR65 example, with flashy mirrored fields and lightly frosted central devices. The obverse strike is sharp, while the reverse shows only brief softness at the upper-right shield junction and adjacent feathers. NGC ID# 24NW, PCGS# 6541

- 3617 1897 PR64 Cameo PCGS.** Noticeable contrast exists between the frosted motifs and reflective, largely brilliant fields. A few daubs of dusky patina are seen. A total of 731 proof half dollars were struck in 1897 — a time of extraordinary production standards. Clean except for a thin pinscratch across the upper cheek. NGC ID# 24NZ, PCGS# 86544

- 3618 1902 PR65 PCGS Secure.** Glimmering fields display liquidlike mirroring on this Gem proof, warmed by light golden toning that deepens to amber along the right obverse border. The obverse is sharp, although the right side of the reverse eagle is poorly defined. NGC ID# 24P6, PCGS# 6549

- 3619 1903 PR65 NGC.** Mottled gold, gray, and violet toning hallmarks this impressive proof Barber half dollar. The surfaces are reflective, and the devices are sharply detailed, except for a touch of softness on the right point of the shield. Only 755 proofs were struck in 1903 and Gem specimens are scarce. Census: 49 in 65, 70 finer (8/18).
Ex: Houston Signature (Heritage, 12/2010), lot 3715, realized \$2,645. NGC ID# 24P7, PCGS# 6550

- 3620 1911 PR64 Cameo PCGS Secure.** The 1911 proof Barber half dollar is rare in Deep Cameo grades, making attractive Cameos important to budget-conscious collectors. This Choice Cameo displays a full strike and stark contrast. Golden toning warms both sides. Population: 22 in 64 Cameo, 45 finer; 0 in 64 Deep Cameo, 4 finer (9/18). NGC ID# 6UPG, PCGS# 86558

1912 Half Dollar, PR66
Reflective and Lightly Toned

- 3621 1912 PR66 NGC.** Golden-toned overall with variations from pale champagne to light russet-gold. The devices display considerable frost, such that the surfaces have nearly a Cameo appearance on the reverse, though the obverse falls short. Carefully preserved and visual excellent. The usual strike weakness is noted on the eagle's right (facing) wing junction. Census: 15 in 66 (1 in 66+), 15 finer; 5 in 66 (1 in 66+) Cameo, 4 finer (8/18). NGC ID# 24PG, PCGS# 6559

- 3622 1915 PR64 PCGS. CAC.** Deep honey-gold and lighter lilac-blue toning covers both sides of this near-Gem proof. The strike is sharp and no obtrusive marks are seen. The 1915 is the final-year issue for the Barber type. Only 450 proofs were struck. The population of CAC-approved survivors is small. CAC: 7 in 64, 25 finer (9/18). NGC ID# 24PK, PCGS# 6562

WALKING LIBERTY HALF DOLLARS

- 3623 1916-D MS65 PCGS.** A popular first-year issue from the Denver branch mint, with the mintmark placed below IN GOD WE TRUST on the obverse — a feature that was implemented for less than two years. This brightly untoned Gem survivor is highly lustrous and notably well-struck on the branch hand, where the thumb shows full separation. Far above average. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

1916-S Walking Liberty Half, MS64 Brilliant First-Year Example

- 3624 1916-S MS64 NGC.** The 1916 San Francisco issue is elusive in near-Gem or finer grades. Always popular for its first-year status with the obverse mintmark, its small mintage of 508,000 pieces attracts attention, too, since it is the scarcest of the three inaugural Walking Liberty issues. This is a brilliant and frosted example, sharply struck, with only a few tiny marks on the eagle's leg. The eye appeal suggests an even finer grade. NGC ID# 24PN, PCGS# 6568

1917-S Half Dollar, AU58 CAC-Approved, Obverse Mintmark

- 3625 1917-S Obverse AU58 PCGS. CAC.** This is an obtainable near-Mint representative of the famous S-mint condition rarity, featuring the popular Obverse Mintmark placement. Partial luster glistens from the bright silver surfaces. A few dark alloy spots at the upper obverse and hints of gold in the field are the only indications of color. NGC ID# 26G7, PCGS# 6572

- 3626 1917-S Reverse MS62 PCGS Secure.** Softly frosted, golden-gray luster illuminates pleasantly clean surfaces for the grade on this Reverse Mintmark 1917-S Walker. Moderate central strike weakness leaves Liberty's branch hand and the eagle's trailing leg poorly defined, which likely contributes to the grade. NGC ID# 24PU, PCGS# 6573

- 3627 1918-D MS63 PCGS Secure.** The 1918-D Walking Liberty half dollar is a rarity in Gem condition, but this MS63 coin is within the grasp of most collectors. Russet-gray and olive toning clings to the crevices on each side, leaving areas of silvery-gray luster throughout the interiors. The centers show the usual strike weakness. NGC ID# 24PW, PCGS# 6575

- 3628 1918-S MS64 ANACS.** Deep forest-green and rose-red patina encompasses this Choice West Coast World War Walker. Satin luster rolls across nicely struck and relatively unabraded surfaces. Housed in a small-sized holder.
Ex: Long Beach Signature (Heritage, 6/2006), lot 1774; Dallas Signature (Heritage, 11/2007), lot 847, which realized \$2,070. NGC ID# 24PX, PCGS# 6576

- 3629 1919-S AU50 NGC.** The 1919-S is a better date among Walking Liberty half dollars. This About Uncirculated example displays partial luster in the fields amid well-struck design elements that have just a brush of wear. The surfaces are satiny and devoid of bothersome marks, producing pleasant eye appeal. NGC ID# 24R2, PCGS# 6579

- 3630 1920-D AU55 NGC.** Partial thumb separation on Liberty's branch hand confirms an above-average strike on this Choice AU coin. Luster remains in the protected portions of the fields and wear is light on the devices. Scattered contact marks accompany the grade. A collector-grade example of this slightly better Denver issue. NGC ID# 24R4, PCGS# 6581

- 3631 1920-D 50C — Questionable Color — PCGS Secure Genuine. Unc. Details.** A lustrous, lightly abraded, and nicely struck early branch mint Walker. Faint tan toning visits both sides, and a blush of lilac patina accompanies AMERICA. The reverse high points are slightly glossy, but the eye appeal is attractive.

- 3632 1921 — Cleaned — NGC Details. XF.** This key date half dollar has been dipped. The untuned surfaces are microgranular and display only incidental contact. The 1921 has the second-lowest mintage of the series, since Philadelphia Mint resources concentrated on silver dollar coinage.

1921-D Half Dollar, AU Details Lustrous Surfaces

- 3633 1921-D — Cleaned — NGC Details. AU.** Hairlines on each side of this piece reveal a light cleaning, and the surfaces have the bright, satiny luster often associated with cleaned silver. However, little wear is evident. Weakness on Liberty's branch hand and the eagle's breast appears to be from the strike only. Liberty's head is sharp, and eye appeal is remarkably pleasing for a Details-graded coin. Only 208,000 half dollars were struck at Denver in 1921, making this a key date in all grades.

1927-S Walking Liberty Half Dollar, MS64 Colorfully Toned

- 3634 1927-S MS64 PCGS. CAC.** The 1927-S Walking Liberty half dollar is a noted strike rarity in the series and this CAC-endorsed Choice specimen shows some of the typical softness on the central design elements, but the peripheral devices are much sharper. Shades of golden-tan, lavender-gray, and russet toning visit the well-preserved satiny surfaces. NGC ID# 24RA, PCGS# 6587

3635 1929-S MS65 NGC. Only a few hundred 1929-S Walkers are believed to exist in Gem condition, and the population declines markedly in MS66. This example exhibits slight central softness but strong peripheral detail. Softly lustrous, well-preserved surfaces feature daubs of golden color at the borders. NGC reports 35 finer submissions (8/18). NGC ID# 24RD, PCGS# 6590

3636 1933-S MS63 PCGS Secure. The 1933-S is one of the best-produced of all branch mint issues in the Walking Liberty half series. Examples are almost always found fully struck, as seen here. The surfaces display bright, sparkling mint luster and a significant presence of lilac and golden toning. NGC ID# 24RE, PCGS# 6591

3637 1933-S MS63 NGC. The 1933-S is moderately available overall, although few Select examples have the eye appeal of this piece. Although lightly abraded, the surfaces are lustrous and toned in warm golden hues. Some deeper amber color graces the right obverse border. The design elements are fully struck. NGC ID# 24RE, PCGS# 6591

1934 Half Dollar, Toned MS68 Top-Grade Registry Coin

3638 1934 MS68 NGC. The 1934 Walker is an available date overall, but MS68 examples are conditionally rare. NGC and PCGS combined report fewer than two dozen pieces this fine, and no numerically finer representatives are known. This coin displays fully struck design elements and frosty, unblemished mint luster. Beautiful multicolor toning covers each side, adding to the eye appeal. Census: 13 in 68 (1 in 68+, 1 in 68 ★), 0 finer (9/18). NGC ID# 24RE, PCGS# 6592

3639 1934-D MS66 PCGS. This is a beautifully preserved example with original, frosty mint luster. Pale orange-gold toning in the margins surrounds bone-white interiors, while neither side exhibits bothersome abrasions. The 1934-D half dollar is occasionally available in this grade, but PCGS lists only four Superb Gems finer (9/18). NGC ID# 24RG, PCGS# 6593

1934-S Half Dollar, MS66 Few Pieces Known Finer

3640 1934-S MS66 PCGS Secure. The 1934-S Walking Liberty half dollar claims a mintage of 3.6 million pieces, making the issue scarce in MS66 condition, and rare in any finer grade. This delightful Premium Gem exhibits a better-than-average strike, with plain separation between Liberty's thumb and index finger on the wreath hand. The well-preserved surfaces are visited by dappled shades of lavender-gray and amber toning. PCGS has graded eight numerically finer examples (9/18). NGC ID# 24RH, PCGS# 6594

3641 1935 MS67 PCGS. CAC. The 1935 Walking Liberty half dollar is conditionally scarce in MS67, and finer pieces are almost unknown. This example is frosty with radiant cartwheel luster and only a blush of light golden toning. Both sides are sharply defined. Population: 61 in 67 (6 in 67+), 1 finer. CAC: 35 in 67, 1 finer (9/18). NGC ID# 24RJ, PCGS# 6595

3642 1935-S MS66 PCGS Secure. Frosty, unblemished mint luster engulfs this Premium Gem 1935-S half dollar. Liberty's branch hand is a trifle soft, but the strike is otherwise sharp. The fields are especially clean, and eye appeal is outstanding. PCGS lists only three Superb Gems finer (9/18). NGC ID# 24RL, PCGS# 6597

3643 1936-S MS66+ NGC. CAC. Flecks of olive and russet toning cling to the border regions on this high-end Premium Gem, leaving the majority of each side essentially untuned. Luster is frosty and free of abrasions, complementing well-struck design elements. Partial thumb separation is visible on Liberty's branch hand. NGC lists only 17 higher-grade representatives (8/18). NGC ID# 24RP, PCGS# 6600

3644 1937 MS67 PCGS. CAC. This impressive Superb Gem is sharply detailed in all areas, save for the slightest touch of the usual softness on the eagle's leg. The impeccably preserved surfaces radiate vibrant mint luster and show hints of pale gold toning. PCGS has graded five numerically finer examples (9/18). NGC ID# 256A, PCGS# 6601

1938-D Half Dollar, MS66+ Fantastic Frosty Semikey

3645 1938-D MS66+ PCGS. CAC. The 1921 and 1921-D are the only two issues in the series that can claim lower mintages than the 1938-D (491,600 coins struck). The design elements on this fantastic high-end Premium Gem are boldly impressed throughout. Gleaming mint frost emanates from mostly brilliant surfaces that show dusky hints of gold color. Scarcely seen finer. NGC ID# 24RV, PCGS# 6605

3646 1943 MS67+ PCGS. CAC. Beautiful multicolor toning surrounds the borders on this high-end Superb Gem, leaving the interiors with a greenish-gold hue. Frosty original luster engulfs each side, complementing a lack of abrasions. Liberty's head and branch hand are well-struck, and there is only trivial weakness on the eagle's trailing leg. PCGS lists just 10 finer coins (8/18). NGC ID# 24S9, PCGS# 6618

3647 1947 MS67 NGC. The Philadelphia Mint manufactured nearly 4.1 million Walking Liberty halves in 1947 as the series drew to a close. Remarkably, none are graded finer than this Superb Gem (9/18). Pale shades of gold accent the essentially brilliant obverse and completely drape the other side. Vibrant and pinpoint-sharp. NGC ID# 24SM, PCGS# 6630

PROOF WALKING LIBERTY HALF DOLLARS

3648 1937 PR67 PCGS Secure. CAC. A glimmering, fully struck Superb Gem proof with virtually flawless preservation. A tinge of deep golden toning along the upper-right obverse border accents champagne color elsewhere. A small portion of the 1937 proofs certified in this grade are CAC endorsed, and PCGS lists only 11 higher-grade representatives (9/18). NGC ID# 5ESS, PCGS# 6637

- 3649 1940 PR68 NGC.** This fully struck proof is delivered from fresh dies that do not exhibit weakened recesses due to excessive die polishing. Green and rose ribbons stretch through the upper obverse margin, but the remainder of the coin is light golden. No contact marks are seen. Census: 59 in 68 (4 in 68 ★), 0 finer (9/18). NGC ID# 27V8, PCGS# 6640

FRANKLIN HALF DOLLAR

- 3650 1954 MS66+ Full Bell Lines PCGS.** A pleasing, lightly toned high-end Premium Gem example with Full Bell Lines, this lustrous piece has wonderful eye appeal. The toning includes light shades of gold, lavender, and sky-blue. The colors are not quite deep enough or speckled enough to state it is of mint set origin, but for a coin from a roll this is a spectacular piece. PCGS has graded three numerically finer examples (8/18). NGC ID# 24T9, PCGS# 86667

PROOF FRANKLIN HALF DOLLARS

- 3651 1950 PR67 PCGS.** Only a single non-Cameo is finer at PCGS (9/18), making this Superb Gem proof 1950 half dollar important for Registry collectors. It is fully struck and reflective with brilliant surfaces save for a few wisps of lavender-gold toning on the obverse. NGC ID# 27VA, PCGS# 6691
- 3652 1950 PR67 PCGS Secure.** The 1950 is the scarcest proof Franklin half dollar in the series in Superb Gem condition. It is also the first proof issue struck of this type. Coinage amounted to 51,386 pieces, the lowest proof mintage of the series. This high-end example displays full design sharpness and has satiny devices. The fields glimmer with reflectivity. Both sides have a dusting of delicate pastel color. PCGS lists a single non-Cameo proof finer (9/18). NGC ID# 27VA, PCGS# 6691
- 3653 1950 PR66 Cameo PCGS Secure.** For the first few years after the resumption of proof production in 1950, Mint officials had difficulty recreating the field-device contrast of an earlier era. This piece displays an unusually stark Cameo effect that is readily appealing. Both sides are all-brilliant and largely contact-free. NGC ID# 6L9N, PCGS# 86691

1950 Franklin Half, PR66 Cameo A Key Date in the Cameo Series

- 3654 1950 PR66 Cameo PCGS.** CAC. Regarded as an enduring key to the Cameo series of Franklin halves — second only to the 1959 issue in high grades — the 1950 is a prize in Premium Gem Cameo or finer. Cameo contrast was a product of fresh dies. This example is almost brilliant with just a hint of golden peripheral color and slight obverse haziness around the well-frosted motifs. Population: 68 in 66 (5 in 66+) Cameo, 23 finer. CAC: 40 in 66, 17 finer (9/18). Ex: *Central States Signature* (Heritage, 4/2012), lot 4825; *Central States Signature* (Heritage, 4/2017), lot 3952. NGC ID# 6L9N, PCGS# 86691

1959 Half Dollar, PR68 Cameo Black-and-White Surfaces

- 3655 1959 PR68 Cameo PCGS Secure.** CAC. John Sinnock's design of Benjamin Franklin on the obverse and the Liberty Bell on the reverse stand out dramatically against the mirrored, unmarked fields. Each side remains completely brilliant with a thick coating of frost over the raised devices. PCGS has certified one Cameo proof finer (9/18). NGC ID# 27VJ, PCGS# 86700

KENNEDY HALF DOLLAR

1964-D Half Dollar, MS67 One Coin Graded Finer

- 3656 1964-D MS67 PCGS Secure.** Type Two Reverse. This first-year Kennedy half dollar from the Denver Mint is much scarcer in MS67 than the mintage of 156 million coins suggests. The Superb Gem offered here displays a full strike with variegated toning around the obverse and golden tones around the reverse, with both sides maintaining silvery centers. Population: 72 in 67 (3 in 67+), 1 finer (9/18). NGC ID# 24U3, PCGS# 6707

CERTIFIED MODERN PROOF SET

- 3657 1937 Five-Piece Proof Set, PR63-PR66 PCGS Secure.** Included are:

Cent PR64 Red. The centers are bright cherry-red, while there is a significant presence of deeper lilac around the margins.

Nickel PR63. Brightly mirrored, as expected, with an even layer of pale golden toning across both sides. Numerous specks of carbon account for the grade.

Dime PR66. Unquestionably original, the surfaces are brilliant with a slight haze across each side and tiny flecks of toning.

Quarter PR66. Similar surfaces to the dime, the underlying brightness in the fields easily flashes through the hazy gray-golden toning seen on both obverse and reverse.

Half Dollar PR65. Again, hazy gray patina is spread over both sides with strong mirroring in the fields. (Total: 5 coins)

End of Session Two

3658

SESSION THREE

EARLY DOLLARS

1795 Flowing Hair Dollar, Fine 12 B-1, BB-21, Two Leaves

- 3658** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, Fine 12 PCGS. Lilac-gray and olive-gold toning characterizes the original, satiny surfaces of this moderately worn Flowing Hair type coin. The border dentils are complete, produced by an even, well-centered strike. No adjustment marks are visible. Detail on Liberty's portrait and the eagle's wings is strong for the Fine grade level. An outstanding Flowing Hair dollar in all respects. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

1795 Flowing Hair Dollar, VF Details Rare B-12, BB-26 Variety, Three Leaves

- 3659** 1795 Flowing Hair, Three Leaves, B-12, BB-26, R.6 — Cleaned — NGC Details. VF. Bowers Die State II, with a vertical die crack through the 7 in the date to the bust. BB-26 is a rare variety, and most known examples are well-worn. This VF-level coin is cleaned, as evidenced by hairlines on each side, but it has since acquired olive-gray toning that deepens toward the borders. The surfaces have a microgranular appearance under a loupe, a byproduct of the cleaning. Some faint adjustment marks appear by the TED in UNITED. NGC ID# 4EWV, PCGS# 39976 Base PCGS# 6852

1795 Flowing Hair Dollar, VF Details B-5, BB-27, Three Leaves Reverse

- 3660** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Cleaned — NGC Details. VF. Bowers Die State II. The familiar die gouge in the field behind Liberty's head aids in identifying this plentiful variety, a popular coin among type collectors. This piece displays an even strike and no adjustment marks. Wisps of lilac toning grace the otherwise slate-gray surfaces, and most major design elements remain defined. A smooth, appealing Flowing Hair type coin.

1795 Off-Center Draped Bust Dollar, VF20 B-14, BB-51, Original Surfaces

- 3661** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, VF20 NGC. Hints of gunmetal-blue deepen the olive-gray patina in the fields of this midgrade Off-Center Bust dollar. The devices show light wear with traditional tan-gold color. There are no visible adjustment marks, and the strike is even and well-centered. Eye appeal is outstanding for the grade. This *Guide Book* variety is highly sought-after in problem-free condition by type and date collectors. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

- 3662** 1796 Small Date, Large Letters, B-4, BB-61, R.3, VG8 PCGS. Bowers Die State III. A stone-gray example of the scarce Small Eagle type. Hints of charcoal patina accompany design recesses. The surfaces are microgranular and lack noticeable abrasions. The reverse displays conspicuous adjustment marks, as made. An edge flaw near obverse star 3 is also of mint origin. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

- 3663** 1796 Large Date, Small Letters, B-5, BB-65, R.2 — Scratched — ANACS. Fine 12 Details. Bowers Die State IV. Die rust accompanies the E in AMERICA, but the IC lump does not extend past the C. This navy-blue and golden-brown Small Eagle dollar has a scratch at 5 o'clock on the reverse, and lesser marks below the bust tip and within the O in OF. The obverse displays faded mint-made adjustment marks from Liberty's ear down to the rim. A spot is noted above the F in OF. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

1796 Large Date, Small Letters Dollar B-5, BB-65, VF20

- 3664** 1796 Large Date, Small Letters, B-5, BB-65, R.2, VF20 PCGS. Die State II, with a large die lump above I in AMERICA that has not yet enlarged to the point of touching the C or the rim above. The 6 in the date is doubled. As noted in the Bowers-Borckardt reference: "... this is visible at the underside of the top of 6 and the upper inside of the bottom loop." This is a pleasingly original VF example with natural rose-gray toning over both sides. Obverse stars 2 and 3 are weak, as are the STA of STATES on the upper reverse, all due to a die bulge. Evenly worn with few marks on either side. Ex: *Baltimore Signature* (Heritage, 3/2009), lot 2315, which realized \$3,881.25. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

3665 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, Fine 15 PCGS. Bowers Die State III. Sharper than anticipated for a Choice Fine example, with impressive definition on E PLURIBUS UNUM and the eagle's wings. The powder-blue fields are slightly glossy and exhibit numerous minuscule marks. NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018

3666 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, VF20 NGC. Bowers Die State II. The earliest collectible die state, before Liberty's shoulder curls were lapped. Bowers Die State I, without lapping on the clouds, is unconfirmed. This deep cream-gray early dollar is sharper than anticipated for the VF20 level, and the only remotely consequential mark is noted on the upper right portion of the shield. Housed in a circa-2000 holder. NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018

1798 Large Eagle Dollar, XF40
B-23, BB-105, Wide Date

3667 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, XF40 PCGS. Bowers Die State III, both dies lapped. The date is widely spaced with the 8 touching the bust. Pleasing olive-gray and russet patina blankets each side of this lightly circulated Heraldic Eagle type coin, complementing smooth surfaces. The strike is well-centered and even. Trivial weakness is noted on Liberty's neck curls, but there are no visible adjustment marks. NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018

1798 Draped Bust Dollar, VF30
Large Eagle, B-21, BB-107

3668 1798 Large Eagle, Pointed 9, 10 Arrows, B-21, BB-107, R.5, VF30 PCGS Secure. Bowers Die State II, with the "Tadpole" die break above the date. This impressive VF30 specimen shows light-to-moderate wear, with the left side of the drapery worn, but still visible. The lavender-gray surfaces are lightly abraded throughout, with a few hints of original mint luster still intact. The overall presentation is most attractive. NGC ID# 24X6, PCGS# 40024 Base PCGS# 40018

3669 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2, Fine 12 PCGS. Bowers Die State II. A stone-gray example that shows mostly separated lines within the shield. The portrait displays a few delicate thin marks, and the obverse rim has minor disruptions near 4:30 and 7:30. NGC ID# 24X6, PCGS# 40025 Base PCGS# 40018

3670 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2 — Cleaned — NGC Details. VF. Bowers Die State II. This pearl-gray early dollar is somewhat glossy but uncommonly free from abrasions. Faint roller marks (as coined) are southwest of Liberty's ear. The edge lettering is blundered near 2:30, and shows three stars over squares and circles. NGC ID# 24X6, PCGS# 40025 Base PCGS# 40018

3671 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2 — Cleaning — PCGS Genuine. VF Details. Bowers Die State IV. A slightly glossy but nonetheless attractive Heraldic Eagle type coin. The golden-brown and ocean-blue surfaces display moderate wear, though hints of luster linger in protected regions. Marks are trivial aside from slight rim dings near the L in LIBERTY and U in UNITED.

3672 1798 Large Eagle, Pointed 9, Wide Date, B-15, BB-112, R.3, VF20 PCGS. Bowers Die State I. The shoulder curl is complete on this early die state example. The dusky steel-gray surfaces are free from consequential contact. The right-side reverse stars are lightly brought up as they are opposite Liberty's high-relief shoulder. Certified in a green-label holder. NGC ID# 24X6, PCGS# 40029 Base PCGS# 40018

1798 Large Eagle Dollar, XF40
B-15, BB-112, Pointed 9

3673 1798 Large Eagle, Pointed 9, Wide Date, B-15, BB-112, R.3, XF40 PCGS. Bowers Die State II, with the obverse lapped. An evenly struck coin with no visible adjustment marks in the margins. Well-detailed design elements show only light wear, and the surfaces are generally smooth. Lavender-gold toning covers the obverse, while the reverse displays blue-gray and olive patina. Pleasing for the grade. NGC ID# 24X6, PCGS# 40029 Base PCGS# 40018

3674 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2 — Graffiti — NGC Details. VF. Steel-gray surfaces exhibit autumn-brown and powder-blue undertones. The letters DH are lightly pinscratched into the field beneath the LI in LIBERTY, and several small depressions are scattered. The reverse periphery exhibits greater wear than the rest of the coin.

3675 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, VF25 PCGS. Bowers Die State II. The high 8 in the date and a crack through OF confirm the variety as Bolender-27. This cream-gray early dollar shows few marks, though the reverse has a hint of granularity above the eagle's left (facing) shoulder and across the middle of the shield. NGC ID# 24X6, PCGS# 40030 Base PCGS# 40018

1798 Heraldic Eagle Dollar, XF45
Scarce B-26, BB-114

3676 1798 Large Eagle, Pointed 9, Close Date, B-26, BB-114, R.5, XF45 PCGS. Almond-gold toning drapes this well-defined and minimally marked early dollar. Technically a mint error, since the upper reverse was struck through a thread or similar object. Most examples of the scarce Bolender-26 are Die State V with several reverse cracks, but the present piece shows only vertical cracks above the branch stem and the top of the first A in AMERICA. NGC ID# 24X6, PCGS# 40031 Base PCGS# 40018

**1798 Heraldic Eagle Dollar, Choice XF
B-9, BB-121, Close Date**

- 3677** 1798 Large Eagle, Pointed 9, Close Date, B-9, BB-121, R.4, XF45 NGC. Bowers Die State IV, cracked and rusted. This evenly worn, well-detailed Large Eagle type coin displays complete border dentils and shows no adjustment marks. The fields have generally gunmetal-gray patina, contrasting with lighter slate-gray relief elements. The obverse fields also show hints of olive, lilac, and gold color when tilted beneath a light. The surfaces are smooth and problem-free. NGC ID# 24X6, PCGS# 40038 Base PCGS# 40018

- 3678** 1798 Large Eagle, Pointed 9, B-24, BB-124, R.2, VF30 PCGS. Die State V with several cracks near obverse star 12. Very late dies for this otherwise available Heraldic Eagle variety. A soft strike on the upper right obverse opposite the bust tip, but well-defined elsewhere on the curls, wings, and E PLURIBUS UNUM. The steel-gray and russet surfaces show few marks. Certified in an old green-label holder.
Ex: Baltimore Signature (Heritage, 3/2009), lot 2327, which realized \$2,300. NGC ID# 24X6, PCGS# 40041 Base PCGS# 40018

**1798 Draped Bust Dollar, VF35
Large Eagle, Pointed 9, B-8, BB-125**

- 3679** 1798 Large Eagle, Pointed 9, Four Berries, B-8, BB-125, R.2, VF35 PCGS. Bowers Die State IV, with the crack from M in AMERICA to the ribbon. Curiously, the Die State III crack through C and the branch does not show here. This attractive Choice VF specimen shows light-to-moderate wear on the design elements and the pleasing lavender-gray surfaces are lightly abraded, aside from a patch of short scratches above the right (facing) shield point. NGC ID# 24X6, PCGS# 40042 Base PCGS# 40018

- 3680** 1799 7x6 Stars, B-12, BB-160, R.3, VF25 PCGS. Bowers Die State IV. A late die state with many interesting obverse cracks. This cream-gray representative displays the expected amount of wear on Liberty's shoulder and the curls above the ear, but marks are minimal and the wings retain ample plumage detail. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

- 3681** 1799 7x6 Stars, B-11, BB-161, R.3, VF20 PCGS. Bowers Die State III. A charming silver-gray representative of the popular early crown-sized type. There are no mentionable marks, and most of E PLURIBUS UNUM is readable. The shield lines are fairly sharp, as is the eagle's left (facing) wing. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

- 3682** 1799 7x6 Stars, B-11, BB-161, R.3 — Cleaned — NGC Details. VF. Bowers Die State III. The lilac-red, sea-green, and orange-gold toning is artificial, but this Heraldic Eagle type coin is nicely defined and shows only a single mentionable mark, a line on Liberty's neck. Double clashed above the date, a die state omitted from the Bowers silver dollar *Encyclopedia*. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

**1799 B-11, BB-161 Dollar, XF45
7x6 Obverse Star Orientation**

- 3683** 1799 7x6 Stars, B-11, BB-161, R.3, XF45 NGC. Bowers Die State III. Multiple sets of clash marks are evident on the obverse, and the reverse shows extensive die cracks and metal flowlines. Delicate lilac and blue toning accents slate-gray surfaces on this lightly worn BB-161 example, complementing bold detail on the devices. No adjustment marks are seen, and the coin is well-centered on the planchet.
Ex: Dallas Signature (Heritage, 10/2008), lot 1083, which realized \$4,600. NGC ID# 24X7, PCGS# 40052 Base PCGS# 6878

- 3684** 1799 7x6 Stars, B-10, BB-163, R.2, Fine 12 PCGS. Bowers Die State III. Almond-gold, powder-blue, and lilac-red toning visits this collectible Heraldic Eagle dollar. All letters in E PLURIBUS UNUM are at least partially present. Relevant marks are limited to a hair-thin line from Liberty's lips. Housed in a green label holder.
Ex: Ed Lepordo Collection, Part One / Long Beach Signature (Heritage, 2/2009), lot 1550, which realized \$1,265. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

- 3685** 1799 7x6 Stars, B-10, BB-163, R.2, VF30 PCGS. Bowers Die State IV. The terminal die state with a bold radial crack through the O in OF. A dusky steel-gray and stone-white example. The microgranular surfaces show uncommonly few marks, though minor ticks are noted near the base of Liberty's throat. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

**1799 7x6 Stars Dollar, XF40
B-10, BB-163, Original Surfaces**

- 3686** 1799 7x6 Stars, B-10, BB-163, R.2, XF40 PCGS. Bowers Die State III, with peripheral die cracks on the reverse. This is a true XF coin with original surfaces. Hints of luster cling to the most protected portions of the fields, particularly on the reverse amid the border legends. Both sides have olive-gold and lilac-gray coloration and strong detail. No adjustment marks are seen. Eye appeal is outstanding on this Heraldic Eagle, 7x6 Stars type coin. NGC ID# 24X7, PCGS# 40054 Base PCGS# 6878

- 3687** 1799 7x6 Stars, B-9, BB-166, R.1, VF20 PCGS. CAC. Bowers Die State IV. The "apostrophe" variety, named after a die break near the northeast serif of the second S in STATES. A charming gunmetal-gray Heraldic Eagle type coin. No marks are conspicuous, and though most letters in PLURIBUS have faded, the shield lines are distinct. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

**1799 7x6 Stars Dollar, XF40
B-14, BB-167**

- 3688** 1799 7x6 Stars, B-14, BB-167, R.3, XF40 PCGS. Bowers Die State IV, cracked atop of the AME in AMERICA. Hints of luminance remain in the most protected portions of the fields on this lightly circulated 1799 Draped Bust dollar. Wear is light and detail is bold throughout. Original olive-gold, russet, and gray patina encompasses each side. The coin is well-centered and shows no distracting adjustment marks. NGC ID# 24X7, PCGS# 40058 Base PCGS# 6878

**1799 Dollar, AU Details
B-14, BB-167, 7x6 Stars Obverse**

- 3689** 1799 7x6 Stars, B-14, BB-167, R.3 — Cleaned — PCGS Genuine Secure. AU Details. Bowers Die State II. This early die state has a couple of small die flaws below the first A in AMERICA but no obvious cracks. The strike is sharp and barely any wear is evident across the devices. No adjustment marks are seen. Luster remains in the protected regions of the fields, and a numeric grade would have been achieved were it not for light cleaning, which leaves the surfaces a bright slate-gray hue.
- 3690** 1799 7x6 Stars, B-21, BB-169, R.3, VF35 NGC. Bowers Die State IV. Stone-gray high points contrast with charcoal-gray fields. An evenly defined Choice VF example. Marks are surprisingly few, and a tiny rim nick near the 7 in the date is mentioned strictly as an identifier. NGC ID# 24X7, PCGS# 40060 Base PCGS# 6878

**1799 Draped Bust Dollar, XF45
B-21, BB-169, 7x6 Stars**

- 3691** 1799 7x6 Stars, B-21, BB-169, R.3, XF45 ANACS. Bowers Die State IV. Pastel toning blankets this slate-gray Bust type coin. Only light wear affects the boldly struck design elements, and satiny luster remains in the protected regions of the fields. Eye appeal is outstanding for the grade. BB-169 is one of the usual 7x6 Stars varieties, which collectively fall into the "Normal Date" *Guide Book* variety listing. NGC ID# 24X7, PCGS# 40060 Base PCGS# 6878

- 3692** 1800 B-1, BB-181, R.5, Fine 12 NGC. Bowers Die State I. A much better die variety attributed by die lumps near star 11 and a repunched first T in STATES. The slate-gray surfaces are minimally abraded and display build-up in design crevices, characteristic of originality. NGC ID# 24X9, PCGS# 40067 Base PCGS# 6887

**1800 Wide Date Dollar, Choice VF
B-10, BB-190**

- 3693** 1800 Wide Date, Low 8, B-10, BB-190, R.3, VF35 NGC. Bowers Die State IV. The date is widely spaced on BB-190. This piece is in a middle die state with lapping on the obverse and cracks on the reverse. Later die states record additional reverse cracks. Sharp detail and an even strike confirm the eye appeal of this gunmetal-gray Large Eagle type coin, and the surfaces are generally smooth. There is a small rim bump on the obverse at 9 o'clock. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

**1800 Large Eagle Dollar, XF40
B-10, BB-190, Wide Date**

- 3694** 1800 Wide Date, Low 8, B-10, BB-190, R.3, XF40 PCGS. Bowers Die State VI, with a forked crack through the C in AMERICA. This is a late die state for the BB-190 variety. The coin offered here is only lightly circulated and has strong central detail. The border dentils are complete and no obvious adjustment marks are seen. Both sides display slightly blended sea-green and golden toning with smooth, problem-free surfaces. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

**1800 Wide Date, Low 8 Dollar, XF45
B-10, BB-190**

- 3695** 1800 Wide Date, Low 8, B-10, BB-190, R.3, XF45 ANACS. Bowers Die State VI. The reverse is heavily cracked on this piece, most notably around UNITED and AMERICA. Detail is sharp. A true Choice Extremely Fine coin, it retains elements of luster in the protected recesses and fields, and only slight wear is visible on the devices. Olive-gold and russet border toning lightens to a slate-gray hue in the centers, and no adjustment marks interrupt the surfaces. On the reverse, a short grease streak (as made) is visible below the D in UNITED and serves as a pedigree marker for this outstanding Draped Bust type coin. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888

**1800 B-15, BB-195 Dollar, XF40
10 Arrows, Attractive Patina**

- 3696** 1800 10 Arrows, B-15, BB-195, R.4, XF40 NGC. Bowers Die State I. This is a beautiful Draped Bust dollar for the grade, showing little wear and sharp detail. Original olive-gray and russet-gold toning encompasses the fields and design recesses, while the relief elements display lighter slate-gray patina. The surfaces are smooth and problem-free. The coin is evenly struck and well-centered, and it shows no planchet weight adjustment marks, which are common on many early dollars. NGC ID# 24X9, PCGS# 40080 Base PCGS# 6891

**1801 B-2, BB-212 Dollar, VF30
Scarce Early Die State**

- 3697** 1801 B-2, BB-212, R.3, VF30 PCGS. Bowers Die State I, the scarce early die state with no visible clash marks on the obverse near Liberty's neck. This piece also lacks planchet adjustment marks, which are present on many Draped Bust dollars due to the Mint's efforts to correct overweight planchets at the early Mint. The surfaces are smooth and problem-free. Light golden-gray patina characterizes most relief elements, leaving the fields with mostly deep gunmetal-blue and gray toning. NGC ID# 24XA, PCGS# 40084 Base PCGS# 6893

- 3698** 1801 B-4, BB-214, R.4 — Cleaned — PCGS Genuine Secure. VF Details. Bowers Die State III. Excluding the novodel proof, B-4 is the scarcest Bolender variety of the date. Specialists identify it by the proximity of the shoulder curl to the 1 in the date. This nicely defined pearl-white early dollar is microgranular but lacks any singularly mentionable marks.

**1802 Narrow Date Dollar, VF25
B-6, BB-241**

- 3699** 1802 Narrow Date, B-6, BB-241, R.1, VF25 PCGS. Bowers Die State III, lapped obverse. An evenly struck coin and well-centered on the planchet with complete border dentils around each side. No adjustment marks are noticed. Mottled olive-gray and lilac patina covers each side, producing a pleasing, natural appearance. Light wear on each side leaves the devices are detailed. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

**1802 Narrow Date Dollar, VF35
B-6, BB-241, Sharp for the Grade**

- 3700** 1802 Narrow Date, B-6, BB-241, R.1, VF35 PCGS Secure. Bowers Die State III, lapped, as usual for the variety. BB-241 is often represented in type collectors' cabinets due to its general availability in circulated grades. This Choice VF example displays a bold strike and even wear. A few faint adjustment marks are visible around the borders with a loupe. Olive-gray and gunmetal-blue toning covers the reverse and leaves only small areas of silvery luster on the obverse. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

**1803 Small 3 Dollar, XF40
Sharp B-5, BB-252 Example**

- 3701** 1803 Small 3, B-5, BB-252, R.3, XF40 PCGS Secure. BB-252 is from a little-used obverse die, although the reverse shows metal flowlines around the borders. On this coin, neither side has adjustment marks, and detail is sharp throughout. Only slight high-point wear is evident. Both sides are smooth with gunmetal-blue and olive-gold toning. Eye appeal is pleasing on this excellent Heraldic Eagle type coin. NGC ID# 24XD, PCGS# 40097 Base PCGS# 6900

SEATED DOLLARS

- 3702 1840 — Cleaning — PCGS Genuine. UNC Details. OC-2, High R.4.** A Top 30 Variety, since several stars are doubled, especially stars 6 to 8. The reverse has a radial die crack through the right edge of the L in DOL. OC-2 is much scarcer than OC-1. A lightly toned example with a mildly bright appearance. No marks are distracting, and luster illuminates the motifs and legends.
- 3703 1841 AU58 PCGS Secure. OC-2, R.1.** A sophomore-year example of the scarce crown-sized type. Ample luster beckons from the borders, and the pearl-white surfaces show only a single mentionable mark, on the field near Liberty's raised arm. A good strike overall, despite inexactness on Liberty's hair and the eagle's left (facing) claw. NGC ID# 24YB, PCGS# 6927
- 3704 1842 AU58 NGC. CAC. OC-2, R.1.** Osburn-Cushing Die State b/a. Chestnut-gold toning fills the fields, while protected areas display ocean-blue. A well-defined Borderline Uncirculated No Motto type coin. A thin mark between stars 3 and 4 provides the sole mentionable contact. CAC: 9 in 58, 19 finer (9/18). NGC ID# 24YC, PCGS# 6928
- 3705 1842 MS61 PCGS. OC-4, R.1.** Osburn-Cushing Die State c/b. Reflective surfaces from polished dies show a few light hairlines and minor abrasions, while diagnostic die lines parallel to Liberty's wrist above the shield define the obverse. Extensions of the reverse vertical shield stripes confirm the OC-4 die marriage. Deep amber-orange toning at the margins deepens to rust-brown shades with touches of blue. The centers are brilliant with frost-white motifs on both sides, crisply struck except for slight blending at Liberty's lower hair curls and at the eagle's neck. Population: 24 in 61, 70 finer (8/18). NGC ID# 24YC, PCGS# 6928
- 3706 1842 MS61 NGC. OC-2, R.1.** Die State b/a. The plate coin for 1842 Obverse 2, on page 90 in the Osburn-Cushing reference. Deeply toned golden-gray with splashes of tan-brown on the reverse. A good strike despite minor merging on the eagle's left-side neck feathers. The subdued surfaces show relatively few marks for the designated grade. NGC ID# 24YC, PCGS# 6928
- 3707 1843 AU58 NGC. OC-1, R.1.** The 4 in the date has a lightly repunched crossbar. Golden-brown borders frame olive-green fields. A crisply struck example that shows only a whisper of wear on Liberty's knees. The satiny surfaces show only inconsequential contact. Ex: *Dallas Signature (Heritage, 10/2009)*, lot 7948, which realized \$1,265. NGC ID# 24YD, PCGS# 6929

1850 Seated Dollar, AU53 Original Toning

- 3708 1850 AU53 NGC. OC-1, R.3.** Only 7,500 silver dollars were struck for circulation in 1850, all with a single pair of dies. This is a better date among No Motto issues, and About Uncirculated coins are highly sought-after. The present piece displays satiny fields and well-defined central devices with light wear. Original olive-gold and cobalt-blue toning encompasses each side in a mottled pattern. A visually pleasing, problem-free example of this better date. NGC ID# 24YM, PCGS# 6937

1850 OC-1 Seated Dollar, AU55 Repunched 0 in Date

- 3709 1850 AU55 PCGS. OC-1, R.3.** This is the only die pair identified for business strike 1850 Seated dollars, featuring a repunched 0 in the date, and a die line angling up to the left through the horizontal crossbars of the shield on the reverse. The reverse die was used to coin circulation strikes from 1848 through 1851, and may have been used in 1852. This Choice AU representative, housed in an old green-label holder, has a typical strike with slight weakness of the right side stars but sharpness elsewhere. The reflective fields and still lustrous devices host delicate champagne toning. NGC ID# 24YM, PCGS# 6937
- 3710 1855 — Scratch — PCGS Genuine. XF Details. OC-1, High R.3.** Although the Philadelphia Mint struck fractional Seated silver in substantial quantity during 1855, the mintage for the silver dollar was only 26,000 pieces. The present example displays deep gunmetal toning. Scratches are noted near the first two stars and the eagle's left (facing) wing. Holed, plugged, and repaired at 12 o'clock on the obverse and opposite at 6 o'clock on the reverse.

1859-O Seated Dollar, MS63 Sharp, Lustrous No Motto Type Coin

- 3711 1859-O MS63 ANACS. OC-1, R.1.** Die State c/e. Light clash marks appear on the obverse and peripheral die cracks affect the reverse. Date alignment and mintmark position are the chief identifiers of the variety. This Select 1859-O Seated dollar is sharply struck and lustrous with remarkably few abrasions for the grade. Mottled golden and russet toning covers much of each side. Eye appeal is outstanding. Although a common date overall, the 1859-O Seated dollar is conditionally scarce in this grade. NGC ID# 24YY, PCGS# 6947
- 3712 1859-O MS60 Prooflike ANACS. OC-1, R.1.** A flashy example of the popular New Orleans No Motto issue. The reflective fields are brilliant, while the margins offer glimpses of golden-brown, fire-red, and navy-blue patina. Liberty's head is slightly soft, but the eagle is sharp. The fields display several mint-made strike-throughs. Marks on the upper left reverse correspond to the grade. Ex: *Long Beach Signature (Heritage, 9/2015)*, lot 4583, which realized \$1,527.50. PCGS# 86947 Base PCGS# 6947
- 3713 1860-O MS60 NGC. OC-2, R.1.** Fine die cracks throughout the bottom of STATES OF AMERICA help attribute the die marriage. Powder-blue and chestnut-gold shades embrace both sides, with the latter more prevalent on the reverse. The strike is sharp except on the upper obverse. Much less abraded than the typical MS60 example. In a circa-2000 holder. NGC ID# 24Z3, PCGS# 6950

- 3714 1860-O MS61 NGC. OC-2, R.1.** Osburn-Cushing Die State a/c. Peach-gold and lilac-blue shades encompass both sides of this lustrous and frosted New Orleans issue. Several of the right-side stars are flat, but the central portrait and eagle are sharply struck. The 8 and 0 of the date show light repunching above the digits, and parallel die lines exist below the rock to confirm an early obverse die state. Both sides exhibit light abrasions and pinprick marks as expected for the assigned grade. NGC ID# 24Z3, PCGS# 6950

**1862 Seated Dollar, Near-Mint
Scarce Civil War Date**

- 3715 1862 AU58 ANACS. OC-1, R.3.** The 1862 is a Civil War date with a meager mintage of 11,540 pieces. The gold dollar mintage was more than 110 times greater that year. This briefly circulated representative has stone-gray fields, but protected regions exhibit autumn-brown, aquamarine, and magenta toning. Free from consequential contact, and a desirable survivor of the better No Motto issue. In a small-sized holder. NGC ID# 24Z5, PCGS# 6952

- 3716 1864 AU50 PCGS. OC-1, R.2.** Rich powder-blue, sea-green, and golden-brown toning embraces this well-defined Civil War Seated dollar. Infrequent small marks are scattered across the patinated surfaces. Certified in a green-label holder. Only 30,700 pieces were coined for commerce. NGC ID# 24Z7, PCGS# 6954

**1865 Seated Dollar, AU53
Brilliant and Semiprooflike**

- 3717 1865 AU53 PCGS Secure. OC-2, R.2.** This die pairing is the only use of Obverse 2 and the first of three uses of the leftover 1864 Reverse A. The surfaces are brilliant and extensively abraded with a confirmed glimmer of reflectivity seen in the fields on each side. This scarce date only had a mintage of 46,500 pieces, many of which were lost to attrition. Population: 16 in 53, 62 finer (9/18). NGC ID# 24Z8, PCGS# 6955

- 3718 1865 AU53 NGC. OC-P2, R.3.** Named a Top 30 Variety by Osburn and Cushing, die to minor die doubling on both sides. Per the authors, OC-P2 is a proof variety, though NGC has certified the present coin as a business strike. Deep steel-gray toning blankets both sides. Unimportant marks are scattered, and the motifs display light wear. NGC ID# 24Z8, PCGS# 6955

- 3719 1866 Motto — Cleaned — PCGS Genuine. Unc. Details. OC-1, R.2.** The upper reverse is lightly die doubled, and the 18 in the date is faintly repunched. Light apricot-gold toning visits the borders. The mildly luminous surfaces are devoid of detrimental abrasions, though the field is microgranular between stars 1 and 3. Another low mintage date with a production of less than 50,000 pieces.

**1869 Silver Dollar, MS63
Attractive Border Toning**

- 3720 1869 Misplaced Date and Repunched Date, FS-301, MS63 ANACS.** Die State b/d. The misplaced numeral in the dentils below the 6 is virtually invisible due to die lapping. However, repunching on the bases of the 1 and 8 remains discernible. The reverse is die doubled on IN GOD WE TRUST. This Select coin is sharp and satiny with minimal abrasions. Light golden interiors cede to vivid blue and violet border toning. PCGS# 416930 Base PCGS# 6962

- 3721 1870 AU58 PCGS Secure. OC-3, R.2.** A minimally abraded pearl-white Borderline Uncirculated Seated type coin. Pockets of luster are prevalent at the peripheries. The strike is typical on GOD, the eagle, and the right-side stars. The reverse is lightly die doubled, most evident on the E in WE. NGC ID# 24ZD, PCGS# 6963

- 3722 1870-CC — Rotated Dies — Fine 12 NGC. OC-7, R.5.** Osburn and Cushing write, "a few examples of OC-7 have been seen with die rotations of up to 85 degrees. These rotated die examples are very rare." The present first-year Carson City dollar has a clockwise die rotation of 85 degrees. The gunmetal-gray surfaces exhibit the expected amount of wear, but the only noticeable marks are a pair of small rim bumps near star 11. NGC ID# 24ZE, PCGS# 6964

- 3723 1872-S XF45 PCGS. OC-1, Low R.3.** Despite a very low mintage, the 1872-S is the only collectible San Francisco Motto Seated dollar issue. Noticeable luster illuminates the legends and borders of this cream-gray example. Marks are minimal save for a thin line through the final A in AMERICA, a smooth area beneath the right scroll end, and small obverse rim knocks at 1, 6, and 8 o'clock. NGC ID# 24ZL, PCGS# 6970

- 3724 1872-S XF45 NGC. OC-1, Low R.3.** Only 9,000 1872-S dollars were struck, and few were saved since collectors of the day instead set aside Philadelphia Mint examples. The 1872-S is essential to a San Francisco type set, since the 1870-S is a great rarity and the 1873-S is unknown. The present stone-white example shows traces of tan-gold and powder-blue toning. The surfaces are nicely defined and blemish-free. NGC ID# 24ZL, PCGS# 6970

PROOF SEATED DOLLAR

- 3725 1873 — Stained — NGC Details. Proof, Unc. Details. OC-P1, R.3.** Osburn-Cushing list OC-P1 as a Top 30 Variety, due to its die doubled IN GOD WE TRUST. It is the sole proof marriage for the final-year date. A well-struck and unworn specimen with frosty devices and light tan-gold toning throughout the fields. NGC ID# 252V, PCGS# 7021

TRADE DOLLARS

- 3726 1873 MS63 NGC.** An impressive Select Trade dollar from the first year of the denomination, this coin exhibits well-detailed design elements, with just a touch of softness on Liberty's head and some star centers. The lightly marked surfaces are blanketed in shades of lavender-gray and pale gold toning, with satiny mint luster underneath. Census: 35 in 63 (2 in 63+), 43 finer (9/18). NGC ID# 252W, PCGS# 7031

3727 1874-CC Chop Mark MS62 PCGS. Micro CC. Period after FINE. Chop marks are noted on the RTY in LIBERTY and the eagle's lower neck. The eagle's waist shows portions of a third chop mark. A lustrous Carson City example with light golden-brown toning on the right obverse field. The obverse field is granular near 10:30 and 1 o'clock. NGC ID# 2532, PCGS# 87035 Base PCGS# 7035

3728 1875-S Type Two Reverse MS63 PCGS. Large S. By far the scarcer of the two reverse subtypes for the issue. A highly lustrous example that shows only a wisp of chestnut toning. A sharp strike except on Liberty's hair. Marks are minor for the Select level. Ex: *Chicago Signature (Heritage, 8/2011)*, lot 4360, which realized \$1,725. NGC ID# 2536, PCGS# 510102 Base PCGS# 7039

3729 1876-CC Type Two Reverse — Cleaned — PCGS Genuine. AU Details. Tall CC. Possibly dipped in its past, this Carson City type coin is pearl-gray aside from two small blushes of charcoal toning at 10:30 and 11 o'clock on the reverse. No marks are apparent except for a line beneath the A in DOLLAR.

3730 1876-CC Doubled Die Reverse, FS-801, AU53 PCGS. Type One Obverse and Reverse. Tall CC. Widely die doubled on the branch above FINE. The eagle's beak and other areas also exhibit broad doubling. Discovered in 1984 by Jack Beymer and listed for many years in the *Guide Book*. Lightly toned golden-gray with ample luster and minimally marked surfaces. Ex: *Houston Signature (Heritage, 11/2012)*, lot 3865, which realized \$2,115. NGC ID# 253A, PCGS# 145815 Base PCGS# 97042

3731 1876-S Type One Obverse, Type One Reverse, MS63 PCGS. Large S. A moderately prooflike representative that has light gold color and carefully preserved surfaces. The strike is bold aside from the eagle's right (facing) claw. The lower reverse margin exhibits spindly die cracks, as made. Ex: *Baltimore Signature (Heritage, 7/2003)*, lot 3827, which realized \$1,207.50. NGC ID# 4EMM, PCGS# 40114 Base PCGS# 7043

3732 1876-S Type One Obverse, Type One Reverse, MS63 PCGS. Large S. Golden-brown and navy-blue toning endows the borders of this lustrous and sharply struck Centennial-year type coin. The fields display only minor marks. Although higher-graded examples are available, the present piece will please the veteran collector. NGC ID# 4EMM, PCGS# 40114 Base PCGS# 7043

3733 1877 MS64 NGC. The 1877 is a slightly better issue in the Trade dollar series. This is quite the coin for an MS64. Each side is nearly brilliant and the fields flash with semiprooflike mirroring. As always, the head of Liberty and surrounding stars show slight weakness of strike. NGC ID# 253C, PCGS# 7044

1877-CC Trade Dollar, MS61 Scarce Issue In Mint State

3734 1877-CC MS61 ANACS. From a relatively small mintage of 534,000 pieces, the 1877-CC Trade dollar is an elusive issue in all Mint State grades today. Most of the coins were used in foreign trade in the Orient, and few have been repatriated without impairments. This impressive MS61 example offers well-detailed design elements, with a touch of softness on Liberty's head. The surfaces are lightly marked for the grade, with attractive shades of lavender-gray toning and satiny luster underneath. NGC ID# 253D, PCGS# 7045

PROOF TRADE DOLLAR

1873 Trade Dollar, Toned PR64 Elusive First-Year Issue

3735 1873 PR64 NGC. The 1873 proof Trade dollar is scarcer than most later issues (not counting, of course, the 1884 and 1885 rarities). NGC has seen only 166 submissions of the issue in all grades, including likely duplication. This near-Gem example displays a full strike and liquidlike mirroring in the fields. Orange-gold, lilac, and russet toning covers each side. A few contact marks to not detract. NGC ID# 27YJ, PCGS# 7053

MORGAN DOLLARS

3736 1878 8TF Alligator Eye, VAM-14.1A, MS65 PCGS Secure. Listed as VAM-14.1 on the PCGS holder, but the coin is actually VAM-14.1A, the clashed die state. The present Gem has a brilliant obverse, while the reverse exhibits medium dove-gray toning. The lustrous and boldly struck surfaces are uncommonly devoid of marks. NGC ID# 253H, PCGS# 133796 Base PCGS# 7072

3737 1878 8TF Crazy Lips, VAM-23, MS63 Deep Mirror Prooflike PCGS. Ex: California. A Top 100 Variety. Reminiscent of the 1888-O "Hot Lips" variety, Liberty's profile is die doubled, especially the lips, chin, and nose tip. This brilliant example offers prominently reflective fields. The central strike is incomplete, but marks are chiefly relegated to the left obverse field and the reverse rim near the final A in AMERICA. NGC ID# 253H, PCGS# 40204 Base PCGS# 97073

1878 7/8 Tailfeathers Morgan VAM-38, MS64 Deep Mirror Prooflike

3738 1878 7/8TF Strong, VAM-38, MS64 Deep Mirror Prooflike PCGS. VAM-38 is a 7/5 Strong variety. Die doubling is evident on the obverse in LIBERTY. This Deep Mirror Prooflike example is struck from heavily polished dies with brilliant surfaces and modest field-device contrast. The strike is sharp, and the luster on the devices is softly frosted. The fields show trivial scattered grazes and marks, consistent with the grade. Housed in a green label holder. PCGS# 40220 Base PCGS# 97079

3739 1878 7TF Reverse of 1878, Doubled Stars, VAM-82, MS64 Deep Mirror Prooflike PCGS. Blushes of peach-gold patina invigorate the margins of this Second Reverse Morgan dollar. The strike is good, the fields are flashy, and both sides are exceptionally free from contact. On VAM-82, LIBERTY is die doubled north, and portions of the wings and tail are lapped. NGC ID# 253K, PCGS# 40246 Base PCGS# 97075

3740 1878 7TF Reverse of 1878, High 1, VAM-83, MS65 Prooflike PCGS. The 1 in the date is entered high and repunched along its right upright. LIBERTY is die doubled, and the reverse features a long neck. This lustrous, nicely struck, and brilliant Gem is smooth aside from minor field grazes above the arrowheads. Population: 2 in 65 Prooflike, 0 finer (9/18).
Ex: FUN Signature (Heritage, 1/2005), lot 10931, which realized \$1,380. PCGS# 40247 Base PCGS# 7075

3741 1878-CC MS65 PCGS. An untuned and thickly frosted first-year Morgan dollar from the fabled Carson City facility and the only issue with a Small CC mintmark. Definition is bold, and the only singular mark is an abrasion on the eagle's right (facing) leg. NGC ID# 253M, PCGS# 7080

**1879 Morgan Dollar, MS66+
Conditionally Rare Any Finer**

3742 1879 MS66+ PCGS. A truly large mintage of 14.8 million Morgan dollars was achieved at the Philadelphia Mint in 1879, and the issue can be located in MS66 condition with some patience, but finer coins are condition rarities. This Plus-graded Premium Gem exhibits well-detailed design elements, with just a trace of blending on the hair strands above Liberty's ear. The impeccably preserved, lustrous surfaces show highlights of emerald-green and lavender toning on the reverse. PCGS has graded six numerically finer examples (9/18). NGC ID# 253S, PCGS# 7084

3743 1879-CC Capped Die, VAM-3A — Cleaned — NGC Details. Unc. A Top 100 Variety. Designated as VAM-3 on the NGC insert, but in fact the later die state, VAM-3A, with a narrow die gouge through the base of the first A in AMERICA. The interesting variety with myriad die chips about the mintmark. The brilliant surfaces are moderately bright and faintly hairlined. A key Carson City issue.

**1879-O Morgan Dollar, MS65+
Seldom Encountered Finer**

3744 1879-O MS65+ PCGS. The New Orleans Mint was reopened for coinage operations on February 20, 1879 and produced more than 2.8 million Morgan dollars that year. The issue is readily collectible in grades up to the MS65 level, but finer coins are rare. This Plus-graded Gem exhibits sharply detailed design elements and well-preserved surfaces, with vibrant mint luster on both sides. PCGS has graded 30 numerically finer examples (9/18). NGC ID# 253X, PCGS# 7090

3745 1879-S Reverse of 1878, VAM-52, MS64 NGC. A Top 100 Variety. A brilliant near-Gem that boasts a bold strike and vibrant cartwheel sheen. The obverse is smooth, as is the reverse save for a field graze above the leaves of Liberty's branch. Die lines within the eagle's right (facing) wing provide a pick-up point for VAM-52, along with a delicate die line above Liberty's lips. NGC ID# CBFS, PCGS# 133868 Base PCGS# 7094

3746 1880-CC 8 Over High 7, VAM-5, MS65 PCGS. CAC. A Top 100 Variety. The three most prominent overdates in the Morgan dollar series are 1880-CC varieties: VAM-4, VAM-5, and VAM-6. Each attains separate *Guide Book* listing. This lustrous and well-struck displays light powder-blue and almond-gold toning. Marks are absent aside from a narrow tick on the eagle's right (facing) flank. Gem CAC: 32 in 65, 43 finer (9/18). NGC ID# 2542, PCGS# 133877 Base PCGS# 7102

3747 1880-O MS64 PCGS. CAC. VAM-11A. Micro O mintmark. A dash below the second 8 and doubling on 188 join numerous die clash marks and diagnostic die lines to confirm the VAM-11A variety. Sharply struck for the issue, this near-Gem Uncirculated example displays semireflective surfaces and lustrous, silver-gray surfaces with a narrow crescent of golden toning on the reverse. The 1880-O is rare any finer. NGC ID# 2543, PCGS# 7114

**1880-O Morgan Dollar, Near-Brilliant MS64+
Micro O Mintmark, Sharply Struck**

3748 1880-O MS64+ PCGS Secure. CAC. Micro O mintmark. The New Orleans Mint resumed coinage operations in 1879, and a large silver dollar mintage of more than 5.3 million pieces in 1880. Most of the mintage was roughly handled during bag storage, making Gem Uncirculated pieces rare. This high-end near-Gem displays both the PCGS Plus designation and CAC endorsement. Lightly abraded surfaces show no heavy hits, with a trace of golden-gray toning on mostly brilliant fields and devices. Sharply struck, the coin features a small, round Micro-O mintmark and excellent eye appeal. PCGS reports just 48 numerically finer pieces (9/18). NGC ID# 2543, PCGS# 7114

3749 1880-O 80/79 Crossbar, VAM-4, MS63 Prooflike PCGS. CAC. Small or Micro O. The *Guide Book* overdate variety is undesignated on the PCGS insert. A brilliant and flashy specimen with a good strike and scattered minor marks on the reverse field. The 1880-O is common in Mint State but prooflike examples are highly elusive. NGC ID# 356H, PCGS# 41287 Base PCGS# 7117

3750 1880-S MS67+ PCGS. CAC. Large S. This high-end Superb Gem dollar displays sharply detailed design elements and scintillating silver surfaces that radiate vibrant mint luster. A few traces of golden-tan toning are evident, and rich mint frost adds to the visual appeal.
Ex: Dallas Signature (Heritage, 10/2012), lot 4753, where it brought \$1,233.75. NGC ID# 2544, PCGS# 7118

3751 1880/79-S MS65 Deep Mirror Prooflike PCGS. VAM-8. A Top 100 Variety. Medium S. The second 8 in the date has raised metal inside the top loop, identifying the popular VAM-8. This delightful Gem exhibits sharply detailed, frosty design elements that contrast profoundly with the deeply reflective prooflike fields. The well-preserved surfaces show a few hints of pale gold toning. Population: 10 in 65 Deep Mirror Prooflike, 4 finer (8/18). NGC ID# 2544, PCGS# 97121

**1880/79-S Morgan, MS67 Prooflike
Sole Finest VAM-9 Example, CAC
Stunning Mirrored Surface Quality**

- 3752 1880/79-S 80/79, Large S, VAM-9, MS67 Prooflike PCGS. CAC.** A Top 100 Variety. In general, the 1880-S is a well-produced issue with many high-grade representatives. The number of Superb Gems drops significantly when prooflike surfaces are sought, and that number dwindles when the VAM-9 variety enters the equation. To our knowledge, this coin is the sole-finest VAM-9 Prooflike, and it is hard to imagine that a finer example exists. Pale-gold toning at the borders surrounds stark silver-mirrored surfaces. The fields and devices are essentially unmarked on the obverse, with only a few minor ticks on the equally mirrored reverse. Sharply struck motifs show a thin coat of mint frost that adds contrast to the nearly unblemished surfaces. CAC endorsement confirms the outstanding quality. Population: 1 in 67 Prooflike, 0 finer (9/18). NGC ID# 35C5, PCGS# 41503 Base PCGS# 7121

- 3753 1881-CC MS66 PCGS. VAM-3.** Dazzling semiprooflike fields, a bold strike, and virtually pristine fields ensure the quality of this low-mintage Carson City dollar. Wispy facial grazes deny an even finer grade. The issue appeared in quantity in GSA sales, but only a small percentage of those pieces are comparable in quality. Encased in a green-label holder. NGC ID# 2549, PCGS# 7126

- 3754 1881-CC MS66 PCGS. VAM-2.** Light straw-gold toning accompanies smooth fields and sharply struck devices. Booming luster traverses both sides. The cheek displays delicate contact, and a single small tan freckle is noted on the left (facing) wing. NGC ID# 2549, PCGS# 7126

- 3755 1881-CC MS66 PCGS. CAC. VAM-2.** Faint silver-gray toning visits this lustrous, well-struck, and high grade Carson City dollar. The fields are virtually pristine, and the cheek exhibits only delicate grazes. A low mintage issue made available by the GSA auctions of the 1970s. NGC ID# 2549, PCGS# 7126

- 3756 1881-CC MS66+ PCGS Secure. CAC. VAM-3.** Scarcer than VAM-2, VAM-3 is identified by bold die lines embedded in the bottom portion of the wreath. A lustrous, brilliant, and exceptionally unmarked Premium Gem. A low mintage Carson City issue, the 1881-CC is nonetheless affordable due to the GSA auctions of the 1970s. NGC ID# 2549, PCGS# 7126

- 3757 1881-CC MS66+ NGC. CAC.** Shades of sea-green and greenish-gray toning, with specks of amber, visit the obverse of this impeccably preserved, Plus-graded Premium Gem, while the reverse remains essentially brilliant. The design elements are sharply detailed and vibrant mint luster radiates from both sides. NGC ID# 2549, PCGS# 7126

- 3758 1881-CC MS66 ★ Prooflike NGC. CAC. VAM-6.** A die scratch beneath the lip identifies this scarcer '81-CC VAM. A brilliant and flashy representative of the popular and low-mintage Carson City issue. The strike shows slight blending at the centers, but the fields are uncommonly devoid of contact. CAC: 12 in 66 Prooflike, 0 finer (8/18). NGC ID# 2547, PCGS# 7127

- 3759 1881-O MS65+ PCGS.** Vibrant cartwheel luster engulfs this high-end Gem in untuned brilliance, highlighting uncommonly well-struck design elements for this New Orleans issue. A few faint grazes are visible, but the preservation is generally outstanding. The 1881-O is conditionally scarce any finer. NGC ID# 2548, PCGS# 7128

**1881-S Dollar, Radiant MS68
Only One Coin Finer at NGC**

- 3760 1881-S MS68 NGC.** Along with the 1880-S, the 1881-S Morgan is a favorite among type collectors due to its availability in high grades. This MS68 example is among the finest reasonably obtainable. Both sides display vibrant mint luster with traces of peripheral golden toning and beautifully preserved surfaces. Semiprooflike fields accentuate the fully struck, frosty motifs. Only one non-Prooflike coin is numerically finer at NGC, and just two are so-graded at PCGS (9/18).
Ex: Summer FUN Signature (Heritage, 7/2015), lot 4210, which realized \$3,760. NGC ID# 2549, PCGS# 7130

- 3761 1882-CC MS65 Deep Mirror Prooflike PCGS.** A delightful Gem Morgan dollar from the famous Carson City Mint, this coin exhibits sharply detailed frosty design elements and deeply reflective fields that show only insignificant signs of contact. Eye appeal is terrific. NGC ID# 254B, PCGS# 97135

**1883-CC Morgan Dollar, MS67
Vivid Obverse Toning**

- 3762 1883-CC MS67 NGC.** Despite a significant number of high-grade specimens that surfaced in the GSA sales of the 1970s, the 1883-CC Morgan dollar is a rare issue in grades above the MS67 level. This impressive Superb Gem is well-detailed and impeccably preserved, with vivid shades of sea-green and violet-gray toning on the obverse, while the reverse remains essentially brilliant. NGC has graded no coins in higher numeric grades (9/18). NGC ID# 254J, PCGS# 7144

1883-CC Morgan Dollar, MS67
Popular Branch Mint Issue

3763 1883-CC MS67 PCGS. The 1883-CC Morgan dollar claims a smallish mintage of 1.2 million pieces, but the issue was well-represented in the GSA sales of the 1970s and the issue can be located in grades up to the MS67 level with a little patience. Finer coins are conditionally rare, however. This spectacular Superb Gem exhibits sharply detailed design elements and impeccably preserved brilliant surfaces, with vibrant mint luster and outstanding eye appeal. PCGS has graded five numerically finer examples (9/18). NGC ID# 254J, PCGS# 7144

3764 1883-S MS62 PCGS. The 1883-S is intermediate in conditional rarity between the plentiful 1882-S and the challenging 1884-S. This brilliant and lustrous representative lacks an intricate central strike but is only moderately abraded. Housed in a green-label holder. NGC ID# 254K, PCGS# 7148

3765 1883-S MS63 NGC. A mostly unabraded example with semiprooflike fields and warm champagne toning. A loupe reveals a few faint lines on each side that limit the grade, although this coin appears finer than MS63 to the unaided eye. NGC ID# 254K, PCGS# 7148

1883-S Morgan Dollar, MS64
Vibrant Luster, Rarely Offered Finer

3766 1883-S MS64 PCGS Secure. As the first in a series of low-mintage San Francisco dollars, the 1883-S saw no large-scale Treasury releases that went directly to collector's hands. The Redfield Hoard contained a few hundred coins, but they were soon dispersed. The issue has enjoyed semikey status ever since. Liberty's portrait is thickly frosted on this near-Gem example. The fields offer a vibrant combination of reflectivity and light mint frost that produces strong cartwheel luster. A few light marks confirm the numeric grade, which is exceeded by the coin's visual impact. PCGS reports just 23 numerically finer pieces (9/18). NGC ID# 254K, PCGS# 7148

1883-S Morgan Dollar, MS64
Rarely Seen Finer

3767 1883-S MS64 PCGS. The 1883-S Morgan dollar claims a substantial mintage of more than 6.2 million pieces, but the issue is more difficult to locate in high grade than that production total would suggest. This impressive Choice example displays sharply detailed design elements and well-preserved surfaces, with vibrant mint luster on both sides. PCGS has graded 23 numerically finer examples (9/18). NGC ID# 254K, PCGS# 7148

1883-S Morgan Dollar, MS64
Well-Preserved and Lustrous

3768 1883-S MS64 PCGS. CAC. Despite an adequate mintage of 6.2 million pieces, the 1883-S is a rare issue in grades above the MS64 level, as it was not well-represented in the Treasury Releases of the 1960s. This impressive Choice example offers sharply detailed design elements and well-preserved surfaces with vibrant mint luster on both sides. PCGS has graded 23 numerically finer examples (9/18). NGC ID# 254K, PCGS# 7148

3769 1885 MS67 PCGS Secure. A generous mintage of 17.7 million pieces assures a high survival rate, even in Uncirculated. This is an all-brilliant dollar that is fully struck and displays bright mint luster. Exceptionally well-preserved. NGC ID# 254R, PCGS# 7158

3770 1885 MS67 PCGS. The Philadelphia Mint produced a staggering total of 17.7 million Morgan dollars in 1885, making the issue available in grades up to the MS67 level today. This sharply detailed Superb Gem exhibits virtually flawless surfaces with vibrant mint luster throughout. PCGS has graded three numerically finer examples (9/18). NGC ID# 254R, PCGS# 7158

3771 1885 MS67 PCGS. This widely produced Philadelphia issue becomes elusive in Superb Gem condition and exceptionally rare any finer. The obverse is completely brilliant, while the reverse features a blush of golden color at the upper border. Coruscating mint luster swirls over clean fields and well-struck motifs. Three coins finer at PCGS (9/18). NGC ID# 254R, PCGS# 7158

3772 1885-CC MS66 PCGS. VAM-2A. Light butter-gold toning adorns this highly lustrous better-date Carson City dollar. The strike is above average and the preservation is exceptional. A die scratch below the Morgan initial is a pick-up point for VAM-2, and clash marks confirm the middle die state. NGC ID# 254S, PCGS# 7160

3773 1885-S MS65 PCGS. Although much less rare as a Gem than the 1884-S, the 1885-S is in turn much scarcer than the 1878-S through 1882-S in better Mint State grades. This lightly toned and lustrous example has a good strike, a clean cheek, and smooth fields. Encased in an old green-label holder. NGC ID# 254U, PCGS# 7164

- 3774 1886-O MS61 PCGS.** Brilliant and lustrous with a good strike and distributed minor obverse grazes. The high-mintage 1886-O is plentiful in VF but Mint State examples are surprisingly scarce. Certified in an old green-label holder. NGC ID# 254W, PCGS# 7168
- 3775 1886-O MS62 PCGS.** A high-mintage issue, the 1886 New Orleans silver dollar did not appear in quantity in the Treasury release that occurred just over half a century ago. Rather, nearly all of the mintage entered circulation. As a result, few Mint State examples survive, and they are always in demand. One such piece is this well-detailed MS62 coin that has frosty silver mint luster with peripheral gold and delicate blue toning. NGC ID# 254W, PCGS# 7168
- 3776 1886-O MS62 ANACS.** Brilliant-white and frosty, this sharply struck example of the conditionally scarce New Orleans issue displays vibrant eye appeal. Three deep-toned spots between the E of UNITED and the eagle's left (facing) wing are noted, but they are quite small. NGC ID# 254W, PCGS# 7168
- 3777 1886-S/S VAM-2 MS65 NGC.** A Top 100 Variety. A brilliant and thoroughly lustrous Gem of this much better San Francisco issue. Exceptionally free from marks, with only a solitary tick on the forehead precluding a higher grade. VAM-2 and VAM-4 are similar repunched mintmark varieties that show doubling on the serifs. NGC ID# 254X, PCGS# 133906 Base PCGS# 7170
- 3778 1886-S VAM-2 MS64 Deep Mirror Prooflike NGC.** A Top 100 Variety. The mintmark is nicely repunched. The variety is undesignated on the prior generation holder. NGC has certified six Deep Prooflike 1886-S dollars as VAM-2, two pieces each in MS62, MS63, and MS64 (9/18). The present crisply struck and carefully preserved near-Gem is richly patinated steel-gray with orange and lime-green undertones. NGC ID# 254X, PCGS# 42794 Base PCGS# 97171

**1887 Morgan Dollar, MS67+
Brilliant-White, Exceptional Surfaces**

- 3779 1887 MS67+ PCGS Secure. CAC.** The fact that PCGS has certified just one numerically finer piece than this coin is of great interest to high-grade Morgan dollar specialists, but equally important are the PCGS Plus designation and CAC endorsement that accompany the coin. One is hard pressed to find a single mentionable mark on this frosted Superb Gem 1887. The strike is sharp and vivid cartwheel luster illuminates a sharp strike throughout all of the devices. Here is a coin destined for a fine Registry Set collection or a superb type set. Population: 13 in 67+, 1 finer. CAC: 66 in 67, 0 finer (9/18). NGC ID# 27Y3, PCGS# 7172
- 3780 1887-S/S VAM-2 MS64 Prooflike PCGS. CAC.** A Top 100 Variety. The mintmark is obviously strongly repunched within its upper loop. A lovely near-Gem with dazzling luster, brilliant surfaces, a bold strike, and smooth surfaces. CAC: 6 in 64, 0 finer (8/18). NGC ID# 2554, PCGS# 42940 Base PCGS# 7181
- 3781 1888 MS66+ PCGS. CAC.** Flashy mint brilliance and lively cartwheel luster are the defining features of this Plus-designated Premium Gem with CAC endorsement. Minor grazes barely prevent a Superb Gem assessment. Despite a mintage of 19.1 million coins, PCGS shows just 49 pieces in MS67 (9/18). NGC ID# 26KE, PCGS# 7182

- 3782 1888-O MS66 PCGS.** The New Orleans Mint struck a substantial mintage of more than 12 million Morgan dollars in 1888, but the issue was not well-produced and striking problems are the norm for the issue, not the exception. This delightful Premium Gem is remarkable for its unusually sharp strike and well-preserved, lustrous surfaces, under attractive shades of violet, lavender-gray, and golden-tan toning. Although PCGS has certified a number of coins in MS66+, none have been graded in higher numeric grades at that service (9/18). NGC ID# 2556, PCGS# 7184
- 3783 1888-S MS65 PCGS.** A desirable Gem of the relatively low mintage issue. Potent cartwheel luster traverses exceptionally preserved and practically brilliant surfaces. A solitary small reed impression on the cheek does not appear to limit the grade. Certified in a green-label holder. NGC ID# 2557, PCGS# 7186
- 3784 1888-S MS65 PCGS.** The 1888-S is a scarce and popular S-mint Morgan dollar issue. The present Gem is somewhat softly struck in the centers of each side, but beautiful patina partially compensates with a melange of rose (deepening to orange) and ice-blue on both sides, underneath which rich luster permeates. PCGS has seen 36 numerically finer pieces (9/18).
Ex: Central States Signature (Heritage, 5/2000), lot 5271; Chicago Signature (Heritage, 8/2011), lot 4634. NGC ID# 2557, PCGS# 7186
- 3785 1889-CC — Cleaned — NGC Details. XF. VAM-2A.** The most interesting VAM variety for this key Carson City issue. The letter N in clashed in front of Liberty's neck, and both sides exhibit prominent die cracks. This example has been dipped white and displays light wear on the central high points, but bright luster accompanies peripheral elements.
- 3786 1889-CC XF40 PCGS.** Among Carson City Mint Morgan dollars, the 1889-CC is the most challenging issue of the series. This impressive XF example shows light wear on Liberty's hair and the eagle's breast, but the surfaces are lightly abraded, under shades of light pink toning. NGC ID# 2559, PCGS# 7190
- 3787 1889-CC XF40 PCGS.** Blue and violet toning enlivens the borders on this otherwise golden-gray 1889-CC dollar. Wear is light and some luster remains in the protected regions of the fields. Problem-free collector-grade examples of the key Carson City Morgan issue are in constant demand, especially with attractive coloration. This piece will please many collectors. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan Dollar, XF45
Key Carson City Issue**

- 3788 1889-CC XF45 PCGS.** The 1889-CC is the rarest Morgan dollar from the Carson City Mint, and collectors prize examples of this date in all grades and conditions. This lightly worn Choice XF specimen retains much of its original mint luster and design detail, and the surfaces show only minor abrasions.
Ex: Central States Signature (Heritage, 4/2012), lot 5609, where it brought \$3,450. NGC ID# 2559, PCGS# 7190

**1889-O Morgan Dollar, MS65
Rarely Seen Finer**

- 3789 1889-O MS65 PCGS.** From a large mintage of more than 11.8 million pieces, the 1889-O Morgan dollar is only somewhat scarce in MS65 condition, but finer coins are definitely rare. This impressive Gem exhibits well-detailed design elements, with just a trace of the usual softness on the hair above the ear. The well-preserved surfaces are lustrous and appealing, with a few hints of pale gold toning. PCGS has graded 13 numerically finer examples (9/18). NGC ID# 255A, PCGS# 7192

**1889-S Morgan Dollar, MS66
Only One Finer Coin at PCGS**

- 3790 1889-S MS66 PCGS Secure.** The San Francisco Mint concentrated on production of gold coins in 1889, and only 700,000 Morgan dollars were struck. Although the 1889-S was represented in the Redfield Hoard, it remains a scarce issue in MS66 condition, and finer coins are virtually unobtainable. This delightful Premium Gem is sharply detailed and impeccably preserved, with vibrant mint luster throughout. PCGS has graded only one numerically finer example (9/18). NGC ID# 255B, PCGS# 7194
- 3791 1890-CC MS64 PCGS Secure.** A brilliant obverse and a blue-toned reverse combine on this Choice Uncirculated Carson City dollar. There are faint roller marks on Liberty's chin and a hint of central softness on each side, however this piece is largely well-struck. Frosty luster abounds. NGC ID# 255D, PCGS# 7198
- 3792 1890-CC MS64 PCGS. VAM-3.** Golden-brown, navy-blue, and stone-gray shades encompass the obverse. The reverse displays powder-blue, fire-red, and straw-gold shades along with a deep blush of blue-green on the lower left quadrant. The lustrous and well-preserved surfaces display minor central incompleteness of strike. A scarcer Carson City issue. NGC ID# 255D, PCGS# 7198
- 3793 1890-CC MS64 PCGS. VAM-6.** The flag of the 1 is repunched north. Brilliant and lustrous with a good strike and pleasing surfaces. A better Carson City issue, found in the GSA holdings but in lesser numbers than the 1879-CC.
Ex: New York Signature (Heritage, 10/2015), lot 4879, which realized \$1,292.50. NGC ID# 255D, PCGS# 7198
- 3794 1890-CC MS64+ PCGS. VAM-5.** The second C in the mintmark is repunched north. This Carson City near-Gem is brilliant save for a blush of autumn-brown toning near GOD. The fields are splendidly smooth, and the cheek displays only minor contact. NGC ID# 255D, PCGS# 7198

- 3795 1890-CC MS64 PCGS Secure. CAC.** An attractive Choice representative from the famous Carson City dollar with sharply detailed design elements and lightly marked, lustrous surfaces that show highlights of greenish-gold toning. The overall visual appeal is quite pleasing. NGC ID# 255D, PCGS# 7198

- 3796 1890-S MS65 PCGS Secure.** An untuned, well-preserved Gem with brilliant cartwheel luster and largely unabraded fields and devices. The obverse is thoroughly frosted, while the reverse has a hint of reflectivity in the fields. Eye appeal is outstanding. NGC ID# 255F, PCGS# 7202

**1891-CC Silver Dollar, MS65+
Few Seen Finer**

- 3797 1891-CC MS65+ PCGS.** The 1891-CC is available in Gem condition but it is rare finer. This Plus-designated MS65 coin strikes a balance between rarity and cost without compromising quality. The strike is bold, and frosty mint luster illuminates tan-gold toning on each side. A loupe reveals only trivial signs of contact. PCGS has seen 39 finer non-Prooflike representatives (9/18). NGC ID# 255H, PCGS# 7206
- 3798 1891-CC Spitting Eagle, VAM-3, MS64 PCGS. CAC.** A Top 100 Variety. The available but ever-popular "Spitting Eagle" variety earns its name from a small die lump that occurs in front of the eagle's beak. This Carson City representative offers an above-average strike for the issue. The untuned surfaces are lustrous and generally smooth.
Ex: Long Beach Signature (Heritage, 9/2014), lot 4790; Long Beach Signature (Heritage, 9/2015), lot 4770, which realized \$1,116.25. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206
- 3799 1891-S MS65 PCGS. CAC.** A solidly struck and attractive silver-white Gem, frosty and essentially untuned, showing minimal marks. Powerful luster and undeniable eye appeal appear on each side. Finer 1891-S Morgan dollars are scarce.
Ex: ANA Signature (Heritage, 3/2008), lot 1094; Rosemont Signature (Heritage, 8/2013), lot 4460; Long Beach Signature (Heritage, 6/2015), lot 4931. NGC ID# 255K, PCGS# 7210
- 3800 1892 MS64+ PCGS.** A frost-white, Plus-graded near-Gem with radiant cartwheel luster and well-struck design elements. There is a small cluster of marks in the field below the P in PLURIBUS, but other abrasions are not obtrusive. The 1892 Morgan dollar is conditionally elusive any finer. NGC ID# 255L, PCGS# 7212

**1892 Silver Dollar, MS65
Old 'Rattler' Holder**

3801 1892 MS65 PCGS. Frosty, shimmering mint luster engulfs the minimally marked, near-brilliant surfaces of this Gem 1892 Morgan dollar. Slight strike weakness on the central high points is typical of the issue and does not detract from the visual appeal. Liberty's cheek is fairly clean. The 1892 is a challenging issue in high grade. PCGS lists only nine non-Prooflike coins finer than the present, plus four Prooflike and six Deep Mirror Prooflike pieces in the current MS65 grade (8/18). Housed in a first generation holder. NGC ID# 255L, PCGS# 7212

3802 1892-CC MS61 NGC. VAM-8A. A double-clashed N in front of Liberty's neck is foremost among the interesting characteristics of VAM-8A. Known for its virtual absence from the GSA auctions, the 1892-CC is a better Carson City issue. This lustrous stone-white example has a tick above the chin but is pleasing overall for its designated grade. NGC ID# 255M, PCGS# 7214

3803 1892-CC MS61 NGC. While the 1892-CC dollar claims a larger mintage than Carson City issues from the early 1880s, far fewer were coins saved in high grades. This example has soft mint frost and a hint of high-point softness. Blushes of gold color adorn each side. Three small rim nicks occur below (DO)LLA(R). NGC ID# 255M, PCGS# 7214

3804 1892-CC MS63 PCGS. Brilliant, satiny mint luster appears over each side of this Select 1892-CC silver dollar, complemented by semiprooflike reflectivity in the fields. The strike is sharp, and grade-limiting abrasions are trivial. NGC ID# 255M, PCGS# 7214

1892-CC Silver Dollar, Near-Gem

3805 1892-CC MS64 NGC. The reverse is decidedly semireflective, while the obverse has more of a brilliant, softly lustrous quality. Faint hints of gold complement each side, and the centers are well-defined. Smooth fields and a clean cheek suggest an even higher grade. A small planchet flake appears behind Liberty's cap. NGC ID# 255M, PCGS# 7214

1892-CC Dollar, Lightly Toned MS64

3806 1892-CC MS64 PCGS. Natural shades of pinkish-gray toning visit the lightly marked surfaces of this pleasing Choice example, with strong mint luster and sharply detailed design elements underneath. The 1892-CC Morgan dollar is always popular because of the charismatic CC mintmark. NGC ID# 255M, PCGS# 7214

**1892-CC Silver Dollar, MS64
Toned and Semiprooflike**

3807 1892-CC MS64 PCGS. Semiprooflike fields and vivid original toning are the hallmarks of this near-Gem, complementing well-struck design elements. No major abrasions are seen. The borders show ocean-blue and violet color, with mottled orange-gold across the interiors. The 1892-CC is a better date among Carson City Morgans, and the availability declines significantly in grades finer than MS64. NGC ID# 255M, PCGS# 7214

1892-CC Morgan Dollar, MS64

3808 1892-CC MS64 PCGS. Dappled multicolor toning complements the otherwise silver-gray obverse, while the largely brilliant reverse features daubs of gold and violet patina. The hair over the ear, the eagle's breast, and the talons lack detail, but the surfaces are clean. A better Carson City issue absent from the GSA auctions. NGC ID# 255M, PCGS# 7214

3809 1893 MS63 PCGS Secure. Violet patina encircles fully frosted and brilliant surfaces on the obverse. The reverse is shrouded in shades of blue and lavender toning. The only obvious marks are small ticks on Liberty's cheek. Well-struck, including the hair strands above the ear. NGC ID# 255R, PCGS# 7220

3810 1893 MS63 PCGS Secure. VAM-3. UNITED is lightly die doubled, and the top of the 3 is repunched. A sharply struck Select example that exhibits vibrant cartwheel luster and refreshingly unmarked surfaces. The 1893 is a much better Philadelphia issue with a mintage of less than 400,000 pieces. NGC ID# 255R, PCGS# 7220

1893-O Dollar, MS62
Low-Mintage New Orleans Issue

- 3811 1893-O MS62 PCGS.** A short crescent of ocean-blue toning at 12 o'clock on the obverse border is the chief visual attribute of this Mint State 1893-O dollar. Amber-gold toning surrounds the remainder of the obverse periphery, and on the reverse it covers much of the interior as well. The central obverse is brilliant and shows minimal abrasions. The normal strike weakness on the hair above Liberty's ear and the eagle's breast is apparent on this coin, which also has the expected satin luster of most mid-1890s New Orleans dollars. *Ex: Long Beach Signature (Heritage, 9/2014), lot 3282, which realized \$4,259.38. NGC ID# 255T, PCGS# 7224*

- 3812 1893-S Fair 2 ANACS.** The date and mintmark are distinct from the rim, though most of UNITED STATES OF is worn smooth. AMERICA is faint but readable, and the bottom half of PLURIBUS is clear. The devices are well outlined except for the wingtips. The low-mintage key to the business series. Certified in a small-sized holder. NGC ID# 255U, PCGS# 7226
- 3813 1893-S AG3 NGC. VAM-1.** Stone-white high-points contrast with dove-gray fields. This key date silver dollar has readable legends, though the tops of several letters have faded into the rims. The surfaces are well-worn but without any distracting marks. NGC ID# 255U, PCGS# 7226
- 3814 1893-S Good 4 PCGS.** The pearl-white portrait, eagle, and wreath contrast with battleship-gray fields. The rims are well defined on the reverse and lower obverse. The fletchings show lines and the lower halves of the wings display plumage. There are no distracting marks on this collector-grade key date silver dollar. NGC ID# 255U, PCGS# 7226
- 3815 1893-S Good 6 PCGS. VAM-2.** A cream-white example with butter-gold undertones. All legends are sharp and the reverse dentils are distinct. The obverse dentils are partially separated. The pearl-white surfaces are problem-free save for an obverse rim nick at 12:30. NGC ID# 255U, PCGS# 7226

1893-S Dollar, Fine 12
Collector-Grade Example

- 3816 1893-S Fine 12 NGC.** Deep ebony-olive toning encompasses the fields on this collector-grade 1893-S Morgan dollar. The relief elements show lighter tan-gray patina, which provides the traditional "circulation cameo" appearance. Detail is pleasing for the grade, and a small rim bump below the 18 in the date is the only mentionable imperfection. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, XF Details
Low-Mintage Key

- 3817 1893-S — Cleaned — PCGS Genuine Secure. XF Details.** From a minuscule mintage of 100,000 pieces, the 1893-S Morgan dollar is prized by collectors in all grades and conditions. This interesting specimen shows some light wear on the high spots of Liberty's hair and the eagle's breast, but a long, hair-thin scratch on the cheek and a shorter, deeper one below the eye are the only marks of note. The luster has been dimmed by the noted cleaning.

1894 Silver Dollar, MS60
Pleasing for the Grade

- 3818 1894 MS60 PCGS.** This is a well-struck example with vibrant cartwheel luster and only a few wisps of light golden toning. Scattered surface chatter on the obverse limits the grade, but there are no singular abrasions. Eye appeal surpasses expectations on this attractive semikey Philadelphia Morgan. Housed in a green label holder. NGC ID# 255V, PCGS# 7228

1894 Silver Dollar, MS62
Highly Pleasing Mint State Example

- 3819 1894 MS62 NGC.** 1894 Morgan dollars are eagerly sought in all grades thanks to the low circulation-strike mintage of just 110,000 pieces. This is a thickly frosted, softly lustrous example, with appealing silver-gray color and minimally abraded surfaces for the assigned grade. It would be a challenge to improve on the present coin at the MS62 level, since the strike is sharp and there are no significant distractions. NGC ID# 255V, PCGS# 7228

1894 Dollar, MS63
Well-Preserved for the Grade

3820 1894 MS63 PCGS Secure. This well-struck example is frost-white and vibrantly lustrous, showing a strong cartwheel effect. A few light luster grazes on the obverse limit the grade, but the reverse is several points finer by itself. This is easily one of the most appealing 1894 Morgan dollars that we have handled in MS63. NGC ID# 255V, PCGS# 7228

3821 1894-S MS63 PCGS. Blushes of light gold patina complement otherwise brilliant and thickly frosted surfaces. The highest points of the portrait and eagle lack a bit of definition, but the border elements are strong. A challenging issue in Select Uncirculated condition or higher. NGC ID# 255X, PCGS# 7232

3822 1894-S MS63 PCGS. Hints of honey-gold toning visit this predominantly brilliant better-date dollar. Dynamic luster sweeps impressively unmarked surfaces. A good strike, though portions of the portrait retain delicate parallel roller marks, as coined. Encased in an old green-label holder. NGC ID# 255X, PCGS# 7232

3823 1894-S MS63 NGC. The 1894-S can prove somewhat difficult to obtain in Select Uncirculated condition, although the issue is still available in the absolute sense at that level. Both sides are bright and frosty, sure to please collectors who prefer untuned coins. Central detail is good. Small flecks appear on each side. NGC ID# 255X, PCGS# 7232

3824 1894-S MS64 PCGS. The 1894-S Morgan is a slightly better date in all grades, but it becomes particularly scarce finer than the Choice level. This well-struck near-Gem displays softly frosted luster beneath irregular shades of amber and tan-gold toning. A few small ticks on Liberty's cheek are all that preclude a finer grade. *Ex: Central States Signature (Heritage, 4/2015), lot 5784, which realized \$1,762.50.* NGC ID# 255X, PCGS# 7232

3825 1895-O AU55 PCGS Secure. The 1895-O Morgan dollar is a low-mintage branch mint issue that is seldom encountered in high grade. This impressive Choice AU specimen shows just a touch of wear on the strongly impressed design elements and the lightly abraded surfaces are still lustrous and attractive. NGC ID# 255Y, PCGS# 7236

3826 1895-S AU58 PCGS Secure. From a low mintage of 400,000 pieces, this impressive near-Mint specimen exhibits just a trace of high-point wear and the lightly abraded surfaces display much prooflike reflectivity, with highlights of sea-green toning. NGC ID# 255Z, PCGS# 7238

3827 1896 MS67 NGC. Dusk appears to be deepening on this coin's obverse, as the top portion shows silver-yellow coloration, transitioning through orange-gold in the midportion and mellowing to sunset-orange and magenta at the bottom. The reverse displays spectacular iridescent blues and greens throughout, and despite the deep color, much cartwheel luster bursts forth. Close perusal with a loupe fails to locate any relevant marks. One for the color connoisseurs, and destined for some spirited bidding. Census: 76 in 67 (2 in 67+, 7 in 67 ★, 1 in 67+★), 5 finer (9/18). *Ex: Long Beach Signature (Heritage, 2/2008), lot 1436, realized \$3,568.45.* NGC ID# 2562, PCGS# 7240

1896-S Morgan Dollar, MS62
Radiantly Lustrous

3828 1896-S MS62 PCGS. Although the San Francisco Mint struck 5 million silver dollars in 1896, most were dispersed into circulation or were later melted. This is a better date in Mint State. For the grade, this MS62 coin is highly appealing. Brilliant, radiant cartwheel luster engulfs each side, and the usual central strike weakness is minimal. Scattered abrasions limit the grade but are not overly distracting. Housed in an old green label holder. NGC ID# 2564, PCGS# 7244

3829 1897-O MS61 PCGS. Sea-green, olive, gold, and lavender hues make up the mottle patina on this Mint State 1897-O Morgan dollar. The strike is sharp and the luster is satiny. Scattered abrasions limit the grade but none are individually bothersome. On the obverse, some small russet specks are visible beneath a lens. NGC ID# 2565, PCGS# 7248

3830 1897-O MS61 PCGS Secure. Bowers writes: "Mint State coins are somewhat scarce in comparison to later New Orleans Mint dollars." This MS61 representative is bright, lacking even the faintest suggestion of color. Far better defined than usual for an O-mint dollar. NGC ID# 2565, PCGS# 7248

3831 1897-O MS62 PCGS. Tinges of golden-russet and sea-green toning accent the borders on this piece, while the interiors show lighter champagne color. No singular abrasions are present. Typical of the issue, slight strike weakness is seen on the eagle's breast and the hair above Liberty's ear. NGC ID# 2565, PCGS# 7248

3832 1897-O MS62 PCGS Secure. Pale champagne toning appears over brilliant silver luster on both sides of this attractive Mint State 1897-O Morgan dollar. The strike is above average and abrasions are trivial. The 1897-O boasts a mintage of about 4 million coins but it is conditionally challenging in Mint State. NGC ID# 2565, PCGS# 7248

1897-O Dollar, MS63
Conditionally Elusive

3833 1897-O MS63 PCGS Secure. Although the New Orleans Mint coined 4 million Morgan dollars in 1897, few if any were preserved in the Treasury vaults, as most of the mintage entered circulation. Few examples have survived in Mint State grades. This Select piece has brilliant-silver surfaces with a lone splash of gold toning at 1 o'clock on the obverse. PCGS has only certified 57 numerically finer examples (9/18). NGC ID# 2565, PCGS# 7248

**1897-O Morgan Dollar, MS63
Scarce Issue in High Grade**

3834 1897-O MS63 PCGS. The New Orleans Mint struck just over 4 million Morgan silver dollars in 1897, but many of those coins were released into circulation and most of the coins held in government storage were probably melted in 1918, making the issue quite elusive in high grade today. This lustrous Select example shows some minor signs of contact on Liberty's cheek and the design elements show a touch of the typical softness on the centers. PCGS has graded 57 numerically finer examples (9/18). NGC ID# 2565, PCGS# 7248

3835 1897-S MS65 Deep Mirror Prooflike PCGS. VAM-4. The date is repunched above the 7 and beneath the flag of the 1. The reverse exhibits die gouges near the loops of the knot. This lustrous Gem is brilliant save for a few blushes of light tan-brown toning and a small spot above the E in AMERICA. Well struck and refreshingly unabraded. Encapsulated in an old green-label holder. NGC ID# 2567, PCGS# 97251

3836 1898-O MS67 PCGS. The 1898-O Morgan dollar can be located in MS67 condition with a little patience, but PCGS has certified no coins in higher numeric grades (9/18). This spectacular Superb Gem exhibits well-detailed design elements and virtually pristine lustrous surfaces. NGC ID# 2569, PCGS# 7254

3837 1898-O MS67 NGC. From a mintage of 4.4 million pieces, the 1898-O Morgan dollar is only somewhat scarce in MS67 condition, but finer examples are virtually unobtainable. This well-detailed Superb Gem is impeccably preserved, with vibrant mint luster and terrific eye appeal. NGC has graded a single numerically finer example (9/18). NGC ID# 2569, PCGS# 7254

3838 1898-S MS65 PCGS Secure. This all-brilliant example of this popular, late-date S-mint dollar displays remarkably clean surfaces. The luster is more satiny rather than frosted, and the strike details are completely brought up with notable strength of strike over the ear of Liberty as well as the eagle's breast feathers. NGC ID# 256A, PCGS# 7256

**1898-S Dollar, MS66
Satiny and Brilliant**

3839 1898-S MS66 PCGS. The 1898-S dollar had a substantial mintage of 4.1 million pieces. Most were either released into circulation in the 1920s or paid out to Las Vegas casinos in the 1940s and 1950s. As a result, few high-grade pieces remained when silver dollar collecting really began to take off in the 1970s. This is an attractive piece that shows the satiny luster sometimes encountered on 1898-S dollars. The surfaces are remarkably clean and attractive with no singular abrasions. Brilliant and strongly struck throughout. NGC ID# 256A, PCGS# 7256

3840 1899 MS65+ PCGS Secure. CAC. The 1899 boasts an enticingly low mintage of 330,000 coins, although this issue is much more plentiful in high grades than the low-mintage dates of the early 1890s. This high-end Gem displays a sharp strike and original, frosty mint luster. Orange-gold border toning frames champagne-tinted interiors. NGC ID# 256C, PCGS# 7258

**1899-O Silver Dollar, MS67
Top-Grade CAC Coin
Only One Piece Finer at PCGS**

3841 1899-O MS67 PCGS Secure. CAC. The 1899-O silver dollar is available in most grades, but it becomes conditionally elusive at the Superb Gem level. PCGS lists only a single non-Prooflike piece finer than the present, plus two Deep Mirror Prooflike coins in the same grade (9/18). This is among the finest coins endorsed by CAC. Frosty, brilliant mint luster complements bold devices and a pristine cheek. Eye appeal is outstanding. NGC ID# 256C, PCGS# 7260

3842 1899-O MS65 Deep Mirror Prooflike NGC. Ice-white motifs rise in exemplary definition above the mirrored fields. Peach-gold, fire-red, and ocean-blue toning fills the borders. Smooth aside from a solitary thin field line near the chin. Encased in a prior generation holder. Census: 21 in 65 Deep Mirror Prooflike, 7 finer (8/18). NGC ID# 256C, PCGS# 97261

3843 1899-O MS65 Deep Mirror Prooflike PCGS. Medium O. Light caramel-gold toning visits this intricately struck and splendidly preserved Gem. The fields are flashy and display cartwheel luster as well. Encapsulated in a first generation holder. Population: 46 in 65 (1 in 65+) Deep Mirror Prooflike, 22 finer (9/18). NGC ID# 256C, PCGS# 97261

**1900 Silver Dollar, MS67
Lustrous, Frosted Surfaces**

3844 1900 MS67 PCGS. Creamy white, smooth and frosty brilliance covers both sides of this Superb Gem dollar, while its MS67 numeric grade is unsurpassed at either PCGS or NGC. More than 8.8 million silver dollars were struck in 1900, and coins were released by the bagful well into the 1960s. Still, Superb Gems are scarce. Few pieces can match the razor-sharp obverse strike on this example, and the reverse lacks only a bit of definition on the eagle's breast and talons. A tiny planchet void (mint made) in the field near star 8 is the sole interruption on the vibrantly lustrous and attractive surfaces. Population: 74 in 67 (5 in 67+), 0 finer (9/18). NGC ID# 256F, PCGS# 7264

- 3845 1900-O/CC VAM-11 MS65 PCGS. CAC.** An arc of golden patina graces the upper reverse of this lustrous and nicely struck overmintmarked Morgan dollar. A few wispy grazes are all that preclude an even higher grade. By 1900, it was clear that the Carson City Assay Office would never again regain branch mint status. Leftover CC-Mint reverse dies were overmintmarked and put into production at New Orleans. NGC ID# 256J, PCGS# 133963 Base PCGS# 7268
- 3846 1900-O/CC VAM-12 MS64 PCGS. CAC.** A Top 100 Variety. VAM-12 shows more of the undermintmark than any other 1900-O/CC variety. VAM-12 is also scarcer than VAM-11, VAM-8, or VAM-10. This highly lustrous and practically brilliant near-Gem is nicely struck and boasts smooth fields. The cheek displays only delicate marks. VAM-12 Population: 14 in 64 (2 in 64+), 7 finer (9/18). NGC ID# 256G, PCGS# 133964 Base PCGS# 7268
- 3847 1900-S MS65 PCGS.** The 1900-S is available in XF and lower grades, but becomes conditionally rare in Mint State. This lustrous and boldly struck Gem has a remarkably smooth cheek, and the remainder of the coin is also refreshingly unabraded. Lightly toned, mostly around the margins. NGC ID# 256H, PCGS# 7270
- 3848 1900-S MS65+ PCGS.** Dazzling cartwheel luster engulfs this high-end Gem and likely earns it the Plus designation. The interiors showcase untuned brilliance, while deep copper-orange toning clings to the extreme outer peripheries. Light grazes on Liberty's cheek are all that limit the grade. NGC ID# 256H, PCGS# 7270
- 3849 1901 MS61 ANACS.** Hints of rose-gold color encircle the rims, leaving the remainder of this Uncirculated 1901 Morgan dollar bright and untuned. Softness on the breast feathers is a result of the C4 hub rather than an incomplete strike. A number of abrasions occur on the cheek, and smaller ones are scattered in the fields. Housed in a small-sized holder. NGC ID# 256J, PCGS# 7272
- 3850 1901-O MS66+ PCGS. CAC.** Brilliant cartwheel luster illuminates exceptional preservation on this 1901-O Morgan dollar. PCGS lists only seven finer non-Prooflike coins (9/18), which makes this Plus-designated Premium Gem a strong contender for Registry Sets. The strike is sharp and the fields are virtually pristine. NGC ID# 256K, PCGS# 7274

**1903-O Silver Dollar, MS67
Among the Finest at PCGS**

- 3851 1903-O MS67 PCGS.** Only non-Prooflike 1903-O dollars have qualified for a Superb Gem grade at PCGS. This piece is among the finest. Glistening luster reveals wisps of light golden toning but is otherwise brilliant and vibrant. The design elements are well-defined, and the level of preservation is virtually unimprovable. The 1903-O is a scarce date this fine and important for Registry Set collectors. Population: 89 in 67 (1 in 67+), 0 finer (9/18). NGC ID# 256S, PCGS# 7286
- 3852 1903-O MS65 Prooflike PCGS Secure.** The 1903-O Morgan dollar was a famous rarity before it surfaced in large numbers in the Treasury Releases of the 1960s. Examples in MS65 condition, with prooflike surfaces, are still rare today. This sharply detailed, impeccably preserved Gem exhibits deeply reflective fields and outstanding eye appeal. Population: 26 in 65 (1 in 65+) Prooflike, 5 finer (9/18). NGC ID# 256S, PCGS# 7287

- 3853 1904-S — Cleaned — NGC Details. Unc.** Like other San Francisco issues near the turn of the century, the 1904-S is conditionally challenging in Mint State. This lustrous stone-white silver dollar lacks a crisp central strike and displays moderate contact on the cheek. The surfaces are slightly bright but hairlines are not apparent.
- 3854 1921 MS66+ PCGS. CAC.** In spite of its enormous mintage, the 1921 Morgan is seldom located in better grades. This dollar displays thick mint frost and strong definition throughout with no obvious or distracting abrasions. NGC ID# 256X, PCGS# 7296
- 3855 1921-S MS66 NGC.** A delightful Premium Gem from the last year of the Morgan design, this coin exhibits sharply detailed design elements and well-preserved surfaces, with vibrant mint luster and outstanding eye appeal. Census: 69 in 66 (3 in 66+, 4 in 66 ★), 1 finer (8/18). NGC ID# 256Z, PCGS# 7300

PROOF MORGAN DOLLARS

- 3856 1878 8TF Lines in LIB, VAM-2 — Altered Surfaces — PCGS Genuine. Proof, Unc. Details.** The eight tailfeather subtype has a proof mintage of only 500 pieces. The portrait and eagle are frosty and contrast with cherry-red, orange-gold, and electric-blue fields and borders. The strike is sharp, and contact marks are few and minor. The surfaces appear lacquered.
- 3857 1881 PR61 PCGS.** Pale silver surfaces exhibit daubs of dusky gold patina. Field reflectivity is minimal, but the design elements and borders are as sharp as one would expect of a proof strike. Hairlines and tiny marks explain the PR61 assessment for this example, one of 975 pieces struck in 1881. NGC ID# 27Z5, PCGS# 7316
- 3858 1881 PR61 PCGS.** A total of 984 proof Morgan dollars were struck in 1881. This one displays slightly muted silver surfaces with bluish accents and faint hairlines across each side. The strike is as razor-sharp as expected. NGC ID# 27Z5, PCGS# 7316

**1881 Morgan Dollar, PR64 Cameo
Stark Contrast, Delicate Toning**

- 3859 1881 PR64 Cameo NGC.** This is a dramatically contrasted Choice proof with full depth of mirroring in the fields and sharp, frosty design elements. A hint of light golden toning warms each side, while no contact marks or mentionable hairlines are observed. An outstanding coin for the grade and a beautiful type representative. NGC ID# 27Z5, PCGS# 87316

**1888 Morgan Dollar, PR64
Lightly Toned**

3860 1888 PR64 PCGS. Gold, lilac, and silvery-gray hues decorate the fields of this glimmering near-Gem proof, complementing satiny luster on the central devices. The strike is weak in the centers, as is an almost unavoidable characteristic of the 1888 proofs. No bothersome contact marks are seen. Eye appeal is pleasing for the grade. NGC ID# 27ZH, PCGS# 7323

3861 1890 PR62 NGC. From a small proof mintage of 590 pieces, this impressive PR62 example exhibits sharply detailed design elements and deeply reflective fields that show only minor signs of contact. Eye appeal is strong, but cameo contrast is minimal. NGC ID# 27ZK, PCGS# 7325

3862 1896 PR61 PCGS. A vivid mix of sea-green, cerulean-blue, and lavender toning blankets the surfaces of this attractive PR61 Morgan dollar. Aside from a few short scratches in the upper-left field, between the legend and Liberty's brow, the surfaces are lightly marked for the grade. The design elements are sharply detailed and the fields are deeply reflective, under the patina. NGC ID# 27ZT, PCGS# 7331

PEACE DOLLARS

3863 1921 MS65 PCGS. CAC. A delightful Gem representative from the first year of the Peace dollar design, this coin exhibits the almost always seen softness on Liberty's hair, which is due to the high relief of the design. The lustrous surfaces are free of mentionable distractions and display attractive hints of pale gold toning. PCGS# 7356

**1921 Peace Dollar, MS65+
Satiny High Relief Type Coin**

3864 1921 MS65+ PCGS Secure. CAC. Satiny mint luster on this high-end Gem is almost untuned, showing just a tinge of light golden color. The centers are better struck than typical for the High Relief type, and there are no bothersome abrasions. The High Relief Peace dollar was struck for general circulation only in 1921. Slightly more than 1 million pieces were produced. High-end Gem examples are highly sought-after today and finer pieces are scarce. PCGS# 7356

3865 1921 Reverse Field Break, VAM-1A, MS64+ PCGS. An Elite 30 Variety. A die break in the right reverse field above the second L in DOLLAR identifies this VAM. This near-Gem is frosty and lightly toned, but each side remains largely brilliant. Typically defined over the central obverse, the devices are otherwise strong. Population: 4 in 64 (1 in 64+), 0 finer (8/18). PCGS# 518798 Base PCGS# 7356

3866 1923 MS67 NGC. The 1923 is among the few Peace dollar issues that can be acquired in MS67 for a modest price. This coin is indeed high-end. Frosty, radiant cartwheel luster is virtually flawless as it illuminates wisps of warm golden toning on each side. The strike is sharp and eye appeal is outstanding. An exceptional type coin. NGC ID# AMPA, PCGS# 7360

3867 1923 MS67 NGC. This spectacular Superb Gem exhibits unusually sharp definition on Liberty's hair and the virtually pristine surfaces are blanketed in attractive shades of golden-tan toning. Vibrant mint luster adds to the outstanding eye appeal. No coins have been certified in higher numeric grades (9/18). NGC ID# AMPA, PCGS# 7360

3868 1925 MS67 NGC. The 1925 is the final silver dollar issue with a mintage of more than 10 million pieces. Examples abound in typical Mint State grades, but Superb Gems are elusive. This lustrous representative displays thin caramel-gold and ice-blue toning. The cheek is pristine, the strike is exemplary, and the eye appeal is formidable. Census: 96 in 67 (4 in 67+, 1 in 67 ★), 1 finer (8/18). NGC ID# 257L, PCGS# 7365

3869 1925-S MS64+ PCGS. CAC. The 1925-S Peace dollar is very scarce in grades above MS64. This Plus-graded Choice example offers well-detailed design elements and lightly marked, lustrous surfaces with subtle hints of golden-tan toning. PCGS has graded 41 numerically finer examples (9/18). NGC ID# 257M, PCGS# 7366

3870 1926 MS66 PCGS Secure. The 1926 Peace dollar is moderately available in this grade, but PCGS lists no numerically finer coins (9/18). This Premium Gem has sharp design elements and a hint of light golden toning over the frosted surfaces. The preservation is as close to flawless as is ever seen on this issue. NGC ID# 257N, PCGS# 7367

3871 1928 MS65 PCGS. The 1928 Peace dollar is a key date in the series, from a small mintage of 360,649 pieces. This well-detailed Gem exhibits lustrous, well-preserved surfaces that show highlights of golden-tan toning. PCGS has graded 19 numerically finer examples (9/18). NGC ID# 257V, PCGS# 7373

3872 1928-S MS64+ PCGS. CAC. The monogram and portions of IN GOD WE TRVST are die doubled, usual for this conditionally rare issue. Iridescent lemon-gold toning graces each side of this attractive near-Gem. Lustrous and lightly toned with minor central incompleteness of strike.

Ex: Long Beach Signature (Heritage, 6/2014), lot 5349, which realized \$1,880. NGC ID# 257W, PCGS# 7374

3873 1934 MS66 PCGS Secure. The all-brilliant surfaces show rich, satiny mint luster and there are no abrasions, nor would one expect anything of significance to be evident on a dollar in this high grade. Sharply defined throughout. NGC ID# 257Y, PCGS# 7375

3874 1934-S AU58 PCGS. A sharp, lustrous example of this better late-series San Francisco issue, which boasts a small mintage of barely more than 1 million coins. Light golden toning graces each side and no significant abrasions are seen. Eye appeal is outstanding for the grade. NGC ID# 257Z, PCGS# 7377

3875 1934-S MS60 PCGS. Booming luster traverses this snow-white silver dollar. The strike shows only minor merging at the centers. Distributed marks are consistent with the grade. In uncirculated grades, the 1934-S is the key to the Peace dollar series. Encapsulated in an old green-label holder. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, MS62
Better Date in High Grade**

- 3876 1934-S MS62 NGC.** Barely more than 1 million silver dollars were struck at San Francisco in 1934. This issue is available for a price in most grades, but it is the scarcest Peace dollar overall in Uncirculated condition. Frosted, radiant cartwheel luster cascades across this MS62 example, illuminating sharp design elements. Scattered light abrasions limit the grade but are not overly distracting. NGC ID# 257Z, PCGS# 7377

- 3877 1935-S MS65+ PCGS. CAC.** Three rays below ONE. Lavender-red and blue-green toning enrich the upper obverse and lower reverse, but the majority of this lustrous Gem displays only light olive-gray patina. The cheek is uncommonly smooth, and the fields show only moderate grazes. A conditionally scarce final-year issue. NGC ID# 2583, PCGS# 7379

GOLD DOLLARS

- 3878 1849 Open Wreath, With L, D-2, Normal Stars, MS64 PCGS Secure.** The 5 o'clock star is boldly repunched. Normal date reverse with a radial crack through the D in UNITED. A lustrous and well-preserved caramel-gold near-Gem. The strike is sharp except on the lower reverse dentils. The Open Wreath is a single-year subtype collectible in quality Uncirculated grades. NGC ID# 25B9, PCGS# 521674 Base PCGS# 7502

- 3879 1849 Closed Wreath, D-5, Close Stars, MS63 PCGS.** Breen's "Heavy Date" variety. A lustrous and intricately struck example with peach-gold fields and apple-green margins. The profile is clashed through the D in DOLLAR. A lens reveals only minor marks on the left obverse field. The 1849 Closed Wreath is scarcer in Mint State than its Open Wreath predecessor. NGC ID# 25BA, PCGS# 521672 Base PCGS# 7503

**1850-O Gold Dollar, MS62
A New Orleans Condition Rarity**

- 3880 1850-O MS62 NGC. Variety 1.** The Type One design is the only gold dollar variant that incorporates stars. The obverse is one of the "cleanest" designs in American coin, featuring only the Liberty portrait inside a circle of 13 stars — ideal for such a small coin. The New Orleans Mint struck this type from 1849 to 1853. The 1850-O is the scarcest of these in Mint State. It has a mintage of only 14,000 pieces, the lowest for the type from this mint. Graded MS62, this Uncirculated example displays a bold strike and satiny straw-gold luster. Grade-limiting abrasions are light and scattered, posing little distraction. Census: 20 in 62, 6 finer (8/18). NGC ID# 25BJ, PCGS# 7512

- 3881 1854-S MS60 PCGS.** Elusive in all grades, the 1854-S is always popular as the only Type One gold dollar from the San Francisco Mint, which opened that year. This piece is fully struck and lustrous with rich red-gold and delicate sky-blue color. A few scattered abrasions are seen in the obverse field, limiting the grade. Ex: Long Beach Signature (Heritage, 9/2005), lot 4233, which realized \$2,300. NGC ID# 25C2, PCGS# 7527

- 3882 1855 Type Two MS62 NGC.** Although the 8 in the date is not fully struck because it is opposite the high relief portrait, the strike is otherwise exemplary. This light matte-golden representative offers bright mint luster and nearly unmarked surfaces. Struck from boldly clashed dies, which is typical for this short-lived and desirable type. Ex: Long Beach Signature (Heritage, 9/2005), lot 4248; Houston Money Show Auction (Heritage, 12/2014), lot 4462. NGC ID# 25C4, PCGS# 7532

- 3883 1855-C — Bent — NGC Details. XF. Variety 2.** The 1855-C is the sole Charlotte Type Two issue, and has a meager mintage of 9,803 pieces. The present example has luminous honey-gold surfaces. The obverse displays clash marks, and the CA in AMERICA shows incompleteness of strike. A bend is noticeable west of Liberty's neck and near the DO in DOLLAR, and the rim has a tiny piece out at 1 o'clock. NGC ID# 25C5, PCGS# 7533

**1856-S/S Type Two Gold Dollar, AU55
FS-501, Repunched Mintmark**

- 3884 1856-S/S FS-501 AU55 PCGS.** Repunched mintmark, as often seen. The obverse die of this Type II gold dollar is heavily cracked, and die clashing is visible on both sides. Despite the late die state, a sharp strike remains throughout both sides of this Choice About Uncirculated example. Rich-orange and lilac shades interplay with remnant mint luster for strong eye appeal. Several light marks are seen, including a small mark near the crook of the neck that imparts a minor bulge on the reverse near 1. NGC ID# 25C8, PCGS# 145703 Base PCGS# 7536

**1857-D Gold Dollar, AU55
Underrated, Low-Mintage Issue**

- 3885 1857-D AU55 NGC. Variety 9-L.** From a mintage of 3,533 pieces, the 1857-D gold dollar is a scarce issue in all grades, but its elusive nature is often overlooked, outside of series specialists. This lightly worn Choice AU specimen exhibits the usual softness on the top of Liberty's bonnet and the ribbon bow, with some dramatic clash marks on both sides. The lightly abraded orange-gold surfaces retain traces of original mint luster. Census: 25 in 55, 50 finer (9/18). NGC ID# 25CF, PCGS# 7546

3886 1858-S AU58 PCGS. The 1858-S (10,000 coins struck) is scarce this fine, and only a couple dozen examples are graded higher. Reddish-gold surfaces show faint hairlines, but luster remains vibrant and friction on the cheek and forecurls is trivial. Population: 17 in 58, 14 finer (8/18). NGC ID# 25CK, PCGS# 7550

3887 1870 MS63 PCGS Secure. Only 6,300 gold dollars were produced this year for circulation purposes. As a result, Mint State examples are scarce. This fully struck example shows attractive semiprooflike reflectivity in the fields. The reverse shows evidence of the die striations that created this partial mirroring. Population: 18 in 63, 55 finer (9/18). NGC ID# 25D6, PCGS# 7569

3888 1874 MS66 PCGS. Breen-6094. Only the L in LIBERTY is apparent. The 1 in the date is lightly repunched south, as in Breen-6095, though that is his "No LIBERTY" variety. A high-grade peach-gold example that boasts a bold strike and vibrant cartwheel sheen. A powerful loupe reveals only incidental field grazes. NGC ID# 25DC, PCGS# 7575

1878 Gold Dollar, MS63 Deep Prooflike Rare With the CAC Endorsement

3889 1878 MS63 Deep Prooflike NGC. CAC. A paltry mintage of 3,000 coins ensures the inherent popularity of the 1878 gold dollar. Most issues from the final three decades of this denomination's coinage have low mintage figures, but many of the later dates were preserved in quantity at the time of issue. The 1878 is scarce in Mint State. This CAC-approved Select example displays deeply prooflike fields and stark cameo contrast. No singular abrasions are seen. Census: 22 in 63, 24 finer; 5 in 63 Prooflike, 3 finer; 3 in 63 Deep Prooflike, 0 finer. CAC: 1 in 63, 13 finer (9/18). NGC ID# 25DG, PCGS# 7579

1879 Gold Dollar, MS65+ ★ Exceptional Visual Quality

3890 1879 MS65+ ★ NGC. CAC. Gold dollar production amounted 3,000 coins in 1879, this being one in a series of low-mintage issues toward the end of the series. Boldly contrasted, particularly on the obverse, this Gem is razor-sharp with light yellow-gold color and surprisingly few marks, even for the Gem assessment. Census: 34 in 65 (2 in 65 ★, 1 in 65+★), 36 finer. CAC: 13 in 65, 12 finer (9/18). NGC ID# 25DH, PCGS# 7580

1887 Gold Dollar, MS67 Conditionally Scarce Type Coin

3891 1887 MS67 NGC. CAC. The 1887 gold dollar boasts an enticingly low mintage of 7,500 coins, few of which survive in Superb Gem condition. This CAC-endorsed rarity is frosty and sharp with almost flawless luster. Original wheat-gold hues characterize each side. Collectors will be hard pressed to locate a visually finer example of this late-series Type Three gold dollar. Census: 16 in 67 (1 in 67 ★), 4 finer. CAC: 14 in 67, 4 finer (9/18). NGC ID# 25DS, PCGS# 7588

3892 1887 MS63 Prooflike NGC. Only 7,500 gold dollars were struck in 1887. While many pieces display traces of semireflectivity, few coins possess the blatant Prooflike contrast demonstrated by this orange-gold example. The headdress, curls, and wreath are strong. Wispy lines occur in the fields. Census: 10 in 63 Prooflike, 20 finer (9/18). NGC ID# 25DS, PCGS# 77588

3893 1888 MS63 Prooflike NGC. Seldom seen with Prooflike reflectivity, the 1888 is scarce as such. This Select example displays attractive lemon-gold color and mirrored fields on both sides that contrast with lightly frosted devices. LIBERTY is readable except for R and T. Some wispy hairlines exist and a tiny, Mint-made planchet void between L and A in DOLLAR are noted, although the eye appeal suggests an even finer grade. NGC ID# 25DT, PCGS# 77589

3894 1889 MS66 PCGS Secure. The 1889 is a popular issue to target because of its low mintage, final-year status, and excellent production quality. This gleaming, fully struck Premium Gem displays small coppery alloy spots on the obverse and a more colorful spot above the headdress. A graze occurs below ER. NGC ID# 25DU, PCGS# 7590

3895 1889 MS67 NGC. The gold dollar had not been meaningfully used in commerce for years before the denomination was abolished after 1889. This final-year Superb Gem from a mintage of 28,950 pieces features a full strike and scintillating orange-gold surfaces. NGC has graded 16 finer submissions (9/18). NGC ID# 25DU, PCGS# 7590

CLASSIC QUARTER EAGLES

1835 Two and a Half, MS61 Scarce in Mint State

- 3896** 1835 MS61 NGC. Breen-6141, Variety 6, R.2. LIBERTY is repunched, most dramatically at I and Y, and the M in AMERICA is distant from A. The surfaces of this greenish-gold Mint State example are widely prooflike with tiny field chatter scattered across the reflective fields. Aside from some rounding of the hair curls, all of the motifs and stars are sharply struck. The weirdly spaced legend on the reverse makes this an interesting Classic Head variety, with plentiful eye appeal and gleaming mint luster. Census (all varieties): 37 in 61 (1 in 61 ★), 43 finer (9/18). NGC ID# 25FT, PCGS# 7693

- 3897** 1836 Block 8 AU58 NGC. Breen-6144, Variety 15, R.2. A lovely orange-gold representative. The strike is good despite blending on Liberty's curls and the eagle's leg feathers, as usual for the variety. Free from any noticeable abrasions. An impressive Borderline Uncirculated Classic type coin. NGC ID# 25FU, PCGS# 97694

LIBERTY QUARTER EAGLES

- 3898** 1840 XF45 NGC. Christian Gobrecht's Coronet design was introduced on the quarter eagle in 1840, when 18,859 pieces were struck. This first-year example in Choice XF condition possesses terrific eye appeal — the result of original red and olive-gold color and a dearth of heavy, obtrusive marks. Detail is slightly soft at the centers, but the rims are bold. NGC ID# 25GA, PCGS# 7717

1842-O Two and a Half, Unc Details Sharp and Satiny

- 3899** 1842-O — Cleaned — NGC Details. Unc. Variety 1. Uncirculated examples of the 1842-O quarter eagle are rare. This example shows no wear, although a light cleaning prevents a numeric grade from NGC. The strike is sharp and each side has satiny olive-gold patina with a slightly glossy appearance. Only 19,800 examples of this issue were struck, and most were lost to attrition. NGC ID# 25GK, PCGS# 7726

1843-D Quarter Eagle, AU53 Small D Variety

- 3900** 1843-D Small D AU53 NGC. Variety 4-F, as usual for this early Dahlonega issue. Most examples of this date are Small D coins, ideal for date and type collectors. The 1843-D quarter eagle is generally an available date, although it is conditionally rare in Mint State. This collectible AU53 example displays bright yellow-gold surfaces with light wear and remnants of luster. No significant abrasions are noted. NGC ID# 25GP, PCGS# 7730
- 3901** 1856-O AU53 NGC. Variety 2. Gold coin mintages at New Orleans dropped with the advent of the San Francisco Mint. The 1856-O has a mintage of only 21,100 pieces, and Mint State survivors are very rare. This lightly circulated apple-green and wheat-gold example displays relatively few marks, though we note contact on the upper lip and on the obverse rim at 9 o'clock. NGC ID# 25JA, PCGS# 7780
- 3902** 1861 New Reverse, Type Two, MS63 PCGS. The round O in OF and thin, widely spaced arrowheads are two quick ways to attribute the New Reverse — the scarcer of two varieties for the year. Thick mint frost covers strong peach-gold surfaces. There are a couple of ticks in the upper reverse field, but not much else to limit the grade. NGC ID# 25JX, PCGS# 7794

1861 Liberty Quarter Eagle, MS64 Scarcer New Reverse Type

- 3903** 1861 New Reverse, Type Two, MS64 PCGS Secure. CAC. The scarcer New Reverse variety is easily identified by the slimmer, widely separated arrow heads and the rounded shape of the O in OF. This impressive Choice example exhibits sharply detailed design elements throughout, and the well-preserved orange-gold surfaces radiate vibrant mint luster, with terrific eye appeal. PCGS has graded 50 numerically finer examples (9/18). NGC ID# 25JX, PCGS# 7794

**1873 Open 3 Two and a Half, MS65
Frosted, Yellow-Gold Surfaces**

3904 1873 Open 3 MS65 NGC. Even though a substantial number of 1873 quarter eagles were produced of both Open 3 and Closed 3 variants, this date is a challenge in Gem condition. NGC has only certified 15 other MS65 coins and one piece finer (9/18). This is a light, bright yellow-gold example that is fully struck throughout. The mint luster is bright and frosted and of special note and interest on this piece. NGC ID# 25KN, PCGS# 7817

3905 1889 MS64 NGC. CAC. Strike definition is nearly full on each side. The sole exceptions are the radial lines on stars 1 and 2. Terrific visual appeal is the direct result of lively mint frost that blends with original rose-gold color. Census: 40 in 64 (1 in 64+), 14 finer. CAC: 15 in 64, 6 finer (9/18). NGC ID# 7JTT, PCGS# 7841

3906 1901 MS66 PCGS Secure. A delightful Premium Gem example of this turn-of-the-century issue, with sharply detailed design elements and well-preserved peach-gold surfaces that radiate vibrant, satiny mint luster. Overall eye appeal is terrific. PCGS has graded 23 numerically finer examples (9/18). NGC ID# 25LS, PCGS# 7853

3907 1902 MS66 PCGS. A full strike and glistening mint luster define this Premium Gem, one of 133,540 quarter eagles produced in 1902. These coins were often given as gifts and saved, explaining the issue's relative accessibility in high grades. Still, the date is elusive any finer. NGC ID# 25LT, PCGS# 7854

3908 1906 MS65 PCGS. A late-date representative from a mintage of 176,330 coins, this 1906 quarter eagle is fully struck and marvelously clean. The only imperfection is a small depression in the lower-right obverse field. Yellow-gold surfaces are smooth and frosty. NGC ID# 7JW8, PCGS# 7858

3909 1907 MS66 PCGS Secure. CAC. The 1907 is widely recognized date for type purposes for the Gobrecht-inspired type that began in 1840. This is a remarkably lustrous example, frosted in nature, that has a light accent of reddish patina. Fully struck throughout. NGC ID# 2688, PCGS# 7859

PROOF LIBERTY QUARTER EAGLE

3910 1901 — Cleaned — ANACS. PR58 Details. JD-1, Low R.4. A patch of hairlines near star 10 accounts for the ANACS notation. Frosty motifs contrast with the reflective fields, though faint marks from non-numismatic storage and handling indicate momentary circulation.

Ex: Long Beach Signature (Heritage, 6/2012), lot 4870, which realized \$1,840.

INDIAN QUARTER EAGLES

3911 1908 MS65 PCGS. An impressive Gem quarter eagle from the first year of the Indian design, this coin is sharply detailed in most areas, with just a trace of softness on the eagle's shoulder. The pleasing orange-gold surfaces are lustrous on both sides. NGC has certified 71 numerically finer examples (8/18). NGC ID# 288Y, PCGS# 7939

3912 1909 MS64 PCGS Secure. An impressive Choice specimen of this early series issue, with sharply detailed design elements throughout and well-preserved orange-gold surfaces that radiate vibrant mint luster on both sides. Eye appeal is outstanding. NGC ID# 288Z, PCGS# 7940

**1909 Indian Head Quarter Eagle, MS65
Optimal Quality for a High-Grade Set**

3913 1909 MS65 PCGS. The 1909 Indian quarter eagles are somewhat available in Gem condition but rare any finer, making the MS65 grade the optimal alternative to those assembling a high-grade set. This impressive Gem displays strong mint luster in the recesses that illuminate the attractive, orange-gold coloration. A sharp strike provides excellent definition throughout the headdress and at the eagle's shoulder. There are no large contacts or abrasions to report, and a lens reveals remarkably few marks of any kind on this charming MS65 example. PCGS reports just 22 numerically finer coins (9/18). NGC ID# 288Z, PCGS# 7940

**1910 Quarter Eagle, MS65
A Rarity in Finer Condition**

3914 1910 MS65 PCGS. Ex: Fuljenz Collection. Within any grade, the nicest Indian quarter eagles in the eyes of most series collectors are those that display numerous colors throughout generally golden patina. On this Gem 1910 coin, wisps of rose and more prominent greenish accents complement luminous orange-gold undertones. Eye appeal is spectacular, especially considering the cleanliness of the fields that comes with the MS65 grade. The strike is also sharp on this attractive type or date coin. PCGS lists a mere 11 numerically finer representatives (8/18). NGC ID# 2892, PCGS# 7941

**1911 Two and a Half, MS65
Nearly Uncollectible Finer**

3915 1911 MS65 NGC. The 1911 Indian quarter eagle is only marginally scarce in Gem condition, although there are just nine numerically finer pieces certified — eight at NGC and one at PCGS (8/18). This MS65 coin displays sharp devices and soft, satiny luster with a yellow-gold hue. A circular area of even brighter color illuminates the Indian's face and the adjacent field. No distracting abrasions are seen. NGC ID# 7KR6, PCGS# 7942

3916 1911-D — Cleaned — NGC Details. AU. Although undesignated as such on the NGC insert, the Denver mintmark is bold. This richly detailed key date quarter eagle shows slight high-point wear, but hairlines are faint and minimal. The olive-gold surfaces are minimally abraded except for a horizontal line through GOD.

**1913 Two and a Half, MS65
Frosty and Luminous**

3917 1913 MS65 NGC. CAC. This Gem 1913 Indian Head quarter eagle is among the finest pieces endorsed by CAC, and it is a rarity as such. NGC reports only five numerically finer submissions (8/18). Wisps of silvery-lilac color grace the otherwise frosty, peach-gold and orange surfaces. Abrasions are almost nonexistent and eye appeal is outstanding. NGC ID# 7KR9, PCGS# 7945

3918 1914 MS63 NGC. CAC. This attractive Select specimen exhibits sharply detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster on both sides. Eye appeal is quite strong. From a smallish mintage of 240,000 pieces. NGC ID# 7KRA, PCGS# 7946

**1914 Two and a Half, MS64
Condition Key**

3919 1914 MS64 PCGS Secure. The 1914 Indian quarter eagle is a condition key at the Gem grade level, but it is available for collectors in MS64. This piece displays frosted original luster in shades of peach and olive-gold, with remarkably few field marks for the grade. The design elements are well-struck and eye appeal is outstanding. PCGS lists 66 finer submissions (9/18). NGC ID# 7KRA, PCGS# 7946

3920 1925-D MS65+ PCGS. Lustrous, variegated gold toning ranges from pale-green to vibrant, peach-red hues and lemon-yellow highlights. The PCGS Plus designation is well-deserved for eye appeal alone, but the strike is considerably sharper than often seen for this Denver issue, too. Abrasions and marks are minimal to non-existent across the attractive, frosted surfaces. Population: 41 in 65+, 39 finer (8/18). NGC ID# 7KRD, PCGS# 7949

3921 1925-D MS65+ PCGS. CAC. High-grade examples of the 1925-D are often found in collectors' type sets. The issue is readily available in grades as high as MS65, but its accessibility trails off in MS66. This radiant, fully struck quarter eagle is exceptionally clean with lavish yellow-gold color. NGC ID# 7KRD, PCGS# 7949

3922 1926 MS65 NGC. The 1926 Indian quarter eagle can be located in MS65 condition with a little patience, but finer coins are elusive. This sharply detailed Gem displays lustrous orange-gold surfaces with only minor imperfections. NGC has graded 23 numerically finer examples (8/18). NGC ID# 7KRE, PCGS# 7950

3923 1927 MS65 NGC. Despite a substantial mintage of 388,000 pieces, the 1927 Indian quarter eagle is an elusive issue in grades above MS65. This sharply detailed, lustrous Gem exhibits virtually pristine orange-gold surfaces. NGC has graded 10 numerically finer examples (8/18). NGC ID# BUTL, PCGS# 7951

3924 1928 MS65 NGC. Vibrant luster graces the shimmering yellow-gold surfaces of this attractive Gem. The strike is sharp, and the overall preservation is remarkable. Like the other 1920s quarter eagle issues, this issue is available for a price in Gem, but highly elusive any finer. NGC has graded only 23 such pieces (8/18). Ex: *Long Beach Signature* (Heritage, 5/2008), lot 3109, realized \$3,738.65. NGC ID# 289E, PCGS# 7952

3925 1929 MS65 PCGS. Ex: Fuljenz Collection. A delightful Gem specimen from the final year of the denomination, this coin offers sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster. PCGS has graded five numerically finer examples (8/18). NGC ID# 289F, PCGS# 7953

THREE DOLLAR GOLD PIECES

3926 1854 MS62 PCGS. Eye appeal is excellent for the grade. Marks are relatively scant, and each side features vibrant luster that melds with deep orange-gold color and lavender accents. The bowknot and lower curls are slightly soft, but detail is strong elsewhere. Pleasing first-year type coin. NGC ID# 25M3, PCGS# 7969

3927 1854-O XF40 PCGS Secure. Variety 2. The dies are lapped as usual, although the strike is sharp across all design elements. Light wear leaves most details intact and the surfaces have minimal abrasions. Original olive-gold patina is highly appealing, adding to the appeal of this collector-grade New Orleans type coin. NGC ID# 25M5, PCGS# 7971

3928 1854-O XF45 PCGS. Variety 2. Southern issues of the three dollar series were limited to the scarce 1854-O and the rare 1854-D. Both have the small DOLLARS subtype struck only in the introductory year of the series. This slightly glossy apricot-gold example is inoffensively marked and displays luster throughout the country name. NGC ID# 25M5, PCGS# 7971

**1854-O Three Dollar, AU53
Rich Color**

- 3929 1854-O AU53 PCGS. Variety 2.** Struck from the usually seen lapped dies, the 1854-O three dollar is popular mainly because it is the only year the New Orleans mint struck this denomination. The surfaces on this piece are surprisingly attractive with richer shades of reddish patina interspersed with yellow-gold, and remarkably few abrasions are present (none that are immediately obvious). NGC ID# 25M5, PCGS# 7971

- 3930 1856 AU58 PCGS Secure.** Areas of mint luster illuminate greenish-gold color throughout both sides of this attractive, lightly abraded near-Mint State three dollar gold. The obverse strike is sharp except near Liberty's ear and at the lower-most curl, where the hair strands merge together. Likewise, some the wreath's high points show a combination of brief wear and soft strike. The coin's natural eye appeal remains undiminished. NGC ID# 25M8, PCGS# 7974

- 3931 1857 AU55 NGC.** Despite a mintage similar to its S-mint counterpart (20,891 coins vs. 14,000 coins), the 1857 three dollar is much more collectible, especially in high grades. A touch of friction graces the high points of this honey-gold representative. Definition remains strong, however, and abrasions are minor. NGC ID# 7K5G, PCGS# 7976

**1859 Three Dollar Gold, MS62
Lightly Marked Satiny Surfaces**

- 3932 1859 MS62 PCGS Secure.** From a mintage of 15,558 pieces, the 1859 three dollar gold piece is a scarce-to-rare issue in all Mint State grades. This impressive MS62 specimen offers well-detailed design elements, with a touch of the usual softness on the ribbon bow and faint clash marks on both sides. The lightly marked orange-gold surfaces radiate satiny mint luster. Population: 45 in 62, 57 finer (9/18). NGC ID# 7K5K, PCGS# 7979

- 3933 1874 AU58 NGC.** Original luster remains in the fields of this near-Mint 1874 three dollar gold piece. The wreath bow is weakly struck as usual, but the design is otherwise sharp and shows only trivial wear. No contact marks detract from the eye appeal. An excellent type coin. NGC ID# 7KDE, PCGS# 7998

- 3934 1888 AU55 PCGS. Gold CAC.** This late-date coin derives from a mintage of 5,000 pieces. Deep orange and light lilac-gold hues adorn minimally worn surfaces. Detail is good everywhere except the bowknot, as usual. Housed in a green label holder. This is the highest graded 1888 three dollar with a gold CAC approval sticker (8/18). NGC ID# 25NB, PCGS# 8010

EARLY HALF EAGLES

**1800 BD-2 Five Dollar
AU Sharpness**

- 3935 1800 BD-2, High R.3 — Mount Removed, Rim Filing — NGC Details. AU.** Bass-Dannreuther Die State c/d. Solder remnants on the edge near 3 o'clock confirm past jewelry use. The straw-gold surfaces display horizontal hairlines, and the rims are filed throughout. Nonetheless, a lightly circulated example of this coveted early gold type. A field die lump beneath the I in PLURIBUS is a pick-up point for the scarce BD-2 die marriage.

**1807 Bust Left Half Eagle, AU Details
BD-8, Lustrous Surfaces**

- 3936 1807 Bust Left, BD-8, R.2 — Obverse Scratches — NGC Details. AU.** Bass-Dannreuther Die State d/b, clashed. This is a sharp Bust Left type coin with lustrous surfaces and pleasing orange-gold color in the fields. The central areas exhibit light peach hues. A short mark in the left obverse field and several faint vertical pin scratches on the Liberty portrait deny a numeric grade, but this piece retains pleasing visual appeal nonetheless.

LIBERTY HALF EAGLES

- 3937 1839-D — Tooled — PCGS Genuine Secure. Variety 2-A.** In our opinion, this coin has the details of an XF specimen. The caramel-gold surfaces are mildly luminous. Moderate marks are near star 1 and Liberty's chin. A late die state with radial cracks between OF and through the U in UNITED. The sole Dahlonega Liberty five issue with an obverse mintmark. Only 18,939 pieces were struck.

- 3938 1844-D — Cleaned — NGC Details. AU. Variety 11-G.** A caramel-gold Dahlonega type coin that retains most of its initial definition, though the strike exhibits blending on Liberty's lovelock and the eagle's neck. The fields show signs of smoothing, below the STA in STATES and between stars 2 and 3. NGC ID# 25T9, PCGS# 8221

- 3939 1853 MS61 NGC.** The 1853 is a No Motto type issue, but it is usually encountered in XF or AU grades. Uncirculated examples are scarce. This attractive MS61 features a bold strike and is free from visible marks, though an area of wispy abrasions is above the eagle's head. *Ex: Long Beach Signature (Heritage, 6/2013), lot 5716, where it realized \$1,351.25.* NGC ID# 25UD, PCGS# 8253

**1854 Five Dollar, MS62
Frosty Original Luster**

- 3940 1854 MS62 PCGS Secure.** The 1854 is among the more plentiful No Motto half eagles in Mint State, but such examples are still scarce overall. This piece displays sharp detail and shimmering orange-gold luster. Only light grazes affect the frosted surfaces, and eye appeal is outstanding. Higher-grade examples of this issue are decidedly rare. Population: 31 in 62, 11 finer (9/18). NGC ID# 25UG, PCGS# 8256

**1854-D Half Eagle, Crisply Struck AU58
Weak D Mintmark**

- 3941 1854-D Weak D AU58 PCGS. Variety 37-DD or Variety 37-EE.** Any semblance of a D mintmark on this half eagle is nearly impossible to discern, but we bow to PCGS and their ability to identify the variety. Conceivably, the mintmark may be either a Large D or Medium D, also indeterminate. Gleaming orange-gold color and an otherwise deep, sharp strike accompany nearly full luster on both sides of this attractive five dollar gold. A touch of wear and tiny marks define the near-Mint grade. Population: 3 in 58, 0 finer (9/18). NGC ID# 25UL, PCGS# 98258 Base PCGS# 8258

- 3942 1861-S Good 4 NGC.** The 1861-S Liberty half eagle is an elusive issue in all grades, from a small mintage of 18,000 pieces. This well-worn Good 4 example retains all major design elements complete in outline and the date and all lettering remain legible. Census: 1 in 4, 44 finer (9/18). NGC ID# 25VN, PCGS# 8291

- 3943 1874-CC Fine 15 PCGS. Variety 1-B.** A stingy mintage of 21,198 pieces nonetheless required six die pairs for its production. 1-B, 1-C, and 2-C are the usually encountered varieties, while 1-A, 1-E, and 2-D are rarities. This better Carson City half eagle offers smooth caramel-gold surfaces. The curls and wingtips are worn, but the stars display sharp centrals, and ample plumage remains. NGC ID# 25WP, PCGS# 8334

- 3944 1877-S AU50 PCGS.** The 1877-S derives from a mintage of 26,700 coins, and this is one of about 300 or so pieces believed extant. Still, it is the most collectible of the three half eagle issues for the year. This orange-gold representative exhibits moderate abrasions and slight high-point wear. Overall impression is strong. Population: 15 in 50, 25 finer (8/18). NGC ID# 25X3, PCGS# 8344

- 3945 1879-S MS62 NGC.** The 1879-S half eagle is elusive in Mint State. This piece shows a hint of reflectivity in the fields with grade-appropriate abrasions throughout. Honey-gold luster is original. Under a loupe, minor strike softness is visible on the hair curls around Liberty's face and on the eagle's talons and the fletchings. Census: 56 in 62 (3 in 62+), 28 finer (9/18). NGC ID# 25X9, PCGS# 8350

**1882-CC Five Dollar, AU55
Lustrous Fields**

- 3946 1882-CC AU55 NGC. Variety 1-A.** The 1882-CC half eagle is a rarity in Uncirculated condition, although AU coins are yet collectible. This Choice AU example retains partial luster in the fields and has sharp detail on the devices. Light handling marks accompany a brush of high-point friction, but the eye appeal is outstanding for the grade. NGC ID# 25XH, PCGS# 8359

- 3947 1885-S MS65 NGC.** With a mintage of 1.2 million coins, the 1885-S half eagle is widely collectible through grades as high as MS65, yet only a handful of pieces are graded higher. Clean yellow-gold surfaces exhibit rose and mint-green accents and are awash in frosty luster. Well-struck. NGC ID# 2Y7X, PCGS# 8368

- 3948 1890 AU58 NGC.** The 1890 Liberty half eagle is scarce-to-rare in all grades, due to its meager mintage of 4,240 pieces. This attractive near-Mint example exhibits just a trace of high-point wear, with still lustrous lemon-yellow surfaces that show minor abrasions and chatter in the fields. Census: 21 in 58, 22 finer (9/18). NGC ID# 25Y2, PCGS# 8375

- 3949 1891-CC AU55 NGC. Variety 1-A.** Light wear on the eagle's neck feathers and Liberty's eyebrow confirms a momentary stint in Old West commerce. The minimally marked surfaces are apricot-gold save for a hint of peach-red toning on the left portion of the date. An early die state without any cracks. NGC ID# 25Y5, PCGS# 8378

**1891-CC Half Eagle, MS62
Bold Impression**

- 3950 1891-CC MS62 PCGS. Variety 2-A.** Repunching occurs on the final 1 in the date. Large quantities of five dollar gold pieces were struck at Carson City in 1891 expressly for reserve purposes. Overseas exports had reduced the Treasury's stock of gold coins, which needed to be shored up. Both sides of this piece display a bold impression. Scattered abrasions over yellow-gold surfaces limit the technical grade. Vibrant luster enhances the visual appeal. NGC ID# 25Y5, PCGS# 8378

- 3951 1893-CC AU53 NGC. Variety 1-A.** A short spike from a dentil points to the tip of the bust truncation. Soft mint luster glows beneath slightly subdued, natural buff-gold color of this About Uncirculated 1893-CC five. The 60,000-piece mintage provides a ready supply of the issue, yet not many display the smooth, original surfaces of this solid AU example. Deep-orange accents outline the sharply struck motifs. NGC ID# 25YB, PCGS# 8384

3952 1893-CC AU55 PCGS Secure. Variety 1-A. Luster, strike, and eye appeal are seldom problems for 1893-CC half eagles. Rather, bagmarks plague the issue — even after a substantial time in circulation, surface abrasions often remain. This Choice About Uncirculated example is one of the fortunate few pieces that survive without any heavy marks. Mint luster remains strong across the sharply struck surfaces, which show only momentary wear before the coin was put aside and carefully preserved. NGC ID# 25YB, PCGS# 8384

3953 1893-S MS64 PCGS. Although available in bagmarked lower Mint State grades, the 1893-S becomes conditionally challenging at the MS64 level. This attractive near-Gem is lustrous and displays rich apricot color, with a hint of greenish-gold hue on the cheek. The strike is good, and the field and portrait are only minimally marked. Housed in a green-label holder. Population: 44 in 64 (11 in 64+), 4 finer (9/18).

Ex: Central States Signature (Heritage, 5/2005), lot 8671; Long Beach Signature (Heritage, 2/2006), lot 2981, which realized \$2,530. NGC ID# 25YD, PCGS# 8386

3954 1895 MS62 Prooflike NGC. NGC has certified a grand total of 19 Prooflike 1895 half eagles in all grades, in comparison to nearly 9,000 non-prooflike 1895 fives — a huge variance by any measure. This gleaming, orange-gold example earns the coveted Prooflike designation despite a scattering of tiny marks throughout the mirrorlike fields. The strike is razor-sharp. Census: 9 in 62 Prooflike (1 in 62+ Prooflike), 3 finer (8/18). NGC ID# 25YH, PCGS# 78390

3955 1901/0-S FS-301 MS64 PCGS. The upper curve of an underdigit 0 bookends the top of the final 1 in the date. The 1901/0-S is the final major overdate not caused by the use of different-dated hubs. Instead, the final digit on a leftover 1900 working obverse die was mostly effaced and overdated. A crisply struck and highly lustrous honey-gold near-Gem kept from a finer grade by delicate field grazes. NGC ID# 25YX, PCGS# 145720 Base PCGS# 8403

3956 1901-S MS65+ PCGS Secure. If one were to target a single Liberty Head half eagle for type representation, it would likely be the 1901-S. Scintillating mint frost over impeccable yellow-gold surfaces delivers tremendous visual appeal to match the high-end technical quality. The star radials are mostly clear and the centers are crisp. NGC ID# 25YX, PCGS# 8404

3957 1902-S MS65 PCGS Secure. Struck to the extent of nearly 1 million coins, the 1902-S is generally available even at this high level. Finer examples become challenging. Mint luster is thick and frosty over peach-gold surfaces, and central detail is good. An abrasion between stars 7 and 8 and an as-made planchet flake behind Liberty's hair bun are the only mentionable flaws. PCGS reports 46 finer submissions (8/18). NGC ID# 25YZ, PCGS# 8406

1903-S Five Dollar, MS65+ Elusive CAC-Endorsed Example

3958 1903-S MS65+ PCGS. CAC. The 1903-S is ideal for type purposes in lower grades, but it becomes a conditionally scarce date at the current level. Only nine Gem 1903-S half eagles at PCGS are Plus-designated, and just 30 finer coins are reported (9/18). This CAC-endorsed coin is sharp and frosty with original peach-gold luster. Only a few wispy surface grazes are apparent beneath a loupe. NGC ID# 25Z3, PCGS# 8408

INDIAN HALF EAGLES

3959 1908-S AU55 PCGS Secure. The low-mintage 1908-S serves as one of the series semikeys. Only 82,000 pieces were struck in San Francisco during the Pratt design's inaugural year. Light yellow-gold surfaces are strongly detailed with a trivial trace of high-point friction. A few minor hairlines are noted. NGC ID# 65K3, PCGS# 8512

3960 1909 MS64 PCGS Secure. The 1909 half eagle serves as a plentiful type coin through MS64 condition but becomes elusive in better grades. Bright mint luster shines from strongly defined yellow-gold surfaces. There are a few small ticks in the right reverse field, but not much else to limit the grade. NGC ID# 28DH, PCGS# 8513

3961 1911-D AU53 NGC. Rich orange-gold surfaces have an almost mattelike quality and show thin marks on each side, none of which are singularly distracting. Although the mintmark is slightly difficult to discern, detail on the other elements is good. A mintage of 72,500 coins makes this a sought-after series semikey. NGC ID# 28DR, PCGS# 8521

1915-S Five Dollar, MS61 Better San Francisco Issue

3962 1915-S MS61 NGC. Although somewhat available in circulated conditions through the About Uncirculated level, the 1915-S is one of the more challenging Indian Head fives in Mint State grades. Overall, the 1915-S ranks fourth in series rarity with a mintage of 164,000 pieces. Most examples show numerous abrasions and are weakly struck at the peripheries, although this MS61 fares better than most in those categories. Marks are fewer than expected and generally minor in appearance. Gleaming yellow-gold surfaces display bright mint luster. NGC ID# 25ZR, PCGS# 8531

LIBERTY EAGLES

1843 Liberty Eagle, AU55 Rare Issue in High Grade

3963 1843 AU55 PCGS Secure. The 1843 Liberty eagle claims a business-strike mintage of 75,462 pieces, but few examples were saved for numismatic purposes, making the issue rare in high grade. This impressive Choice AU specimen is sharply detailed in most areas, with just a trace of high-point wear and a touch of softness on some star centers. The lustrous orange-gold surfaces show a number of minor abrasions on both sides, but none that merit individual mention. Population: 6 in 55, 3 finer (9/18). NGC ID# 262P, PCGS# 8588

3964 1843-O AU50 PCGS Secure. Variety 3. The tail feathers are mostly lapped away, characteristic of Variety 3. The 1843-O is a collectible New Orleans No Motto issue, although scarcer than the 1847-O and 1851-O. This lightly circulated lemon-gold representative is moderately bright and displays the expected number of unimportant marks. NGC ID# 262R, PCGS# 8589

3965 1846 XF40 PCGS. The Philadelphia Mint struck only 20,095 Liberty eagles in 1846, most of which circulated and were lost to attrition. Only a handful of Uncirculated pieces surface, and XF-AU coins are scarce. This collector-grade example displays original olive-gold patina with rich orange undertones. The devices are sharp, showing trivial wear. An eye-appealing coin for collectors who appreciate old-time patina. Population: 15 in 40, 51 finer (8/18). NGC ID# 262W, PCGS# 8594

**1847 Liberty Eagle, MS61
Elusive Issue in Mint State**

3966 1847 MS61 NGC. Despite a substantial mintage of 862,258 pieces, the 1847 Liberty eagle is an elusive issue in all Mint State grades today. This impressive MS61 example offers well-detailed design elements, with just a touch of the usual softness on some star centers. The yellow and rose-gold surfaces show the expected number of minor contact marks and chatter for the grade, with traces of prooflike reflectivity clinging to protected areas. Census: 36 in 61 (1 in 61+, 1 in 61 ★), 15 finer (9/18). NGC ID# 262Z, PCGS# 8597

3967 1854 AU55 NGC. Ex: *S.S. Republic*. Luster remains in the protected portions of the fields on this Choice About Uncirculated 1854 eagle. Light wear and scattered abrasions are not bothersome for the grade. The *S.S. Republic* sank off the coast of Georgia in 1865. Salvaged gold coins from the wreck site typically have the bright yellow-gold appearance displayed by this piece. NGC ID# 263G, PCGS# 8613

3968 1856 AU58 NGC. Ex: *S.S. Republic*. The surfaces of this near-Mint 1856 ten are remarkably smooth for a coin pedigreed to the *S.S. Republic*, although there are a few scattered marks seen with a loupe. Luster remains in the protected portions of the fields and the bright yellow-gold surfaces showcase sharp design elements. NGC ID# 263P, PCGS# 8619

3969 1857 AU55 NGC. Ex: *S.S. Republic*. A hint of reflectivity remains in the protected regions of the fields on this bright yellow-gold shipwreck coin. The strike is sharp and wear is trivial. Light field chatter appears on each side but there are no bothersome abrasions. Census: 27 in 55, 29 finer (9/18). NGC ID# 55GV, PCGS# 8622

**1859 Ten Dollar, AU58
Ex: *S.S. Republic***

3970 1859 AU58 NGC. Ex: *S.S. Republic*. The Philadelphia Mint struck 16,013 Liberty eagles in 1859, almost all of which were dispersed into circulation. Surviving Mint State coins are rare, and high-end AU examples are also elusive. This near-Mint representative comes from the *S.S. Republic* shipwreck, and thus its bright yellow-gold surfaces are expected. Detail is sharp and surface abrasions are generally light. Census: 23 in 58, 8 finer (9/18). NGC ID# 263Z, PCGS# 8628

3971 1860 XF45 NGC. Bulging Bun subtype. The radiant orange-gold surfaces display distributed small marks, consistent with light to moderate circulation. Luster outlines the stars and fills the legends. The 1860 has a low mintage of just 15,055 pieces and is much scarcer than its 1861 successor. Housed in a circa-2000 holder. NGC ID# 2644, PCGS# 8631

1865-S Normal Date Ten, AU Details

3972 1865-S — Obverse Damage — NGC Details. AU. The 1865-S has a low mintage of 16,700 pieces, divided between the Normal Date and Inverted Date varieties. Although the latter is better known, the Normal Date is rarer. AU examples are rare, and the present piece would secure Condition Census status were it not for a capital J counterstamp on Liberty's back shoulder tip, and a pair of small roundish digs in the obverse field near the chin. NGC ID# 55MU, PCGS# 8642

3973 1871-S VF35 PCGS. CAC. From a small mintage of 16,500 pieces, the 1871-S Liberty eagle is an elusive issue in all grades today. This attractive Choice VF specimen exhibits moderate wear on the devices and the orange-gold surfaces are lightly abraded, aside from a V-shaped scratch in the left obverse field. Population: 5 in 35, 51 finer. CAC: 1 in 35, 6 finer (9/18). NGC ID# 264Y, PCGS# 8662

3974 1878 MS62 PCGS. From a mintage of 73,700 pieces, the 1878 Liberty eagle is scarce in Mint State grades. This impressive MS62 example displays just a touch of the usual softness on Liberty's curls and some star centers, while the reverse is sharply detailed throughout. The lustrous orange-gold surfaces exhibit the expected number of minor contact marks for the grade. Population: 56 in 62 (3 in 62+), 20 finer (9/18). NGC ID# 265J, PCGS# 8680

3975 1881-CC XF40 PCGS. Variety 1-A. All Carson City ten dollar issues prior to 1890 are rare. The 1881-CC mintage was just 24,015 pieces with a survival rate of approximately 3%. The present olive-gold example displays noticeable remaining luster. The surfaces are minimally marked for a circulated Old West gold coin, though we note a tick above Liberty's shoulder. NGC ID# 265X, PCGS# 8692

3976 1882-O AU55 NGC. Variety 1. Uncirculated 1882-O eagles are rare, and high-end AU coins are only marginally available. This piece displays sharp detail with glimmers of reflectivity in the protected portions of the fields. Bright straw-gold surfaces yield deeper olive, orange, and lilac overtones, which mask scattered abrasions. Census: 31 in 55, 59 finer (8/18). NGC ID# 55GJ, PCGS# 8697

3977 1890-CC XF45 NGC. Variety 1-A. A complete set of Carson City ten dollar gold pieces is an attainable goal, although both the 1870-CC and 1879-CC will require persistence and a fat wallet. This 1890-CC is a Choice collector-grade example, with generous mint luster remaining among the medium-gold devices, and only a few scattered pinprick marks. Both sides show signs of light high-point wear on sharply struck motifs. NGC ID# 266S, PCGS# 8718

3978 1890-CC AU55 PCGS Secure. Variety 1-A. A well-defined butter-gold Choice AU example. Luster fills the borders, and the only noticeable mark is a line near the E in AMERICA. The 1890-CC was the first Carson City ten dollar issue since 1884, and has a low mintage of 17,500 pieces. Survivors are scarce relative to demand. NGC ID# 266S, PCGS# 8718

3979 1891-CC MS61 NGC. Variety 2-B. This vibrantly lustrous 1891-CC eagle is frosty and sharply struck, showing natural wheat-gold coloration and a captivating cartwheel effect. Scattered small abrasions limit the grade, but none are individually bothersome. A pleasing lower-end Uncirculated example of this popular Carson City ten. NGC ID# 266U, PCGS# 8720

3980 1891-CC/CC FS-501 AU58 NGC. The mintmark is widely repunched west. Breen credits Doug Winter as the discoverer of the variety. This is a flashy and sharply struck near-Mint Carson City type coin with dazzling luster throughout the peripheries. Light bagmarks and a few small ticks do not detract from the substantial eye appeal. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

3981 1891-CC/CC FS-501 MS61 NGC. Variety 3-C. The mintmark is clearly repunched east. A late die state with an unusual straight crack through star 12. The present sun-gold Carson City type coin is well struck and displays the expected quantity of minor to moderate marks on the cheek and fields. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

3982 1892 MS61 Prooflike NGC. The reflective surfaces sacrifice some of their reflective character to field chatter, yet enough of the mirrorlike fields survive to qualify for the NGC Prooflike designation. Lustrous, rich-gold color frames frosted, pinpoint sharp central devices. This is a readily available Philadelphia date that is scarce in Prooflike format. Census: 19 in 61 Prooflike, 7 finer (8/18). NGC ID# 26JA, PCGS# 78721

3983 1892-CC Tripled Die Reverse, FS-801, AU53 NGC. Variety 1-A. Carson City eagles have a wide following among Liberty Head gold specialists — a much-loved subset in an otherwise long and demanding series. Despite a healthy mintage of 40,000 pieces, the 1892-CC benefits from the Carson City cachet, and the issue is always popular with collectors. All 1892-CC tens have the tripled die reverse (most visible at the motto), while the Variety 1-A obverse shows recutting on 89 in the date. This sharp example is still-lustrous despite brief circulation, with light-yellow color and only tiny marks. NGC ID# 266W, PCGS# 511600 Base PCGS# 8722

3984 1897 MS64 PCGS. The 1897 Liberty eagle is scarce in MS64 condition and rare any finer. This attractive Choice example displays sharply detailed design elements and well-preserved peach-gold surfaces, with vibrant mint luster throughout. PCGS has graded 15 numerically finer examples (9/18). NGC ID# 26CH, PCGS# 8737

1899-S Liberty Eagle, MS64

A Rarity This Fine

3985 1899-S MS64 PCGS. The 1899-S ten is scarcer in Uncirculated condition than its mintage of 841,000 pieces would suggest. Examples are occasionally available through MS63, but the population declines sharply in MS64, and only a few finer pieces are known. This near-Gem displays a full strike and frosty original luster. Bright yellow-gold interiors cede to traditional greenish-gold border hues. A few faint field grazes on the obverse are all that prevent Gem classification. Population: 17 in 64 (1 in 64+), 6 finer (9/18). NGC ID# 267L, PCGS# 8744

3986 1901-S MS64 PCGS. Apple-green borders frame peach-gold centers. A lustrous and well-struck Choice Liberty type coin. A small area of tan toning is noted near the T in UNITED. No marks merit mention, and the reverse is especially smooth. Encapsulated in a green-label holder. NGC ID# 267S, PCGS# 8749

3987 1902-S MS64+ PCGS Secure. CAC. A Plus-graded Choice specimen of this popular branch mint type issue, with razor-sharp definition on all design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster, with outstanding eye appeal. NGC ID# 267U, PCGS# 8751

3988 1903-O MS62+ NGC. Variety 1. This sharply struck New Orleans type coin has pleasing lemon-gold color and unencumbered cartwheel sheen. Surprisingly smooth for the often bagmarked issue, since only a graze beneath the TR in TRUST merits mention. NGC reports just 3 pieces in 62+ with 52 finer (9/18). NGC ID# 267W, PCGS# 8753

3989 1904 MS63 PCGS. Light yellow-gold color combines with cartwheel luster on this Select Uncirculated eagle. The devices are nearly fully brought-up, though the date and lower stars are a trifle soft. Minute flecks are more prevalent on the obverse. NGC ID# 267Y, PCGS# 8755

3990 1904 MS63 PCGS. The 1904 eagle is a low-mintage emission with a total production of 161,900 coins. Double eagles were the gold coins of choice at Philadelphia, and at San Francisco, the latter mint not producing any eagles during the year. This pleasing Select Mint State example has satiny light yellow luster and sharp design features with minimal marks. PCGS has only certified 59 finer examples (9/18). NGC ID# 267Y, PCGS# 8755

3991 1904-O MS62 PCGS. Variety 1. A lustrous lemon-gold New Orleans type coin. The strike is sharp except on stars 7 and 13. There are fewer marks than usual for the MS62 level, though a vertical line near star 12 precludes a higher grade. NGC ID# 7LHK, PCGS# 8756

3992 1906-D MS64 PCGS. The Denver Mint struck only two issues each of the Liberty five, ten, and twenty dollar series. None are rare, but the 1906-D eagle is conditionally scarce in the present quality. This sharply struck apricot-gold representative has exemplary luster, clean surfaces, and good eye appeal. NGC ID# 7JHG, PCGS# 8760

INDIAN EAGLES

- 3993 1907 No Motto MS62 NGC.** This 1907 No Motto eagle is one of the most storied first-year type coins in American numismatics. Yellow-gold surfaces present shallow grazes rather than deep abrasions, and mint luster is frosty and vibrant. As always, definition on the forecurls and the eagle's shoulder is slightly soft, but this piece is better-defined than many others. NGC ID# 28GF, PCGS# 8852
- 3994 1907 No Motto MS62 NGC.** The 1907 No Motto Indian eagle is always in demand as the first year of the design. This impressive MS62 specimen offers well-detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster throughout. NGC ID# 28GF, PCGS# 8852
- 3995 1907 No Motto MS62 PCGS Secure.** An attractive MS62 specimen of this important first-year type issue, with well-detailed design elements that show just a trace of the usual softness on the eagle's shoulder. The lightly marked orange-gold surfaces are lustrous and appealing. NGC ID# 28GF, PCGS# 8852
- 3996 1907 No Motto MS63 NGC.** A lightly marked Select specimen from the first year of the Indian design, with the short-lived No Motto motif. This coin exhibits well-detailed design elements and lustrous orange-gold surfaces on both sides. NGC ID# 28GF, PCGS# 8852
- 3997 1907 No Motto MS63 NGC.** Theodore Roosevelt, Augustus Saint-Gaudens, and Charles Barber all had a hand in the production of the 1907 No Motto ten dollar. The surfaces are smoother than one would expect for a coin in this grade, though small flecks are present on each side. Well-struck and frosty with appealing yellow-gold color. NGC ID# 28GF, PCGS# 8852
- 3998 1908 No Motto MS61 NGC.** This impressive Mint State specimen represents the short-lived No Motto design, with well-detailed design elements and lustrous orange-gold surfaces that are minimally marked for the grade. Eye appeal is surprisingly strong. NGC ID# 28GG, PCGS# 8853
- 3999 1908 No Motto MS62 NGC.** Both sides of this luminous, frosty example display bold design elements and vivid honey-gold coloration. Scattered abrasions account for the grade. The No Motto 1908 Indian eagle was struck to the extent of just 33,500 coins, one of the lowest mintage figures in the series. NGC ID# 28GG, PCGS# 8853
- 4000 1908 No Motto MS62 PCGS Secure.** An impressive MS62 example from the final year of the short-lived No Motto design, this coin exhibits well-detailed design elements and lustrous orange-gold surfaces that are minimally marked for the grade. NGC ID# 28GG, PCGS# 8853
- 4001 1908-D No Motto MS61 NGC.** This Mint State Indian eagle was struck before the design was modified to include the motto IN GOD WE TRUST, later in the year. The pleasing yellow and rose-gold surfaces are lustrous and lightly marked for the grade. NGC ID# 28GH, PCGS# 8854
- 4002 1909-S MS62 NGC.** Despite a respectable mintage of 292,350 pieces, the 1909-S Indian eagle is seldom encountered in high grade. This well-detailed MS62 specimen offers lustrous yellow and rose-gold surfaces that are minimally marked for the grade. Census: 79 in 62, 75 finer (8/18). NGC ID# 28GP, PCGS# 8864
- 4003 1910-D MS64 PCGS Secure.** This attractive Choice specimen is sharply detailed in most areas, but a touch of softness shows on the eagle's shoulder and right (facing) claw. The well-preserved orange-gold surfaces radiate vibrant mint luster. NGC ID# 28GS, PCGS# 8866
- 4004 1910-D MS64+ NGC. CAC.** With more than 2.3 million 1910-D eagles struck and tens of thousands available through the lower Mint State grades, this is always a great option for type representation. Here is a high-end hear-Gem with strong definition and glowing orange-gold surfaces void of significant flaws. Marvelous visual appeal. NGC ID# 28GS, PCGS# 8866

- 4005 1911-D XF40 NGC.** The strongly impressed design elements of this impressive XF specimen show some light wear, and the pleasing orange-gold surfaces are lightly abraded. A dig on the eagle's wing is the only mark of note. From a tiny mintage of 30,100 pieces. NGC ID# 28GU, PCGS# 8869

1911-D Ten Dollar Indian, AU50 Sharp for the Grade

- 4006 1911-D AU50 PCGS Secure. CAC.** The 1911-D is the leading condition rarity in the Indian eagle series, from a modest mintage of 30,100 pieces. This attractive AU specimen shows only light wear on the strongly impressed design elements, and the lightly abraded orange-gold surfaces retain traces of original mint luster on both sides. NGC ID# 28GU, PCGS# 8869

1911-S Ten Dollar, MS60 Attractive Base-Grade Mint State Coin

- 4007 1911-S MS60 NGC.** This scarce S-Mint Indian eagle survives from a mintage of only 51,000 coins, one of the lowest production totals in the series. Both sides exhibit splendid straw-gold surfaces with grade-consistent but unobtrusive abrasions. The luster is brilliant and frosty. Eye appeal is good overall. Mint State examples of the 1911-S ten are scarce in all grades, and only a few are in the collectible base grade of MS60.
Ex: Long Beach Signature (Heritage, 6/2015), lot 5376, which realized \$3,055. NGC ID# 28GV, PCGS# 8870
- 4008 1913-S AU50 PCGS.** Examples of this low-mintage semikey issue (66,000 coins) present a challenge in high grades. This still-lustrous, lightly circulated representative has straw-gold color and bold detail, especially on the obverse. A cluster of marks occurs below UNITED. Encapsulated in a first-generation "rattler" holder. NGC ID# 28GZ, PCGS# 8874

**1913-S Indian Ten, AU58
Eye-Appealing for the Grade**

- 4009 1913-S AU58 NGC.** A better date with a mintage of only 66,000 coins, the 1913-S Indian eagle is scarce in Mint State. This nearly Uncirculated example remains within the grasp of budget-conscious collectors but possesses many of the attributes of a lower-end Mint State coin: soft luster, sharp motifs, and light surface chatter. Eye appeal is pleasing.
Ex: ANA Signature (Heritage, 3/2016), lot 4549, which realized \$4,230. NGC ID# 28GZ, PCGS# 8874

- 4010 1914-S MS61 NGC.** The 1914-S Indian eagle was produced in large numbers, but the issue is still elusive in higher Mint State grades. This impressive MS61 specimen is well-detailed and lustrous, with a number of minor marks and thin scratches on both sides. NGC ID# 28H4, PCGS# 8877

**1914-S Ten Dollar Indian, MS62
Scarce in Mint Condition**

- 4011 1914-S MS62 NGC.** The 1914-S Indian eagle claims a mintage of 218,000 pieces, but the issue is more elusive in mint condition than the substantial production figure would suggest. This attractive MS62 specimen offers well-detailed design elements, with just a trace of the usual softness on the eagle's shoulder. The lightly marked orange-gold surfaces are lustrous and appealing. NGC ID# 28H4, PCGS# 8877
- 4012 1915 MS63 NGC.** Smooth, minimally abraded fields awash in frosty luster feature attractive shades of rose and green-gold coloration. The obverse is uniformly well-struck, while minor softness appears on the tip of the eagle's wing. A single fleck on Liberty's jaw merits attention. NGC ID# 28H5, PCGS# 8878
- 4013 1916-S MS61 PCGS.** An impressive Mint State specimen of this last pre-war Indian eagle, with well-detailed design elements and lustrous orange-gold surfaces that show the expected number of minor contact marks and chatter for the grade. NGC ID# 28H7, PCGS# 8880
- 4014 1916-S MS62 NGC.** The 1916-S Indian eagle is a scarce issue in grades above the MS62 level. This well-detailed MS62 specimen is lustrous and lightly marked for the grade, with pleasing yellow and rose-gold surfaces. NGC has graded 69 numerically finer examples (8/18). NGC ID# 28H7, PCGS# 8880
- 4015 1932 MS64+ NGC. CAC.** Always of interest as the logical type coin for the ten dollar Indian series, this piece displays the usually seen bright, shimmering mint luster that 1932s are known for. Additionally, the Plus designation indicates there are just the slightest abrasions that separate this piece from a Gem. NGC ID# 28HB, PCGS# 8884

LIBERTY DOUBLE EAGLES

**1850 Twenty Dollar, Choice XF
Smooth Surfaces**

- 4016 1850 XF45 PCGS.** Relatively smooth yellow-gold surfaces give this Choice XF example pleasing eye appeal. The strike is sharp, and wear is light. The 1850 double eagle was primarily coined with California ore and is recognizable for its bright yellow color. The early Philadelphia issues from before the opening of the San Francisco Mint are frequently pursued for type representation. NGC ID# 268F, PCGS# 8902

- 4017 1851 XF40 PCGS.** Early-date double eagles hold a special allure. This is a well-detailed XF40 example from the second year of issue and a mintage approaching 2.1 million coins. Each side exhibits deep orange-gold color and greenish accents that contribute to the appeal. A scrape through (TWE)NT(Y) is the sole mark of note. NGC ID# 268H, PCGS# 8904

- 4018 1851-O — Surfaces Smoothed — PCGS Genuine Secure. Variety 2.** In our opinion, this coin has the details of an XF specimen. Among the five facilities that struck Liberty double eagles, the New Orleans mintmark is scarcest. The 1851-O is often collected by those seeking a single Southern gold example of the denomination. This butter-gold example is hairlined, and a scratch near the UNI in UNITED shows signs of smoothing. A minor strike-through (as made) is south of obverse star 3.

- 4019 1852 AU50 PCGS.** The 1852 was well-produced and ranks among the sharpest No Motto issues, enhancing its type-coin appeal. This piece is characteristically bold with rich yellow-gold surfaces that show minimal evidence of circulation and retain glints of mint luster. NGC ID# 268K, PCGS# 8906

- 4020 1852 AU53 PCGS Secure.** An attractive AU53 example of the Type One double eagle, with just a touch of wear on the well-detailed design elements and lustrous orange-gold surfaces that are lightly abraded, aside from a few digs near Liberty's mouth. NGC ID# 268K, PCGS# 8906

- 4021 1852 AU55 NGC.** Moderately abraded surfaces show light high-point wear that prevents a Mint State designation, although luster remains in the protected areas. This Choice AU Type One double eagle displays original olive-gold coloration and is pleasing for the grade. NGC ID# 268K, PCGS# 8906

- 4022 1853/2' FS-301 — Cleaned — NGC Details. AU.** The so-called overdate of 1853 remains popular with collectors of Type One double eagles. This example is sharp and shows pleasing olive-gold patina with some luster remaining. The reverse has faint hairlines that are only visible with a loupe, while the obverse is more aggressively cleaned with prominent hairlines. No significant contact marks are seen. NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

- 4023 1853 XF40 PCGS.** The availability of the 1853 compares to that of the 1851 and 1852 despite a considerably lower mintage of 1.2 million coins. Each side presents pleasing orange-gold color and traces of partial mint luster. The border elements are moderately soft, while the central devices display high-point friction consistent with the grade. NGC ID# 268M, PCGS# 8908

4024 1853 XF45 NGC. An impressive Choice XF specimen of this popular Type One Liberty double eagle, with a touch of wear on Liberty's hair and the prongs of the coronet. The pleasing yellow and rose-gold surfaces are lightly abraded, with traces of original mint luster still intact. NGC ID# 268M, PCGS# 8908

4025 1854 Small Date AU50 PCGS. According to Winter: "The 1854 Small Date remains an undervalued and overlooked date in higher grades. It is not as scarce as the 1855 and 1856 but it is much harder to locate than the 1850-1853 issues." Reddish-gold surfaces display light high-point rub, but definition is strong and the only serious abrasions are a scrape on the cheek and a tick above 54. NGC ID# 268R, PCGS# 8911

4026 1854 Small Date AU55 ANACS. An original sea-green and wheat-gold representative. The portrait and the E in UNITED are typically abraded. The 1 in the date is lightly repunched south, though the variety appears to be different (and more minor) than Breen-7167. Housed in a small-sized holder. NGC ID# 268R, PCGS# 8911

1856 Twenty Dollar, Unc Details Luminous Surfaces

4027 1856 — Cleaned — NGC Details. Unc. Hairlines on each side of this unworn 1856 double eagle suggest a light cleaning, but luster remains in the fields and the devices are sharply struck. The orange-gold surfaces show no bothersome contact marks, although a small russet spot is noted at the tip of Liberty's nose, useful for pedigree purposes. Despite a mintage of more than 329,000 pieces, the 1856 double eagle is rare in Mint State.

1857-S Double Eagle, AU58 Partially Lustrous and Appealing

4028 1857-S AU58 NGC. Most of the high-grade 1857-S double eagles extant are from the S.S. *Central America* shipwreck. This near-Mint coin is not pedigreed to the wreck, and neither does it have the typical look of a shipwreck coin: bright and frosted. Original luster resides in the protected portions of the fields, and little high-point wear is apparent. The surfaces display pleasing olive-gold and peach-orange coloration, with scattered light abrasions that suggest a brief time in circulation. NGC ID# 2696, PCGS# 8922

1857-S Liberty Twenty, AU58+ Rare Plus-Graded Example

4029 1857-S AU58+ PCGS. The 1857-S double eagle is plentiful due to the salvage of thousands of examples from the S.S. *Central America* shipwreck, although this piece has an old-time olive-gold appearance with trivial high-point friction and scattered contact marks. It is one of only 18 AU58 coins awarded a Plus designation at PCGS (9/18). Detail is sharp and eye appeal is pleasing. NGC ID# 2696, PCGS# 8922

4030 1858-S AU53 NGC. Ex: Granite Lady Hoard. Original orange-gold surfaces have tinges of deeper olive color on this About Uncirculated 1858-S double eagle. Only light wear is evident on the devices. Although both sides show the usual surface chatter, this coin has no singular abrasions of note. NGC ID# 2699, PCGS# 8925

1859-S Twenty Dollar, AU53 Lustrous and Eye-Appealing

4031 1859-S AU53 PCGS. CAC. This San Francisco issue exists almost entirely in circulated grades, with Mint State coins scarcely seen. This About Uncirculated example displays substantial luster in the fields and is sharply detailed. Warm orange-gold surfaces are remarkably smooth for the grade. The coin's eye appeal exceeds expectations for the grade. NGC ID# 269C, PCGS# 8928

4032 1860 AU53 PCGS. Winter estimates a survivorship of 1,500 to 2,000 pieces for the 1860 double eagle, making examples accessible but hardly common. This is a bright and well-detailed No Motto representative with scattered marks and just one mentionable abrasion above the 8. NGC ID# 269D, PCGS# 8929

4033 1861 XF40 NGC. Only a couple of 20th century Liberty Head twenties claim larger mintages than the 1861, which was struck to the extent of 2.9 million pieces because of increased gold shipments from California. This example circulated briefly and has developed pleasing red-gold color. The high points are worn, but the stars and date are bold. Marks are minimal. NGC ID# 269G, PCGS# 8932

4034 1861 XF40 NGC. This pleasing Type One Liberty double eagle exhibits only light wear on the well-detailed design elements and the orange-gold surfaces are lightly abraded. A few traces of original mint luster cling to protected areas. NGC ID# 269G, PCGS# 8932

4035 1861 AU55 NGC. More than 2.9 million pieces were struck, making the 1861 Philadelphia twenty a popular issue for Type One double eagle collectors and a logical selection for gold type sets. This pleasing, sun-gold example retains much of its original mint luster. Light abrasions and marks plus slight wear on the high points confirm the Choice About Uncirculated grade. NGC ID# 269G, PCGS# 8932

4036 1861 AU58 NGC. Other than a couple of reed marks on Liberty's jaw, this example is remarkably smooth and it retains substantial field luster. The preservation and eye appeal are far beyond expectations for a Type One Philadelphia coin in an AU grade. This is an outstanding No Motto type coin. NGC ID# 269G, PCGS# 8932

4037 1864 PCGS Genuine Secure. The PCGS number ending in .94 suggests Altered Surfaces as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been cleaned. The orange-gold surfaces are moderately bright, but the borders are lustrous and Liberty's curls show only traces of wear. The 1864 is a scarce and underappreciated Civil War date typically encountered in XF and AU grades.

4038 1865-S XF45 NGC. Medium S. Deep red-gold color is eminently appealing throughout this Choice XF S-mint twenty from one of the final No Motto productions. Detail is slightly uneven, while hints of luster still shimmer from the protected regions. NGC ID# 269V, PCGS# 8944

4039 1865-S — Cleaned — PCGS Genuine. AU Details. Small S. An olive-green Civil War twenty with considerable remaining luster. The left obverse displays vertical hairlines from an attempt to efface a scuff. Prominently clashed near Liberty's ear and hairbun, and a mint-made die line passes through the lower right wing. A heavy die crack through the top of STATES suggests a cud later formed over TE.

1865-S Twenty, Still-Lustrous AU58

4040 1865-S AU58 NGC. Small S. Prior to the discovery of the S.S. Republic and the Brother Jonathan the 1865-S was a significant condition rarity. Garrett-Guth relate that Harry Bass never found a coin finer than XF. Today AU and Mint State pieces are frequently encountered, especially in auctions. This is a high-end AU that retains significant portions of mint luster and each side shows even reddish patina. NGC ID# 269V, PCGS# 8944

4041 1866-S Motto XF40 PCGS. CAC. Tall S. A sea-green and apricot-gold representative with substantial remaining luster. A few left-side stars are soft, but the strike is generally good. One thin vertical mark noted east of the eagle's head. Certified in a green-label holder. In all grades, CAC has approved only 69 pieces. NGC ID# 26B2, PCGS# 8950

4042 1868-S AU55 NGC. Small Squat S. Design detail is impressive for a lightly circulated Type Two twenty dollar gold piece. The star radials are clear and the feathertips are strong. Bright remaining mint luster shines from the peripheral elements and the recesses of the central devices. Straw-gold surface show minor abrasions. NGC ID# 26A4, PCGS# 8954

1868-S Double Eagle, AU58 Smooth, Lustrous Surfaces

4043 1868-S AU58 ANACS. An early Type Two issue, the 1868-S double eagle is a rarity in Uncirculated grades. This near-Mint coin displays sharp detail and has luminous original luster in the fields. The surfaces are also remarkably free of major abrasions, which is a rare sight on AU-level Type One and Type Two double eagles. Both sides display pleasing straw-gold coloration. NGC ID# 26A4, PCGS# 8954

1869 Twenty Dollar, AU58 Sharp and Attractive

4044 1869 AU58 NGC. The 1869 double eagle is a rarity in Uncirculated condition, and such coins are largely affected by unsightly abrasions. This near-Mint example is conditionally scarce and has significant eye appeal. Subtle reflectivity in the fields complements original luster, and the sharp design elements have only slight high-point friction. Warm straw-gold color and smooth surfaces please the eye. Census: 81 in 58, 13 finer (9/18). NGC ID# 26A5, PCGS# 8955

4045 1870-S AU53 NGC. In spite of the mintage that approaches a million pieces, most 1870-S twenties were exported or melted. Few are known finer than AU. This piece shows rich reddish patina and partially reflective fields. Lightly marked overall, only one abrasion just below the eye of Liberty merits individual mention. NGC ID# 26A9, PCGS# 8959

4046 1870-S AU55 NGC. Substantial luster remains in the fields on this Choice AU example, complementing sharp design elements that show only slight high-point wear. Orange-gold and rose coloration is original. Scattered abrasions are present, including significant marks on Liberty's jaw and in the left obverse field. NGC ID# 26A9, PCGS# 8959

**1873-S Double Eagle, MS61
Closed 3 Variety**

- 4047 1873-S Closed 3 MS61 PCGS Secure.** The Closed 3 variant of the 1873-S double eagle is much more plentiful than the Open 3 variety, ideal for date collectors. This MS61 coin shows grade-appropriate abrasions but has original, frosty mint luster. Greenish-gold borders surround warmer peach interiors, complementing well-struck design elements. PCGS lists just 50 numerically finer coins (9/18). NGC ID# 26AL, PCGS# 8969

**1876-CC Double Eagle, Choice XF
Smooth and Appealing**

- 4050 1876-CC XF45 PCGS. Variety 4-A.** Date and mintmark position are the chief identifiers of this variety, and die lines in the recesses of Liberty's hair curls confirm the attribution. This lightly circulated Carson City double eagle displays smooth prairie-gold surfaces with hints of luster in the protected portions of the fields. Eye appeal is pleasing for the grade. Carson City twenties are seldom seen without heavy abrasions. NGC ID# 26AW, PCGS# 8977

**1875-S Twenty Dollar, MS62
Vibrant Mint Luster**

- 4048 1875-S MS62 PCGS Secure.** Mint State examples of the 1875-S double eagle are challenging in all grades, but they are especially rare finer than MS62. PCGS lists just 27 submissions in those grades (9/18). This collectible MS62 coin is well-struck and radiantly lustrous with original peach-gold coloration. Scattered abrasions account for the grade but none are individually bothersome. NGC ID# 26AU, PCGS# 8975

**1876-CC Twenty Dollar, AU53
Smooth, Lustrous Surfaces**

- 4051 1876-CC AU53 PCGS. Variety 5-B.** This is the only known use of this reverse die in 1876. Hints of luster remain in the protected portions of the fields on this About Uncirculated Carson City type coin, while the remainder of each side is lightly worn with pleasing wheat-gold coloration. The surfaces are remarkably smooth for the issue, and eye appeal exceeds expectations for the grade. NGC ID# 26AW, PCGS# 8977

**1875-S Double Eagle, MS62 Prooflike
Beautifully Reflective**

- 4049 1875-S MS62 Prooflike NGC.** The availability of the 1875-S double eagle declines sharply in MS62, and finer pieces are rare. However, the added appeal of this piece is its Prooflike designation — one of only three Prooflike designations awarded to 1875-S twenties by NGC — these include one MS61 and two MS62 (9/18). This piece is brilliant and brightly lustrous with reflective fields. The mirroring is from an early die state rather than heavily polished worn dies. Scattered light abrasions account for the grade but none are individually bothersome. NGC ID# 26AU, PCGS# 78975

- 4052 1877 MS61 PCGS.** An impressive Mint State Liberty double eagle, from the first year of the Type Three design. This MS61 example offers well-detailed design elements and lustrous orange-gold surfaces that are appropriately marked for the grade. NGC ID# 2547, PCGS# 8982

- 4053 1877 MS61 NGC.** In 1877, the design was modified to read TWENTY DOLLARS. Radiant luster rolls over the surfaces of this Type Three Philadelphia issue. The design elements are boldly impressed with full star centers and sharp hair detail. Myriad abrasions are scattered over each side, but this remains an attractive Mint State representative.
Ex: Long Beach Signature (Heritage, 9/2014), lot 4561. NGC ID# 2547, PCGS# 8982

**1877-CC Twenty Dollar, XF40
Collector-Grade Example**

- 4054 1877-CC XF40 NGC. Variety 3-D.** This is the only 1877-CC double eagle die variety that shows the mintmark positioned with the first C higher than the second. On the obverse, date placement and a faint diagonal die line off the left base of the 1 confirm the attribution. The 1877-CC twenty is a collectible issue in circulated grades. This XF coin displays good detail and original olive-gold patina. Some chatter behind Liberty's eye is the only significant distraction. NGC ID# 26AZ, PCGS# 8983

**1877-CC Double Eagle, XF40
First-Year Type Three CC-Mint Issue**

- 4055 1877-CC XF40 PCGS. Variety 1-A.** As usual for the variety, this 1877-CC double eagle displays horizontal clash marks in front of Liberty's ear, corresponding to the shield lines on the reverse die. This collector-grade Carson City coin is a first-year Type Three piece, surviving from a mintage of 42,565 coins. Light abrasions on each side accompany the grade, but the olive-gold patina is pleasing. NGC ID# 26AZ, PCGS# 8983

**1877-CC Twenty Dollar, XF45
Remarkably Smooth Surfaces**

- 4056 1877-CC XF45 NGC. Variety 1-B.** Mintmark placement and date position identify this variety. The 1877-CC double eagle as a date is available type and date collectors, at least in circulated condition. This Choice XF coin displays strong detail for the grade and has remarkably smooth, tangerine-gold surfaces. Remnants of original luster illuminate the fields and offer exceptional visual appeal. NGC ID# 26AZ, PCGS# 8983

- 4057 1877-S MS61 PCGS.** This is a first-year Type Three representative from a substantial mintage of 1.7 million coins. The star radials and hair curls are well-delineated. S-mint frost issues from attractive orange-gold surfaces. Myriad abrasions, more plentiful on the obverse than the reverse, are what limit the grade. NGC ID# 254B, PCGS# 8984

- 4058 1878 MS60 NGC. VP-003.** Three different doubled die reverse varieties are known for the 1878 twenty. On the present variety, designated VP-003 by NGC, most obverse legends exhibit some degree of die doubling. TWENTY and PLURIBUS exhibit the most prominent spread. A well-struck apricot-gold double eagle that displays the expected number of obverse abrasions. NGC ID# 26B3, PCGS# 8985

- 4059 1878 MS60 Prooflike NGC.** Both the obverse and the reverse are lightly die doubled. The doubling is apparent on LIBERTY and STATES. This Mint State coin is one of only a dozen 1878 double eagles that NGC has designated Prooflike (8/18). The devices are sharp and the fields are deeply reflective, producing modest cameo contrast on both sides. Scattered abrasions limit the numeric grade. Census: 2 in 60 Prooflike, 7 finer (8/18). NGC ID# 26B3, PCGS# 78985

**1879-CC Double Eagle, AU Sharpness
Scarce Type Three Issue, Challenging CC Date**

- 4060 1879-CC — Obverse Cleaned — NGC Details. AU. Variety 1-A.** All four mints struck double eagles in 1879, with the Philadelphia and San Francisco twenties far outnumbering those from New Orleans and Carson City. The 1879-O is a major, low-mintage rarity, while the 1879-CC is merely scarce in comparison with a mintage of only 10,708 pieces. The obverse of this example has AU sharpness, but the surfaces are a bit subdued by a light cleaning. The reverse appears unimpaired and retains a portion of its original mint luster.

- 4061 1880 AU53 PCGS.** An attractive AU53 example of this lower-mintage Philadelphia issue, with vivid orange-gold surfaces that retain much of their original mint luster and show only minor abrasions. Just the slightest trace of wear shows on the sharply detailed design elements. NGC ID# 26BA, PCGS# 8992

- 4062 1883-S MS62+ PCGS.** This is far and away the most collectible double eagle for the year. Only proofs were struck at the Philadelphia Mint, and CC representatives are scarcer than these S-mint twenties. Small abrasions on the cheek and in the adjacent fields barely limit the grade. Strongly struck with rose and mint-green accents. NGC ID# 26BJ, PCGS# 9000

- 4063 1885-S MS62 PCGS. CAC.** A distinctive combination of light green and delicate rose combine with splashes of darker patina to create excellent eye appeal on this frosty and lustrous Mint State double eagle. The mintmark is clear of the tailfeather and tilted to the left on the reverse of this double eagle. San Francisco Mint gold varieties represent an understudied field, deserving more numismatic attention. NGC ID# 26BP, PCGS# 9005

- 4064 1889-CC — Cleaned — NGC Details. XF.** The Carson City Mint was downgraded to assay office status in 1885 under Cleveland, but resumed coinage in 1889 under Harrison. The mintage of only 30,945 pieces ensures survivors are scarce. This lightly abraded pumpkin-gold example is somewhat glossy and displays traces of struck-in grease above the eagle's beak. NGC ID# 26BV, PCGS# 9011

- 4065 1889-S MS63 NGC.** An attractive Select example of the Type Three double eagle, this coin exhibits sharply detailed design elements and vivid orange-gold surfaces with only minor signs of contact. Vibrant mint luster adds to the outstanding eye appeal. NGC has graded 52 numerically finer examples (9/18). NGC ID# 26BW, PCGS# 9012

1890-CC Double Eagle, AU50
Early Die State, Luster Remains

- 4066 1890-CC AU50 PCGS. Variety 1-A.** Original luster illuminates the protected portions of the fields on this About Uncirculated coin. Orange-gold and brighter yellowish hues intermingle across each side, drawing the eye away from scattered abrasions that accompany this coin's wear. Detail is sharp despite brief circulation. The coin is in an early die state, before the dies were lapped, partially effacing the designer's initials and the eagle's tailfeathers. NGC ID# 26BY, PCGS# 9014

1892-CC Double Eagle, XF45
Choice for the Grade

- 4067 1892-CC XF45 NGC. Variety 1-A.** Little true wear is apparent on this coin, despite the XF grade designation. Much of the weakness on the upper obverse stars, Liberty's hair curls, and the tops of the BERTY in LIBERTY is due to a poor strike, not circulation. Luster remains in the protected portions of the fields and the orange-gold and olive patina is original. Scattered light abrasions do not detract. NGC ID# 26C6, PCGS# 9020

1894 Twenty Dollar, MS64
Only Three Coins Finer at PCGS

- 4068 1894 MS64 PCGS.** The availability of the 1894 double eagle declines sharply in MS64, although it remains collectible at this grade level. Finer coins are decidedly rare and are out of reach for many collectors. This near-Gem displays vibrant, frosty cartwheel luster and sharp design elements. Orange-gold surfaces yield tinges of rose and lilac throughout the fields and design recesses. NGC ID# 26CB, PCGS# 9025

- 4069 1895-S MS63 PCGS. CAC.** Original, frosty luster shimmers as this Select 1895-S double eagle is rotated beneath a light. Warm rose-gold hues adorn the centers but cede to greenish-gold margins. The strike is sharp and abrasions are minimal. Few examples in this grade have received CAC endorsement. CAC: 44 in 63, 35 finer (9/18). NGC ID# 26CE, PCGS# 9028

- 4070 1898 MS62 PCGS.** An impressive MS62 example of this popular Type Three issue, with sharply detailed design elements and lightly marked orange-gold surfaces that exhibit a number of grade-consistent contact marks. Vibrant mint luster enhances the strong overall eye appeal. NGC ID# 26CK, PCGS# 9033

1898-S Liberty Twenty, MS64+
Nice Color and Luster

- 4071 1898-S MS64+ PCGS. CAC.** From a mintage of 2.5 million pieces, the 1898-S Liberty double eagle is a plentiful issue in MS 64 condition, but it becomes somewhat scarce in finer grades. This Plus-graded Choice specimen exhibits sharply detailed design elements, aside from the slightest flatness on some star centers. The well-preserved peach-gold surfaces radiate vibrant mint luster and outstanding eye appeal. NGC ID# 26CL, PCGS# 9034

- 4072 1901 MS64 PCGS.** A beautiful peach-gold and lime-green Liberty twenty. Lustrous and sharply struck. Although graded MS64 by PCGS within a a first-generation "rattler" holder, the eye appeal surpasses its numerical designation. The 1901 is a lower mintage issue that can nonetheless be located in quality Mint State grades. NGC ID# 26CS, PCGS# 9039

- 4073 1901 MS64 PCGS.** The base of the 1 in the date is repunched. This apricot-gold Choice double eagle displays faint mint-made roller marks on the cheek, but post-strike abrasions are minimal. The 1901 has a much lower mintage than its ten dollar counterpart, yet foreign bank hoards have made it available in MS61 to MS65 grades. NGC ID# 26CS, PCGS# 9039

1901 Double Eagle, MS65
Unlisted Repunched Date Variety

- 4074 1901 MS65 NGC.** A large, pale-blue alloy spot at the bridge of Liberty's nose commands the eye, but that does a disservice to the otherwise smooth and minimally marked fields that characterize this sharply struck Gem double eagle. Vibrant orange-gold color radiates cartwheel luster throughout both sides. The 1901 double eagle is a low-mintage issue in any case, but especially when the base of 1 is repunched such as the present coin — an unlisted variant easily visible on this example. NGC reports no finer 1901 twenty dollar pieces than the MS65 level, either with the normal date or with repunching. NGC ID# 26CS, PCGS# 9039

**1901-S Double Eagle, MS63+
Fully Struck**

4075 1901-S MS63+ PCGS. Collectors are apt to find 1901-S twenties in MS61 to MS63 condition, but seldom finer. This razor-sharp Liberty Head double eagle enjoys thickly frosted rose-gold surfaces that are entirely worthy of the Plus designation. Every design element is fully raised. Light chatter and a few more prominent marks are noted on the obverse, while the reverse is undoubtedly clean for the grade. NGC ID# 26CT, PCGS# 9040

4076 1903 MS64 PCGS. Each side of this Choice Uncirculated twenty dollar gold piece is lively and bright, reflecting the swirling mint frost and luminous wheat-gold coloration that dominates. Deeper shades of orange-gold are also seen throughout. The stars (both sides), curls, and feathers exhibit bold definition. NGC ID# 26CW, PCGS# 9043

**1903 Twenty Dollar, MS65
Frosty Gem Type Coin**

4077 1903 MS65 NGC. The 1903 double eagle is moderately available in MS65, although such coins are highly sought-after by type collectors and some gold investors. Higher-grade pieces are rare. NGC lists a dozen numerically finer coins and PCGS five (8/18). This Gem displays a sharp strike and frosty wheat-gold luster. A few light marks on Liberty's cheek are not out of line for the grade. NGC ID# 26CW, PCGS# 9043

4078 1903 MS62 Prooflike NGC. This lustrous and mirrored 1903 twenty has relatively few marks for the assigned grade, while its prooflike fields retain their glassy reflectivity throughout both sides. Gleaming medium-gold color and a sharp strike greet the eye. Prooflike examples of the issue are scarce and in strong demand. Census: 9 in 62 Prooflike, 9 finer (8/18). NGC ID# 26CW, PCGS# 79043

4079 1904 MS65 NGC. A lustrous lemon-gold Liberty twenty with uncommonly smooth surfaces, even for the lofty MS65 grade. The strike is bold and the eye appeal is outstanding. Ideal for the collector seeking a single type example. Certified in a circa-2000 holder. NGC ID# 26CY, PCGS# 9045

4080 1904 MS65 PCGS. There is no better issue to represent the Coronet type than the 1904 double eagle, which proves obtainable in grades as high as this. Lively mint luster and a strong strike define each side. A few tiny grazes throughout the medium yellow-gold surfaces fail to affect the appeal. NGC ID# 26CY, PCGS# 9045

**1904-S Double Eagle, MS65
Few Finer Pieces Are Known**

4081 1904-S MS65 NGC. Gem 1904-S double eagles are plentiful enough that most collectors can acquire one, however, higher-grade coins are decidedly rare. NGC lists just two finer representatives, and PCGS has seen eight such submissions (8/18). Possible duplication exists in these figures. The present MS65 coin is a good balance of quality and value. The strike is sharp and the frosty luster is original. Rose-gold interiors gradually transition to brighter green-gold margins. NGC ID# 26CZ, PCGS# 9046

4082 1905 MS61 PCGS Secure. The Philadelphia Mint struck just 58,919 double eagles in 1905, creating a semikey date among 20th century issues. This piece has original orange-gold color and well-struck design elements. Heavy abrasions on each side account for the grade. NGC ID# 26D2, PCGS# 9047

**1907-S Liberty Twenty, MS64+
Final Year of Design**

4083 1907-S MS64+ PCGS. CAC. A Plus-graded Choice example from the final year of the Liberty design, this coin exhibits well-detailed design elements, with just a touch of the usual softness on Liberty's curls and the coronet. The pleasing orange-gold surfaces are well-preserved and lustrous, with outstanding eye appeal. PCGS has graded 14 numerically finer examples (9/18). NGC ID# 26D9, PCGS# 9054

SAINT-GAUDENS DOUBLE EAGLES

4084 1907 Arabic Numerals MS64 PCGS. An attractive Choice example of this in-demand first-year type issue, with well-detailed design elements that show just a touch of softness on the eagle's belly feathers. The well-preserved orange-gold surfaces radiate vibrant mint luster and overall visual appeal is outstanding. NGC ID# 26F5, PCGS# 9141

4085 1907 MS64 PCGS. Lovely lime-green and pastel rose coloration adorns the shimmering surfaces of this first-year example. Boldly struck overall, with a handful of grade-limiting abrasions noted on the obverse and very few marks discernible on the reverse. Ex: *Long Beach Signature (Heritage, 9/2007)*, lot 3996. NGC ID# 26F5, PCGS# 9141

4086 1908 No Motto MS66 PCGS. Short Rays Obverse. An exquisite apricot-gold example of the briefly issued subtype. The strike is crisp except for blending on the eagle's leg feathers. Exemplary aside from a few minor marks on the obverse field near 3 o'clock. NGC ID# 26F6, PCGS# 9142

4087 1908 No Motto MS66+ NGC. Short Rays Obverse. The 1908 No Motto twenty is known for its availability in high grade, but the present example is nonetheless nicer than most survivors. Field marks are inconsequential, and a strong lens is required to locate the infrequent minor contact on the motifs. One aqua speck noted on the N in UNITED. NGC ID# 26F6, PCGS# 9142

4088 1908-D No Motto MS64+ PCGS Secure. Long Rays Obverse. The mintmark is lightly repunched within the loop. This apricot-gold near-Gem has a good strike and vibrant luster. Marks are minimal, and the eye appeal is impressive. An ideal grade for combining quality and value. NGC ID# 26F7, PCGS# 9143

4089 1908 Motto MS63 PCGS. The 1908 Saint-Gaudens double eagle claims a smallish mintage of 156,258 pieces. This well-detailed Select specimen represents the popular Motto design, which was introduced that year. The vivid orange-gold surfaces are lustrous and lightly marked. NGC ID# BNAK, PCGS# 9147

4090 1908-D Motto MS64 PCGS. An impressive Choice specimen from the first year of the popular Motto design, this coin exhibits sharply detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster on both sides. NGC ID# 26F9, PCGS# 9148

4091 1908-D Motto MS64 PCGS. CAC. Long Rays, as always for the With Motto type. This is a sharp, lustrous near-Gem example of the inaugural With Motto Saint from Denver. A vibrant cartwheel effect reveals original orange-gold coloration, and abrasions are inconsequential aside from a slender vertical mark above the eagle's breast. Certified in an old green label holder.
Ex: ANA Signature (Heritage, 2-3/2014), lot 5606, which realized \$2,890.50. NGC ID# 26F9, PCGS# 9148

4092 1909/8 MS60 PCGS. FS-301. The remnants of an undertype 8 are plainly visible below the second 9 in the date, identifying the popular *Guide Book* overdate variety. This well-detailed Mint State example offers lustrous orange-gold surfaces, with the expected number of minor contact marks for the grade. NGC ID# 26FC, PCGS# 9151

4093 1909/8 FS-301 — Altered Surfaces — PCGS Genuine. UNC Details. Most examples of the 1909/8 overdate were likely considered to be 1908 Motto twenties by their owners until the 1940s, when the variety was finally publicized. This well-struck and coruscating double eagle is surprisingly free from marks. The green-gold surfaces exhibit a fine matte texture.

4094 1909 MS62 NGC. The 1909 Saint-Gaudens double eagle claims a smallish mintage of 161,282 pieces. This impressive MS62 specimen offers well-detailed design elements, with just a touch of softness on the torch. The lustrous orange-gold surfaces show the expected number of minor contact marks for the grade. NGC ID# 26FC, PCGS# 9150

1909-D Twenty Dollar, MS61 Low-Mintage Denver Issue

4095 1909-D MS61 PCGS. The 1909-D Saint-Gaudens double eagle is a better date in Uncirculated condition, coming from a mintage of only 52,500 coins. This Mint State piece is well-struck and displays original straw-gold coloration with hints of reddish patina throughout. Scattered abrasions define the grade but none are individually bothersome. NGC ID# 26FD, PCGS# 9152

4096 1909-S MS64 PCGS. The San Francisco Mint upped production from 22,000 double eagles in 1908 to more than 2.7 million twenties in 1909. Gleaming frost, honey-gold color, and a needle-sharp impression contribute to the appeal of this near-Gem. NGC ID# 26FE, PCGS# 9153

4097 1910-D MS65 PCGS. It should come as little surprise that this Gem double eagle is as sharp as it is. The 1910-D was well-made. Mint luster is vibrant, rolling over eye-appealing honey-gold surfaces. Two ticks left of the torch are the only obvious flecks, though a few others are well-hidden within the drapery folds and feathers. NGC ID# 26FG, PCGS# 9155

4098 1911-D MS65 PCGS. Gem Uncirculated condition is the optimal collecting grade before the 1911-D becomes out of reach for most collectors. The impression is nearly fully defined. Textured peach-gold surfaces radiate lively satin mint luster. An eye-appealing Denver double eagle. NGC ID# 26FK, PCGS# 9158

1911-S Saint-Gaudens Twenty, MS65 Sharp and Lustrous

4099 1911-S MS65 NGC. This is a sharp, brilliant Gem with mostly clean surfaces and vibrant cartwheel luster. Lightly textured fields are softly frosted. Although available in this Gem condition, the 1911-S double eagle is much more challenging in higher grades. NGC lists just 33 finer submissions (8/18).
Ex: New York Signature (Heritage, 2/2014), lot 4926, which realized \$3,642.50. NGC ID# 26FL, PCGS# 9159

1911-S Double Eagle, MS65 Scarce Any Finer

4100 1911-S MS65 PCGS. In MS65, the 1911-S Saint-Gaudens double eagle is relatively plentiful for collectors, offering an ideal balance of preservation quality and price. PCGS lists only 45 finer coins, and these are out of reach for most collectors. This Gem displays sharp motifs and frosty wheat-gold mint luster. A few trivial surface grazes are not bothersome. NGC ID# 26FL, PCGS# 9159

4101 1912 MS63 PCGS. Well-impressed orange-gold surfaces display a scattering of tiny abrasions on each side. Mint luster is brightly frosted, furthering the appeal. The 1912 claims a mintage of 149,750 coins and an average certified grade of 61.7. NGC ID# 26FM, PCGS# 9160

4102 1913-D MS64 PCGS. Both sides of this Denver Mint near-Gem boast strong design definition. Perhaps the most appealing quality, however, is the alternating shades of deep sun-gold and lighter peach-gold that blend with vibrant satin mint luster. A few small marks are of little importance. NGC ID# 26FP, PCGS# 9162

**1913-S Twenty Dollar, MS62
Only 34,000 Pieces Struck**

4103 1913-S MS62 PCGS. With a mintage of only 34,000 pieces, the 1913-S double eagle is a better date in all grades. This was the second-lowest mintage recorded at any mint for the series, not counting the High Relief type. Only the 1908-S (22,000 pieces struck) boasts a lower production total. This Mint State 1913-S is well-struck and has radiant straw-gold cartwheel luster. Scattered abrasions limit the grade. NGC ID# 26FR, PCGS# 9163

4104 1914 MS62 NGC. From a small business-strike mintage of 95,250 pieces, this attractive MS62 specimen exhibits well-detailed design elements and lustrous surfaces that show the appropriate number of minor contact marks for the grade. NGC ID# 26FS, PCGS# 9164

4105 1914 MS63 PCGS. This better-date Philadelphia double eagle showcases strong detail on the Capitol and relatively smooth fields for a large gold coin. Yellow-gold surfaces feature attractive lavender accents and swirling mint luster. NGC ID# 26FS, PCGS# 9164

4106 1914-D MS65 PCGS. There are probably only 100 to 120 examples of the 1914-D double eagle that survive in better condition than this well-struck Gem. Satiny mint luster glistens across orange-gold surfaces that show a few isolated bagmarks but little else to distract. NGC ID# 26FT, PCGS# 9165

**1914-D Saint-Gaudens Twenty, MS65
CAC-Approved in an Old NGC Slab**

4107 1914-D MS65 NGC. CAC. The bulk of the Mint State survivorship for this issue resides in MS64 and lower grades. Gems are available to a lesser extent, but these coins represent the finest pieces typically available to collectors. Higher-grade pieces are scarce. This CAC-endorsed Gem displays a sharp strike and satiny orange-gold luster. Housed in a prior generation holder. NGC ID# 26FT, PCGS# 9165

4108 1915-S MS65 NGC. Booming luster, a bold strike, and smooth orange-gold surfaces confirm the quality of this World War Gem. Minor obverse field grazes deny an even finer assessment. The MS65 grade provides optimal value for the issue, given the much higher cost of MS66 examples. Housed in a former generation holder. NGC ID# 26FW, PCGS# 9168

4109 1915-S MS65 PCGS. Gem condition is the highest level for which the 1915-S twenty is plentiful. Although the Capitol dome is slightly soft, Liberty's face and torch hand are boldly defined. Frosted orange-gold surfaces are impressively free of overt distractions. NGC ID# 26FW, PCGS# 9168

4110 1915-S MS65+ NGC. This common date is seldom located with mint luster that is as bright as seen on this piece. Additionally, the fine-grain matte-like surfaces are free from the abrasions often encountered. Fully struck throughout. NGC ID# 26FW, PCGS# 9168

4111 1916-S MS64 NGC. From a mintage of 796,000 pieces, the 1916-S Saint-Gaudens double eagle is an available issue in high grade. This attractive Choice example displays well-detailed design elements and lightly marked orange-gold surfaces with vibrant mint luster throughout. NGC ID# 34NJ, PCGS# 9169

**1916-S Double Eagle, MS65
Only Issue of the Year**

4112 1916-S MS65 PCGS. Vibrant luster illuminates vivid orange-gold surfaces on this Gem 1916-S double eagle. A few light, scattered marks are not out of line for the grade. The 1916-S is the only double eagle issue of this date from any mint. After this, no double eagles were coined at any facility until 1920. The '16-S is available in this grade but scarce finer. NGC ID# 34NJ, PCGS# 9169

**1920 Double Eagle, MS64
Only Two Coins Finer at PCGS**

4113 1920 MS64 PCGS. The 1920 is one of the more famous condition rarities in the Saint-Gaudens double eagle series. Examples are available through MS64, but in MS65 the issue is prohibitively rare. PCGS lists only two such coins and none are finer (9/18). This places increased demand on the population of MS64 coins. Offered here is a lustrous, well-struck near-Gem with a vibrant cartwheel effect. Grade-limiting abrasions are trivial. NGC ID# 26FY, PCGS# 9170

1922 Saint-Gaudens Twenty, MS65
Conditionally Rare Any Finer

- 4114 1922 MS65 NGC.** Most 1922 double eagles escaped the nationalization and melting of gold, although much of the issue known today comes from repatriated foreign holdings. This smooth and lustrous, orange-gold MS65 example displays a satinlike sheen with no marks to be seen aside for tiny, insignificant chatter among the lower reverse rays. The strike is sharp, with minimal weakness at the Capitol building, which is often incomplete for the issue. While Gem examples are relatively available, the 1922 is extremely rare any finer with fewer than two dozen Premium Gem (or finer) coins certified (9/18). NGC ID# 26G3, PCGS# 9173

1922-S Twenty Dollar, MS62
Pleasing for the Grade

- 4115 1922-S MS62 PCGS.** Bright yellow-gold surfaces showcase sharp design elements on this Mint State 1922-S double eagle. Some die erosion around the reverse periphery is noted, but the obverse is better defined. Scattered light abrasions account for the grade, but the overall eye appeal is yet pleasing. The 1922-S is a slightly better date in Uncirculated condition despite a mintage in excess of 2.6 million pieces. NGC ID# 26G4, PCGS# 9174

1923 Saint-Gaudens Double Eagle, MS65
Popular Type Issue

- 4116 1923 MS65 NGC. CAC.** The 1923 Saint-Gaudens double eagle is an available issue in MS65 condition and a popular choice of type collectors. The 1923 is definitely rare in finer grades, however. This attractive Gem is sharply detailed in most areas, with some of the typical flatness on the Capitol. The lustrous orange-gold surfaces are well-preserved and appealing. NGC has graded no coins in higher numeric grades (9/18). NGC ID# 26G5, PCGS# 9175

1923-D Twenty Dollar, MS66
Beautiful Coloration

- 4117 1923-D MS66 PCGS.** The 1923-D has a reputation for often showcasing tremendous eye appeal, which makes it a popular choice for type collectors. This Premium Gem does not disappoint. Frosty, radiant cartwheel luster engulfs each side and shows only the most trivial of contact marks. The interiors have rich rose-gold color, yielding to brighter green-gold borders. The border hue forms a defined halo around the warm centers. NGC ID# 26G6, PCGS# 9176

- 4118 1924 MS65 PCGS. CAC.** Lime-green borders encompass peach-gold centers. Boldly struck and lustrous with uncommonly smooth surfaces. One narrow strike-through (as coined) west of the base of the torch. The 1924 is the most prevalent pre-1933 gold issue of any denomination, but outstanding Gems are nonetheless desirable. Encapsulated in a first-generation "rattler" holder. NGC ID# 26G7, PCGS# 9177

- 4119 1925 MS66 PCGS.** The availability of the 1925 Saint-Gaudens double eagle is widespread through MS66 condition, but the issue becomes rare any finer. Glistening mint frost combines with rich honey-gold color over marvelously preserved surfaces. Every element of the design is well-struck. Lilac accents and a few copper spots are seen. Just seven finer examples at PCGS (9/18). NGC ID# 26GA, PCGS# 9180

- 4120 1927 MS65 NGC. CAC.** A beautiful peach-gold Saint-Gaudens type coin. Well-preserved fields combine with dynamic luster and a good strike to ensure the eye appeal. The 1927 will never be rare, but attractive Gems are always in demand. Housed in a former generation holder. NGC ID# 26GG, PCGS# 9186

- 4121 1927 MS65 PCGS. CAC.** A lovely orange-gold Gem that boasts potent luster, a good strike, and attractive surfaces. The 1927 is often selected to represent the Saint-Gaudens twenty dollar design within a gold type set. Housed in a first-generation "rattler" holder. NGC ID# 26GG, PCGS# 9186

- 4122 1928 MS65+ NGC. CAC.** The 1928 Saint-Gaudens double eagle is an available issue in high grade and a popular choice of type collectors. This Plus-graded Gem displays sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster throughout. NGC ID# 34VK, PCGS# 9189

COMMEMORATIVE SILVER

1893 Isabella Quarter, Toned MS66 Thick Mint Luster

4123 1893 Isabella Quarter MS66 PCGS Secure. CAC. This luminous Gem type coin displays sharp motifs and unabraded surfaces. Original olive, amber-gold, and russet toning embraces softly frosted fields and devices, promoting excellent visual merit. The distribution of the Isabella quarter amounted to only 24,214 coins, and Gem survivors are in high demand today. NGC ID# BYJ9, PCGS# 9220

4124 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B. Light to medium dove-gray and straw-gold toning accompanies this lustrous and well-struck Choice silver dollar. Small areas of charcoal patina are noted near Lafayette's profile and the horse's tail. Remarkably smooth save for unimportant contact on Washington. NGC ID# BYKW, PCGS# 9222

4125 1921 Alabama MS66 NGC. The average certified assessment for the 1921 Alabama half dollar is fractionally better than MS62. This Premium Gem represents the highest collectible grade for the issue, and only a handful of coins are known finer, including eight submissions at NGC (9/18). Softly shimmering surfaces display daubs of gold, crimson, and gunmetal patina, though the obverse remains mostly brilliant. NGC ID# BYF2, PCGS# 9224

4126 1939 Arkansas MS66 PCGS. The 1939 Arkansas half dollar is scarce in this grade, and only a handful of pieces are finer at PCGS and NGC combined. This Premium Gem displays light olive-gold toning that deepens around the peripheries. Scattered microscopic russet flecks appear under a loupe. Eye appeal is outstanding. Population: 87 in 66 (9 in 66+), 3 finer (9/18). NGC ID# BYFJ, PCGS# 9249

4127 1939 Arkansas PDS Set MS65 PCGS. The trio are housed in separate holders bearing consecutive certification numbers. The final-year Arkansas set has one of the lowest mintages of the classic silver commemorative series: 2,100 pieces, excluding the few coins reserved for assay. The Philadelphia and San Francisco examples display blushes of attractive golden-brown toning. The Denver Gem has tan-brown patina on the central obverse and a single slender mark on Liberty's cheek. (Total: 3 coins) NGC ID# BYFJ, PCGS# 9252

4128 1936 Bridgeport MS67 PCGS. CAC. A Superb and essentially flawless example of this well-designed Art Deco (well, at least the reverse) commemorative half. The mint luster is smooth and flows uninterrupted across each side with just the slightest gray patina present that deepens around the margins. NGC ID# BYG9, PCGS# 9279

4129 1928 Hawaiian MS63 PCGS. CAC. Most of the well-preserved surfaces of this impressive Select example are blanketed in shades of sea-green and lavender-gray toning, with a darker crescent of slate-gray on the obverse. The design elements are sharply detailed and vibrant luster shines through the patina. NGC ID# BYGR, PCGS# 9309

4130 1918 Lincoln MS67 NGC. Often called the Lincoln half dollar, this 1918 commemorative is officially the Illinois Centennial half dollar. Superb Gems are scarce and highly sought-after. This piece displays sharp motifs and radiant cartwheel luster. Gold and light olive toning covers each side. Census: 81 in 67 (1 in 67+, 8 in 67 ★, 3 in 67+★), 6 finer (9/18). NGC ID# BYGU, PCGS# 9320

4131 1921 Missouri MS65 NGC. An impressive Gem specimen of this popular silver commemorative, with lightly marked surfaces that are blanketed in shades of lavender-gray and pale gold toning. The design elements are well-detailed and vibrant mint luster shines through the patina. NGC has graded 46 numerically finer examples (9/18). NGC ID# BYH2, PCGS# 9330

4132 1923-S Monroe MS66 PCGS Secure. Well-struck and frosty with light olive-gold toning. A loupe reveals only the most trivial surface grazes, which keep this coin from an even finer grade. Still, it is scarce in Premium Gem condition. PCGS lists just seven finer representatives (9/18). NGC ID# BYH4, PCGS# 9333

1938 New Rochelle, MS68 None Numerically Finer, CAC Endorsed

4133 1938 New Rochelle MS68 NGC. CAC. The 1938 New Rochelle half dollar claims a distribution figure of 15,266 pieces, but only a handful of survivors can match the quality of the present coin. This magnificent MS68 specimen shows spectacular "tab toning" on the obverse, while the reverse remains mostly brilliant, with a few hints of greenish-gold at the peripheries. The design elements show razor-sharp definition and the surfaces radiate satiny mint luster. Census: 20 in 68 (1 in 68+, 4 in 68 ★, 1 in 68+★), 0 finer. CAC: 3 in 68, 0 finer (9/18). NGC ID# BYDX, PCGS# 9335

4134 1937-D Oregon MS68 NGC. This spectacular silver commemorative exhibits sharply detailed design elements and virtually pristine, lustrous surfaces, with highlights of lavender-gray, sea-green, and amber toning. Census: 84 in 68 (2 in 68+, 6 in 68 ★, 3 in 68+★), 1 finer (9/18). NGC ID# BYHG, PCGS# 9347

4135 1937 Roanoke MS68 NGC. A stunning MS68 specimen of this popular silver commemorative, with razor-sharp definition on all design elements and impeccably preserved lustrous surfaces that show a few highlights of pale gold and lavender toning. Census: 39 in 68 (10 in 68 ★), 0 finer (9/18). NGC ID# BYHW, PCGS# 9367

4136 1925 Vancouver MS67 NGC. An impressive Superb Gem Vancouver half dollar, this piece ranks near the Condition Census of the issue, with only four numerically finer examples certified at NGC and PCGS combined. This piece has brilliant satin mint luster with splashes of gold, sea-green, and iridescent toning. Census: 65 in 67 (4 in 67+, 11 in 67 ★), 1 finer (9/18). NGC ID# BYJP, PCGS# 9399

1925 Vancouver Half Dollar, MS67
Extremely Rare Any Finer

4137 1925 Vancouver MS67 PCGS. CAC. Shades of sea-green, lavender-gray, and amber toning visit the impeccably preserved surfaces of this remarkable Superb Gem, from a distribution of 14,994 pieces. The design elements are well-detailed and vibrant, satiny mint luster shines through the patina. Population: 78 in 67 (13 in 67+), 3 finer. CAC: 37 in 67, 0 finer (9/18). NGC ID# BYJP, PCGS# 9399

4138 1950 Booker T. Washington MS67 PCGS Secure. CAC. A spectacular Superb Gem representative of this popular commemorative issue, with sharply detailed design elements and virtually pristine surfaces that radiate vibrant mint luster, with terrific eye appeal. A few hints of lavender and pale gold toning visit both sides, along with a single streak of amber on the obverse. NGC ID# BYK6, PCGS# 9420

4139 1936 Wisconsin MS68 NGC. A magnificent MS68 specimen of this popular commemorative issue, with sharply detailed design elements and virtually pristine lustrous surfaces that show attractive highlights of lavender and pale gold toning. Census: 49 in 68 (4 in 68+, 8 in 68 ★, 1 in 68+★), 1 finer (9/18). NGC ID# BYKU, PCGS# 9447

COMMEMORATIVE GOLD

4140 11-Piece Gold Commemorative Set MS62 NGC and PCGS. All coins are identically graded, housed in green-label PCGS holders (eight coins), an old green-label PCGS holder (one coin), and early NGC holders (two coins). The round or octagonal 1915-S fifty dollar issues are absent, but otherwise a complete and conservatively graded set of classic gold commemoratives. The set includes:

1903 Louisiana Purchase Exposition Jefferson Gold Dollar. Sharp and satiny with warm orange-gold patina. A couple of small marks are seen in the left obverse field.

1903 Louisiana Purchase Exposition McKinley Gold Dollar. Sharp and satiny with original wheat-gold coloration. A short radial die crack is seen from the through the ST. in ST. LOUIS.

1904 Lewis and Clark Gold Dollar. Beautiful tangerine-orange and lilac-gold color. The luster is luminous.

1905 Lewis and Clark Gold Dollar. Satiny with rich orange-gold coloration. Abrasions in the right obverse field limit the grade.

1915-S Panama-Pacific Gold Dollar. Normal mintmark. A sharp coin with yellow-gold luster and light abrasions.

1915-S Panama-Pacific Quarter Eagle. Slivers of lilac color appear throughout vivid sun-gold surfaces on this well-struck example.

1916 McKinley Gold Dollar. A razor-sharp coin, high-end for the grade. Rich orange-gold color shows a few coppery flecks on each side.

1917 McKinley Gold Dollar. As well-preserved as the 1916 coin aforementioned, but with lighter yellow-gold color and minor strike weakness on the central reverse.

1922 Grant Gold Dollar, No Star. A sharp example with satiny orange-gold surfaces and no bothersome abrasions.

1922 Grant Gold Dollar, With Star. Impressively sharp and worthy of recognition on that aspect alone. This piece is satiny with bright yellow-gold color.

1926 Sesquicentennial Quarter Eagle. Frosty, luminous mint luster shows only trivial surface grazes and features original orange and greenish-gold hues. (Total: 11 coins)

4141 11-Piece Gold Commemorative Set MS64 PCGS. All coins are housed in identically-graded old green-label holders. Without the round or octagonal 1915-S fifty dollar issues, but otherwise a complete and conservatively graded set of classic gold commemoratives. The set includes:

1903 Louisiana Purchase Exposition Jefferson Gold Dollar. A full strike, apple-green borders frame sun-gold centers.

1903 Louisiana Purchase Exposition McKinley Gold Dollar. Sea-green and apricot-shades compete for territory.

1904 Lewis and Clark Gold Dollar. Lime-green hues dominate, though pumpkin-gold also emerges.

1905 Lewis and Clark Gold Dollar. The pale peach-gold surfaces are smooth and satiny.

1915-S Panama-Pacific Gold Dollar. Ideal aside from a delicate mark or two on the cheek of the canal worker.

1915-S Panama-Pacific Quarter Eagle. Blushes of orange-red toning visit sharply struck surfaces.

1916 McKinley Gold Dollar. Hints of lilac patina accompany this highly lustrous and unmarked example.

1917 McKinley Gold Dollar. Lustrous and lovely with a bold strike and exemplary preservation.

1922 Grant Gold Dollar, No Star. A couple of tiny rose-red alloy spots on Grant's collar.

1922 Grant Gold Dollar, With Star. Glimpses of peach toning overlie unmarked green-gold surfaces.

1926 Sesquicentennial Quarter Eagle. A minimally marked near-Gem with apple-green fields and pumpkin-gold motifs. (Total: 11 coins) NGC ID# BYLD, PCGS# 7443

4142 1903 Louisiana Purchase, Jefferson Gold Dollar MS66 PCGS. The well-preserved orange-gold surfaces of this impressive Premium Gem radiate vibrant mint luster on both sides and the design elements are sharply detailed. A single amber alloy spot is evident by the L in Louisiana. NGC ID# BYLD, PCGS# 7443

1903 Louisiana Purchase Gold Dollar, MS67 Beautiful McKinley Type Coin

4143 1903 Louisiana Purchase, McKinley Gold Dollar MS67 PCGS Secure. Two varieties of the gold dollar commemorative were issued for the Louisiana Purchase Exposition, held in St. Louis in 1904. This is the McKinley variant, whose distribution was 17,500 coins (the same as the Jefferson type). The obverse fields are striated as made, and both sides have frosted orange-gold luster and sharp design elements. Eye appeal meets all expectations for the lofty grade. PCGS lists only three finer representatives (9/18). NGC ID# BYLE, PCGS# 7444

4144 1915-S Panama-Pacific Gold Dollar MS66 PCGS. A sharp, frosty Premium Gem that exhibits near-pristine surfaces and rich orange-gold color. A few small, coppery specks appear under a loupe, attesting to the originality. The Pan-Pac gold dollar is available in this grade but seldom offered finer. NGC ID# BYLH, PCGS# 7449

4145 1915-S Panama-Pacific Quarter Eagle — Obverse Scratched — NGC Details. Unc. Thorough evaluation beneath a lens finally locates a pair of delicate pinscratches on the hippocampus and drapery. Otherwise, this sharply struck and lustrous green-gold example is undisturbed and attractive.

4146 1917 McKinley Gold Dollar MS66 PCGS. This was the third commemorative gold dollar to feature the slain president. Gleaming peach-gold surfaces present predictably few abrasions for the Premium Gem grade. A well-struck example of this Barber-Morgan collaboration. NGC ID# BYLL, PCGS# 7455

4147 1926 Sesquicentennial Quarter Eagle MS65 PCGS. Luminous, frosty mint luster engulfs this Gem Sesquicentennial quarter eagle, illuminating well-struck devices and showing no mentionable abrasions. The margins have bright yellow-gold coloration, surrounding slightly warmer rose-gold interiors. Eye appeal is exceptional. NGC ID# 2FE9, PCGS# 7466

MODERN BULLION COINS

1987 Half-Ounce Gold Eagle, MS70 Scarce This Fine

4148 1987 Half-Ounce Gold Eagle MS70 NGC. The luminous surfaces of this flawlessly preserved half-ounce Gold Eagle shimmer when rotated beneath a light, and the design elements are struck to the full depth of the dies. Under a loupe, a faint mattelike texture is observed. The 1987 half-ounce Gold Eagle is scarce in MS70, even in an NGC holder. NGC reports just 90 submissions in this top grade (9/18). NGC ID# 26N8, PCGS# 9812

4149 1990 Silver Eagle MS70 NGC. This magnificent one-ounce Silver Eagle displays full definition on all design elements and the lustrous surfaces are free of even the most insignificant imperfections. A few delicate hints of golden-tan toning add to the outstanding eye appeal. NGC ID# 26JC, PCGS# 9836

4150 1990 Silver Eagle MS70 NGC. The design elements of this spectacular one-ounce Silver Eagle are fully detailed throughout and the lustrous surfaces are completely free of even the most insignificant distractions. Eye appeal is terrific. NGC ID# 26JC, PCGS# 9836

4151 1991 Silver Eagle MS70 NGC. This delightful one-ounce Silver Eagle exhibits razor-sharp definition on all design elements and the technically perfect surfaces display vibrant mint luster on both sides. Overall eye appeal is tremendous. NGC ID# 26JE, PCGS# 9846

4152 1993 Silver Eagle MS70 NGC. A spectacular example of the popular one-ounce Silver Eagle, with technically perfect surfaces and fully detailed design elements throughout. Vibrant mint luster and a few highlights of golden-tan toning add to the terrific visual appeal. NGC ID# 26JJ, PCGS# 9866

4153 1994 Silver Eagle MS70 NGC. This spectacular one-ounce Silver Eagle exhibits fully detailed design elements and technically perfect surfaces that show a few highlights of emerald-green toning. Vibrant mint luster adds to the terrific eye appeal. NGC ID# 26JL, PCGS# 9876

4154 1995 Silver Eagle MS70 NGC. Vibrant, frosty luster engulfs this perfectly preserved Registry Set coin. The strike is sharp, and the brilliant interiors are framed by warm yellow-gold border toning. A beautiful, shimmering coin with great eye appeal. NGC ID# 26JN, PCGS# 9886

**1995-W Silver Eagle, PR69 Ultra Cameo
Low-Mintage Key Issue**

4155 1995-W Silver Eagle PR69 Ultra Cameo NGC. The 1995-W one-ounce Silver Eagle is the acknowledged key to the series, with a meager mintage of 30,125 pieces. This spectacular PR69 example exhibits fully detailed, frosty design elements that contrast profoundly with the deeply mirrored fields to create an intense cameo effect. The brilliant surfaces are just one tick away from technical perfection. NGC ID# CFWX, PCGS# 9887

4156 1996 Silver Eagle MS70 NGC. Registry Set collectors and Silver Eagle enthusiasts in general seek after flawless examples of each issue. The 1996 is somewhat scarce in MS70 and highly sought-after. This piece is fully struck, showing frost-white luster that shimmers when rotated beneath a light. An outstanding example of the date and a top contender for Registry Sets. NGC ID# 26JR, PCGS# 9900

4157 1996 Silver Eagle MS70 NGC. Shimmering, frosty luster is untuned as it illuminates fully struck devices on this pristine 1996 Silver Eagle. Top-grade examples of this issue are elusive, most being housed in NGC holders. Registry Set collectors especially create an active market for these pieces. A beautiful coin worthy of the finest Silver Eagle collection. NGC ID# 26JR, PCGS# 9900

4158 1996 Silver Eagle MS70 NGC. This magnificent one-ounce Silver Eagle exhibits fully struck design elements throughout and the technically perfect surfaces radiate vibrant mint luster, with a few hints of lavender-gray and pale gold toning. NGC ID# 26JR, PCGS# 9900

4159 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 NGC. The Y2K scare increased sales of bullion coins to those seeking protection against software displaying an incorrect date. The extra demand at the U.S. Mint presumably led to a pair of 1999-W quarter-ounce gold dies receiving a satin finish instead of the expected proof finish. The resulting variety is scarce and listed in the *Guide Book*. The present example exhibits an intricate strike and an immaculate appearance. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

4160 2000 Silver Eagle MS70 NGC. This is one of the last truly scarce American Silver Eagles in MS70 before the populations start to inflate dramatically in 2002. Only a handful of other issues are more elusive in this ultimate grade level. Not a speck of color or a single surface mark appear on this unimprovable representative. Both sides are brilliant with satiny mint luster. NGC ID# 26JZ, PCGS# 9949

4161 2009 One-Ounce Gold Ultra High Relief Twenty Dollar, Thomas Cleveland, Edition of 2,500 MS70 Prooflike PCGS. These 2009 Ultra High Relief double eagles were and continue to be extremely popular with collectors, especially in flawless MS70 Prooflike condition. This piece has deeply reflective fields that surround fully raised devices amid orange-gold surfaces. PCGS# 674601 Base PCGS# 506602

S.S.C.A. RELIC GOLD MEDAL

**2008 'Humbert Commemorative' Slug
Struck From S.S. Central America Ingots
Gem Proof**

4162 2008 "Humbert \$50 Commemorative" Gem Proof NGC. #232 of 375. A hefty proof gold piece struck September 12, 2008, from Humbert gold ingots 830 and 555, after they were recovered from the S.S. Central America shipwreck. The 2008 date is on the reverse, while the obverse features the date 1852, when the U.S. Assay Office in San Francisco was producing the original octagonal "slugs." The fields are deeply mirrored, complementing sharp, satiny devices. Both sides have bright yellow-gold color. *From The Marcello Collection.* PCGS# 10361

CALIFORNIA FRACTIONAL GOLD

4163 1854 Liberty Octagonal 25 Cents, BG-105, R.3, MS66 PCGS Secure. Die State I. A prominently mirrored high-grade example of this popular Period One variety. Evenly struck and void of detractors. The O and R in DOLLAR are repunched, and Liberty's hair is partially lapped. Population: 8 in 66, 1 finer (9/18). NGC ID# 2BGP, PCGS# 10374

4164 1855 Liberty Octagonal 25 Cents, BG-110, High R.4, MS65 NGC. A well-struck tan-gold Gem of this scarce Period One variety. Void of marks, and the sole imperfections are a few pin-point flecks in front of Liberty's chin. None are certified finer by either NGC or PCGS. Census: 4 in 65, 0 finer (9/18). NGC ID# 2BGV, PCGS# 10379

4165 Undated Liberty Round 25 Cents, BG-203, R.6, MS62 PCGS Secure. An early Period One variety attributed to Lionel and Josephus Joseph, British-immigrant jewelers in San Francisco. A well-struck caramel-gold and sea-green representative with smooth problem-free surfaces. Population: 8 in 62, 11 finer (9/18). NGC ID# 2BGZ, PCGS# 10388

**1870 BG-789 Octagonal Quarter, MS66
Scarce 'Goofy Head' Variety**

4166 1870 Goofy Head Octagonal 25 Cents, BG-789, R.4, MS66 PCGS Secure. The dramatic Die State IV with a large cud on the reverse between 1 and 3 o'clock. The Goofy Head maker is unknown, but examples are scarce, since only six die marriages exist, one for each shape and denomination. This is a charming sun-gold Premium Gem. The obverse margin is distinct opposite the cud, characteristic of the terminal die state. Tied with one other for the honor of finest certified at PCGS; none are graded above MS65 by NGC. NGC ID# 2BR9, PCGS# 10616

- 4167** 1881 Indian Octagonal 25 Cents, BG-7990, Low R.4, MS66 Prooflike PCGS Secure. As of (9/18), PCGS has certified 6 examples at the MS66 level, but only the present piece is designated as Prooflike. The butter-gold surfaces are reflective and evenly struck. The lower reverse displays a few "ghosts" from the stars, but there are no post-strike imperfections. From the busy workshop of Christopher Ferdinand Mohrig. PCGS# 680856 Base PCGS# 10641

**1872/1 Round Indian Quarter, BG-869
MS67 Prooflike, Single Finest at PCGS**

- 4168** 1872/1 Indian Round 25 Cents, BG-869, Low R.4, MS67 Prooflike PCGS Secure. Struck from the same die pair as BG-868, but leaves and berries were re-engraved "probably to distinguish Mohrig's work from Frontier & Bellemere," per the Breen-Gillio Second Edition. This crisply struck Superb Gem has smooth, glassy honey-gold fields and the reverse crack and clash marks characteristic of BG-869. Presently the single-highest graded example at PCGS (9/18). NGC ID# 2BV2, PCGS# 10730

- 4169** 1874 Indian Round Half Dollar, BG-1072, R.6, MS65 Prooflike PCGS Secure. A splendid Gem that boasts radiant lemon-gold fields. The strike shows blending at the centers, but there are no post-strike detractors. A very rare backdated variety from the productive San Francisco workshop of Christopher Ferdinand Mohrig. PCGS# 680360

COIN OF HAWAII

- 4170** 1847 Hawaii Cent MS63 Brown PCGS. M. 2CC-2. Crosslet 4, 15 berries. A satiny tan-brown representative with sea-green undertones and a bold strike. A diagonal line above the left (facing) shoulder provides the only contact. We note minor carbon about the M in MOI, and glimpses of russet patina on the reverse near 3 and 9 o'clock. NGC ID# 2C52, PCGS# 10965

PATTERNS

**1850 Perforated Cent in Billon
Judd-119 Original, PR64**

- 4171** 1850 One Cent, Judd-119 Original, Pollock-134, Low R.6, PR64 PCGS. The obverse displays the denomination CENT at the top, the date 1850 at the bottom, two rosettes at the sides, and a perforation in the center. The shattered reverse has the inscriptions USA and ONE TENTH SILVER around. Struck in billon (10% silver, 90% copper) with a plain edge. According to USPatterns.com, the billon strikings with a central perforation are originals. Each side shows deep streaks of toning, mostly gray-blue, and the left-side obverse is noticeably deeper-hued than the right side. Ex: ANA Signature (Heritage, 3/2011), lot 4363, where it brought \$2,530. NGC ID# 2A57, PCGS# 11511

**1855 Hooked-Neck Flying Eagle Cent
Judd-173, Struck in Bronze, PR63 Brown**

- 4172** 1855 Flying Eagle Cent, Judd-173, Pollock-198, Low R.7, PR63 Brown PCGS. The Flying Eagle cent pattern in large format, featuring a hooked-neck eagle on the obverse and ONE CENT in the center of the reverse surrounded by a small laurel wreath. Struck in bronze with a plain edge. The brown surfaces are lightly streaked with faint red across each side, suggestive of improper mixture of the bronze alloy (thus confirming it is bronze rather than a copper striking). Sharply defined, except on the highest portions of the wreath. A small carbon spot can be seen on the lower portion of the wreath. NGC ID# 27MB, PCGS# 11748

**1858 Flying Eagle Cent Pattern
Judd-202, Choice Proof**

- 4173** 1858 Flying Eagle Cent, Judd-202, Pollock-245, Snow-PT19, R.5, PR64 NGC. The Small Eagle obverse with open claws and raised wings. The tall, thin obverse letters represent Paquet's style. The reverse is similar to the regular issue 1859 Indian cent. The Pollock subvariety with five-leaf clusters. Struck in copper-nickel with a plain edge. This well struck and unmarked near-Gem is predominantly tan-brown but displays apricot-gold in design recesses. Granularity is confined to the obverse margin near 2:30. Both sides exhibit a partial wire rim. NGC ID# 29BH, PCGS# 11867

**1858 Indian Cent in Copper-Nickel
Judd-212, PR64 Cameo**

- 4174** 1858 Indian Cent, Judd-212, Pollock-263, R.4, PR64 Cameo PCGS. Eagle Eye Photo Seal and Certificate. This is a Centered Date variant with a rounded bust tip. Similar to the later regular issue Indian cent but with a broad, ornamented shield at the top of the reverse and broad rims. Struck in copper-nickel with a plain edge. The reddish patina seen across each side gives little hint about the coin's copper-nickel composition. The fields are deeply reflective and serve to enhance the lustrous devices and heighten the cameo contrast. One tiny fleck in the center of the Indian's cheek is the only restriction from an even higher numeric grade. PCGS# 811895

1859 Indian Cent With Ornamental Shield
Judd-227, PR64

- 4175** 1859 Indian Cent, Judd-227, Pollock-271, Low R.6, PR64 PCGS. Eagle Eye Photo Seal and Certificate. The designs are similar to the issued 1860 Pointed Bust cent, except the shield on the upper reverse is broad and ornamental. Struck in copper-nickel with a plain edge. This is a relatively common Indian cent pattern, but it is surprisingly difficult to locate in near-Gem and finer grades. This is a nicely reflective example. The obverse displays even reddish-orange color, while the reverse shows significant lilac patina, a color often seen on this issue. NGC ID# 29C7, PCGS# 11930

1870 Standard Silver Dime in Silver
Judd-849, PR63 Cameo

- 4176** 1870 Standard Silver Ten Cents, Judd-849, Pollock-956, R.5, PR63 Cameo NGC. This Standard Silver design shows a bust of Liberty facing right with UNITED STATES OF AMERICA above and IN GOD WE TRUST below. The reverse has 10 CENTS and the date in the center, surrounded by a wreath of cotton and corn with STANDARD above. Struck in silver with a reeded edge. Both reeded edge and plain edge silver variants of this pattern are fairly common and affordable. The copper and aluminum examples are much scarcer. This is an essentially all-brilliant piece with strongly contrasted fields and devices. As usual, heavy die striations are present in the fields, as struck. PCGS# 800090

1870 Standard Silver Dime in Aluminum
Judd-866, PR65+ Cameo

- 4177** 1870 Standard Silver Ten Cents, Judd-866, Pollock-955, High R.7, PR65+ Cameo PCGS Secure. On the obverse the head of Liberty is wearing a diadem with a plain ribbon encircling her hair, the reverse has 10 CENTS in the center surrounded by a thick oak and laurel wreath with STANDARD SILVER 1870 at the margin. Struck in aluminum with a plain edge. Only a dozen or so examples are believed known in silver, both with reeded and plain edges. Copper and aluminum pieces are twice as scarce. This is a bright, strongly contrasted aluminum striking whose only noticeable flaw is a streak of oxidation along Liberty's jawline. PCGS# 800046 Base PCGS# 61110

1870 Standard Silver Half Dollar
Judd-957, PR64

- 4178** 1870 Standard Silver Half Dollar, Judd-957, Pollock-1108, R.5, PR64 PCGS. Ex: The New Millennium Collection. A bust of Liberty faces right and is surrounded by UNITED STATES OF AMERICA. The figure of Liberty wears a headband inscribed LIBERTY, and the front of the headband has a large star. IN GOD WE TRUST is below on a banner. The reverse features 50/ CENTS / 1870 within a wreath of cotton and corn. STANDARD is centered above the wreath. Struck in silver with a reeded edge. Although the B in LIBERTY is not fully brought up, the strike is generally crisp. The richly toned golden-brown and mauve fields are moderately reflective and nicely preserved.
Ex: November Signature (Heritage, 11/2003), lot 11150; FUN Signature (Heritage, 1/2015), lot 6743. NGC ID# 26VX, PCGS# 61203

**1870 Standard Silver Half Dollar in Copper
Judd-959, PR64 Red and Brown**

- 4179** 1870 Standard Silver Half Dollar, Judd-959, Pollock-1110, R.7, PR64 Red and Brown PCGS Secure. CAC. A bust of Liberty faces right. She wears a headband decorated with a star and inscribed LIBERTY. Her hair is tied up in a bun. IN GOD WE TRUST is emblazoned on a scroll below, and UNITED STATES OF AMERICA surrounds the portrait. The reverse has the familiar wreath of corn and cotton, with 50/CENTS/1870 centered therein. STANDARD crowns the wreath. Struck in copper with a reeded edge. Fewer than a half dozen examples are known, according to USPatterns.com. Fire-orange and golden-brown surfaces include tinges of pastel rose and blue color. Contact is difficult to discern without magnification. We note two small specks above S1 on the obverse and left of the 5 on the reverse. NGC ID# 29YR, PCGS# 71205

**(1982) '1759' Martha Washington Cent-Sized Medal
Struck in Bronze, Judd-2180, MS63 Red and Brown**

- 4180** (1982) "1759" Martha Washington Cent-Sized Medal, Judd-2180, Pollock-Unlisted, High R.7, MS63 Red and Brown PCGS. The obverse shows a central figure of Martha Washington facing right, VIRGINIA above and the fantasy date 1759 below, the motto in the right obverse field. The reverse depicts Mount Vernon in the center, surrounded by HOME OF THE WASHINGTON FAMILY around the margin and MOUNT VERNON below the Washington home. This Martha Washington fantasy design was first used in 1965 to test a new composition for the cent before there was a change from bronze to copper-coated zinc. Later these dies were used both in the Mint and by private entities to test various concepts. The 1982 date is tentative and examples may have been struck at other times as well. Since the first auction appearance of these cent-sized patterns in our November 2003 auction there are now more than a dozen examples believed known. The surfaces glow with red mint luster that is slightly subdued by central browning. PCGS# 510454

WORLD

- 4181** (1945-1946) Saudi Arabia, Ibn Saud, Gold 4 Pounds — Obverse Scratched — NGC Details. Unc. KM-34. Struck at the Philadelphia Mint as payment for Saudi oil rights. The gold weight is equivalent to four British sovereigns. The butter-gold fields display scattered minor abrasions, along with a light diagonal pinscratch on the upper left obverse noted by NGC.

GSA DOLLARS

- 4182** 1880-CC 8 Over High 7, VAM-5, GSA, MS65 NGC. A Top 100 Variety. The ears, crossbar, stem, downstroke, and checkmark of an underdigit 7 are obvious within the second 8. A lustrous and brilliant Gem of the popular Carson City issue. The reverse is close to pristine, as is the right obverse field. NGC ID# 2542, PCGS# 518854 Base PCGS# 7102
- 4183** 1883-CC GSA MS66 Prooflike NGC. VAM-5B. A narrow band of forest-green, cherry-red, and autumn-gold toning graces the left obverse periphery of this otherwise brilliant Carson City type coin. The strike is good and the fields are reflective. A small spot is noted on the west border of the eagle's right (facing) leg. No box or certificate is included. NGC ID# 254H, PCGS# 518870 Base PCGS# 7145

**1883-CC GSA Silver Dollar
MS66 Deep Mirror Prooflike**

- 4184** 1883-CC GSA MS66 Deep Mirror Prooflike PCGS. The 1883-CC emerged in quantity from GSA holdings, but few such pieces merit the lofty grade of MS66, especially with Deep Mirror surfaces. This nicely struck and brilliant Carson City type coin offers frosty motifs and shows only a single slender mark, in the field near Liberty's nose. Population: 3 in 66 Deep Mirror Prooflike, 0 finer (8/18). NGC ID# 254H, PCGS# 518871 Base PCGS# 97145

**1890-CC Silver Dollar, MS62
Elusive in a GSA Holder**

- 4185** 1890-CC GSA MS62 NGC. A lustrous and mostly brilliant example of this better Carson City issue, which is scarce in a GSA holder. The nicely struck surfaces display minor marks corresponding to the grade. The lower left obverse exhibits a few small gray dots, a toning pattern associated with long-term storage against the inside of a Treasury bag. Included with the lot is a GSA box and certificate, though the serial number has been trimmed. Ex: Lenny Reiner Collection, Part VI (Heritage, 12/2016), lot 66313, which realized \$3,055. NGC ID# 255D, PCGS# 518878 Base PCGS# 7198

- 4186** 1891-CC GSA Uncertified. This scarcer date Carson City dollar has Uncirculated details, but the reverse exhibits patches of hairlines near the tailfeathers and IN GOD WE TRUST. Brilliant and lustrous with minor field marks near the chin. The strike is incomplete on the hair above the ear. A GSA box and certificate accompany the lot.

ERROR

Denver Mint Kennedy Half, MS65
Struck On a Quarter Blank
Partial Obverse Brockage

- 4187** Undated Denver Mint Kennedy Half Dollar — Struck on a Quarter Blank, Partial Obverse Brockage — MS65 NGC. 5.6 gm. A Type One clad quarter planchet was fed between half dollar dies. The planchet partially pushed out a previously struck half dollar, but that half dollar nonetheless overlapped about 10% of the quarter planchet, and was struck into the obverse at 5 o'clock. Portions of OF AME are incused, reversed, and expanded on the indented area. The date is off the flan but both the portrait and eagle are complete.

WASHINGTONIA

1799 Washington Funeral Urn Medal
White Metal, XF40, Baker-166C

- 4188** 1799 Washington Funeral Urn Medal, White Metal, XF40 NGC. Baker-166C, Fuld 1-B, Musante GW-70. Small hole at 12 o'clock, as issued and customary for the variety, which was intended to be worn at Washington's Boston civic funeral procession, held on February 22, 1800. Jacob Perkins of Newburyport, Massachusetts was the maker. This cream-gray example displays moderate high point wear but luster outlines the legends and wreath. Mentionable marks are limited to a tick or two beneath OB.D. NGC ID# D3G7, PCGS# 410788

U.S. PRESIDENTS & STATESMEN

1906 Franklin Bicentennial Medal, Unc Details
Greenslet-119, Struck in Bronzed Copper
Rare Plain Edge Variant

- 4189** 1906 Franklin Bicentennial Medal — Obverse Rim Damage — NGC Details. Unc. Greenslet-119, Plain Edge, R.7. A large and impressive medal, 101 mm diameter, commemorating Benjamin Franklin's birth year (1706). The medal depicts the bust of Franklin flanked by palm branches, with an exergue that proclaims PRINTER-PHILOSOPHER / SCIENTIST-STATESMAN / DIPLOMATIST. The reverse shows a seated figure of History inscribing a shield, while the figures of Literature, Science, and Philosophy look on. It was designed by the combined efforts of Augustus Saint-Gaudens and his brother, Louis, although Augustus was ill at the time, and most of the work was done by Louis — particularly the medal's reverse design.

The NGC holder indicates Obverse Rim Damage, which consists of two small, inconspicuous triangular indents — one beneath the first T of DIPLOMATIST, and another just left of B in BENJAMIN. While the medal's edge is not visible, the holder identifies the SCH-GM-119 variety (Plain Edge), which is much scarcer than the usual Tiffany Edge medals of this design. Just two Plain Edge examples are listed by NGC — this piece, plus one MS64 medal. We are aware of no other Plain Edge representatives. The obverse is especially well-preserved, while the reverse has two small areas of dark encrustation or verdigris, plus minor high-point incompleteness on the figure of Philosophy.

- 4190** 1917-Dated Woodrow Wilson Inauguration Medal, Official, Unfinished, MS61 NGC. Levine-WW-3, Dusterberg-OIM 6B51. Bronze, 51 mm. The high points are walnut-brown, and design recesses display deep lavender shades. Patience is required to locate infrequent evidence of incidental contact. One small spot noted on the obverse exergue. Harris & Co. of Washington, D.C. struck a reported 200 to 300 examples, but its rarity suggests a much lesser distribution. Our online auction archives show only one prior appearance, as lot 20 in our 2007 Long Beach Signature.

U.S. MINT MEDAL

John E. Howard Comitia Americana Medal
Paris Mint, Betts-595, MS63 Brown

- 4191** Lieutenant-Colonel John E. Howard MS63 Brown NGC. Betts-595, Julian-MI-9. Bronze, 47 mm. Struck by the Paris Mint from the original dies. A rim die break is present above the E in PEDITUM, and the E in ACIEM is entered low. The edge is concealed by the holder. A magnificent and boldly struck mahogany-brown specimen without contact marks or high-point friction. Julian writes, "Director Pollock ordered twenty John E. Howard medals struck in Paris and sent to Philadelphia in March, 1862." An example of Julian-MI-9 sold in a February 2017 Heritage auction for \$998.75. As of (9/18), NGC reports 4 in MS63 Brown, 1 in MS64 Brown, and 1 in MS65 Brown.

EXPOSITIONS AND FAIRS

1893 World's Columbian Exposition Medal
Eggit-338, Large Diameter, White Metal, MS63

- 4192** 1893 World's Columbian Exposition, Administration Building, View of Fair, MS63 NGC. Eggit-338. White metal, 115 mm. Nathan Eggit states the variety was struck in Britannia metal, which is chiefly tin. The engraver was F. Koenig, who worked for the Nuremberg, Germany medallic firm of Ludwig Christoph Lauer. The obverse depicts Liberty with a Union shield reclining in front of the Administration Building, with an eagle and scroll above. The reverse presents a bird's eye view of the Chicago exposition. This hefty, large diameter medal is very rare and **the only sale we could find was for an inferior AU50 example which sold for \$1925 in 1989.** The well-struck cream-gray surfaces are smooth and exhibit powder-blue and almond-gold undertones. This is the only example that NGC has certified (9/18).

End of Auction

Terms and Conditions of Auction

Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., Heritage Auctions, Inc., Heritage Collectibles, Inc., Heritage Luxury Property Auctions, Inc., Heritage Numismatic Auctions, Inc., Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatief U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the “Auctioneer”). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
 - Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
 - Twenty percent (20%) on Animation Art, Comic, Currency, Movie Posters, Sports Collectibles, US Coin, and World & Ancient Coin Auction Lots;
 - Twenty-three percent (23%) on Wine Auction lots;
 - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$250,000, plus twenty percent (20%) of any amount between \$250,000 and \$2,500,000, plus twelve percent (12%) of any amount over \$2,500,000.
 - Minimum Buyer's Premium per lot is \$19, except for Sports Collectibles lots wherein the Buyer's Premium is \$14 per lot.

Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction (“Bidder(s)”).
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

Bidding Options:

8. Bids in Signature® Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled “Choose your bidding method.” For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, email, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: “How can I lose by less than an increment?” on our website. Bids will be accepted in whole dollar amounts only. No “buy” or “unlimited” bids will be accepted.

The following chart governs current bidding increments
(see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10	\$1	\$10,000 - \$19,999	\$1,000
\$10 - \$49	\$2	\$20,000 - \$49,999	\$2,000
\$50 - \$99	\$5	\$50,000 - \$99,999	\$5,000
\$100 - \$199	\$10	\$100,000 - \$199,999	\$10,000
\$200 - \$499	\$20	\$200,000 - \$499,999	\$20,000
\$500 - \$999	\$50	\$500,000 - \$999,999	\$25,000
\$1,000 - \$1,999	\$100	\$1,000,000 - \$1,999,999	\$50,000
\$2,000 - \$4,999	\$200	\$2,000,000 - \$9,999,999	\$100,000
\$5,000 - \$9,999	\$500	>= \$10,000,000	\$200,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment (“Cut Bid”) only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A “Minimum Bid” is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN “Minimum Bids” ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE “Minimum Bid”, THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. “Minimum Bids” are generally posted online several days prior to the Auction closing. For any successful bid placed by a

consignor on his Property on the Auction floor, or by any means during the live session, or after the “Minimum Bid” for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in “Good Faith” when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in “Good Faith.” Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes “good funds”: checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer.
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Should state sales tax become applicable in the state for delivery prior to delivery of the property on the invoice, the bidder agrees to pay all applicable state sales tax as required by the delivery state as of the shipping date. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

Delivery, Shipping, and Handling Charges:

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item's hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:
- Scope of Transit Services:** Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, you will provide a Secure Location to which the items will be delivered. NOTICE: **Auctioneer is neither an insurance company nor a common carrier of any type.**
 - Auctioneer's Compensation for Transit Services:** Auctioneer will provide transit services to Buyer for ¼ of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.
 - Auctioneer's Limitation of Liability for Transit Services:** You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**
35. It shall be the responsibility for the successful Bidder to arrange pick-up or shipping in a timely manner (within 10 days). Held Lots will be subject to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 20% Seller's Commission.
36. A. NOTICE OF CITES COMPLIANCE: The purchase of items made from protected species: Any property made of or incorporating endangered or protected species or wildlife may have import and/or export restrictions established by the Convention of International Trade in Endangered Species of Wild Fauna and Flora (CITES) in various countries and domestically. Plant and animal properties include (but are not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, alligator, lizard, or other wildlife. These items may not be available to ship internationally or, in some cases, domestically. Domestic bans and restrictions exist in these states: 1) California state law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California. 2) Fossil Ivory is currently banned or restricted in 5 U.S. states: New York, New Jersey, California, Hawaii, and New Mexico. By placing a bid, the bidder acknowledges that he or she is aware of any restriction in their country or place of residence and takes responsibility for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment or afford them the capacity to void their purchase or payment. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or failure to mark lots containing protected or regulated species. For further assistance, please contact client services at 1-800-872-6467.
36. B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.
36. C. Auctioneer shall not be liable for any loss caused by or resulting from:
- Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
 - Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles.
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

Cataloging, Warranties, and Disclaimers:

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

Release:

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person.

Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

Dispute Resolution and Arbitration Provision:

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administered by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

Miscellaneous:

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

State Notices:

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to: the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature® Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. **AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY.** Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet **THREE (3) DAY RETURN POLICY:** Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcgsc.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency and PMG may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 10470, Peoria, IL 61612-0470. Third-party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the noncertified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions, call the Credit department at 877-HERITAGE (437-4824) or email: CreditDept@HA.com.

Notice as to an Auction in New York City:

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21, which states: The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

HERITAGE WEEK | HONG KONG

December 3-10, 2018

Heritage Week | Hong Kong features special previews, collections and auctions. This inaugural event begins with our industry-leading World Coins preview and continues with events from our Luxury Lifestyle categories, including Fine Jewelry, Luxury Accessories, Rare Timepieces and Wine.

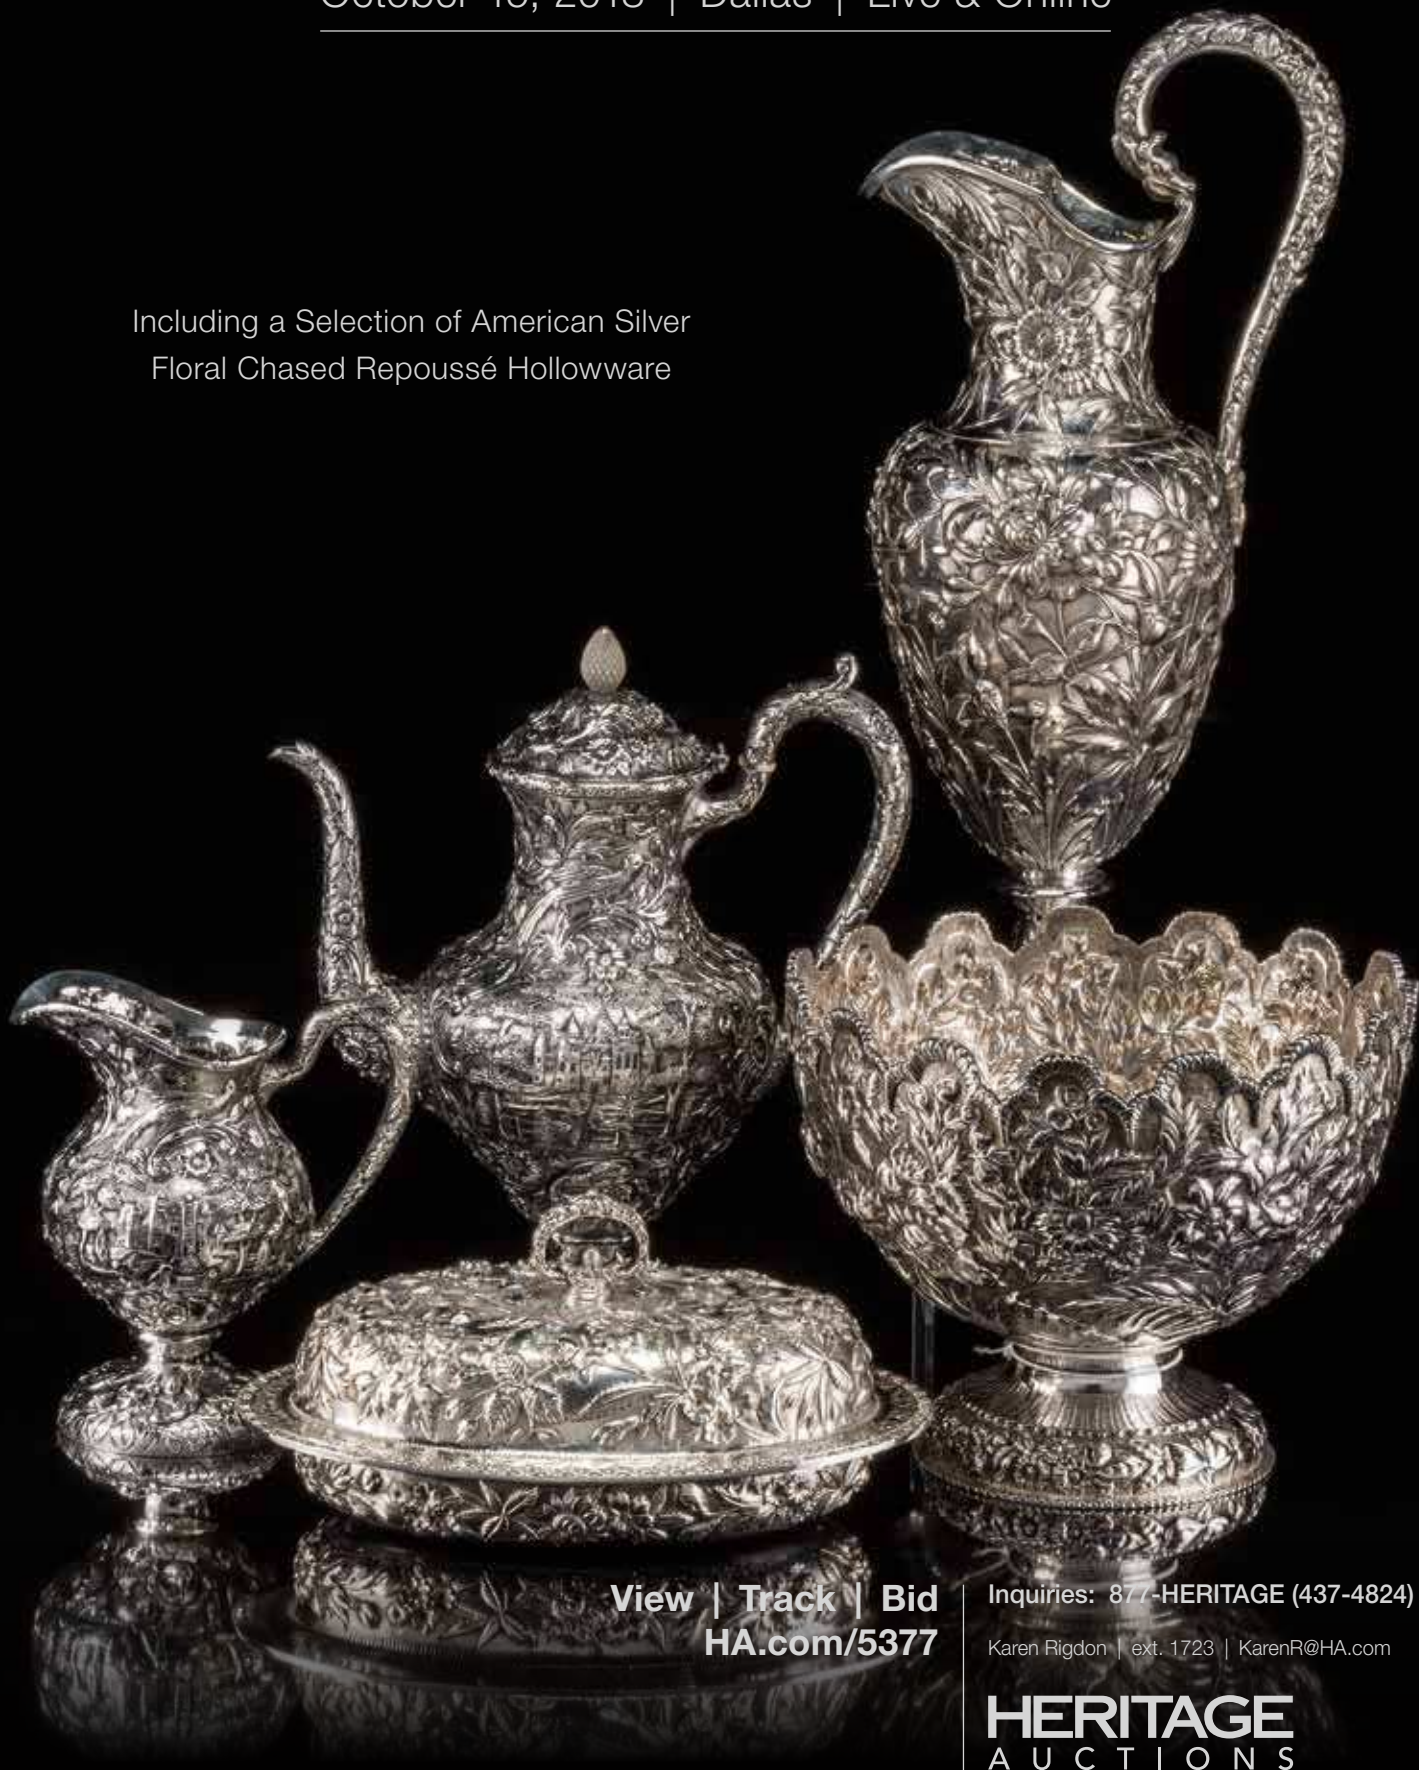

Visit HA.com/HeritageWeek for a schedule of events and more details.
